PREFACE

This Reader is intended to serve as an introduction to the language and literature of the period concisely called Middle English, that is the centuries between 1100 and 1500. It consists of a Grammatical Introduction based on lectures to students beginning the study of Middle English; selections arranged on the basis of the great dialectal divisions of the language during the period, and accompanied by explanatory Notes; a Glossary which, in addition to the necessary general information of a lexicon, accounts for the forms of words on the basis of dialectal differences in Old and Middle English.

The arrangement of the book on the basis of a single dialect has seemed to be justified by the writer's experience with students during the last ten years. Whatever book has been used, the student has been first introduced to those selections best illustrating the chronological development of a single dialect, as the Midland, and only then to each of the others, with direct relation always to the one already mastered. This has not failed to insure a fairly accurate knowledge of the main features of each division of the language, rather than a confused conception of linguistic forms such as often results from reading selections without regard to dialectal differences. This method, it will be seen, is but following the best practice in reading Old English, or Anglo-Saxon. Indeed, the great advance in the latter study may be dated from the time when a grammar was prepared on the basis of texts representing a single dialect, West Saxon, in its purity, rather than a mixture of dialectal forms such as much Old English literature presents. The plan of Old English study, therefore, as well as experience in teaching, seems to justify some such arrangement as the present. The emphasis of the Midland dialect is owing to its fundamental importance in linguistic and literary history. Since Midland became the language of the most important literature as early as the middle of the fourteenth century, and the foundation of the standard language of modern times, it is that dialect which is most important to the student of both language and literature for at least six centuries. Besides, the apparent continuity of Southern

English in its relation to West Saxon is apparent rather than real in any important sense. So thoroughly is the continuity broken by important phonetic and orthographic changes, wide-spread leveling of inflexions, and considerable differences in syntax, that it affords no decided advantage over Midland, even to the student fresh from Old English study. In any case the change to Midland must be made not later than the middle of the fourteenth century, and the student must then be led back to the beginnings of Midland English, in order fully to understand the language of Chaucer and those who follow him. There seems, therefore, no special advantage in emphasizing the Southern dialect as the descendant of West Saxon, though this may be done even with the present book if desired.

It is believed that a sufficient number of texts have been given, to represent adequately for the beginner each great dialectal division of the language. Kentish has been given least space, and is not separated from the rest of Southern English. This is owing partly to the limitations of an introductory book, partly to the relatively unimportant place of that dialect in both Old and Middle English. The Kentish selections chosen could be easily grouped together, however, and special emphasis of Kentish peculiarities will be found in the Notes upon them. On the other hand, the dialect of London is especially represented in order to illustrate the change from Southern to Midland, so important in relation not only to the language of Chaucer but also to Modern English. Owing, also, to necessary limitations of a single handbook texts from writers of the fifteenth century have not been used. To that century little introduction is necessary apart from such study of the earlier period as this book will permit.

As to the selections themselves, the purpose has been to present texts representing the dialects in their purity, together with as much of interest as is compatible with the first and most important consideration. Comparison with such lists as those by Morsbach, 'Mittelenglische Grammatik,' pp. 7–11, will show how fully this has been done. In fact, except for two or three selections from poetical romances, chosen on the score of interest along with a fair degree of purity, all texts may be relied upon as typical of the time and region to which they belong. When possible, texts or selections not found in other books have been used, so as to furnish a greater variety within the reach of student and teacher. In all cases the selections are of sufficient length to afford a fairly com-

prehensive view of the author or period. Partly because they would not be typical, partly owing to mixture of dialectal forms, some short pieces which might have been included on the score of interest have been omitted.

For each selection, the best manuscript from the standpoint of linguistic purity has always been followed. This is now more easily possible owing to the great number of well-edited texts accessible in printed form, but the manuscripts themselves have been examined when necessary to secure linguistic purity. It has not been thought necessary, however, to burden the pages of an introductory book with readings from less important texts, though references to these sometimes occur in the Notes. Finally, the selections chosen have been reproduced in their integrity in all essential particulars. Yet this does not mean that a mediæval punctuation has been preserved, or an irregular and meaningless use of capitals. To retain these, as has sometimes been done in beginners' books, is but to confuse the student without any measurable advantage. The footnotes give references to abbreviations expanded with regard to the forms of the particular dialect, and to manuscript readings not given in the text. These are usually errors of a careless scribe, or readings in which emendation seemed necessary. Regularization of orthography has not been attempted in general, but in the Midland selections, as those which will usually be first read, some slight assistance of this sort has been offered the beginner. All such forms, however, have been indicated in footnotes, so that they cannot mislead if they do not assist.

The Notes on each selection give such information as is known regarding the manuscript, its date, author, place of composition, and some account of the work from which the extract is made. This is followed by explanations of points in grammar, history, life of the times, and similar subjects when necessary. In all cases, use is made of critical articles in the various scholarly journals, and references are given to assist the student in independent examination when desirable.

The Glossary has been prepared on the basis of the Midland dialect, from which the greater number of selections have been made, but with inclusion in alphabetical order of all words not found in the Midland selections, and cross-references when necessary to the forms of other dialects. In the matter of cross-references, as in arrangement within the alphabet, the needs of the

beginner have always been regarded as the most important in an introductory book. Thus the strictest alphabetic arrangement has been chosen in all cases. The ligature *æ*, though a simple sound rather than a diphthong at any time, has been placed after *ad* because the beginner will more easily find it there. He may then easily learn its real value, as he must in most other cases in which alphabetic arrangement gives no certain clue.

A word as to the Grammatical Introduction may not be out of place. In the incomplete state of the exhaustive treatment of Middle English grammar proposed by Morsbach, it would be impossible to expect so accurate a summary as may in future be written. The task was simpler, however, than it might seem. It was to present in systematic order the main grammatical facts of the Midland dialect, with such notes as would make possible an intelligent reading of the literature in the remaining divisions of the language. It need not be said that the writer is grateful, as all must be, for the part of Morsbach's grammar which has appeared. He has also made use of most special studies of the period, or of particular works, so far as they were important for the book in hand. But the arrangement of material is based upon the writer's presentation of the subject to students for some years.

The book is intended for those who have had some introduction to the study of Old English. This will be seen from the numerous references to Old English grammar, and to grammatical forms of the older period. It is needless to say that no minutely careful study of Middle English is possible without a fundamental knowledge of the earlier period. On the other hand, a reading knowledge of Middle English literature is easily possible with even a moderate attention to grammatical relationships, and it is hoped that the book may be of use to those who have not begun with the more fundamental study of earlier English.

It is impossible here to give credit to all books and monographs used in the preparation of the Reader. Mention in Introduction or Notes of articles and commentators is intended to imply grateful acknowledgement of indebtedness. Failure to mention others does not imply that the writer has not used them so far as seemed wise. Certainly it has been his purpose to weigh and consider practically all of the literature of the subject up to the time of going to press.

GRAMMATICAL INTRODUCTION

THE LANGUAGE AND THE DIALECTS

1. By Middle English is meant that form of the language used in England between the years 1100 and 1500, that is English of the twelfth, thirteenth, fourteenth, and fifteenth centuries. At the first date, the language shows such considerable differences from Old English (Anglo-Saxon) as to warrant a new name. By the last date, all essential elements of Modern English had come into existence.

2. Middle English is not so homogeneous in form during the whole period as the Old English of literature (mainly West Saxon) on the one side, or as Modern English on the other. It is most homogeneous for the Midland dialect, with which this introduction especially deals, between 1200 and 1400, or normal Middle English as it will be considered. From 1100 to 1200, known as early Middle English, the language shows less of regularity, owing to more rapid changes from Old English, and to the gradual absorption of new elements in the vocabulary, as of Danish and French words. Besides, the scribes of this period were largely influenced by the traditional orthography and grammar of the language, so that literature of this time was largely a copy, with slight variations, of that properly belonging before 1100. From 1400 to 1500, late Middle English, the language was more rapidly approaching its modern form. This introduction, therefore, deals with Middle English proper, with notes on early and late forms, and on the different dialects.

Note 1.—Scholars differ somewhat as to the divisions of the ME. period. Sweet, 'History of English Sounds,' p. 154, makes the periods 1050 to 1150, 1150 to 1450, 1450 to 1500; Morsbach, 'Mittelenglische Grammatik,' p. 11,

gives the dates 1100 to 1250, 1250 to 1400, 1400 to 1500. As changes in language are always gradual, exclusive divisions are naturally impossible. Besides, chronological divisions must differ somewhat when different dialects are taken as the basis, the language of the South being much more conservative than that of the Midland or the North. For the South, the date 1250 is none too late to close the first period, and early Southern, in notes on the dialects, will include the years 1100 to 1250. For the other districts the date 1200 is late enough for all practical purposes, so that early Midland and early Northern will comprise the twelfth century, 1100 to 1200.

3. Some characteristics of Middle English, as compared with Old English, may be briefly summarized. Middle English phonology shows a reduction to simple sounds of all OE. diphthongs, and the formation of new diphthongs; widely-spread changes in quantity of both long and short vowels; and the loss of the consonant *h* in OE. initial combinations *hl*, *hn*, and *hr*. The vocabulary shows large additions of foreign words, especially Danish and French. The inflexions show a far-reaching leveling, and later a loss of older inflexional endings. Finally, the syntax is characterized by a marked tendency to a fixed order of words, and by larger use of connective words to perform the functions of the lost inflexions, as prepositions to join nouns and pronouns to other elements, and of verbal auxiliaries to effect unions of verbal elements.

4. Middle English embraces the great dialect divisions, Southern, Midland, and Northern, corresponding in general to Southern, Mercian, and Northumbrian of the OE. period. Northern, however, extended beyond the region of the older Northumbrian to the Lowlands of Scotland on the north, to the north half of Lancashire on the west, and probably to parts of Nottinghamshire and Lincolnshire on the south. Southern included, as in Old English, Kent and the region south and west of the Thames, with Gloucestershire and parts of Hereford and Worcestershire. Midland embraces the region between Northern and Southern from Wales to the North Sea. Southern and Midland are again divided into east and west divisions. The eastern division of Southern

includes Kent and a small part of the old West Saxon district; the western division all the remainder of Southern as already described. West Midland is bounded by Wales on the west, and the Danelaw on the east. East Midland includes the larger part of the older Mercia, together with East Anglia, Essex, and Middlesex. As the East Midland district contained the city of London, the center of national life from the middle of the twelfth century, the language of this division assumed the greatest importance in the history of English, and became the basis of the modern language of standard speech and of literature. For this reason, selections from East Midland are placed first in this book, and upon it this introduction is based. Unless otherwise stated, therefore, Middle English, as used in this book, will mean the Midland (mainly East Midland) dialect.

NOTE 1.—West Midland, in its purer examples, differs so slightly from East Midland, and is so scantily represented by texts uninfluenced by Southern on one side or Northern on the other, that it has been but sparingly represented.

NOTE 2.—The language of London, the seat of government after the beginning of Henry the Second's reign (1154), was largely Southern during the earlier part of the ME. period, as shown by the proclamation of Henry III in 1258 (see p. 226). It gradually lost its Southern character however, until, toward the end of the fourteenth century, it was essentially Midland. The importance of London English, in relation to the development of the literary language, has suggested devoting to it several special selections.

5. The differences between the different dialects will be best understood by a study of phonology and of inflexions in the following pages. Some of the more characteristic differences may be given here, especially of Midland with which we have most to do. Midland English, like Northern, is based on Old Anglian, and shows forms due to OAng. phonology and inflexion as compared with West Saxon. See Sievers, 'Angelsächsische Grammatik'[1] (Sievers-Cook, 'Grammar of Old English'), §§ 150–168, and notes under inflexions, as well as notes under § 16 f. of this Introduction. The most marked phonological differences between Old Anglian

[1] All references are to the third edition, and translation of same.

and West Saxon are the lengthening of OA. *a* before *ld*, the retention of Teutonic *ē* as a close sound (WS. *ēo*); the monophthonging of Teutonic *au*, *eu* (WS. *ēa*, *ēo*) to *ē* before *c*, *h*, *g*; and the appearance of *æ* for WS. *īe* and *e* for WS. *ie*, the mutation of *ēa*, *ea*. Owing to these OAng. peculiarities, Midland English has *ǭ* for OAng. *ā* before *ld*, as for OE. *ā* in other situations, together with a far greater number of close *ē* sounds than Southern. Otherwise the clearest idea of Midland English may be gained by a clear separation from it of Northern and Southern dialects. Phonologically, Northern is distinguished by retention of OE. *ā* (OAng. *ā* before *ld* also) as *ā*; by the guttural quality of *k*, *g* sounds; by the use of *qu(w)* for OE. *hw*, when beginning a word or syllable; and by *s* for OE. *sc* in unstressed words and syllables, as *sal* 'shall,' *Inglis* 'English.' Southern is clearly marked by the retention of the quality of OE. *y* sounds (< *ŭ*, less commonly lWS. *ĭe*, *y̆*), representing them by *u* (*ui*) under the influence of OF. orthography; and by the tendency of OE. initial *f*, *s*, *hw*, *þ*, to become *v*, *z*, *w*, voiced *þ*, though the latter is not indicated in writing. The last consonantal changes, especially of *f*, *s* to *v*, *z*, are more fully represented in Kentish than in southwest Southern. Otherwise Kentish is distinguished by the use of *ĕ* for OE. *y̆*, as in Old Kentish.

6. As to inflexion, by the last of the thirteenth century Northern had reduced almost all nouns to a single inflexional form, based on OE. strong masculines, and had completely leveled most inflexions of adjectives and adjective pronouns. The two preterit stems of OE. strong verbs had commonly been reduced to one, usually the singular. The OE. prefix *ge*, whether of past participles or other parts of verbs, had been wholly lost. Final unstressed *e* was no longer pronounced after the middle of the fourteenth century. On the other hand, Southern is distinguished by retaining the weak *en* plurals of nouns, and even by extending that ending in some cases; also by the retention of a larger number of inflexional forms of adjectives and adjective pronouns, and of *īe(n)*, *īe*, *īeð* in

infinitive and present tense of OE. weak verbs of the second class; by the preservation of final unstressed *e*, in general, through the fourteenth century. In these particulars the Midland dialect agrees more commonly with Northern than with Southern, though southeast Midland agrees with Southern in many cases. The most distinctive mark of inflexion in the three dialects is that of the present indicative of verbs, the inflexional endings of which are as follows:—

Nth. Sg. 1. (*e*) or *es*: 2. *es*: 3. *es*.	Pl. 1, 2, 3, *es*, or *e*[1].
Ml. 1. *e*: 2. *est*: 3. *eþ*(*th*):	„ *en*, later *e*.
Sth. 1. *e*, (*īe*)[2]: 2. (*e*)*st*: 3. (*e*)*þ*(*th*)	„ *eþ*, (*īeþ*)[2], *eth*(*īeth*)[2].

In addition, Northern is also peculiar in the use of the ending *and*(*e*) in the present participle, the usual loss of personal endings in the weak preterit, and the reduction of the two preterit stems in strong verbs to one, generally the singular. Midland and Southern agree in general in retaining the personal endings of weak preterits, and both preterit stems of strong verbs, while in the present participle Midland uses the ending *end*(*e*), later *inge*, seldom *and*(*e*), and Southern *inde*, later *inge*, seldom *ende*.

NOTE.—For a fuller statement of dialectal differences, see Morsbach, 'Mittelenglische Grammatik,' pp. 11–14; Kaluza, 'Historische Grammatik der englischen Sprache,' § 17, 204. Naturally not all works written in Middle English are equally valuable for the study of the language. Especially popular works, which were frequently copied, show a mixture in orthography as well as in dialect, owing to changes by different scribes. The purest texts are of course necessary to an understanding of the language as it actually existed, and from these most of the selections for this book have been made. For fuller lists of pure texts representing the different dialects, see Morsbach, as above, pp. 4–11, and Sweet, 'History of English Sounds,' pp. 154–6.

ORTHOGRAPHY AND PRONUNCIATION

7. Middle English orthography is based on older English spelling, but shows marked influence of French orthography. The union of the two systems produced many apparent irregularities, some of the most important of which are as follows:

Vowels: The OE. digraph *æ*, when representing a long sound, was displaced by *e*, as in *hwēte* 'wheat.' The short OE. *æ* had already become *a*, pronounced as in *artistic*.

au interchanged with *a* before a nasal in closed syllables of French words, sometimes in those of English origin, as *aunswere* beside *answere*.

ie (*ye*) was used for long close *e* in late Middle English, as in *lief* 'dear,' *belief*, more naturally in French words as *mischief*.

o took the place of short *u* in proximity to *n*, *m*, *u* (*v*), *w*, to prevent confusion of manuscript forms, sometimes also in other places. Examples are *wonede* 'dwelt,' *icomen* 'come,' *wode* 'wood'; also late ME. *bote* 'but,' *corāge* 'courage,' where the use of *u* might have suggested the long sound.

ou (*ow*) for *ū*, sometimes *u*, as in *hōūs* 'house,' *cōūþe* 'known,' *cōw* for long *ū*, and *sorou*(*w*) 'sorrow' for short *u*.

v for *u*, especially in initial position, as *vnder* 'under.'

y and *i* are used interchangeably for OE. *i* or *y*, long or short. Especially before *n*, *m*, *u* (*v*), *w*, *y* commonly takes the place of *i* in late Middle English, to prevent confusion, as in the case of *o* for *u* above. It also takes the place of *i* in the diphthongs *ai*, *ei*, *oi*, *ui*, especially when final in syllable or word.

Consonants: There were even more variations from OE. usage in the case of consonants. In the first place, the OE. forms of *f*, *r*, *s*, *w*, now seldom preserved in printing OE. texts, gave way to French forms of those letters which are nearer to those used to-day. Besides,

c is used in early Middle English for *ts*, as in *blecen* for *bletsen* 'bless'; see also *tz*, *z*, for the same. Later *c* (*sc*) and *ce* were used for voiceless *s*, *ss*, as *alce* 'also,' *lescūn* 'lesson,' *fāce*.

ch is used for OE. palatal *c*, as well as for *ch* in French words; examples, *chirche* 'church,' *chāse*. When doubled, *cch* (*chch*) are written, as in *wicche* (*wychche*) 'witch.'

ct, *cht*, are sometimes written for *ȝt* (*ht*), as in *mycht* 'might.'

ff for capital *f* occurs in late Middle English.

g (the French form, our modern *g*) took the place of the guttural stop, as in *gold*, and *gg* (*g*) the place of OE. *cg*, as in *brigge* 'bridge.' *g* also occurred sometimes for French soft *g* (=*j*), as in *jugen* 'judge.'

ȝ (the English form of *g*) was used for the palatal spirant *g* (*gh*), as in *miȝt*

'might'; for OE. *g* (=*y*) initially, as in *ȝē* 'ye'; and sometimes in late Middle English for voiced *s*, as *sīdeȝ* 'sides,' by confusion with *z*.

gh (*ȝh*) for spirant *g* (*h*) in later Middle English, as in *might*, *miȝht* 'might'; the combination with *t* was also sometimes written *gth*, *ȝth*, as in *knigth* 'knight.'

gu occurs in late Middle English for the guttural stop of French words, as *guard*, and sometimes in English words before a palatal vowel, as *guest*, *guilt*, to avoid confusion with *g* (=*j*), as in *gest* 'jest.'

i (consonantal) was occasionally used for initial *ȝ* (=*y*), as in *iaf* 'gave'; also for *j*, as *ioy* 'joy.'

j initially in French words, as *jugen* 'judge,' in later Middle English.

k came to be used for *c* before *e*, *i*, and *n*, sometimes before *a*, *o*, *u*, the former because *c* before *e*, *i*, in French words was *s* in sound; examples are *kēpen* 'keep,' *king*, *kāre* 'care,' *kniȝt* 'knight.'

qu for OE. *cw*, as in *quēn* 'queen,' as well as for French *qu* (=*kw*), as in *quīte*; it was also occasionally used for *hw*, as in *quilk* 'which.'

sch, *sh*, *ss* for OE. *sc*, as in *schal*, *shal*, *ssal* 'shall.'

st for *ht* sometimes, as *nist* 'night.'

th displaces *þ*, which had itself displaced *ð* almost entirely in early Middle English. But *þ* occasionally remained to modern times, especially in the forms *yē* (=*thē*), *yt* (=*that*), where *y* represents *þ* with an open top.

tz occasionally for *ts*, as in *bletzen* 'bless.'

u (consonantal), later *v*, for voiced *f*, as in *heuen*, *heven*, OE. *heofon* 'heaven.'

w was used in later Middle English for *u*, in *ou*, especially when final in word or syllable, as *cōw̄*, earlier *cū*, *cōū* 'cow.' *w* also rarely occurs for *v*.

y (consonantal) in later Middle English for earlier *ȝ* (=*y*); also for *þ* (*th*), through confusion with *þ* with open top, as already noted.

z occasionally for *ts*, as in *vestimenz* 'vestments'; rarely also for voiced *s*, as in *wēzele* 'weasel,' though common in Kentish.

NOTE 1.—In early Midland the older orthography prevails, as *æ* beside *a* and *e*, and the rune for *w*, as by Orm. A large number of the peculiarities already noted are also found. The most important orthography of the period is that of Orm, who indicated pronunciation with minute care, especially by the doubling of consonants, the relations of which will be discussed under 'Changes in Quantity.' Minuteness in other respects may be indicated from his use of separate signs for the stop *g*, as in *God*, the spirant as in ME. *ȝif* 'if,' and the MnE. *g* as in *singe*.

NOTE 2.—Nth. shows few distinctive peculiarities. Especially to be noted are the indication of length in the vowels *a*, *e*, *o*, by adding *i*(*y*) in late Nth. Thus *ai* (*ay*), *ei* (*ey*), *oi* (*oy*) correspond to ME. *ā*, *ē*, *ō*. Besides, *cht* and *ght* are used for the palatal spirant, as in *mycht* 'might'; *gh* for the palatal spirant

in other situations, as *high*, *hight* 'promised'; *qu* regularly for OE. *hw*, as *quā* 'who,' *quīte* 'white.' Sth. shows the following peculiarities: *e*, in early Sth., for OE. *æ*; *ie* (*ye*) for long close *ē*, especially in Kentish; *oa* (*ao*) for long open *ǭ*, in early Sth.; *u* for OE *y* long and short, sometimes *ui* (*uy*) for OE. *ȳ*; *ue*, *u*, *oe* (*o*) for OE. *ēo*, less commonly for OE. *ē*, and occasionally for OE. *eo* (*e*); the same usage is also often found in West Midland; *sch*, *sh*, and *ss* were all used for *sh*, OE. *sc*.

8. Accents were sometimes used in early Middle English to indicate long quantity, or occasionally for emphasis. In a later time they were also sometimes employed to indicate that a final *e* or *y* was not silent, as in *plenté*. The breve (◡) was also sparingly used to indicate short quantity. The common means of indicating long quantity, however, whether of vowels or consonants, was by doubling the letter, as *good*, OE. *gōd* 'good,' *wicche* 'witch.' The doubling of vowels when long was increasingly common in later Middle English, and accounts for double vowels in many modern words. Cf. also the indication of long vowels by digraphs, as in the table under § 7.

9. Abbreviations are not uncommon in Middle English texts. Some of the most frequent are a macron over a vowel for following *n* or *m*, as *cō* for *com*, *hī* for *him*, *þīg* for *þing*; a curl above a letter, sometimes through the stem of it, for *er*, *re*, *ur*; a small undotted *i* above the line for *ri*; a roughly written *a* for *ra*. Certain common words were often abbreviated, as ꝛ, later ⁊ for *and*; *þt*, later *yt*, *þ*, *ð* for *that* (*thet*); *qd* for *quod* 'quoth'; *wt* for *wiþ*, *with*; *k̄* for *king*; *b̄* for *bishop*; *s'* for *sanct*, *sant*, *saint*; *ihc*, *ihu* for *Jēsus*, *Jēsu*. As such abbreviations admit of no misinterpretation, they are regularly expanded in all the texts of this book with no further notice than a single reference to the earliest. Even this has not been thought necessary except in case of abbreviations for words, as *and*, *that*, *king*, &c.

10. The following table shows the approximate pronunciation of the vowels and diphthongs of Middle English. The order chosen is that which represents essential relations of the sounds, as of pitch and physiological formation, rather than the merely conventional

order of the alphabet. It will thus be possible to see at a glance the sounds which are closely related in fundamental characteristics and may therefore most easily interchange.

THE VOWELS

SHORT	LONG
i, as in h*i*t.	ī, as in mach*i*ne.
e, as in m*e*n.	ē (close), as in th*ey*, but without vanish.
	ę̄ (open), as in th*e*re, c*a*re.
a, as in *a*rtistic.	ā, as in *a*rt, f*a*ther.
o, as in n*o*t (not Italian a).	ǭ (open), as in l*o*rd.
	ō (close), as in n*o*, but without vanish.
u, as in f*u*ll[1].	ū (*ou*), as in f*oo*l.

THE DIPHTHONGS

iu (iw), as *i* + *u*, or *ew* in f*ew*.
ei (ey), as *e* + *i* sounded together.
eu (ew), as *e* + *u*, later as *ew* in f*ew*.
ai (ay), as in *ai*sle, more nearly as *a* of m*a*n + *i*.
au (aw), as *ou* in h*ou*se, *ow* in c*ow*.
oi (oy), as in j*oy*.
ǫu (ow), as *o* in l*o*rd + *u*.
ou (ow), as *o* in n*o* + *u*.
ui (uy), rare, as *u* + *i*.

[1] The question of how far the quality of OF. *ü* in *plus* was actually adopted in the speech of the Midland and Northern districts, and how long it retained its purity, cannot be positively settled. It is agreed, however, that toward the end of the period this sound had fallen in with OE. short *u* or had become *iu*. From the small number of words with this OF. sound, and from their necessarily gradual adoption, it seems more than doubtful whether the pure French pronunciation ever existed on Midland (Nth.) soil, except as spoken by those who knew French. The exact quality of the vowel is naturally most important in rime, and the lack of significance of it for our purposes may be indicated by the fact that there is in this book but one rime, twice repeated, with this vowel. This is the rime, *Jēsu* : *vertu* (97, 17–18; 99, 3–4). For practical purposes, therefore, we shall disregard the French quality of this vowel and consider that from the first it had fallen in with OE. *u* and the ME. diphthong *eu* (*iu*). Cf. Behrens, 'Franz. Sprache in England,' p. 118; Luick, 'Anglia,' xiv. 287.

11. Theoretically there are two sets of the diphthongs *ei*, *eu*, *ǫu* and *ou*, those with the first elements long or short, according as they developed from long or short vowels or diphthongs in Old English. Indeed, Orm distinguished them in his orthography (see § 71, n.), but otherwise they are not distinguished in written forms and can be separated only by a knowledge of their development from older English. As their later development also shows no separation, the distinction of long and short diphthongs in Middle English may be disregarded for all practical purposes. Besides, the distinction between *ǫu* and *ou*, *iu* and *eu*, was not long preserved, and that between *ei* and *ai*, which had begun to be confused in Chaucer's English, as shown by his rimes, was lost in late Middle English. A new *ou* before *ȝt* (*ht*, *ght*), as in *ouȝt* (*ought*), developed during the period, but, as it often interchanges with *o* and has had a separate development from either of the *ou* diphthongs (compare English *ought*, *brought* with *know*, *grow*, *bow* in *rainbow*), it need not be pronounced diphthongic. The combination *ui* was never sufficiently common to merit consideration beside the other diphthongs. By a slight conventionalization for practical purposes, these nine diphthongs may thus be reduced to five at most. Those who wish to make more minute distinctions have but to refer to the historical basis of the sounds.

NOTE 1.—Early Midland English shows some considerable retention of OE. pronunciation, as of OE. orthography. Owing to many peculiarities of orthography, however, most words must be analysed in relation to their earlier and later forms in order to be sure of their pronunciation. See, for example, the passages from the *Chronicle* and notes thereon.

NOTE 2.—Nth. has no differences in pronunciation not sufficiently indicated by the spelling, as the retention of OE. *ā* as *ā*. Sth. has, in addition to the above, the sounds *e*, from OE. *æ*, as *a* in *man*; *ü*, from OE. *y*, with the older mutated sound, as in French *plus*; and *ǖ* (*ui*, *uy*), from OE. *ȳ*, as in French *lune*.

12. The consonants are in general pronounced like those of Modern English, except as already explained under orthography. In addition, doubled consonants are to be pronounced long, as in

sunne 'sun,' which differs from *sune* 'son'; *ch* was pronounced *tsh*, as in *church* to-day, whether in English or French words; *h* has the sound of German *ch* in *ich, auch*, except initially. For other notes see the Phonology under each consonant.

13. As to word-stress or accent, we must distinguish between Teutonic words, that is those from Old English and Norse, with a few from Low German, and the ever increasing number from French. The former, which make the basis of the speech, were in general accented as in Old English—simple words on the first syllable, compound words on the first syllable if nouns, adjectives, or words derived from them, on the root syllable if verbs, or adverbs formed from prepositional phrases. Even in Old English, however, the prefixes *ge, for*, usually *be*, and sometimes *un, al*, and the borrowed *earce* 'arch,' were unstressed in nouns and adjectives. In addition, during Middle English times, the prefixes *un, al*, and usually *mis*, lost accent in nouns and adjectives, except in *almost, mishappe* 'mishap,' which have retained prefix stress to the present time. There was also a shifting of accent to the second element of some nouns, as at present in *man·kind*[1], *Nor·thumbrian*, a stress which was occasional in Old English, as shown by *Norþ·hymbron*, 'Battle of Maldon' 266. A similar shifting of stress affected adjectives when in predicate rather than attributive position, as today in *thirteen*; compare 'he's *thir·teen*' with 'a *·thirteen* year old boy.' In all such cases the stress can be certainly known only from verse, where the metre will sufficiently indicate the position of the accent.

14. New compounds in Middle English also followed the general law of stress, as in *·dōmesdai, ·sometīme, whōsǭ, tōfǭre, wiþ·ūten*. Sometimes the root, sometimes the prefix syllable was stressed in new compound adverbs, as *þērfǭre, þērof, intō, intil, upon*. Secondary stress, which was strong in Old English upon the second elements of compounds, was still so in Middle English. It is especially

[1] A turned period indicates stress on the syllable before which it is placed.

important for ME. metre, since this strong secondary stress was often elevated to a principal position in the line of verse. This is particularly true of certain syllables, wholly unstressed at present when next the principal accent, as *ande* (*ende*) *inge*, *ēre*, *nesse*, *schipe*, *līke* (*lȳ*, *līche*), *hood*, *dōm*, *ish*, *ȳ*.

15. Borrowed words of French origin vary in stress during the period, as they at first retain their original stress on the final syllable (except weak *e*) or tend to assume the Teutonic stress. Thus *rēsōun* 'reason' is variously accented, *rē'sōun* or *'rēsōun*, in Chaucer's verse. The following general principles may be set down. Old French nouns and adjectives tend to assume the Teutonic stress on the first syllable. Disyllables, or trisyllables with final weak *e*, when acquiring stress on the first syllable retain a strong secondary stress, corresponding to the original principal accent. Examples are *pītèe*, *prīsoun*, *mánère*. Trisyllables, or polysyllables with weak *e*, which originally had secondary stress on some antecedent syllable, shift principal and secondary stress respectively. This brings principal stress on the first syllable, as in *chárītè*, *émperōur*, *páradīs*, or sometimes on the second as *povértè*, *victórīe*, *relígiūn*, *condíciūn*. In the latter cases a second shift of the principal stress may take place, as in *víctorīe*, *póvertè*. On the other hand, many nouns and adjectives, especially prefix compounds, never acquired stress on the initial syllable, as *acc'ount*, *aff'air*, *att'empt*, *con'diciōun*. This may have been due to the fact that there was no secondary stress on the prefix in Old French, more often to the influence of the corresponding verb. Disyllabic OF. verbs, accented on the first syllable, fell in with uncompounded English verbs and suffered no change of stress, as *'preie*(*n*), *'suffre*(*n*). Polysyllabic verbs fell in with native compounds in retaining stress on the last syllable (except weak *e*(*n*)), as *esc'āpe*(*n*), *ass'aile*(*n*), or shift to a preceding secondary stress as *'punishe*(*n*), *dim'inishe*(*n*), *condíciōne*(*n*). A further shift to prefix, perhaps under the influence of the corresponding noun, may take place, as in *cónf'orte*(*n*). The best guide to stress in Middle English is metre, but this, while

usually sufficient for itself, is no certain guide to the pronunciation of every word in prose.

NOTE 1.—Following the principles above, and sometimes no doubt under the influence of analogy, OF. verbs fall in with Sth. verbs ending in *īe(n)*, as *carȳe(n)*, *chastīe(n)*. In Midland and Nth. such OF. verbs in *ier* usually assume the common infinitive ending *e(n)*.

PHONOLOGY[1]

THE VOWELS OF STRESSED SYLLABLES

SHORT VOWELS

16. Middle English *a*, pronounced like Italian short *a* or unstressed *a* in *artistic*, is one of the commonest sounds, and occurs in English, Norse or Danish, and French words. It springs from:

1. OE. *a*, *ǫ* before a nasal except when lengthened, and *ā* when shortened: OE. *ā* as in *asschen* 'ashes'; OE. *ǫ* as in *man*, *began* (*bigan*); OE. *ā* as in *asken* (*axen*) 'ask,' *alderman*.
2. OE. *æ* (Merc. *e*=*æ*), and *ǣ* from Teut. *ai* by *i*-mutation, sometimes *ǣ* (Merc. *ē*, Gothic *ē*) by shortening: OE. *æ* as in *cat* (*kat*); OE. *ǣ* from Teut. *ai* as in *agasten* 'terrify,' *ladder*, *fat*; OE. *ǣ* (Merc. *ē*) as in *bladdre* 'bladder,' *naddre* (*addre*) 'adder,' *dradde* 'dreaded' (cf. § 33).
3. OE. *ea* (Merc. sometimes *a*) before *r* + consonant, and *ēa* by shortening: OE. *ea* as in *harpe* 'harp,' *sharpe* 'sharp'; OE. *ēa* as in *chapman* 'merchant,' *chaffare* 'merchandise.'
4. ON. *a*, *ǫ* by *u*-mutation of *a* (ODan. *a*), and *ā* when shortened:

[1] In the following descriptive chapters on Middle English sounds the borrowed elements are treated with the native, as their considerable importance warrants. Attention is first given to the Teutonic element, Old English and Old Norse or Danish, and then to that derived from Old French. Differences between Mercian, on which the Midland dialect is based, and West Saxon are also noted. The notes are intended to cover, in order, first, early Midland English, next the principal variations of the dialects.

ON. *a* as in *carl*, *want*, *stac* 'stack'; ON. *ǫ* as in *adlen* 'addle,' *bark* (of a tree); ON. *ā* as in *laten* 'let.'

5. OF. *a* as in *barge*, *Anne*, *cas* (later *cāse*) 'case.'

17. The principal sources of ME. *a* will be seen to be OE. *a*, *æ*, *ea*, and *ǫ* from *a* before a nasal, which all regularly become *a* in Midland English, as well as long OE. *ā*, *ǣ*, *ēa* when shortened. A large number of OF. words also belong here. Besides *a* from regular OE. *æ*, ME. *a* sometimes springs from OE. *æ* instead of *ę* by *i*-mutation of *a* (cf. Sievers, Gr. § 89). This usually appears in ME. in closed syllables before nasals, *ch* (*cch*), and *r*, as in *wanden* beside *wenden* 'wend,' *panis* (*pans*) beside *penis* (*pens*) 'pence,' *lacche* 'seize,' *macche* (less commonly *mecche*) 'match,' *barlȳ* (*barlic*, seldom *berlic*) 'barley.' As indicated, in most cases of this sort forms with *e* also appear; cf. § 19. OE. *ǫ* from *a* before a nasal, which was regularly lengthened before certain consonant groups (see § 72), sometimes appears as *a* by earlier shortening, especially in certain words as *land*, *hand*, *standen* 'stand,' *gangen* 'go,' *hangen* 'hang,' *answeren* 'answer.' West Midland, however, sometimes has *o* for *a* before nasals not causing lengthening, as in *mon* 'man,' but this was not common enough to be a distinguishing feature of the dialect. For OF. *a* before a nasal + cons., see § 56.

18. Certain forms with *a* corresponding to OM. *ē* (Goth. *ē*, WS. *ǣ*) require special mention. They occur before *r* in unstressed words, as *þar* beside *þēr* (Sth. *þę̄r*), *whar* beside *whēr* (Sth. *whę̄r*), *waren* beside *wēren* (Sth. *wę̄ren*) 'were.' Corresponding forms with long open *o* (*ǭ*), on the other hand, must have developed from eME. forms with *ā* existing beside the shortening here supposed. For these see § 43. Words with ME. *a* sometimes rime with *e* words, as if pronounced with *e*, at least dialectally. There would thus seem to be double forms of such words, as *was–wes*, *fast–fest*, *gadren–gedren* 'gather.' Rarely also *a* becomes *o*, as before *v* in *govel* 'tribute,' *hove* 'have,' and in *quoþ* (*quod*) 'quoth,' where it is probably due to lack of stress. Individual words which also show interchange of *a–e* are *masse–messe* (Nth. always *messe* by influence

of OF. *messe*) 'mass,' *gadeling–gedeling* less commonly, *tōgadre–tōgedre* (*tōgidre*). The word *Chester* (*-chester*) < OE. *ceaster* regularly has *e* in Ml., though *a* in Nth. *Doncaster*, &c. Forms with *e* are also common from shortening of OE. *ǣ* and Merc. *ē*, *ǣ*, as under §§ 8, 9 above.

NOTE 1.—In early Midland this sound was still represented by the older Mercian *æ* or *e*, as in *hæfden* (*hefden*) 'had,' *wæs* (*wes*) 'was,' *æfter* (*efter*) 'after.' The digraph *ea* is not found in the 'Chronicle' after 1132, but the Mercian variant *eo* once appears in *weorþ* for *wearþ*. Even before 1132, its interchange with OE. *æ* probably indicates that it was not diphthongic much after 1100. Orm never uses *ea*, and only exceptionally *æ* for short *a*.

NOTE 2.—Nth. agrees with Midland in almost every particular. Before a nasal, however, it has *a* for OE. *ǫ* (*ā* before consonant groups causing lengthening), except in *monȳ* beside *manȳ* 'many,' which is characteristically Northern. Sth., in the earliest period, generally shows *a* for OE. *a*, *e* (*æ*, *ea*) for OE. *æ*, *ea*, as for *ǣ*, *ēa* when shortened. Later all become *a*, as in Midland, except that Kentish, which had *e* for WS. *æ* in Old English, retains it regularly until late ME. times. For OE. *ea* Kentish uses, in the early period, *ia* (*ya*, *yea*). Minor variations are not noted here. For OE. *ǫ* from *a* before a nasal (except before consonant groups causing lengthening) Sth. has *a* in western Sth. and in Kentish, but often *o* in middle and southeast Sth. Before consonant groups causing lengthening, *ā* or *ǭ* are found in Kentish and southeast Sth. The London dialect has *a* with great regularity except before consonant groups causing lengthening, and even here in later ME. by shortening, as commonly in *land*, *England*, *hand*, *&c.*

19. Middle English *e*, an open sound like that in *men*, has the following origin.

1. OE. *e*, *ę* by *i*-mutation of *a*, *eo*, and *ē*, *ēo* by shortening: OE. *e* as in *west*, *helpen* 'help': OE. *ę* as in *men*, *bet*, *tellen* 'tell'; OE. *eo* as in *self*, *heven* 'heaven'; OE. *ē* as in *mette* (OE. *mētte*) 'met'; OE. *ēo* as in *fell* (OE. *fēol*) 'fell,' *derre* (OE. *dēorra*) 'dearer.'
2. OM. *e* (WS. *ie* by *i*-mutation of *eo*), *e* after a palatal consonant (WS. *ie*, later *y*), and when shortened *ē*, *ǣ* (Gothic *ē*, WS. *ǣ*, *ēa* after a palatal cons.), *ē* (WS. *īe* by *i*-mutation of *ēa*), and sometimes *ǣ* by *i*-mutation of Teut. *ai*: OM. *e* as in *wercen* (WS. *wiercan*) 'work'; OM. *e* as in *ȝelp* (WS. *ȝielp*)

'yelp,' *ȝeten* (WS. *ȝietan*) 'get'; OM. *ē*, *ǣ* as in *slepte* (WS. *slǣpte*) 'slept,' *shephērde* (WS. *scīephierde*) 'shepherd'; OM. *ē* as in *hersum* (WS. *hīersum*) 'obedient'; OE. *ǣ* as in *evere* 'ever,' *everȳ* (*everīch*, *everilk*), *enȳ* beside *anȳ*, *clensen* 'cleanse.'

3. ON. *e*, or *ę* by *i*-mutation of *a*: ON. *e* as in *þwert* 'thwart'; ON. *ę* as in *egg*, *eggen* 'egg or urge on,' *benk* 'bench.'

4. OF. *e* as in *dette* 'debt,' *serven* 'serve,' *defenden* 'defend.'

20. The principal sources of ME. *e*, in native words, are OE. *e*, *ę*, *eo* when remaining short, and OE. (Merc.) *ē*, *ēo* when shortened. Sporadically, *e* is found for OE. *i* and *y*, the former in open syllables and in connexion with labials, nasals, and liquids; the latter before liquids and nasals. Examples of the first are *smeten* 'smitten,' *resen* 'risen,' *clemben* 'climb,' *fenger* 'finger,' *wekked* 'wicked.' Such occasional rimes as *helle–stille*, *wille–telle*, *denne–wiþinne*, also point to the same fact. Sometimes this may be accounted for by confusion of forms, as in the verbs *springen* and *sprengen* 'cause to spring,' *swingen* and *swengen* 'cause to swing,' where the weak verbs with *e* have influenced the corresponding strong verbs with *i*. So perhaps *welcome* for *wilcome* by influence of *wel*; *þredde* for *þridde* 'third' by influence of *þree* 'three.' Unstressed position in the sentence may also account for some such *e*'s, as in *heder* for *hider* 'hither,' *here* for *hire* 'her.' Examples of *e* for *i* from OE. *y* are *ferst*, *cherche*, *dent*, *stent*, beside *first*, *chirche*, *dint*, *stint*. In a few OF. words, *e* springs from AN. *ē* (< OF. *ue*) by shortening in originally unstressed syllables, as *keveren* beside *coveren* 'cover,' *keverchēf* (*kerchēf*) 'kerchief.'

21. ME. *e* sometimes becomes *i* before dentals and palatals. Some cases which have been preserved to Modern English are *ridden* 'rid,' *rideles* 'riddle' with loss of final *s*, *hinge*, *lingren* 'linger,' *singen* 'singe,' *grinnen* 'grin,' *minglen* 'mingle.' In *þinken* 'think' (OE. *þencean*), found in Midland and Nth. from the thirteenth century, there is no doubt confusion with *þinken* 'seem' (OE. *þyncean*). Sth. keeps *penchen* (*þenken*), and Chaucer

separates the two except in preterit and past participle. Beside *e* sometimes appear forms with *o* or *u* from OE. *eo* after *w*, as in *sword*, *worþ*, *worþī* 'worthy,' *worþen* (*wurþen*) 'become.' So *swolwen* (*swolhen*) is from a form with OE. *e* after *w*. This change had no doubt begun in Old English as similar forms appear in that period; cf. § 26. For *e* to *i* in unstressed prefixes cf. § 83.

NOTE 1.—Early Midland show *æ* for *e*, less commonly *æo* for *eo*, as in *æten*, *bigæten* for *eten*, *bigeten*, and *æorl* for *eorl*, in the 'Chronicle.' The 'Chronicle' and Orm also have *eo* for OE. *eo* sometimes, as in *weorces* 'works,' *heom* 'them,' *weorþenn* 'worth, be,' *heoffne* 'heaven.'

NOTE 2.—The dialects in general agree with Midland. Early Sth. usually preserves *eo*, though sometimes it becomes *o* or *e*, and occasionally *u* as in *dupe* 'deep,' *mulk* 'milk.' Sth. also sometimes has *e* or WS. *ie* (later *y*) from *e* by influence of a preceding palatal consonant. In all cases Sth. *e* must be separated from Sth. *e* = *æ*, derived from OE. *æ*, *ea*, as already noted in § 18, n. 2. Kentish has *ie* (*ye*) for OE. *eo*, as in *ierþe* 'earth,' *lyerne* 'learn.' Kentish also retains OE *e* for *y*, so characteristic of this dialect in OE. times, thus increasing greatly the number of *e*'s in literature of this district.

22. Middle English *i*, with a sound like that of *i* in *hit*, is common in words from all sources. Its frequency is increased for Midland English because it corresponds not only to *i* in English and Danish words, but to older *y* by *i*-mutation of *u*, the latter having become *i* in sound. On this account also the vowel is represented by *i* or *y* at the pleasure of the writer. ME. *i* springs from:

1. OE. *i*, *y* by *i*-mutation of *u*, and when shortened *ī* and *ȳ*: OE. *i* as in *smiþ* 'smith,' *his*, *writen* 'written'; OE. *y* as in *king* (*kyng*), *synne* 'sin,' *kissen* 'kiss'; OE. *ī* as in *fiftēne* 'fifteen,' *wisdōm*; OE. *ȳ* as in *wisshen* 'wish,' *hydde* 'hid.'
2. OM. *i* (WS. *io*), and *e* (WS. *eo*) before *ht*: OM. *i* as in *rihten* 'make straight,' *brihte* 'bright,' *wiht* 'wight,' *milk*; OE., OM. *e* as in *riht* 'right,' *kniht* 'knight,' *liht* 'light, easy,' *fliht* 'flight.'
3. ON. *i*, *y* by *i*-mutation of *u*, and *ī* or *ȳ* when shortened: ON.

i as in *skill, skin, twinne* 'twin'; ON. *y* as in *flitten* 'flit,' *biggen* 'build,' *kindlen* 'kindle'; ON. *ȳ* as in *imis* 'variously.'

4. OF. *i* as in *simple, prince, delivren* 'deliver,' *citē* 'city.'

23. For *e* instead of *i*, from OE. *i, y*, see § 20. For forms with *u*, beside those with *y* by *i*-mutation of *u*, see § 28. One word, OE. *wīfman*, shows various forms, as *wimman, wimmen* by shortening, and by later change of *i* to *u* (written *o*) under the influence of preceding *w, womman, wommen*. Similar influence of *w* is seen in *woll*(*e*) 'will.' By Caxton's time, however, the forms of Modern English, with the sound of *u* in singular, *i* in plural, seem to have become established. OF. *ei, ui*, sometimes appear as *i* in unstressed syllables, as in *malisūn, werriōr* for original *ei*, and *angwys* 'anguish' for *ui* (§ 70).

NOTE 1.—The use of *i* for OE. *y* is found as early as 1121 in the 'Chronicle' and regularly later and in Orm. There is also early use of *y* for OE. *i*, showing conclusively the like character of the two sounds. Later, *y* is more generally used for OE. *ī, ȳ*.

NOTE 2.—Nth. agrees with Midland. Sth. shows *ü*, as in French *plus*, for OE. *y* by *i*-mutation of *u*, as already noted, § 5. Examples are *sünne* 'sin,' *fülde* 'filled,' *kün* 'kin,' *cüsse* 'kiss.' Sth. *ü* also appears for a late WS. *y* from *i, ie*, as in *wülle, wüten*, Ml. *wille, witen*, *ʒüt* for Ml. *ʒēt* (*ʒet*). Kentish, on the other hand, which had levelled OE. *y* by *i*-mutation of *u* under *e*, still preserves the latter, except before palatal *ht, ng*, and in *king*. This accounts for such forms as *melle* 'mill,' *cherche* 'church,' *lest* 'lust,' *dent* 'dint,' in that dialect. The dialect of London probably agreed with Sth. in the earliest time, but by the last quarter of the fourteenth century usually has *i* for OE. *y*, though sometimes an *e* which is probably Kentish in origin. Chaucer frequently uses this Kentish *e* beside Midland *i* in rimes, though mostly in closed syllables.

24. Middle English *o*, with the sound of *o* (not Italian *a*) in Modern English, occurs in words from all sources. It corresponds to:

1. OE. *o*, or *ō* when shortened: OE. *o* as in *folk, bodiȝ* (*bodȳ*) 'body,' *cok* 'cock,' *on*; OE. *ō* as in *softe* 'soft,' *oþer* 'other.'

2. ON. *o*, *ō* when shortened: ON. *o* as in *lot* 'bow of the head,' *loft* 'upper room,' *odde* 'odd'; ON. *ō* as in *þoh* 'though.'

3. OF. *o* as in *apostle*, *potāge*, *offis* 'office,' *hostāge*.

25. Short *o* occasionally interchanges with *e* by *i*-mutation of *o*, as in *Wodnesday* beside *Wednesday*, *wolken* beside *welkin*, *sorwen* beside *serwen* 'to sorrow.' It also becomes *u* sometimes, by influence of preceding *b*, *m*, or *w*, as in *burd* for *bord* 'board,' *wurd* for *word*, *murþ* 'death' (cf. MnE. *murder*, OE. *morðor*). Probably an OE. interchange of *o* and *u* accounts for *plocken* 'pluck,' OE. *pluccian*: *knocken* 'knock,' OE. *cnocian*, *cnucian*; *þrostel* beside *þrustel* 'throstle,' OE. *þrostle*. For *o* beside *e* from OE. *eo* (*e*) see § 21.

NOTE.—In general early Midland and the dialects all agree. Early Sth., as in Layamon, occasionally uses *eo* for OE. *o* as in *heors* 'horse,' *beord* (*bēord*) 'board,' and individual writings, as those of Shoreham, show *ou* for *o*, as in *sourwe* 'sorrow.'

26. Middle English *u*, with the sound of *u* in *full*, is common in English, Danish, and French words. Its sources are:

1. OE. *u*, and *ū* when shortened: OE. *u* as in *under*, *sunne* 'sun,' *drunken* 'drunk'; OE. *ū* as in *us*, *buxom*, *buten*, (*bute*, *but*) 'but,' OE. *beūtan*, *būtan*.
2. OM. *u* (WS. *eo* by preceding palatal *g* (*i*) and sometimes *sc*), as in *ȝung* 'young,' *schunen* 'shun.'
3. ON. *u*, and *ū* when shortened: ON. *u* as in *bule* 'bull,' *uglī* 'ugly'; ON. *ū* as in *scum*, *busken* 'prepare.'
4. OF. *u*, or *ü* in closed syllables: OF. *u* as in *purse*, *suffren* 'suffer'; OF. *ü* as in *juggen* 'judge,' *humble*.

27. Middle English *u* is often written *o* (seldom *ou*), especially in proximity to *n*, *m*, *u* (*v*), *w*, as already noted under orthography, § 7. This use of *o* for *u* accounts for such forms as *wolf*, *woll* 'wool,' *wode* 'wood,' *son*, *ton*, *come*, *love*, and many others which have remained to Modern English. Beside *dure* 'door,' as above, there is also a ME. *dō̤re* (*dǫ̤ǫ̤re*) with lengthened vowel, probably from OE. *dor*, or some such form with *o* instead of *u*. OE. *eo*

becomes *u* after *w* sometimes, as in *wurþen* 'become,' *wurþ*, *wurþī* 'worthy'; cf. § 21. So OF. *ui* becomes *u* occasionally as in *frut* 'fruit,' *frutestȩre* 'fruiterer,' and in unstressed syllables *u* (beside *i* § 23) as in *biscut* (cf. §§ 61, 70).

28. Forms with *u* beside those with *i*, from OE. *y*, probably depend upon OE. forms with *u* beside others with mutation. Examples are *cluster*, OE. *cluster*, *clyster*; *brustel* beside *bristil*, *bluscen* 'blush,' *clucchen* 'clutch,' *dull* (*doll*) beside *dill* 'dull,' *rusche* beside *rische* (*rasche*) 'rush,' *mukel* (Sth. *muchel*) beside *mikel*, *shuttel* beside *schitel* 'shuttle.' In other cases analogy accounts for a form with *u* instead of *y*, as *hungren* influenced by the noun *hunger*, *sundrȳ* by the adjective *sunder*.

NOTE.—Early Midland and the dialects agree in general. From this *u* (OE., ON., OF. *u*) is to be separated of course Sth. *ü* from OE. *y*, as already explained under ME. *i*, § 23, n. 2. The writing of *o* for *u*, as above, is not found in early Midland, as the 'Chronicle' and Orm, and not until the last half of the twelfth century even in Sth. From the middle of the thirteenth century it becomes common.

LONG VOWELS

29. Middle English *ā*, with the sound of *a* in *art*, is limited in its occurrence, so far as Teutonic words are concerned, by the change of OE., ON. *ā* to *ǭ*, § 40. Long *ā* results from the lengthening of OE. and ON. short *a* under various conditions, and frequently appears in French words under similar circumstances. Its sources are as follows:

1. OE. *a* when lengthened, as in *dāle*, *gāte*, *blāde*, *nāme*, *gāmen* 'game, sport.'
2. ON. *a* when lengthened, as in *tāken* 'take,' *dāsen* 'daze.'
3. OF. *a* when lengthened, as in *fāce*, *grāce*, *plāce*, *āge*, *pāle* 'pale.'

30. The lengthening of the older short *a* occurs in open syllables (cf. § 73), or in OE. monosyllables with final consonant, most of which assumed in ME. an inorganic, final *e*. By reason of the latter change the unstressed syllable became open, and the *a* vowel

subject to the lengthening which affected syllables originally open. OE. *a* before certain consonant combinations which caused lengthening in late OE., when remaining long, had of course become ME. *ǭ*, as in the case of original *ā*.

NOTE.—The dialects agree. In Nth. this newly lengthened *ā* fell in with *ā* from OE. *ā* (§ 43, n. 2). In lNth. *ā* is often written *ai* (*ay*), as noted under § 7, n. 2, and still later (the early fifteenth century) *ai* from whatever source sometimes shows monophthonging to *ā*, as *travāle* from *travaile*.

31. Middle English *ē*, written *e*, or later especially *ee*, represents two different sounds, which are of different origin and are, in general, kept distinct throughout the period. The first of these, called open *ē* and often designated at the present time by a tag below (*ę̄*), had the sound of the vowel in *there*, *care*, *bear*. The second, called close *ē*, had the sound of *ē* in *they*, or of the first element when *they* is pronounced with a diphthong. The dialectal differences, which are especially important in the case of these two *ē*'s, will be noted, as usual, under each of them. There are, in addition, occasional interchanges of sounds naturally so much alike, as shown by rimes, but these are probably due to dialectal confusion or the same poetic licence that is sometimes found in Modern English.

32. Middle English open *ē* (*ę̄*) develops from:

1. OE. *ǣ* (Merc. *ē* sometimes) by *i*-mutation of Teut. *ai*, *ēa* (except WS. *ēa* before *c*, *h*, *g*), and when lengthened *e* and *ę* by *i*-mutation of *a*, or *ea*: OE. *ǣ* as in *dę̄l* 'deal,' *hę̄len* 'heal,' *hę̄te* 'heat'; OE. *ēa* as in *dę̄d* 'dead,' *dę̄f* 'deaf,' *lę̄d* 'lead,' *bę̄m* 'beam,' *hę̄ved* 'head'; OE. *e* as in *brę̄ken* 'break,' *bę̄ren* 'bear'; OE. *ę* as in *stę̄de* 'stead,' *swę̄ren* 'swear'; OE. *ea* as in *ę̄rd* 'dwelling-place,' *ę̄rn* 'eagle.'
2. ON. *ǣ* by *i*-mutation of Teut. *ai*, and when lengthened *e*, or *ę* by *i*-mutation of *a*: ON. *ǣ* as in *gę̄len* 'guard,' *hę̄ben* 'mock'; ON. *ę* as in *nę̄ve* 'fist,' *skę̄ren* (beside *skerren*) 'scare.'

3. OF. *ę̄* before *l*, AN. *ę̄* by monophthonging of *ai*, *ei*, and OF. *e* when lengthened: OF. *ę̄l* as in *naturę̄l* 'natural,' *condicionę̄l* 'conditional'; AN. *ę̄* from *ai* as in *trę̄sōn* 'treason,' *rę̄sōn* 'reason,' *pę̄s* 'peace,' *ę̄se* 'ease,' *fę̄tīs* 'shapely'; AN. *ę̄* from *ei* as in *dę̄s* 'dais,' *encrę̄s* 'increase'; OF. *e* as in *bę̄ste* 'beast,' *fę̄ste* 'feast.'

33. The principal sources of Ml. *ę̄* are OE. *e* of whatever origin when lengthened in open syllables (§ 73), OM. *ǣ*, *ēa* though far less common than WS. *ǣ*, *ēa*, and OF. or AN. *ę̄*. In a few cases OM. close *ē* seems to have become open *ę̄*, though the exact circumstances under which this occurs are not easily made out, owing to the uncertainty as to certain rimes in long *e*. Thus, while keeping apart ME. open and close *ē* as a rule, a poet may have allowed himself occasional impure rimes, as in every period of English. Less careful poets no doubt did this more frequently, so that it is impossible to formulate a principle except from a considerable number of cases in more than a single poet. Except in rime there is only Orm's significant use of *æ* (= *ę̄*) for certain words with OM. *ē*. From this and from rimes it seems likely that OM. *ē* gave *ę̄* after *w*, *l*, and *r*, as in *wę̄t* 'wet,' *wę̄pen* (later *wepen*) 'weapon,' *lę̄chen* 'cure,' *rę̄den* 'read, advise.' But not all such words, especially not all in which Orm uses *æ*, can have had open *ę̄* in all cases in ME. The practice of this book is to rest the probable quality on the usual development of the OM. sounds, especially when confirmed by later English, though recognizing the possible variation in well established cases. Thus OE. *ǣ* from Teut. *ai* seems to give ME. *ē* (beside *ę̄*) when final, as in *sē* 'sea.' Similarly the AN. *ę̄* from *ai*, *ei* before *r* becomes ME. *ē* (beside *ę̄*), as in *pōēr* 'power,' *dubonēre* 'debonair,' *gramēr* 'grammar.'

34. The AN. monophthonging of *ai*, *ei* took place especially before *s*, *t*, *d*, *v*, *s* + cons., a palatal + liquid cons., and sometimes before *r*. Even under such conditions diphthongic forms sometimes appear, as *aise* 'ease' beside *ę̄se*.

NOTE 1.—In early Midland the digraph *æ* was still used for open *ę̄*, as in the

'Chronicle' *sǣ* 'sea,' *ǣr* 'ere,' *ǣvre* 'ever.' Orm also regularly uses the digraph for open *ę̄*, as in *sǣ* 'sea,' *hǣte* 'heat,' from OE. *ǣ*, and in *dǣf* 'deaf,' *flǣt* 'floated,' &c., from OE. *ēa*, as well as for OM. *ē* sometimes; see § 33.

NOTE 2.—All the dialects agree, in general, with the usage above indicated. Early Sth. sometimes has *ēa*, probably a digraph rather than a diphthong, and *ǣ* beside *ę̄*. Sth., however, except Kentish and early Sth., has a much larger proportion of open *ę̄* sounds from WS. *ǣ*, *ēa*. Thus Sth. open *ę̄* springs from the following sources, in addition to the above:

WS. *ǣ*, Gothic *ē*, as in *bę̄ren* 'bore.'

WS. *ēa* by influence of preceding palatal cons., as in *gę̄r* 'year,' *gę̄fen* 'gave,' pl.

WS. *ēa* before palatal *c*, *g*, *h*, as in *hę̄h* 'high,' *ę̄ge* 'eye.'

WS. *ea* (*ēa*) before *l* + cons., as in *hę̄lde*(*n*), Ml. *hę̄lde*(*n*)<OM. *hāldan*.

Kentish and eastern Sth., together with a small district in the extreme north of middle Sth., agree with Midland and Nth. in the main. On the other hand, Kentish has *ēa*, *ȳa*, *yēa* for OE. *ēa*, the first element being a close *ē*, sometimes even *ī*. Kentish also has sometimes *īe* beside *ē* for WS. *īo*, *ēo*.

35. Middle English close *ē* is the development of:

1. OE. *ē*, *ē* by *i*-mutation of *ō*, *ēo*, and *e* or *eo* when lengthened in late Old English: OE. *ē* as in *hēr* 'here'; OE. *ē* from *ō* as in *grēne* 'green,' *sēken* 'seek,' *bēche* 'beech,' *fēt* 'feet'; OE. *ēo* as in *bē* 'bee,' *sēn* 'see,' *trē* 'tree,' *dēre* 'dear'; OE. *e*, *eo* as in *fēld* 'field,' *schēld* 'shield,' *ēnde* 'end,' *ērþe* 'earth.'

2. OM. *ē* cognate with various WS. sounds: OM. *ē* (WS. *ǣ*, Goth. *ē*) as in *bēre* 'bier,' *spēche* 'speech,' *bēren* pt. pl. of *bę̄ren* 'bear,' *ȝēr* (*gēr*) 'year,' *ȝēven* 'gave'; OM. *ē* (WS. *ēo*, *ēa* before OE. *c*, *g*, *h*) as in *flēȝen-flēh* 'fly-flew,' *sēc* 'sick,' *hēh* 'high,' *nēh* 'nigh'; OM. *ē* (WS. *īe* by *i*-mutation of *ēa*), *ēo*, as in *hēren* 'hear, obey,' *nēd* 'need,' *stēren* 'steer'; OM. *ē* from earlier *e* (WS. *ie*, late *īe* by *i*-mutation of *ēa*) as in *ēlde* 'eld,' *ērve* 'heritage,' *dērne* 'secret.'

3. ON. *ē*, *ǿ* by *i*-mutation of *ō*, and *iu* (*io*): ON. *ē* as in *sēr* 'several'; ON. *ǿ* as in *slēh* 'sly,' *fēre* 'power,' *ēpen* 'cry, call' (cogn. OE. *wēpan* 'weep'); ON. *iu* (*io*) as in *mēk* 'meek,' *skēt* 'soon.'

4. OF. *ē*, and AN. *ē* by monophthonging of OF. *ie*, *ue*, some-

times of *ai*, *ei* (*ieu*): OF. *ē* as in *degrē* 'degree,' *compēr* 'compeer,' *procēden* 'proceed'; AN. *ē* from *ie* as in *grēf* 'grief,' *pēce* 'piece,' *manēre* 'manner,' *achēven* 'achieve'; AN. *ē* from *ue* as in *bēf* 'beef,' *pēple* 'people,' *mēven* 'move'; AN. *ē* from *ai*, *ei* (*ieu*) sometimes, as in *gramēr* 'grammar,' *pōēr* 'power,' *pardē* < OF. par dieu.

36. While the sources of close *ē* seem so various, they resolve themselves into a much smaller number if we consider the characteristic phonology of the Mercian dialect, in which this sound was especially frequent as compared with West Saxon. In fact the sources of far the larger number of words may be summed up as OM. *ē*, *ēo*, *ē* in late lengthenings, corresponding, however, to various WS. vowels, as *ē*, *ēo*, *ēa*, early and late *īe* (*ȳ*). To these must be added the important OF. sources, from which come many words, and the less important ON. contingent.

37. The variation between ME. open and close *ē* has been noted in § 33. A few words with OE. *ēo* show *ō* instead of *ē* in Middle English by reason of a shifting of stress and absorption of the first element of the diphthong. Examples are OE. *hēo* 'she' which gives *ȝho* (*ȝō*, *hō*) beside *hē* (Sth. *hē*, *hā*), and OE. *sēo* 'she' which gives *scho* (*sho*) beside *schē* (*shē*). Similarly *ȝōde* (lNth. *ȝude*) from OE. *geēode*, and for *fower*, *trowen* see § 60. For words with *ei* from AN. *ē* < *ie* see § 53. To the AN. monophthongs of *ai*, *ei* may be added *verrē* (OF. *verai*), and *monē* (OF. *moneie*), beside the more common forms. Monophthonging in originally stressed syllables which have lost the stress are exemplified by *sudēn* (*suden*) 'sudden.' Besides forms with *ē* from AN. *ē* (OF. *ue*) occur others with *ō* (cf. § 49). In unstressed syllables this *ē* becomes short, as in *ceveren*, beside *coveren*, *keverchef*, 'kerchief.' Certain Romance words with *ē* (*ee*) beside (*eie*) forms (cf. § 53) depend upon Central French forms with *ē* (*ee*) beside AN. *eie*. Examples which belong here are *cuntrē* (*contrē*) 'country,' *jornē* 'journey.' In the case of ME. *dēȝen* (*deien*) 'die' the word may be from an OE. source, rather than from the ON. word with *ǫ́y* reduced to *ē* (cf. § 52). For ME. *e*

for AN. *ē* (< OF. *ue*), by shortening in originally unstressed syllables, cf. § 20.

NOTE 1.—In early Midland *ēo* is occasionally used for OE. (Merc.) *ē* or *ēo*, as in 'Chronicle' *forðfēorde* (OE. *fērde*) 'went forth, died,' *dēovles* (OE. *dēofles*) 'devils,' *prēostes* (OE. *prēostes*) 'priests.' Orm also sometimes uses *ēo* for OE. *ēo*, as in *prēost* 'priest.' It is probable, however, that this was rather traditional spelling in his time than the representation of a real diphthong.

NOTE 2.—Nth. agrees with Midland except for *ei* (*ey*) written for *ē* (§ 7, n. 2). Sth. differs in a number of important respects owing to a different development from older West Saxon and Kentish. Middle and western Sth., the old West Saxon district, shows the following peculiarities:

e [*ę̄*], seldom *ü*, rarely *i*, for WS. *ie* by *i*-mutation of *e* or *a* before *l* or *r* + cons., or of *ea*, *eo* not before a palatal cons.

ĕ or *ĭ*, seldom *ŭ*, for WS. *ĕe* after a palatal cons.

Kentish and eastern Sth. differ from Midland and Sth. in having:

ē from WS. *ȳ*, for WS. *ǣ* of whatever origin, and for WS. *ĕe* after a palatal cons.

ēa, *ȳa*, *yēa* (close *e* with obscure second element), for WS. *ea* before *l* or *r* + cons.

ĕe beside *ē* for WS. *ĭo*, *ĕo* by *u* or *o*-mutation.

The Katherine group, representing the northern part of middle Sth., agrees with Midland in having *ē* for WS. *ǣ* = Gothic *ē*, but *e*, *ea* for Ml. *a* before *r* in unstressed words; also *ē* for WS. *ie* by *i*-mutation of *ēa* and *ēo*. In addition it has:

ā for WS. *ea* before *l* + cons.

ēa, *ǣ*, *ē* (open or close *ē*) for WS. *ie* by *i*-mutation of *ea* before *l* or *r* + cons.

i for WS. *ie* by *i*-mutation of the *eo* breaking.

38. Middle English *ī*, with the sound of *i* in *machine*, corresponds in Teutonic words to older *ī* and to *ȳ* by *i*-mutation of *ū*. In addition to these two principal sources it occurs in many words of French origin. Like short *i*, as already noted (§ 22), it is written *i* or *y*, with a growing tendency toward *y* in late Middle English. In detail the origin of ME. *ī* is as follows:

1. OE. *ī*, *ȳ* by *i*-mutation of *ū*, and *i* or *y* when lengthened; OE. *ī* as in *wīs* 'wise,' *līf* 'life,' *fīve* 'five,' *wrīten* 'write'; OE. *ȳ* as in *brīd* 'bride,' *hȳde* 'hide,' *fīr* 'fire'; OE. *i* as in *wīld*, *chīld*, *fīnden* 'find'; OE. *ȳ* as in *kīnd* 'kind.'

2. ON. *ī, ȳ* by *i*-mutation of *ū*; ON. *ī* as in *tīþende* 'tidings,' *þrīven* 'thrive'; ON. *ȳ* as in *sīte* (*sīt*) 'pain,' *-bī* in *Grimesbī* 'town.'

3. OF. *i* when lengthened, as in *crīen* 'cry,' *prīme* 'prime,' *delīt* 'delight,' *bīble* 'Bible.'

39. There seems to be no evidence of lengthening of ON. *i, y* in Middle English, such words as *skinden* 'hasten,' *kindlen* 'kindle' preserving their short vowels. This would perhaps indicate that such words entered the language after the OE. lengthening before *nd* had taken place, though the examples are too few to make this certain. In a few cases OF. *ei* becomes *ī* in a syllable which loses principal stress, as *werrīen* 'make war,' falling in with OF. verbs in *ier* (ME. *īen* sometimes) as *carrȳen* 'carry.'

NOTE 1.—Early Midland shows no special peculiarities.

NOTE 2.—Nth. agrees with Midland. Sth., which preserves the older mutated sound of *ȳ* as already mentioned (§ 11, n. 2), used for it *ǖ* (*ǖī*) under the influence of French orthography. Examples are *hǖren* (*hǖiren*) 'hire,' *fǖr* (*fǖyr*) 'fire,' *kǖþen* 'make known.' With this *ǖ* from OE. *ȳ* in Sth. also fell in, in some cases, a French *u*, with the sound of *u* in French *lune* to-day. This was easily possible owing to the similarity of the two sounds in Sth., but in Midland, which had not preserved the older mutated sound of OE. *ȳ*, this French *ü* finally associated itself with the diphthong *eu* (*iu*); see § 6. As already noted under close *ē* (§ 37, n. 2), Kentish has *ē* for OE. *ȳ* in accordance with older Kentish.

40. Middle English *ō*, like ME. *ē*, represents two different sounds of different origin and development. The first, open *ō* designated by *ǭ*, had the sound of *o* in *lord*. The second, close *ō*, was pronounced like *o* in *no*, or like the first element when *no* is pronounced with a diphthong. These two sounds are usually kept apart in Middle English rimes, and in general have maintained a separate development to Modern English.

41. Middle English open *ō* (*ǭ*) springs from:

1. OE. *ā*, and when lengthened *ǫ* from *a* before a nasal or *o* in open syllables: OE. *ā* as in *tǭ* 'toe,' *ǭþe* 'oath,' *stǭn* 'stone'; OE. *ǫ* as in *lǭng* 'long,' *strǭng*, *sǭng*; OE. *o* in *hǭse* 'hose, trousers,' *pǭke* 'bag,' *þrǭte* 'throat,' *befǭre* (*bifǭre*) 'before.'

2. OM. *ā* (WS. *ea*, *ēa*) from *a* before *ld*, as in *ǭld*, *bǭld*, *cǭld*.
3. ON. *ā*, and when lengthened *ǫ* from *a*+nasal or *o* in open syllables: ON. *ā* as in *lǭte* 'countenance,' *brǭþe* 'violent,' *rǭþen* 'counsel, explain'; ON. *a* as in *wrǭng*, *wǭnd* 'rod'; ON. *o* as in *bǭle* 'stem of a tree,' *scǭre* 'score.'
4. OF. *o* when lengthened in open syllables, and AN. *o*+*rie* (OF. *oire*): OF. *o* as in *rǭse*, *nǭble*, *restǭren* 'restore'; AN. *orie* as in *glǭrie* (*glǭrȳ*), *stǭrie* (*stǭrȳ*), *memǭrie* 'memory.'

42. The principal sources of ME. open *ǭ* are OE. *ā*, and when lengthened in open syllables OE., OF. *o*. Special note should be taken of the small group of words with OM. *ā* from *a* before *ld*, since WS. forms could not possibly account for the MnE. words *old*, *bold*, &c. In the few possible cases OE. *ā*, preceded by a cons.+*w*, early developed *ō* (< *ǭ*) under the influence of *w*, as in *twō* 'two,' *swōpen* 'swoop.' Preceding *w* alone did not affect the change (cf. Hempl, 'Jour. of Germ. Phil.' I, 14). In the case of *sǭ* which seems to have open *ǭ* more commonly in Midland, we may perhaps assume a late OE. *sā* with loss of *w*.

43. In § 18 attention was called to certain words with ME. *ǭ*, eME. *ā* (see the strong preterits like *bǭren* 'bore'), where we expect Ml. *ē* (OM. *ē*, WS. *ǣ*). These may possibly represent an OM. *ā* beside *ē* or from *ē*, may be due to analogy or to Norse influence, such forms having *ā* in Old Norse. Norse influence certainly seems probable, though see the discussion in Björkman, 'Scand. Loan-words in Mid. Eng.,' p. 84.

NOTE 1.—In early Midland OE. *ā* often remains as in 'Chronicle' *āpes* 'oaths,' *stānes* 'stones.' Orm, too, writing in northeast Midland not far from the northern border, has *ā* regularly as in Nth. From the beginning of the thirteenth century *ǭ* was the rule.

NOTE 2.—In Nth., as already noticed (§ 5), OE. *ā* remained *ā* through the period and is thus a distinguishing feature of that dialect. In early Sth., *ā* is still written, though beside *ǭ*, *oa* (*ao*). From the thirteenth century *ǭ* (*oa*) are regular, as in 'Ancren Riwle.' The change of *ǭ* to *ō* after cons.+*w*, noted above for Midland, was very late in Sth., probably not taking place until 1400.

44. Middle English close *ō* springs from:

1. OE. *ō*, or *ō* from *o* before certain consonant combinations: OE. *ō* as in *dōm* 'doom,' *gōd* 'good,' *cōk* 'cook'; OE. *o* as in *gōld, bōrd, wōrd.*
2. ON. *ō* as in *bōne* 'prayer, boon,' *bōþe* 'booth,' *crōk* 'crook.'
3. OF. *ō* (AN. *ū*), *o* rarely, AN. *ō* from OF. *ue* sometimes: OF. *ō* as in *trę̄sōn* 'treason,' *barōn, condiciōn*; OF. *o* as in *pōvre* (*pōre*) 'poor,' *fōl* 'fool'; AN. *ō* from *ue* as in *mōven* 'move,' *prōven* 'prove,' *dōlen* 'grieve,' *pōple* 'people.'

45. OF. words in *ō*, especially before *n*, beside AN. forms with *ū* (cf. § 46) are common in early Middle English. Forms with AN *ō* from OF. *ue*, by monophthonging, occur beside those with *ē* already noted (§ 35). In unstressed syllables this AN. *ō* becomes *o*, as in *coveren* 'cover.'

NOTE 1.—Early Midland and the dialects agree in general. In late Nth. this sound is frequently written *u*, indicating a change in the direction of French *eu* in *peu*, the sound of Scotch *u* in *gude* 'good.'

46. Middle English *ū*, with the sound of the vowel in *boot*, is found in words from all sources. Under the influence of French spelling it is often written *ou* (*ow*), but this orthography never indicates a diphthong in the case of this vowel. The sources of ME. *ū* are:

1. OE. *ū*, and *u* when lengthened: OE. *ū* as in *fūl* 'foul,' *hūs* 'house,' *ōut, lōud, hōw*; OE. *u* as in *wūnde* 'wound,' *grūnd* (*grōund*) 'ground.'
2. ON. *ū*, and *u* when lengthened: ON. *ū* as in *būn* 'ready, prepared,' MnE. 'bound,' *skūlen* 'project,' *drūpen* 'droop'; ON. *u* as in *lūnd* 'nature, disposition.'
3. AN. *ū* as in *crōune* 'crown,' *dōute* 'doubt,' *avōwen* 'avow,' *mōunt, acōunt, flōur* 'flower,' *precious.*

NOTE 1.—Early Midland has no special peculiarity, except that *ū* is never written with French *ou*, but regularly with the English symbol.

NOTE 2.—There is general agreement in the dialects with regard to ME. *ū*. In the thirteenth century the French *ou* came to be used for ME. *ū* first in Sth., where it was especially necessary to distinguish this sound from *ū* (*ū̄*) for OE.

ȳ. Later it spread to other dialects, and in late Middle English became the rule. For Sth., in the earlier period especially, ME. *ū* must be carefully separated from *ū* (*ūi*) for OE. *ȳ*. For Sth. *u* from French *u*, with the sound in French *lune*, see § 10, footnote.

THE DIPHTHONGS

47. As has been shown (§ 3), the OE. diphthongs became monophthongs in Middle English. Their place was supplied by certain new diphthongs formed from certain combinations of OE. vowels and following consonants. The change probably began in late Old English, and was certainly completed in the early Middle English period. The formation of the new diphthongs follows the accompanying scheme:

1. An OE. palatal vowel, *æ̆, ĕ, ĕa, ĕo* + a palatal *ẖ* or *g* became *ai, ei*.
2. An OE. guttural vowel, *ă, ŏ* + guttural *ẖ* or *g* became *au, ou*.
3. An OE. palatal vowel, *æ̆, ĕ, ĕa, ĕo, ĭ* + *w*, and occasionally medial *f* (i. e. *v*) when developing into *w*, became *eu*.
4. An OE. guttural vowel, *ă, ŏ* + *w*, and occasionally *f* as above, became *au, ou*.

48. As the vowels of these formulæ were long or short, two sets of diphthongs resulted in the earliest period. This is proved by the orthography of Orm, who doubles the second element of the diphthong in all cases when the first is short. On the other hand, long and short diphthongs were not otherwise distinguished in their written form or in their later development, so that they need not in general be separated. A more essential distinction, especially in the *ou* diphthongs, is the quality of the first element, which was either open or close according as it developed from OE. *ā* and *o*, or from OE. *ō*. Even these can be distinguished only by knowing their origin in Old English. The diphthongs naturally developed most readily in the case of a following *w*, as in *soule*, OE. *sāwle* 'soul,' *growen*, OE. *grōwan* 'grow.' They next appear when *g* (*ẖ*) are final, medial between vowels, or between vowel and voiced consonant, as in *saide*, OE. *sægde* 'said,' *drawen*, OE. *dragan* 'draw.'

Only occasionally do they appear from a vowel and a medial *f* (*v*), as in *hawk*, OE. *hafoc* 'hawk.' Before OE. *ht*, sometimes before final or medial *h* when still preserved, a parasitic *i* or *u* developed in later ME., as in *eighte* 'eight,' *draught* 'draught,' *nought*, *wrought*, and these diphthongs have usually had a somewhat different development from others. Diphthongs are also occasionally formed by the development of a parasitic vowel before other palatal consonants than *h* and *g*, as in *bleinte*, OE. *blencte* 'blenched,' *meinde*, OE. *mengde* 'mingled,' *aische*, OE. *asce* 'ashes,' *fleisch*, OE. *flǣsc* 'flesh.'

49. To these diphthongs of OE. origin must be added some from other languages, especially Danish and French. These usually associated themselves with those of English origin, as will be seen from the following sections, but in the case of OF. *oi* (*ui*) a new diphthong was added to the language.

NOTE.—When it is said above that the OE. diphthongs became monophthongs in Middle English, it should be remembered that in Kentish the older diphthongs were preserved to a late period. These have been noted already under § 37, n. 2. The consonants *g* and *h* do not immediately disappear on the formation of the diphthong, which is probably due to the formation of a parasitic vowel before the consonant. This accounts for such forms as *deigen* 'die,' in 'Gen. and Ex.' The consonant *h* appears especially when in conjunction with *t*. For a late monophthonging of *ei* and *ou* sometimes, see §§ 54, 69.

50. Middle English *ai*, in the earliest times, had the sound of the diphthong in *high*. As *ai* came to rime with *ei* in late ME., its pronunciation probably assumed the sounds *a* (as in *man*)+*i* in the course of its development. It springs from:

1. OE. *æg*, as in *dai* (*day*), *mai* (*may*) 'may,' *sayde* 'said.'
2. ON. *ag* (*þg*) rarely, as in *gainen* (ON. *gagna*), *kairlīc* (Orm *kazzerrlezzc*) if from Norse *kþgur* as Brate 'Nord. Lehnworter,' p. 46.
3. OF. *ai*, as in *payment*, *paien* 'satisfy, pay,' *bitraien* 'betray.'

51. Attention has been called to the development before OE. *ht*, no diphthong appearing as early as in other cases. In *miȝt*, *niȝt*, OE. (Merc.) *mæht*, *næht*, *i* resulted from the influence of the

following palatal. There could therefore be no diphthongization in these cases. OF. *ei* appears as *ai* from the twelfth century, so that the number of *ai* forms is considerably increased in this way.

NOTE 1.—In early Midland the first element of the diphthong is written *æ* or *a*, and the last element *g* sometimes. Thus the 'Chronicle' has *dæi* (*dæg*) 'day.' Orm writes *daȝȝ* 'day,' *maȝȝ* 'may,' in accordance with his usual spelling of the diphthong. He also has *mahht*, *nahht*, 'might, night.' In 'Genesis and Exodus' *migt*, *nigt* appear beside *magt*, *nagt*.

NOTE 2.—lNth. *ai* becomes *ā* (§ 30, n. 1). Early Sth. has *ei* for Midland and Nth. *ai*, as in *dei* 'day,' *mei* 'may,' in accordance with its usual use of *e* for OE. *æ*. Sth. also developed the diphthong *ei* before *ht*, sometimes *h*, much earlier than the other dialects, as in *eihte* 'eight.'

52. Middle English *ei*, with the sound of *e*+*i*, comes from:

1. OE. *eg*, or *ɣg* from *ag*, *āg* from Teut. *aig*, and *ēg* from *ōg* by *i*-mutation: OE. *eg* as in *wei* (*wey*) 'way,' *pleien* 'play'; OE. *ɣg* as in *eiȝe* (*eie*) 'fear, awe'; OE. *āg* as in *feie* 'fay,' *clei* 'clay,' *kei* 'key'; OE. *ēg* as in *feien* 'join,' *wreien* 'accuse.'
2. OM. *ēg* corresponding to various WS. vowels: OM. *ēg* (WS. *āg*, Goth. *ēg*) as in *grei*(*y*) 'gray'; OM. *ēg* (WS. *ēag*, *ēog*) as in *fleien* 'fly,' *dreien* 'endure'; OM. *ēg* (WS. *īeg* by *i*-mutation of *ēag*) as in *beien* 'bend.'
3. ON. *ei* (*æi*), and *ϕy* (*ey*) by *i*-mutation of Teut. *au*: ON. *ei* as in *reisen* 'raise,' *beiten* 'bait,' *þei* 'they'; ON. *ϕy* (*ey*) as in *ay* 'aye,' *cairen* 'go, return,' *traist* 'strong, confident.'
4. AN. *ei* as in *preien* 'prey,' *streit* 'strait,' *peinten* 'paint,' *kweynte* 'quaint,' *aqueyntaunce*.

53. While these sources seem to be various they are, in reality, very few. Thus ME. *ei* springs from OE. (Merc.) *ĕg* (*āg*) from whatever source. The principal foreign sources are ON. and OF. *ei* diphthongs, which are responsible for a considerable number of *ei* words. In a few native words *ei* develops from *e* under the influence of a following palatal consonant or consonant combination. Here belong *fleisch* beside *flesch* (OE. *flǣsc*) 'flesh,' *weisch* (*weis*) beside *wesch* 'wash,' *leincte* beside *lengten* (*lenten*) 'spring,' *bleincte*

(*bleinte*) < *blencen* 'blench,' *dreincte* (*dreinte*) < *drencen* 'drench.' Some AN. words have a diphthong *ei* (*e*), (*ai*) where OF. forms have *ē* (*ee*); examples are *contraie* (*contray*) 'country,' *jorneie* (*jornay*) 'journey.' Cf. § 37. In the case of words with OE. *ǣg* by *i*-mutation of Teut. *aig* (see 1 above), we should expect ME. *ai* by early shortening of *ǣ*. Either this did not take place in the few words belonging here, or more probably the open *ǣ* quality was changed to close *ē* under the influence of the following *g*. In a few cases *ei* (*ey*) springs from AN. *ē* (OF. *ie*) as *mayntеynen* 'maintain,' *susteynen* 'sustain,' perhaps by analogy of words ending in *ei*(*ai*)*ne*, for example *atteinen* 'attain.' Beside AN. forms in *ei* (*ai*) occur cognates from Central French in *oi*; see § 64.

54. For early confusion between OF. *ei* and *ai* words see § 51. ON. words with *ϕy* also usually appear in Middle English with *ai*, perhaps indicating early change of quality from *ei* to *ai*. There is a tendency in late ME. to confuse all *ei*'s and *ai*'s as already noted under *ai* (§ 50). This is shown even as early as Chaucer, who sometimes rimes *ei* and *ai*. Besides, ME. *ei*, more especially in the southeast Midland as shown by Chaucer's usage, occasionally becomes a monophthong *ī*, by palatalization of the first element and contraction. Examples are *flīen* 'fly,' *drīen* 'endure,' *dīen* (*dȳen*) 'die,' *sȳe* 'saw.' A similar change took place in late Middle English in such words as *heigh*, *neigh*, *sleight*, by which they acquired the long *ī* which later became the Modern English diphthong *ai*.

NOTE 1.—Early Midland has *ei*, as in 'Chronicle' *eie* 'awe,' OE. *ege*. Orm writes *eȝȝ* for *ĕi*, *eȝ* for *ēi* in accordance with his usual orthography.

NOTE 2.—Nth. writes *ai* even in the earliest texts (last half of the thirteenth century) for *ei* (except for *ei* from OE. *ēg*(*h*)), as in *þai* 'they,' *ay* 'aye,' *raise*, *pray* 'prey,' *paint*. *Ei* from OE. *ēg*(*h*) does not become *ī* in Nth.; cf. Scotch *dee*, *ee*, 'die, eye.' In lNth. *ei* became *ē*. Sth. does not differ from Midland, except that the palatalization of *ei*, from *eg*, to *ī* does not seem to occur.

55. Middle English *au*, a diphthong with the pronunciation of that in *house*, is of common occurrence in both native and foreign words. In general it develops from OE. *a*+*w* or *g* when final or

medial in voiced company, while it also appears in many words borrowed from Old French. In detail, its sources are:

1. OE. *aw* or *eaw*, *āw* or *ēaw* when shortened, and rarely *afo* (*eafo*) by vocalization of *f* (=*v*): OE. *aw* or *eaw* as in *clawe* 'claw,' *raw*, *straw*, *awel* 'awl'; OE. *āw* or *ēaw* as in *tawen* (OE. *tāwian*, perhaps *tawian*) 'prepare,' *aunen*, *taunen* (OE. **ēawnian* **ætēawnian*) 'show'; OE. *afo* (*eafo*) as in *hauk* (OE. *heafoc*, *hafoc*) 'hawk,' *nauger* (OE. *nafogar*) 'auger,' and OE. *afl* as in *craulen* (OE. *craflian*) 'crawl.'
2. OE. *ag*, *ahh*, and *aht*, or when shortened *āht* (*ǣht*): OE. *ag* as in *drawen* (earlier *drāȝen*) 'draw,' *gnawen* 'gnaw'; or *ahh*, as in *lauȝhen* 'laugh,' *lauhte* 'laughed'; OE. *āht* (*ǣht*) as in *auhte* (*auȝte*) 'aught,' *tauhte* (*taugte*, *tauȝte*, *tauȝhte*) 'taught.'
3. ON. *ag* as in *lawe* 'law,' *awe*, *felawe* 'fellow.'
4. OF. *au*, as in *cause*, *pause*, *applauden* 'applaud,' *assault*.

56. As already noted the diphthongs which develop from *ag* (*h*) appear later than those from *aw* (cf. § 48). In Romance words, *au* from OF. *a* before a nasal + cons. (except *nk* and *n* + the stop *g*) appears in Middle English from the thirteenth century. The exact quality of this sound is not clear, but it seems not to have been a strict diphthong like OF. *au*, and was more probably an open *o* sound like that of OE. *ǫ* from *a* before a nasal, varying with *a* as the interchangeable orthography would indicate. Its development during the period is different under different circumstances. It falls in with ME. *a* as in *sample*, *champiōn*, *chance*, *branch*, and in unstressed syllables as *servant*, *cōuntenance*; with ME. *ā* as in *chāmber*, *chānge*, *dānger*, *grānge*, *strānge*; and with ME. *au* or *ou* before *ht* as in *daunt*, *vaunt*, *paunch*, *staunch*, *lawn* with loss of final *d*. A similar *au* appears from OF. *ave* before a nasal, as in *aunter* beside *aventure* 'venture, adventure,' *paraunter*, probably *laundēre* 'laundress.' Cf. Behrens, 'Franz. Sprache in England,' p. 77, Luick, 'Anglia,' XVI, 479 f.

NOTE 1.—In early Midland, as in the other dialects, the change of *g* to *w*

had not been carried out. Thus Orm writes *draȝhenn* for OE. *dragan* 'draw,' *laȝhe* 'law.' The change was not completed, perhaps, until the beginning of the fourteenth century.

NOTE 2.—In early Sth., OE. *g*, which became vocalized to *w*, was written *h*, as in *drahen* 'draw,' but the diphthongic change was completed by the beginning of the thirteenth century, as in 'Ancren Riwle' *drawen* 'draw.' In Kentish, however, *aȝ* for OE. *ag* is found as late as the middle of the fourteenth century; cf. 'Ayenbite of Inwit.' The earliest Nth. texts, the last half of the thirteenth century, also show the change complete. In Nth. before *ht*(*hh*) no *au* diphthong develops, but the *au* diphthong is otherwise increased by the addition of *au* from OE. *āw*, *āg*, since in Nth. OE. *ā* remained *ā* (§§ 5, 43, n. 3). In Kentish also, OE. *āw* frequently remained *āw*, beside *ou*, and only later fully developed *ou* in all cases.

57. Middle English *eu* (*ew*) represents two slightly different sounds as the first element was open or close *e*. This gave a slightly different pronunciation to the two through the period, but they became one in early Modern English, when the first element of each had assumed the sound of *i*.

58. Middle English *eu*, with the sound of open *e*+*u* as in *fool*, has its principal sources in OE. *e* (*eo*), or *ǣ* (*ēa*) +*w*. In detail these are as follows:

1. OE. *ew* (*eow*), *ȝw* (*ȝow*) from Teut. *aw* by *i*-mutation, *ǣw*, *ēaw*, are rarely *ef* (=*ev*): OE. *ew* (*eow*) as in *sewen* 'sew'; OE. *ȝw* (*ȝow*) as in *ewe*; OE. *ǣw* as in *mew* 'sea bird,' *lewed* (*lewd*) 'lay, lewd'; OE. *ēaw* as in *dew*, *hewen* 'hew,' *fewe* 'few'; OE. *ef* as in *ewte* (OE. *efete*) 'newt.'
2. OE. *eau* in originally unstressed syllables as in *beautē* (*beutē*) 'beauty,' *lewtē* 'loyalty.'

NOTE 1.—In early Midland OE. *ǣw* (*ēaw*) was written *æu* (*w*), as in 'Chronicle' *fæu* 'few,' Orm *dæw* 'dew,' *shæwen* 'show.' The consistent use of *æ* for OE. *ǣ* (*ēa*) shows that the first element of the diphthong was still long.

NOTE 2.—Nth. does not differ from Midland. Early Sth. has *ea* many times, as *sheau*(*w*)*en* 'show,' *leawede* 'lewd.' Kentish also has *ēa* (*yea*) for OE. *ēa*; see § 34, n. 2.

59. Middle English *eu*, with the sounds of close *e*+*u* (*fool*), has its principal sources in OE. *ēow*, OM. *ēw* (*ēow*), less commonly OE. *īw* and OF. diphthongs of similar quality. It springs from:

1. OE. *ēow*, sometimes *īw*: OE. *ēow*, as in *ew* (*yew*) 'yew,' *hrewen* 'rue,' *chewen* 'chew,' *brewen* 'brew,' *knew* 'knew,' *grew* 'grew'; OE. *īw*, as in *steward* beside earlier *stiward*, *Tewesdai* beside *Tiwesdai* 'Tuesday.'
2. OM. *ēw* (*ēow*) corresponding to different WS. diphthongs: OM. *ēw* (WS. *ǣw*, Goth. *ēw*), as in *bilewen* 'betray'; OM. *ēow* (WS. *īew*, *īw* by *i*-mutation of *ēow*), as in *hewe* 'hue,' *newe* 'new'; OM. *ēow* (WS. *īw*), as in *spewen* 'spew,' *clewen* 'ball of thread, clue.'
3. OF. *eu* (*ieu*), and sometimes *ü*, *üi*: OF. *eu* (*ieu*), as in *Jew* 'Jew,' *Hebrew*, *sewen* 'sue,' *curfew*, *rewle* 'rule'; OF. *ü*, especially when final or before a vowel, as in *virtew* 'virtue,' *crewel* 'cruel'; OF. *üi* rarely, as in *frewte* 'fruit,' *seute* 'suit.'

60. Here belong many preterits of reduplication verbs with OE. *ēow*, as *hew* 'hewed,' &c. To these, in later English, a few were added by analogy, as *drew*, *slew*, ME. *drōh* (*drou*), *slōh* (*slou*). Words with OE. *īw* were largely reduced in number for Mercian by their appearance in that dialect with *ēow*. Perhaps on this account early ME. *stiward* becomes *steward*, and OF. words with *ü* (*üi*) sometimes show a like phonology. On the other hand, words with ME. *eu* from OF. *eu* (*ieu*) sometimes have *iu* beside *eu*, as in *riwle* 'rule,' *Juus=Jiues*. Beside forms with *eu* (*ew*) OE. *ēow* gives *ow* sometimes, by absorption of the first element of the diphthong, as in *trowen* 'trust, believe,' *trowð* (*trouthe*) 'truth,' *fower* 'four.' In ME. *ōu* (*ōw*, *ȝōu*) 'you' OE. *ēow* has become *ū*, perhaps earlier *ou* as a diphthong.

NOTE 1.—In early Midland, OE. *ēow* is sometimes written beside the new diphthong. Thus Orm writes *neowe* 'beside,' *newe* 'new.'

NOTE 2.—Early Sth. preserves *eo*, as in *treowe* 'true,' in accordance with § 37, n. 1. Otherwise the dialects are in general agreement with Midland.

61. Middle English *iu* is rare in native words and later falls in with *eu* (see above). That it developed in later ME. times from OF. *ü* (*üi*) when lengthened is certain (cf. Luick, 'Anglia,' XIV, 287).

How early this came about depends upon the question how far OF. *ü* was adopted in its purity in Middle English (cf. § 10, footnote). We shall here assume that OF. *ü* (*üi*) were diphthongal from the first, or practically so. Middle English *iu* has therefore the following origin:

1. OE. *īw* as in *stiward*, later *steward*, *Tiwesnizht* 'Tuesday night.'
2. OF. *ü* and *üi* (AN. *ü* sometimes): OF. *ü* as in *rude*, *huge*, *usen* 'use,' *accusen* 'accuse,' *pursuen* 'pursue,' *nature*, *mēsure* 'measure,' *duk* 'duke,' *pur* 'pure,' *vertu* 'virtue'; OF. *üi* (AN. *ü* sometimes) as in *frut* (*fruit*), *sute* (*suite*), *anui* 'annoy,' *nuisance*.

62. Confusion with the ME. diphthong *eu* has been noted under that combination. OF. *ui* also becomes *oi* as in the following section. On the other hand some words with *ew* appear with *iu* (*iw*) as *riwle* 'rule,' or, in unstressed syllables, *u* (=*iu*?) as in *construe*(*n*) 'construe,' Sth. *asunīen* 'excuse.'

NOTE.—In Nth. and NWMl. OF. *ü* sometimes becomes *ū*, as in *Lōuk* 'Luke,' regularly in the ending *ure*, as *armōur* 'armor.'

63. Middle English *oi*, with the sound of the diphthong in *coy* but with close *o* as the first element, is almost exclusively of romance origin. It springs from:

OF. *oi* (i.e. *ǫi*), *oi* (AN. *ui*, sometimes *ei*), and AN. *oi*+*l*, *n* (OF. *o*): OF. *oi*, as in *joie* 'joy,' *choice*, *cloister*, *noise*; OF. *oi* (AN. *ui*), as in *destroien* 'destroy,' *Troye* 'Troy,' *vois* 'voice,' *crois* 'cross,' *moiste* 'moist'; OF. *oi* (AN. *ei* sometimes), as in *quoynte* (*coint*) 'happy, gay,' *quointīse* 'skill,' *point*, *enointen* (*anointen*) 'anoint,' *joint*, *coin*; AN. *oi*+*l*, *n* (OF. *o*), as in *soile* 'soil,' *spoilen* 'spoil,' *despoilen* 'despoil,' *oil*, *joinen* 'join,' *Burgoine*.

64. Attention has already been called to AN. *ei* (*ai*) for OF. *oi* in some words, accounting for such MnE. forms as *acquaint*, *quaint*. Nth. *aquynt* 'acquainted' shows monophthonging of AN. *ei*. Beside forms with *oi* from *ui* may be mentioned the rare *froit*, beside *fruit*

(*frut*) 'fruit.' ME. *jewel* (*juel, jouel*) has perhaps been influenced by OF. *ju, jeu* 'game.' ME. *boie* 'boy' is certainly of ultimate Teutonic origin, and possibly from an unrecorded OF. word. In *broiden*, pret. pl. and pp. of OE. *bregdan*, *oi* develops naturally perhaps from OE. *og* before *d* (§ 179). For *ui* beside *oi* see §§ 61, 70.

65. Middle English *ou*, like *eu*, represents two different diphthongs which, however, came together in late Middle English, and were not always distinct in the earlier ME. period. The two sounds differ, as one had open, and the other close *o* for its first element.

66. Middle English *ǫu*, with the sound of open *ǫ*+*u* (*fool*), has its principal sources in OE. *ow*, *og* and *ā*+*w* or *āg*, while some Norse words with *au* have ranged themselves with these. Its sources, in detail, are:

1. OE. *āw*, *āg*(*h*), *āht*: OE. *āw*, as in *sowen* 'sow,' *blowen* 'blow,' *crowen* 'crow'; OE. *āg*(*h*), as in *owen* 'owe,' *dou* (*doh, dogh*) 'dough'; OE. *āht*, as in *ouȝt* 'ought,' *ouȝte* 'ought' (vb.).
2. OE. *ow*, *og* (*h, hh*), *oht*, and when shortened *ōh* or *ōht*: OE. *ow*, as in *tow* 'coarse flax'; OE. *og* (*h, hh*), as in *bowe* 'bow of the archer,' *flowen* 'flown,' *trouȝ* (*troh, trogh*) 'trough,' *couȝ* (*cogh*) 'cough,' *couȝen* (OE. *cohhettan*) 'cough'; OE. *oht*, as in *douȝter* 'daughter,' *bouȝt* 'bought'; OE. *ōh* as in *touȝ* (*toh, togh*) 'tough'; OE. *ōht*, as in *souȝt* 'sought,' *fouȝten* 'fought' (pp.).
3. ON. *og*, *ōh* when shortened, and *ou* (*au*): ON. *og*, as in *lowe* 'fire'; ON. *ōh*, as in *þou* (*þoh, þouȝ*) 'though'; ON. *ou* (*au*), as in *nout* 'cattle,' *routen* 'roar,' *rouste* 'voice.'

67. In a few cases double forms appear, as OE. *āht* becomes short (cf. § 55) or remains long until OE. *ā* had become ME. *ǭ* as in 1 above.

NOTE 1.—In early Midland the diphthongs had not yet developed in the case of *og*, *āg*, *oht*, as already noted in § 56, n. 1. Orm thus writes *aȝhen* 'owe,' OE. *āgan*.

NOTE 2.—The dialects agree in general. In Nth., as OE. *ā* remains, OE. *āw*, *āg* become *au*, not *ou*. Nth. *ah*, *aht* also do not develop a diphthong. The same is true in Kentish of OE. *āw* which remains *au*, though later becoming *ou*; see § 56, n. 2.

68. Middle English *ou*, with the sound of *ō*+*u* (*fool*), is of infrequent occurrence. It is from

OE. *ōw*, as in *growen* 'grow,' *flowen* 'flow,' *stowen* 'stow.'

69. This diphthong, which occurs in no large number of words, assumed the quality of *ǫu* in the fourteenth century, as shown by rimes of Chaucer, and has since had a similar development. For *ou* from OE. *ōh*, see § 66. In a few words ME. *ou* (probably close *o*) springs from OE. *ēow* by absorption of the first element of the diphthong, as in *foure* (OE. *fēower*) 'four,' *trowen* (OE. *trēowian*) 'believe.' This may also explain *ū* (*ōu*, *ȝōu*) from OE. *ēow* 'you,' but if so the diphthong soon became *ū*, as shown by rimes.

70. A Middle English *ui*, occurring in Romance words, may represent OF. *üi*, which soon became ME. *iu* (cf. § 61) or in unstressed syllables *u*(*i*) as noted in §§ 23, 27. Otherwise ME. *ui* represents OF. *ui*, which has a diphthongal sound approximating ME. *oi*, with which it varies in early texts and by which it is finally displaced (§ 63). Examples are *destruien* 'destroy,' *fuisōn* 'abundance,' *Burguine* 'Bourgogne.' After *k* (*c*) this OF. *ui* sometimes became *kwi*, as in ME. *quylte* 'quilt,' Nth. *aquynt* 'acquainted.' Perhaps a similar change also accounts for *anguis* 'anguish,' which sometimes seems to have stress on the last syllable. In originally unstressed syllables this OF. *ui* became *u* or *i* as noted in §§ 23, 27.

NOTE.—A Sth. *ui* (*üi*) rarely springs from OE. *ȳ*+*g* as in 'Ancren Riwle' *druie* (<OE. *drȳge*) 'dry,' but the quality of the diphthong is uncertain. Cf. Sweet, 'Hist. of Eng. Sounds,' § 717.

VARIATIONS IN VOWEL QUANTITY

71. As compared with Old English, Middle English shows important variations of vowel quantity. Some of these are extensions of changes which were operative in late OE. times: see Sievers, 'Gr.,' §§ 120–125 and notes to §§ 150–168; Bülbring,

'Altenglisches Elementarbuch,' § 284 f. Others belong to the Middle English period, and affect not only a great number of English words, but also those borrowed from Norse and French. The best criteria for the variations in quantity of ME. vowels are, (1) the orthography of Orm; (2) the doubling of vowels and consonants, and the use of two symbols for a single sound, as *ey* for *i*, *ui* (*y*) for *u*, *ea* for *e*; (3) the occasional use of accents or other signs for vowel length; (4) the rimes in Middle English poetry, and other metrical evidences as of syncope, apocope, &c.; (5) the relation of ME. vowels to the course of their development in the modern period. Reference may be made especially to Morsbach, 'Mittelenglische Grammatik,' pp. 65–92; Sweet 'History of English Sounds,' §§ 392, 616–640.

NOTE.—Orm, to whom special reference is made above, undertook to indicate pronunciation with minute exactness by doubling consonants and the second elements of short diphthongs, as well as by the occasional use of the accent and the breve. The most striking feature, the doubling of consonants, has led some to believe that Orm intended to indicate consonant length, while others think vowel length alone was intended. In any case, however, Orm's orthography is of practical value mainly in determining vowel quantity. Thus, vowels followed by doubled consonants are invariably short, as in *staff*, *gladd*, *inn*, *allderrmann*, *asskenn*, *clennsenn*; those followed by a single consonant in closed syllables are long, as in *bāld* 'bold,' *fēld* 'field,' *chīld*, *gōld*, *grūnd* 'ground.' The quantity of vowels followed by a single medial consonant is indeterminate by Orm's orthography, but in these cases, as in closed syllables, Orm uses accents to show original length in many words, and the breve to show original short quantity in something like a third of the examples. Those who believe that Orm intended to indicate vowel length only, explain his failure to double the consonant after a short medial vowel because such doubling would have produced confusion between such words as *sune* 'son' (OE. *sunu*) and *sunne* 'sun' (OE. *sunne*), the difference between which was still important. In the case of diphthongs, the first vowel is short when the second element is doubled, as in *clawwess* 'claws,' *knewwe* 'knew,' *trowwenn* 'trow'; otherwise long, as in *cnāwen* 'know,' *sāwle* 'soul,' *sāwen* 'sow.' The two views above are supported by Trautmann ('Anglia,' 7, 'Anzeiger,' 94, 208), Ten Brink ('Chaucer Gr.,' §§ 96–97), Effer ('Anglia,' 7, 'Anzeiger,' 167) for the first; Sweet ('Hist. of Eng. Sounds,' § 616 f.), Morsbach ('Mitteleng. Gr.,' § 15, anm. 2–3) for the second, with which most scholars agree.

LENGTHENING

72. It may be assumed, in accordance with the evidences of lengthening in late Old English, that OE. long vowels and diphthongs remained long in open syllables and before a single final consonant, except as shown hereafter; and that original OE. short vowels and diphthongs had become long before certain consonant groups made up of a liquid or nasal and a voiced consonant, as *ld*, *rd*, *rl*, *rn*, *rþ*, *mb*, *nd*, *ng*, *nǧ* (=*ng* as in *strange*), though probably not *rm*. Original short vowels were also sometimes long in monosyllables, especially when final. Some examples of original short vowels with long quantity at the beginning of ME. times are *hwā* (*hwō*) 'who,' *hē* 'he,' *bī* 'by,' *nū* 'now'; *wēl* 'well,' Scotch 'weel[1],' *hōl* 'hole'; *ōld* (*ald*) 'old,' *cōmb*, *ēnde* 'end,' *bīnden* 'bind,' *hōrd* 'hoard,' *gōld*, *sūnd* 'sound as of body,' *būnde* 'bound.'

NOTE 1.—Lengthening had not taken place in Old English before consonant groups made up of a liquid or nasal and a voiceless consonant. In French words, however, *u* before *nt*, *ns* (*nce*), shows similar lengthening in ME., as in *cōunt*, *mōunt*, *ōunce*, *flōunce*, &c.; so also OF. *e* before *st* in some words, as *bēst* 'beast,' *fēst* 'feast.' Lengthened before *lt* in *cōlt*, *bōlt*, *mōlten*, and before *lst* in *bōlster* occurred in late Middle or early Modern English.

NOTE 2.—Sporadic shortening occurs very early, as in Orm's *tenn* 'ten,' *annan* 'anon,' while in late ME., the fifteenth century, it was more common, especially before dental consonants, as *rĕd*, *drĕd* 'dread,' *lĕt* 'permit,' *wĕt*, *hŏt* (OE. *hāt*), *brĕth* 'breath,' *dĕth* 'death,' *nŏne*.

73. During the Middle English period OE. short *a*, *e*, *o* were lengthened in open syllables, as in *rāke* 'rake,' *nāme*, *schāme* 'shame,' *wēfen* 'weave,' *mēle* 'meal,' *hōpen* 'hope,' *hōse* 'hose, trousers.' Examples of Norse words showing similar lengthening are *tāken* 'take,' *dāsen* 'daze,' *scēren* 'scare'; French words, *fāce*, *grāce*, *cēsen* 'cease,' *apēlen* 'appeal,' *rōse*, *clōsen* 'close.' Lengthening did not take place, however, when the following syllable was weak, as *ī* (*ȳ*) in *penȳ* 'penny,' *hevȳ* 'heavy,' *bodȳ*. When the following syllable consists of a short vowel and *l*, *r*, *n*, or *m*, in French words *le*, &c.,

[1] Cf. Horstmann, 'Anglia, Beiblatt,' xiii, 16.

the lengthening sometimes occurred, sometimes not. It would be resisted naturally by the strong tendency to syncopation of *e*, especially in inflexional forms; but some cases of certain lengthening are *wē̆sele* 'weasel,' *ē̆ven*, *nāvele* 'navel,' *crādel* 'cradle,' *ō̆ver*, *stō̆len*. Borrowed words follow the same rule, lengthening sometimes taking place, sometimes not. Some French words with certain lengthening are *stāble*, *tāble*, *nō̆ble*.

74. Lengthening of OE. short vowels in open syllables did not affect OE. *i*, *u*, or *o* for *u*, as in *hipe* 'hip,' *ȝiven* 'given,' *sune* (*sōne*) 'son,' *numen* 'taken,' *cōmen* 'come.' But English words which had developed forms with *e* for OE. *i* (*io*) show lengthening of *e*, as in *clē̆ven* 'cleave, adhere' (OE. *cliofian*), *lē̆nen* 'lean' (OE. *hlionian*), *wē̆ke* 'week' (OE. *wiocu*, *weocu*). In all these cases the ME. forms with *e* no doubt rest on OE. forms with *e* (*eo*), as often in Mercian. On the other hand, *i*, *u* in French words are long in open syllables in ME., as are *a*, *e*, *o*. Examples are *crīen* 'cry,' *bīble* 'Bible,' *brībe*, *desīren* 'desire,' *avōw*, *prōw*, *crōune* 'crown.' In these cases perhaps OF. *i*, *u*, because of their close quality, associated themselves with English *ī*, *ū*, rather than with *ĭ*, *ŭ*, and thus assumed long quantity.

Note 1.—Lengthening of OE. short vowels in open syllables does not, in general, belong to the twelfth century, though there are some evidences that it may have begun in this period. It was clearly operative in the first half of the thirteenth century, and by the middle of the century was complete. In accordance with this principle OE. vowels in open syllables are not marked long in early Midland or Southern selections, even though the phonology seems to imply lengthening in some cases. Northern selections are all later than the change indicated, and therefore show lengthening in all cases.

Note 2.—Later shortening no doubt accounts for such forms as show short vowels in Modern English, as *rot*, *knock*, *crack*, *lap*, ME. *rō̆ten*, *knō̆ken*, *crāken*, *lāpen*. Sometimes also analogy accounts for the change, as in MnE. *sweat*, vb. by analogy of the preterit with short vowel, ME. *swette*.

75. Compensatory lengthening also occurred in Middle English, as in the case of the *i*, *u* vowels, by the vocalization of a following consonant. Examples are *Ī* from *ic* (*ik*), *sīe* 'sty' (OE. *stigu*,

early ME. *stige*), *rīe* 'rye' (OE. *ryge*), *stīle* (OE. *stigel*), *fūel* (*fōwel*) 'fowl' (OE. *fugel*), *sōw* (OE. *sugu*) 'sow.'

SHORTENING

76. At the close of the Old English period, OE. long vowels and diphthongs, whether in simple or compound words, were usually shortened before long, that is doubled, consonants and before consonant groups, except those which had caused lengthening of short vowels and therefore preserved the quantity of long vowels (§ 72). Examples under the various heads are as follows:

(*a*) Before long, that is doubled, consonants, *lĕdde* 'led,' *sprĕdde* 'spread,' *hătte* 'called,' *fĕll*, *hĭdde* 'hid,' *hătter* 'hotter.'

(*b*) Before more than two consonants, *hĕrcnen* 'hearken,' *ĕrnde* 'earned,' *lĕrnde* 'learned.'

(*c*) Before two consonants, not those groups which preserved long quantity, *fĭlþe* 'filth,' *hĕlþe* 'health,' *kĕpte* 'kept,' *slĕpte* 'slept,' *lăst*, *brĕst* 'breast,' *sŏfte* 'soft,' *sŏhte* 'sought,' *tăhte* 'taught,' *lĭht* 'light,' *lĭhten* 'make light,' *drŭhþe* 'drought,' but dialectal 'droughth,' *lĭttle*, *Wĕdnesday*, *clĕnsen* 'cleanse,' *brĕmmil* (*brĕmbel*) 'bramble,' *slŭm(e)ren* (*slŭmbren*) 'slumber,' *ever*, *everȳ*.

(*d*) Before two or more consonants in compounds, *chăpman* 'merchant,' *Ĕdward*, *shĕphērde*, *wĭsdōm*, *fĭflȳ*, *gŏshawk*, *clĕnlȳ* 'cleanly,' *hŭsbonde* 'husband,' *hŭswīf* 'hussy, housewife.'

NOTE 1.—The short vowel is often replaced by the long under the influence of analogy. Thus, in inflexional forms, the shortened vowel of the genitive singular and the plural, as *dĕvles*, is replaced by the long vowel of the nominative-accusative singular, *dēvel*, becoming *dēvles*. On the other hand, the short vowel of the genitive and plural sometimes replaced the long in the nominative-accusative, as in *mŏþer*, *brŏþer*, *ŏþer* 'mother, brother, other.' For a similar reason there is variation in quantity in compounds, as *sūþdāle* 'south part,' *sōþfast* 'soothfast,' *hōmward* 'homeward,' *mēknesse* 'meekness,' *wīslȳ* 'wisely,' with long vowels by analogy of the uncompounded *sūþ*, *sōþ*, *hōm*, *wīs*.

NOTE 2.—Variations in quantity are also found before certain consonant groups, as *st*, before which the long vowel often remains, as in *gāst* (*gōst*) 'ghost,' *prēst* 'priest,' *Crīst* 'Christ,' *lēste* 'least.' But if a third consonant follows *st*, the vowel is regularly short, as in *wrăstlen* 'wrestle,' *crĭstnen* 'christen,' *thĭstle*, *fŏstren* 'foster,' *blŏstme* 'blossom,' yet *ēstren* 'easter.' Modern

English shows many cases of shortening, as *hest*, *breast*, *fist*, *list*, *dust*, *rust*. Before OE. *sc*, ME. *sh* (*sch*), a long vowel is preserved by Orm in *flȝsh*, though not in *wesh* 'washed.' Short vowels are common before *sh*, as in Modern English *flesh*, *mesh*, *wish*, *rush*.

77. Long vowels and diphthongs were sometimes shortened when one or more syllables with strong secondary stress followed the accent. Examples are *hălidaȝ* 'holiday,' *hĕring* 'herring,' *stĕrop* 'stirrup,' *nŏþing* 'nothing,' *fĕlawe* 'fellow' (ON. *fēlagi*). Before the syllable *ī* (*ȳ*) there is variation, shortening occurring sometimes as in *rĕdȳ* 'ready,' *sŏrȳ* 'sorry,' *ănȳ* (*ĕnȳ*) 'any,' while in other cases the long vowel is retained, as in *īvȳ*, *wēȝrȳ* 'weary,' *grēdȳ* 'greedy,' *hōlȳ*.

NOTE.—Here also analogy may counteract the operation of the rule, as in such words as *frēdōm*, *rīdȝre* 'freedom, rider,' where the long vowel is due to the influence of the uncompounded words *frē*, *rīden* 'free, ride.'

78. Before the consonant groups which usually preserved vowel length (§ 72), original short vowels remained short or were shortened, when followed immediately by (*a*) another consonant, as in *hŭndred*, *chĭldren*; (*b*) a syllable having strong secondary stress, as in *wŭrþī* 'worthy,' *ĕrþlȳ* 'earthly'; (*c*) a syllable made up of a short vowel and *l*, *r*, *n* (though not usually inflexional *n*), or *m*, as in *gĭrdel*, *wŭnder*, *ălderman*, *sĕlden* (*sĕldom*) 'seldom.' In cases under (*c*) frequent syncope of the short vowel before the liquid or nasal is presupposed, so that shortening would be due to the same influence as in cases under (*a*). In some words two of the above influences were operative at the same time, as in *wĭlderness*, *ălderman*. Inflexional *en* did not usually affect the preceding vowel, but the vowel remained long when *n* was dropped.

79. The vowels *i*, *u*, before *ng*, though long in early ME. as shown by the orthography of Orm, were short from the middle of the thirteenth century, as in *þĭng* 'thing,' *tŭnge* 'tongue.' Many cases of shortening before consonant groups also appear, especially in later Middle English. Shortening is most common before *ng*, *rn*, *rl*, *rþ*. Some examples of these are Orm's *ȝerrne* beside *ȝĕrne* 'desire,' *turrnenn* 'turn.'

NOTE.—Analogy doubtless accounts for many forms, as *frend* 'friend,' by influence of *frendlȳ*, *frendship*.

THE VOWELS OF SYLLABLES WITHOUT PRINCIPAL STRESS

80. In syllables bearing strong secondary stress, Middle English vowels usually retain the quality of their Old English originals, as *fredōm*, *Godhēd*, *handsum*. The same is usually true of prefixes, as in *arīsen* 'arise,' *forlǭren* 'forlorn,' *upbǭren* 'upbear' (cf. *tō*, § 82). On the other hand, in suffixes and prefixes *o* and *u* before a nasal sometimes suffer change in quality, the first becoming *a* or *u*, the second *i*, partly no doubt under the influence of analogy. Thus the suffix *ung* (*lung*) of OE. nouns became *ing* (*ling*) in Middle English, and the prefix *on*, except the privative prefix, became *an* (*a*). The privative prefix *on*, as in OE. *onlūcan* 'unlock,' became *un*, perhaps under the influence of the negative *un* so commonly used. The greatest change in vowel quality from Old to Middle English, however, is in the case of inflexional endings. In these every OE. unstressed *a*, *o*, or *u* become *e*, a far reaching change which affected all classes of words.

NOTE 1.—The change of OE. *a*, *o*, *u* to *e* is often carried out in early Midland, as in 'Chronicle' and 'Ormulum,' but not so fully as later.

NOTE 2.—Nth. shows complete change of *ung* (*lung*) to *ing* (*ling*), and of the privative prefix *on* to *un*, but otherwise the prefix *on* usually remains *on* (*o*). The change of vowel quality in inflexional endings has not affected the Nth. present participle, which ends in *and* (*e*). In early Sth. the suffix *ung* (*lung*) sometimes remains unchanged, but later regularly appears as *ing* (*ling*), as in other dialects. The other changes in vowel quality already mentioned are carried out, and in addition the ending of the present participle has become *inde* in most cases before the further change to *inge*, § 163.

81. Owing to the changes in stress many syllables in Romance words which formerly bore principal stress retain a strong secondary accent (cf. § 15). These also usually retain their original quality. In a few cases already mentioned in the preceding sections, certain changes in quality do appear, *ēre* instead of *ēre* from OF. *aire* (§ 33), *werrīen* beside *werreien* (§ 39), *eu* instead of *eu* in *beutē* 'beauty' (§ 58), but it is not certain that such changes may not be due to

some other influence, as the following *r* in the first case. Similarly Romance nouns in *-ion*, which occasionally seem to show variation between *-ōn* and *ǭn*, may have suffered by the same influence. The OF. prefixes *des*, *en*, *mes* often appear as *dis*, *in*, *mis*, the latter no doubt partly under the influence of OE. *mis*. Examples are *distroien*, *inclǭsen*, *mischeef* 'destroy, inclose (enclose), mischief.' OF. initial *e* sometimes becomes *a* as in *ascāpen* 'escape,' *anointen* 'anoint,' *asunīen* 'excuse.'

82. The second elements of compounds, when containing a long vowel or diphthong, usually retain original length under strong secondary stress, as *Alfrēd*, *barfōt* 'barefoot.' The same is often true of suffixes bearing secondary stress, as *hōd*, *hēd* which are regularly long, and *dōm*, *ǣre*, *lǣs*, *līke* (*līche*) which are sometimes short, however. The length is proved by doubling of vowels, as in *hood*, *heed*, *doom*, *lees*, and the occasional shortening by such spellings of the suffixes as *dam*, *less*. Prefixes with original long vowels show shortening in Middle English, as *arīsen* 'arise,' *tofǭre* 'before,' from OE. prefixes *ā* and *tō*. In the case of *tō-* the spelling clearly indicates occasional shortening, as well as variation in quality; cf. *tegadere* (*gidere*), *teday* 'together, today.' Yet these are on the whole rare forms, and the probability is that the prefix *tō-* was associated with the preposition-adverb *tō* and was usually regarded as long. The same is true of vowels in words unstressed in the sentence, as *an* (*a*), *but* (*bot*), *anȳ* (*enȳ*), *nat* (*not*), *þoh* (though), *us*, *sholde*, *wolde*, *wel* beside *wēl*, &c.

NOTE.—In early Midland the long quantity is retained, as shown by Orm's orthography in *hād*, *dōm*, *lāes* 'less,' *wīs* 'wise,' *rēde*, *līk* (*līke*) 'like,' often *ǣre*, though the latter is sometimes short. So also *ī* (*ȳ*), from OE. *ig*, as in *hālīȝ*, *bodīȝ*, and the second elements of compounds as *æd*(*d*)*mōdnesse*, where *mōd* is long as indicated by the single *d* following the vowel. Shortening of vowels in words unstressed in the sentence is also shown in Orm's *butt*, *us*, *þohh*, *ann*(*a*), &c.

83. Other changes in unstressed syllables are those called syncope, apocope, aphæresis, elision, contraction, the occurrence of which follows general laws that may be briefly summarized. To begin

with, every vowel or diphthong, whether medial or final, makes a syllable except as noted hereafter. But unstressed syllables, that is those without principal or secondary stress, often show syncope of medial *e*. Thus, after an accented syllable, medial *e*, whatever its origin, is syncopated, as in *chirche* 'church,' *hevne* 'heaven,' *lernde* 'learned,' *ōpnen* 'open.' In many such cases, however, the syncopated *e* is restored by analogy of unsyncopated forms, as *chireche*, *hevene*, *lernede*, *ōpenen*. The same is true of medial *e* between a principal and secondary stress, as *trewelȳ*, *sēmlȳ*, *Englǭnd*, beside *trewelȳ*, *sēmelȳ*, *Engelǭnd*. Syncope of any other vowel than *e* is rare, though *i* in the suffixes *iȝ*, *ish* is sometimes lost.

NOTE.—Early Midland shows the same syncope in many cases, as in Orm's *effne*, *errnde*, *gaddrenn*, *heffne*, *oppnenn*, &c., while in other forms the loss has not occurred.

84. Medial *e* is sometimes syncopated or partially lost in certain endings. Syncopation frequently occurs before final *r*, *l*, *n*, as in *silv(e)r*, *hung(e)r*, *striv(e)n̈*, *līl(e)l*. It is especially common between a vowel or liquid and *n*, as in the past participles *drawn*, *slayn*, *born*, *torn*. In past participles of weak verbs, the ending *ed* shows similar syncopation sometimes, owing to such a change in Old English (Sievers, 'Gr.,' § 406), though unsyncopated forms also occur. Syncopation seldom occurs in the endings *est*, *eþ* (*eth*) of the present indicative; in *es* (*is*) of the genitive singular, the nominative plural, and the adverb; in *en* of the infinitive, the plural of verbs, and in other forms except the past participle of strong verbs; in *ed* of preterit singular and plural, and *er*, *est* of comparative and superlative in adjectives. Syncope often occurs in words unstressed in the sentence, as *arn* for *āren* 'are,' *wiln* (*woln*) for *willen* (*wollen*) 'will.'

NOTE 1.—In early Midland syncope is less common except in the verbal endings *est*, *eþ*(*eth*), in which it is sometimes found. Compare Orm's *seȝȝst* 'sayest,' *seȝȝþ* 'sayeth.'

NOTE 2.—In addition to general agreement with Midland, Nth. shows syncope in *es* of nouns and verbs. Sth., while also showing general agreement

with Midland, differs in a much more frequent syncopation of *e* in the *est*, *eþ* (*eth*) verbal endings, as in Old English.

85. When medial *e*, of whatever origin, is followed by a syllable with another unstressed *e*, syncope or apocope often takes place. This gives rise to double forms, such as *aþel*, *aþ(e)le* 'noble'; *adys*, *ad(e)se* 'adze'; *ever*, *ev(e)re* 'ever'; many also in inflexion, as *loved*, *lov(e)de* 'loved'; *hevens*, *hev(e)nes* 'heavens.' In the last half of the fourteenth century, apocope of *e* is preferred in preterits of weak verbs, the latter thus agreeing with the past participle. Upon this apocope and consequent agreement between preterit and past participle, rests the regularity of Modern English forms.

NOTE 1.—In early Midland the same variation between syncope or apocope also occurs, as in Orm's *heffne* 'heaven,' *aþell* 'noble,' but *lufede* 'loved.'

NOTE 2.—In Nth. the final *e* is usually silent or has suffered apocope. Sth. seems to prefer syncope of medial *e*. Chaucer makes frequent use of both forms for the same word, no doubt for metrical purposes.

86. Apocope of final *e* is common in Middle English, and materially affects the spoken forms of words, whether indicated or not by the orthography. It occurred earliest in polysyllables after a strong secondary stress, as in *almess*, OE. *ælmesse* 'alms'; *lafdiȝ* (*lę̄vdiȝ*), OE. *hlāfdige* 'lady'; and in inflected forms of such words as *drinking*, *wurþiȝ* 'worthy,' *twentiȝ* 'twenty.' On the other hand, some such words occasionally assumed an inorganic *e* in the nominative by analogy of other forms, instead of suffering apocope in the latter, as *tīþende* 'tidings,' *twīfālde* 'twofold.' Similar apocope often occurred in words not bearing principal stress in the sentence, as in pronouns, unstressed adverbs and conjunctions, and auxiliary verbs. Examples are *mȳn*, *hir*, *swich* (*such*), *whan*, *þan* (*than*), *shul*, *myȝt*, beside forms with *e* in which the spelling is often merely traditional. Total or partial apocope, that is slurring, also occurs in poetry when unstressed *ne*, *þē* (*thē*), *a* precede words beginning with a vowel, as proved by the metre.

NOTE 1.—In early Midland, syncope is already clear from such cases as Orm's *laffdīȝ*, *drinnkinng* and others; unstressed words as *an*, *all*, *mīn*, *pīn*; and such evidences of elision as *þarrke* 'the ark.'

NOTE 2.—In the earliest Nth. apocope has taken place even more commonly than in other dialects; compare § 6. Sth. is far more conservative, with the exception of Kentish, which does not differ from Midland.

87. After syllables bearing principal stress, final *e*, of whatever origin, tends to disappear in Middle English, sometimes through analogy, later especially through general weakening. At the beginning of the period, the beginning of the thirteenth century, final *e* is usually retained except as already noted. About 1300 it remains or disappears at the pleasure of the writer, as shown by poetry, and in late Middle English, that is about the middle of the fifteenth century, it is wholly lost. Texts written in the northeast Midland district show disappearance of final *e* before those of the southeast Midland.

NOTE 1.—In early Midland final *e* was still preserved as a rule, though lost in words not bearing sentence stress, and in some inflexional forms as the dative of nouns.

NOTE 2.—In Nth. final *e* was wholly lost by the middle of the fourteenth century, a century before it disappeared entirely in Midland. It remained longest in the adjective inflexion, less commonly in nouns and verbs. In Sth., except Kentish, final *e* was kept somewhat longer than in Midland, though sometimes silent in the fourteenth century. In Kentish it is generally kept as late as the middle of the fourteenth century. In the dialect of London it is also retained somewhat longer than usually in Midland, as shown by the writings of Chaucer, in which, though often silent, it may still form a syllable for metrical purposes at the pleasure of the writer.

88. Elision of weak final *e* occurs before a word beginning with a vowel or weak *h*, that is *h* in unstressed words as *hē*, *him*, or those with French *h*. Examples are numerous in poetry, as indeed they are rarely found in Old English verse. The commonest OE. elision, that of *e* in the negative *ne*, remains to Middle English in such forms as *nas* for *ne was*, &c. In Middle English also *e* of *þē* (*thē*) is often elided. This is shown by such early Midland forms as *þemperīce* 'the empress' in the 'Chronicle,' and *þarrke* 'the ark' in the 'Ormulum.' Common also is elision of *o* in unstressed *tō*, as in *toffrenn* 'to offer,' *tunnderrgān* 'to undergo' from the 'Ormulum.' Rarely the *e* of the pronouns *mē*, *þē* (thee) also suffers elision, as in *thalighte* 'thee alight,' *dō mendȳte* 'do me endyte.'

89. Aphæresis, that is loss of an initial vowel (or syllable), sometimes occurs in unstressed words or syllables. Examples in unstressed words are *hēt* for *hē it*, *wast* for *was it*. So also the unstressed vowel has disappeared in *rīsen* from OE. *ārīsan* 'arise,' *taunen* from OE. *ætēawnian* 'show,' *twīten* from OE. *ætwītan* 'twit.' Similarly *i* (*y*) from OE. *ge* usually suffers aphæresis in Northern and Midland, though often not in Southern. Old French *e* before *sc* (*sk*), *sp*, *st* is often lost as in *spȳen* 'espie, spy,' *spȭuse*, *stāt* 'state,' *stȭrīe* (*stȭrȳ*), *scāpen* 'escape.' Aphæresis of *a*, *e* under other circumstances also occurs sometimes, as *prentys* 'apprentice,' *semblee* 'assembly,' *nuien* (*noien*) 'annoy,' *pistle* 'epistle.' Aphæresis of an unstressed syllable in Romance words occurs in *sample* < *ensample*, *buschment* < *embuschment*, *fenden* < *defenden*, *sport* < *desport*, *struien* < *destruien*.

90. Contraction of vowels brought together by vocalization of a medial consonant sometimes occurs. Examples are *dēl* for *dēvel*, *ēl* for *evel*, *yēde* (*yōde*) from OE. *ge-ēode*, *whēr* for *whe*þ*er*, *ȭr* (*or*) for *ou*þ*er* 'or,' *ēr*, *nēr* for *ever*, *never*.

The Consonants

91. The Middle English consonant system may be best exhibited by a table such as the following:

	Stops.		Continuants.				
			Spirants.				
	Voiceless.	Voiced.	Voiceless.	Voiced.	Semivowels.	Liquids.	Nasals.
Labials	*p*	*b*	*f*	*v*	*w*		*m*
Dentals	*t*		*þ* *s* *sh*	*þ* *z*		*l* *r*	*n*
Palatals	*k′*	*g′*	*ɟ* (*h*)	[*ɟ*(*h*)]	*ɟ*, *y*		
Gutturals	*k*	*g*	*ɟ*	*ɟ*			*ŋ*

To these must be added the breath consonant *h*, and the combinations *hw* (MnE. *wh* as in *what*), *ch* (=*tsh*) as in *church*, *g*, *j* (=*dzh*) as in *wāge*, *judge*. *x* is but a sign for *ks*.

NOTE.—The pronunciation of most of the consonants is the same as in Modern English. The palatal stops *k'*, *g'* are pronounced as in *kid*, *get*, compared with the guttural stops in *cot*, *got*. The voiced *þ* (*ð*, *th*) is sounded as in *the*. *Sh* (*sch*) represents the simple consonant sound in *she*, no voiced variety being found in Middle English. The palatal spirant *ȝ* (*h*) has the sound of *ch* in Ger. *ich*, the voiced *ȝ* (medial and only in early Middle English) may be pronounced as *y* in *yet*. The guttural spirants represent respectively the Ger. *ch* in *auch*, and *g* in *sagen*. *ŋ* represents the sound of *n* before *k* or *g*.

92. The general relations to the Old English consonant system may be briefly summarized; compare also a table similar to the above in Sievers, 'Gr.,' § 170. In the first place, most consonants in Middle English correspond to similar ones in Old English on the one side, and in Modern English on the other. Especially is this true of the semi-vowels, liquids, and nasals, as well as of the dental and labial stops and spirants. The most radical changes that have taken place have affected the palatal and guttural stops and spirants. In addition to this there are of course some minor changes within the limits of each consonant, which will be noticed as they occur. Owing to the general similarity between the Old, Middle, and Modern English consonant systems, however, it seems best here to presuppose knowledge of the Old English system, and to consider mainly those changes that are necessary for an understanding of Middle English proper. In considering the consonants, the order will be that of the table above, the stops first, and next the various classes of continuants, spirants, semi-vowels, liquids, and nasals[1].

[1] This order is chosen as best exhibiting the essential character of the consonants on the physical, rather than the physiological side. The physiological terms, as guttural, palatal, &c., and the descriptive terms, as semi-vowels, liquids, &c., are also freely employed because of their long acceptance and their general value.

THE STOPS

93. The Middle English voiceless and voiced stops of labial and dental varieties, *p–b*, *t–d*, correspond so nearly with those of Old and Modern English that little space need be given to them. Each is a stable consonant in the main, and subject only to such changes as may affect any consonant at different times; see § 112 f. It is worthy of note that the voiceless labial *p*, which was rare initially in Old English, became common owing to the great number of French words introduced in Middle English. The geminated labial *bb*, when medial as in a few OE. words, was replaced by *v* under the influence of the numerous forms in which *v* (OE. medial *f*) occurred in Old English. Examples are *hāven*, OE. *habban* 'have,' *liven*, OE. *libban* 'live,' *hēven*, OE. *hebban* 'heave.' For *d* under grammatical change see § 116.

NOTE.—The dialects in general agree. In late Nth., final unstressed *d* was often unvoiced to *t*, and this has remained to modern Scotch. In Sth. geminated *bb* as above was not replaced by *v*. Early Sth. shows unvoicing of final unstressed *d* as in *asket* 'asked,' *tōwart* 'toward,' *inempnet* 'named,' but later *d* was restored by analogy of other forms.

94. The ME. voiceless palatal stop *k* (as in *kid*) springs from the OE. palatal stop *c* (*k*), from Norse *k*, and in a few words from OF. *c* (=*k*). It occurs initially before the OE. palatal mutated vowels *ę*, *ē* < *ō*, sometimes *ǣ*, usually before the OE. guttural *y̆* (from *ŭ*) which had become palatal *i̯* by unrounding, before *e*, *i* in words from Norse (rarely Old French), and sometimes by analogy of guttural vowels in allied forms. Examples of native words are ME. *kemben* 'comb,' *Kent*, *kēne* 'keen,' *kei* (OE. *cǣge*) 'key,' *kichen* (OE. *cycene*) 'kitchen,' *kīte* (OE. *cȳta*) 'kite.' A considerable number of Norse words also occur, as *ketel* 'kettle,' *kevel* 'bit, clamp, gag,' *kide* 'kid,' *kindlen* 'kindle,' *kirke* 'church.' On the other hand, OF. words with palatal *k* are limited by rare occurrence of OF. *c* (=*k*), except before gutturals, but compare AN. forms with *e* < *ē* by monophthonging of OF. *ue* (§ 35, 20), which account for ME. *keveren* beside *coveren* 'cover,' and *keverchef*

(*kerchef*). Here belong also ME. *kenet* 'hound,' *kenel* 'kennel,' *kitōn* 'kitten.' By analogy of guttural *k* in preterit and past participle, the palatal stop *k* (*c*) took the place of ME. *ch* in the present of *kerven* 'carve.' Medially the ME. palatal stop *k* appears as above, as well as before OE. *a*, *o*, *u*, which had become ME. *e* in unstressed syllables (§ 80). Examples are *tāken*, *māken*, *āker* 'acre.' By analogy of the indicative present third singular of certain verbs as *sēkeþ*, *wirkeþ*, palatal *k* often appears in the infinitive and other present forms, as *sēken*, *wirken*. In *chiken* 'chicken,' *īsikel* 'icicle,' the *k* is doubtless due to the OE. inflected forms, as *cycnes*, *īsikles* in which OE. *c* would remain *k*. The combination *s* + palatal *c* (=*k*) always indicates borrowing, as in *skil* 'reason,' *skin*, *skēre* 'clear.'

NOTE.—The examples of palatal *c* (*k*) are increased for the Nth. dialect by the lack of palatalization of OE. *c* to *ch* (§ 110, n. 2). Examples are *mikel* 'much,' *swilk* 'such,' *līk* 'like,' *sēk* 'seek,' *wirk* 'work,' and many others. For Nth. *s* < OE. *sc*, cf. § 102, n. 2.

95. The voiced palatal stop *g* springs from OE. guttural *g* before *y̆* which had become palatal *ĭ* by unrounding, from OF., ON. *g* before palatal vowels, and is sometimes due to analogy of allied forms with guttural *g*. Examples of initial *g* in native words are *gilden* 'gild,' *gilt*, 'guilt,' *girden* 'gird'; in those from Old French, where *g* represents earlier *gu*, *gīle* 'guile,' *gimelot* (*gimbelet*) 'gimblet,' *giterne* 'guitar'; in Norse, *gēre* 'gear,' *gēren* 'do, make,' *gil* 'gill of a fish,' *gest* 'guest,' the last supplanting the native English word. Analogy of *g* in preterit and past participle accounts for *geven* (*given*) 'give' beside English *ȝeven* (*ȝiven*) and *ginnen*, *beginnen* 'begin,' while *geten* beside *ȝeten* 'get' is of Norse origin. Medially, palatal *g* appears in the combination *ng* (=*ŋ*+*g'*) before palatal vowels, as *singen* (OE. *singan*) 'sing,' *gengen* (ON. *genga*) 'go,' *genge* (ON. *gengi*) 'company.'

96. The Middle English guttural stops *c* (*k*)–*g* correspond to OE. (ON.) guttural stops *c*–*g* in Teutonic words, or to similar sounds in Old French. Both guttural stops occur before conso-

nants and the guttural vowels *ă, ę̆, ŏ, ŭ*. For the stops *c* (*k*)–*g* which occur before OE. *ę̆, y̆*, sometimes *ǣ* when due to mutation, see § 94, and for OF. *ch* before *a, au*, see § 110. The guttural *c* (*k*) also appears in the combination *x* (=*ks*), *qu* (=*kw*), *nc* (*k*) =*ŋ*+*k*, and the stop *g* in the combination *ng* (=*ŋ*+*g*), occasionally in gemination (*gg*). Guttural *c* (*k*) initially in Teutonic words may be illustrated by *clǭþ* 'cloth,' *cāre* (*kāre*), *cōld, cōle* 'coal,' *cumen* (*cómen*) 'come,' and in Romance words by *crȳen* 'cry,' *cas* (*cāse*) 'case,' *colūr* 'colour,' *cūrs* (*cōurs*) 'course.' In Romance words the stop *c* (*k*) before *a, au* indicates learned origin or Norman-Picard dialect, in which vulgar Latin *k* did not become *ch* (as in Central French). Examples are *cas* (*cāse*), *cause, cāge, carpentēr*, and the doublets *catȩ̄l, cachen* 'catch,' *calīce, caritē*, beside OF. *chatel, chācen, chalīce, charitē* (cf. § 110). Medially the guttural stop *c* (*k*) appears before a guttural vowel in syllables having principal or secondary stress, and finally after a guttural vowel. Between a guttural and palatal vowel, the stop must have varied between guttural and palatal quality as it belonged to the syllable with one vowel or the other. The combination *s*+guttural *c* (*k*) always indicates borrowing, either from Norse as in *scōwl, scull, bask*, or Old French as in *scōrn, scūren* 'scour,' *scoūte* 'scout.'

NOTE.—In Nth. the number of guttural *k*'s is increased by the fact that OE. *c* did not become *ch* in that dialect (§ 94, n.). Examples are *caf* 'chaff,' *calk* 'chalk.' For the combination *sk* < OE. *sc* in unstressed words, see § 102, n. 2.

97. The guttural stop *g* initially may be exemplified by *grēne* 'green,' *galle* 'gall,' *gōld, gōd* 'good,' *gume* 'man' in Teutonic words, and *glǭrīe, governen* 'govern,' *gōute* 'gout' in Romance. In Teutonic words borrowed by vulgar Latin initial *w* became *gu* (=*gw*), and this combination became guttural *g* in Old French, as in ME. *garde, garisōn, regard*, while remaining *w* (except before *i*) in Anglo-Norman, and therefore appearing in the doublets *warde, warisōn, reward* (§ 106). Before *i*, *g* < Teut. *w* appears in *gīden* 'guide,' *gīse* 'guise,' *gīle* 'guile,' *begīlen* 'beguile.' Medially and

finally guttural *g* occurs under the same circumstances as guttural *k* above. In a few cases ME. guttural *g* represents late OE. geminated, that is long *g* (*gg*), as in *dogge* 'dog,' *frogge* 'frog,' *hogge* 'hog,' *stagge* 'stag.' Usually, however, medial or final guttural *g* implies borrowing, as in *draggen* 'drag,' *big*, *egg*, *legg* from Norse. ME. *sugre*, beside *sucre* 'sugar,' shows voicing of OF. *c* to *g*. ME. *garden* represents Picard *garden*, beside OF. *jardin*.

THE SPIRANTS

98. The spirants *f–v* (*f*) in Teutonic words occurred under the same conditions as in Old English and to-day. The voiceless *f* appears initially in a stressed syllable, as in *fader* 'father,' *beforen* 'before'; medially when preceding a voiceless consonant or in gemination (*ff*), as in *shaft*, *offren* 'offer'; finally, as in *wulf*, *self*. In Romance words *f* was regularly voiceless and retained this quality whether in stressed or unstressed syllables. Examples of Romance words in which *f* appears contrary to the rule in Teutonic are *cómfort*, *trufle*.

99. The voiced spirant *v* (sometimes written *f*) in Teutonic words springs from OE. (ON.) *f* in voiced company, as *ofer*, *given* (*ȝiven*, *yiven*) 'give'; occasionally also in inflected forms with final *f* in nominative singular, as *stāves* from *staf* 'staff,' *calves* from *calf*. To these were added in Middle English many *v*'s, both initial and medial, from Old French. As initial *v* did not occur in Teutonic words, except rarely in those borrowed from the Sth. dialect, Midland words with initial *v* or with *v* beginning a stressed syllable are of Romance origin, as *vīne*, *devīne*.

NOTE 1.—In early Middle English *f* was still written for *ȝ*, as in the OE. period; cf. *iāfen* (=*ȝāven*), *hāfen* 'have,' &c.

NOTE 2.—Nth. agrees with Midland. In Sth. the number of initial *v*'s was largely increased by the voicing of initial *f*, as in *vader* 'father,' *vihten* 'fight.' Cf. Kt. selections especially.

100. The spirants *þ* (*ð*, *th*), voiceless and voiced without distinction of written sign, occurred in Teutonic words under exactly the

same circumstances as *f–v*, and need not be especially illustrated. While in Modern English some borrowed words have the voiceless *th*, the voiced and voiceless spirants usually indicate Teutonic origin. In late Middle English *th* came to be written for OF. *t* (*th* = *t*), as in *thę̄atre*, *thę̄orīe*, *thēme*, *thrǭne*, *authōur* 'author,' and these were doubtless still pronounced with *t* until, in Modern English, they acquired the spirant sound by influence of the spelling. There is no evidence that initial *þ* (*th*) had become voiced in pronominal words, as *þē*, *þat*, *þis*, *þū*, &c., or final *þ* in unstressed *wiþ*. Initial unstressed *þ* in pronominal words often becomes *t* after *d*, *t*, sometimes *s* by back assimilation, as in *and tat* 'and that,' *at tat* 'at that,' *is tat* 'is that.' Occasionally ME. *þ* interchanges with the voiced stop *d* in medial position, as *cōude* beside *cōuþe* 'could,' *aforden* 'afford,' and finally in the preterit *quod* 'quoth.' After a voiceless spirant, *f*, *s*, *ȝ* (*h*), ME. *þ* becomes *t*, as in *þefte* 'theft,' *leste* (OE. *lǣs þē*) 'lest,' *heiȝte* 'height.'

NOTE.—Nth. agrees with Midland. The parallel voicing in Sth. of initial *f*, *s*, sometimes *wh* (*hw*) to *w*, implies voicing of *þ* in similar position, but the orthography gives no evidence of it.

101. The spirants *s*, voiced and voiceless, but usually without distinction of written sign, are parallel to *f-v* in their occurrence in Teutonic words. The voiced spirant is usually written *s*, *z* ordinarily indicating *ts* in Middle English. *z* is found, especially when final in unstressed syllables, as in WMl. forms like *sīdez* 'sides,' indicating the voicing of *s* in this position. Both spirants were largely increased from Old French sources. OF. voiceless *s* (written *s* (*sc*) *ss*, or *c* before *e*, *i*) occurs in all positions and need not be especially illustrated. Medial OF. *iss* usually became ME. *isch* (*issh*) as in *finischen* (OF. *finir*, *finiss-*) 'finish,' *perischen* 'perish,' *anguische* 'anguish.' OF. voiced *s* is found in such words as *prisūn* 'prison,' *trę̄sōn* 'treason.' In *cilesen* 'citizen' the voiced spirant has been inserted, perhaps by analogy of similar *sen* (*zen*) forms. For Picard *ch* in words with OF. *c* = *s* cf. § 110.

NOTE.—In general Nth. agrees with Midland, but note Nth. *s* for Ml. Sth.

sch (*sh*), § 102. For OF. *sīre* Nth. has *schir* sometimes. Teutonic initial *s* was voiced in Sth., as shown especially by initial *z* in the Kentish 'Ayenbite of Inwit.'

102. The Middle English spirant *sch* (*sh*) is a characteristic ME. sound springing from OE. *sc* in all positions. Examples are *schaft* (*shaft*) 'shaft,' *schort* (*short*), *asche* 'ash,' *Englisch*, *fisch* (*fish*) From such strictly English words with ME. *sch* (*sh*) are to be separated the Norse and OF. borrowed words with *sc* (*sk*); but medial OF. *iss* gave ME. *isch* (*ish*) as already noted. In the pronoun *schē* (*scho*, *sho*) ME. *sch* springs from OE. *s*+*y* (< *e*) in unstressed *sēo* (*seō*) from OE. *sēo*. In *asken* 'ask' (OE. *ascian*, *axian*), *sk* probably represents a late metathesis of *x*. *Scotland*, *Scottisch*, *scōl* 'school,' are doubtless learned forms, the first two influenced by the Nth. *Scot*, the last by OF. *escole* or mediæval Latin *scola*. There was no corresponding voiced spirant in Middle English.

NOTE 1.—In 'Chronicle,' *sc* is still written for ME. *sch* (*sh*), but Orm writes *sh* after long, *ssh* after short vowels.

NOTE 2.—Nth. agrees with Ml. in the main, but OE. *sc* in unstressed words and syllables became *s*, as in *sulen*, *sal*, *suld*, 'schulen, shall, should,' *Inglis*, 'English,' *Scots* 'Scotch.' In Sth., sometimes Ml., *ss* (*s*) are written for the spirant sound.

103. The Middle English palatal spirants *ȝ* (*h*)–*ȝ* (*ȝh*), voiceless and voiced without much distinction of signs, are exclusively of Teutonic origin and of limited occurrence. They cannot occur initially because the corresponding OE. palatals *c*, *g* had become ME. *ch*, and the semivowel *ȝ* (*y*) respectively. They are also limited, in medial and final position, by their vocalization to form diphthongs (§ 47), or *ī*, *ū* (§ 75). While this vocalization was probably complete in early Middle English, as shown by the spelling of Orm (§ 71, n.), the signs were still sometimes written as *hēh* (*hēg*, *hēȝ*) 'high,' *leȝen* (*leȝhen*) 'lay.' Otherwise the voiceless spirant *ȝ* (*h*) is found only medially in the OE. combinations *ht*, *hþ*, which both became *ȝt*, written also *ht*, *gt*, *ct*, *ȝht*, *ght*, less commonly *ȝth*, *gth*, *cth*. Examples are *riȝt* (*riht*) 'right,' *kniȝt* (*kniht*) 'knight,' *driȝten* (*drihten*) 'lord,' and *heȝte* (*heȝt*, *hiȝt*) 'height,' *siȝte* 'sight,'

with change of *þ* to *t* in accordance with § 100. ME. *ȝt* is sometimes written *st* by confusion of these high-pitched palatal sounds. The OE. combination *rhþ* had become *rþ*, as in *mirþe* 'mirth,' and such forms as ME. *fē* 'money, fee,' spring from OE. forms which had lost the final *h*, as *fēo* beside *feoh*; cf. also ME. *þur* beside *þurȝ* (*þurh*) 'through.' The voiced palatal spirant *ȝ* (*ȝh*) is found medially as above until fully vocalized after vowels to form diphthongs, after *r* or *ĭ* to *ī*, as *mirīe* (OE. *myrge, myrige*) 'merry,' *birīen* (OE. *byrgan*) 'bury,' *sīþe* (OE. *sigeþe*) 'scythe,' *drīe* (OE. *drȳge*) 'dry.' Finally in stressed syllables the voiced spirant had probably become unvoiced, but in unstressed *iȝ* (OE. *ig*) the voiced spirant also became *ī*, as in *bodī* (*bodȳ*), *hōlī* (*hōlȳ*). ME. *belī* (OE. *belg, belig*) no doubt comes from the form with parasitic *i*, compared with that with *g* which gave *w* after *l* as in ME. *belwe* (*belou*) 'bellows.'

Note 1.—In early Ml. the voiceless spirant is still spelt *h* as in Old English, and the voiced spirant *g*, *ȝh* as in Orm.

Note 2.—The dialects agree in general, though in Nth. OE. *ht* remained guttural as in Northumbrian. Sth. has a larger number of palatal spirants, owing to the larger number of palatal vowels in that dialect, as *leȝhen* (*liȝhen*) from WS. *hleihan*, beside Ml. *lahhen* (*lauhwen, lauwen*) from OM. *hlæhhan* 'laugh.' Sth. also retains *ī* from OE. *ig* in the present tense of OE. weak verbs of the second class (§ 6).

104. The Middle English guttural spirants *ȝ* (*h, ȝh*)–*ȝ* (*ȝh*), voiceless and voiced without much distinction of signs, are also exclusively of Teutonic origin and of as limited occurrence as the spirants. They cannot occur initially because not so appearing in Old English, OE. guttural spirant *g* having become a guttural stop before ME. times. While occurring in medial and final position they later became vocalized after vowels to form diphthongs (§ 47), or the voiced spirant became *w* after *l, r*, after *ŭ* was absorbed (§ 75). The voiceless *ȝ* remained voiceless throughout the period only in the OE. combination *ht*, as in *taȝte* (*tauhte*) 'taught,' *douȝter* 'daughter,' *fouȝten* 'fought,' *þouȝt* 'thought.' When final it remained voiceless until finally vocalized in the preceding diphthong which had been formed (§ 66). Examples are *þoh* (*þouȝ*)

'though,' *slōh* (*slouȝ*) 'slew,' *þurh* (*þurȝ*) 'through.' The OE. medial voiceless guttural *hh* became voiced and developed as the voiced guttural through *ȝh* to *w*, as in *lauȝen* (*lauwen*) 'laugh,' *couȝen* (*couwen*) 'cough.' The preterit singular *saw* has its *w* from the plural *sawen* (OE. *sāwon*), and *þorw* (*þorow*) developed from *þoruȝ* beside *þurȝ*. The medial voiced spirant *ȝ* remained as *ȝ* (*ȝh*) until vocalized after vowels to form diphthongs, after *ŭ* to strengthen the preceding vowel, after *l*, *r*, to *w*. Examples are *draȝen* (*drawen*) 'draw,' *ōȝen* (*ōwen*) 'owe,' *fuȝel* (*fūel*, *fōwel*) < OE. *fugel* 'fowl,' *folȝen* (*folwen*) 'follow,' *sorȝe* (*sorwe*) < OE. *sorh*, f., 'sorrow.' When final, the original voiced spirant had become voiceless and fell in with that sound as above. Examples are *douȝ* 'dough,' *plouȝ* 'plow.' Such forms as ME. *schō* 'shoe' rest upon the forms which had lost final *h* in Old English, as *scō* beside *scōh* (cf. § 103).

NOTE 1.—In early Ml. *h* was still written for the voiceless guttural, and *g* (*gh*, *ȝh*) for the voiced: cf., however, *halechen* for more regular *halȝen* (*halwen*) 'saints', *halechede* for later *halȝede* (*halwede*) 'hallowed' of 'Chronicle.'

NOTE 2.—The dialects agree.

THE CONSONANT *H* AND ITS COMBINATIONS

105. The ME. breath consonant *h*, essentially a spirant of palatal or guttural character, occurs in general as in Old and Modern English, that is only in initial position, or initially in the second element of compounds. It had been regularly lost, however, from the OE. initial combinations *hl*, *hr*, *hn*, as in *lēpen*, 'leap,' *ring*, *nute* 'nut,' and sometimes also initially in unstressed words as *it* for OE. *hit*. In unstressed syllables it regularly disappeared as in *fostrild* < OE. **fōstorhild* 'nurse.' OF. *h*, in words of Teutonic origin, falls in with OE., ON. *h*, as in *hardī*, *harneis* 'harness.' In words of Latin origin *h*, though frequently written by scribes, was not pronounced. This accounts for the double forms *eremite–hermit*, *abit–habit*, *onōur–honōur*. The OE. combination *hw* was retained in Middle English, though early written *wh* as by Orm, sometimes with the characteristic Nth. *qu* as in 'Genesis and Exodus.'

Occasionally *wh* (*hw*) is reduced to *h*, as in *hō* for *whō* (§ 106). In OE. *hēo* initial *h* became *ȝh*, as in *ȝhē*, *ȝhō* 'she.'

NOTE.—Nth. agrees with Ml. as to *h*, but uses *qu* (*quh*) for *wh*, showing a strengthening of the original *hw* to *kw*. Sth. shows a more frequent loss of initial *h*, as in *ā* for OE. *hē*, *hēo*, and *abben* 'have.' In Kt. the orthography *lh*, *nh* for OE. *hl*, *hn*, perhaps indicates a retention of the original combinations.

THE SEMIVOWELS, LIQUIDS AND NASALS

106. The ME. semivowel *w*, which appears only in Teutonic words, though a few are from Romance sources, springs from OE. *w*, though limited by its vocalization to form diphthongs (§ 47). To words with OE., ON. *w* were added a few from Anglo-Norman which had retained an original Teut. *w* instead of the usual OF. *gu*. Examples of the latter are *waiten* 'wait,' *wāfre* 'wafer,' *wāge*, *walop*, *werre* 'war,' *werreien* (*werrīen*) 'make war.' Teut. *w* was not retained before *i* and hence an OF. *g* appears in such words as in § 97. In Teut. words *w* disappears between an initial consonant and a following *o* (*u*), as in *tō* beside *twō* 'two,' *þǭng* beside *þwǭng* 'thong,' *sōte* beside *swōte* 'sweet,' *hō* beside *whō* (*hwō*) 'who.' In *sǭ*, *alsǭ*, the disappearance of *w* was earlier than in the other words, perhaps as early as late Old English (cf. § 42). *w* also disappears initially in a few unstressed words of common breath groups, as *nas* for *ne was*, *nēre* for *ne wēre*, *nille* for *ne wille*, *nǭt* for *ne wǭt*, *God ǭt* (*God wǭt*). OE. *cw*, ON. *kv* (=*kw*) were generally written *qu*, under French influence, and with them fell in OF. words with *qu* together with a few with OF. *c* (=*k*)+*ue*, *ui* as *quēre* 'choir,' *squiēre* (*squīre*), *squirel*. For AN. *queint*, *aqueinten* see § 53. Similarly *gu* (=*gw*) springs from OF. *g*+*ue*, *ui* in *anguische* 'anguish.'

NOTE.—The dialects agree, but Nth. also has *qu* (*quh*) for OE. *hw*, and *w* was preserved in *twā*, *quā*, &c. in which OE. *ā* had not become *ǭ* (*ō*).

107. The ME. semivowel *ȝ* (*y*) is exclusively of Teutonic origin, and springs from the OE. semivowel *g* as in *ȝēr* 'year,' *ȝǭke* 'yoke,' *ȝung* (*ȝǫng*) 'young,' or the OE. palatal spirant *g* as in *ȝēlden*

'yield,' *ȝȩ̄rd* (*ȝard*) 'yard.' Before *i*, OE. *g* is sometimes vocalized as in *icchen* (OE. *gyccean*) 'itch,' *Ipswich* (OE. *Gipeswīc*), *Ilchester* (OE. *Gifelceaster*), and in unstressed *īsikel* (OE. *īsgicel*) 'icicle.' Similarly in the OE. unstressed prefix *ge* also became *i* (*y*), though regularly preserved only in Sth. ME. *ȝ* sometimes develops initially before a palatal vowel as in *ȝork* (OE. *Eoforwīc*), *ȝōu* (*ȳōu*) from OE. *ēow*, the latter perhaps by influence of *ȝē* (*ȳē*) 'ye.'

108. The ME. liquids *l*, *r*, do not differ in general from their Teutonic or OF. originals. In OE. words *l* disappears before and after *ch*, as in *swich*, *such* (OE. *swilc*) 'such,' *which* (OE. *hwilc*), *ȩ̄ch* (OE. *ālc*) 'each,' *müche* beside *müchel* (OE. *mycel*), *wenche* beside *wenchel* (OE. *wencel*). The combination *rld* sometimes becomes *rd* in *werde* 'world.' The OE. metathesis of *r* remains in Middle English, and some new examples of metathesis appear as *fresch*, *preschen* 'thresh.' Double forms of some OF. words are found, owing to OF. double forms as *marbre–marble*, *purpre–purple*.

NOTE.—In Nth., *l* before *k* does not disappear as before the corresponding *ch* in the other dialects; cf. *swilk*, *quilk* 'such, which.'

109. The ME. nasals *m*, *n*, *ŋ* (=*n* before *k* or *g*) do not differ from their Teutonic and OF. originals, so far as preserved. OE. final unstressed *m* in inflexional endings had become *n* in late Old English. ME. final unstressed *n* in similar position or in unstressed words tends to disappear throughout the period. This affects especially the *en* of verbal endings, and such unstressed words as *an* (*a*), *ō̤n* (*ō̤*), *nō̤n* (*nō̤*), *būten* (*bute*, *but*) 'but.' Some stressed words show a similar loss at times, as *morwe*(*n*), *gāme*(*n*), *maide*(*n*), *ō̤pe*(*n*), *seve*(*n*).

NOTE.—In Nth. infinitives no final *n* was received from OE. times. This indicates the beginning of the tendency to lose inflexional *n*, a tendency that was more pronounced and rapid than in Ml., far more than in Sth.

THE AFFRICATIVE COMBINATIONS

110. The ME. combination *ch*, as in *church* (*tsh*), occurs in native and Romance words. In native words it springs from the OE.

palatal stop *c* (*cc*) before palatal vowels, as initially in *chirche, chīld, cheste, cherl, cherren* 'turn,' *chēse* 'cheese,' *chaf* 'chaff'; medially in *wrecche* 'wretch,' *spēche* 'speech.' After a palatal vowel OE. *c* became ME. *ch* when final in unstressed words and syllables, as in *ich* 'I,' *which, swich* 'such,' *Ipeswich* 'Ipswich'; sometimes in stressed words as *lich* 'body,' *pich* 'pitch,' *French,* owing to inflected forms with OE. *c* in medial position or possibly in some cases to analogy of corresponding verbal roots. By analogy also *ch* appears in *chōsen,* pp. for OE. *coren.* On the other hand *ch* is replaced by the palatal stop *k* in the infinitive and other present forms of some verbs by analogy of the pres. 3rd sg., which had no *ch*; examples are *sēken* beside *sēchen* 'seek,' *wirken* (*wirchen*) 'work.' In Romance words *ch* appears before *a, au* in those from Central French, before *e, i* in those from the Picard dialect, beside NF. *c* (*k*) for the former and *c* (=*s*) for the latter. Examples are *charme, charge, chaunge, chaumbre, prȩchen* 'preach,' *aprōchen* 'approach,' *cherischen* 'cherish,' *chisel, chimeneie* 'chimney.' For doublets with NF. *c* (=*k*) beside OF. *ch,* and OF. *c* (=*s*) beside Picard *ch,* see §§ 96, 101. For OE. *s* + palatal *c,* see § 102.

NOTE 1.—In 'Chronicle,' *c* is still written for OE. *c,* but Orm uses *ch* which continues to prevail.

NOTE 2.—As Old Northumbrian suffered no palatalization of OE. *c,* Nth. has *c* (*k*) in place of Ml. Sth. *ch*; cf. *caf* 'chaff,' *calk* 'chalk,' *mikel, ik* 'I,' *quilk* 'which,' *swilk* 'such,' *sēk* 'seek,' *wirk* 'work' (§ 94, n.). Sth., on the other hand, shows a greater number of *ch* forms, owing to the greater number of palatal spirants in West Saxon; cf. Sth. *chēld* (*chald*) 'cold' from WS. *ceald,* with Ml. Nth. *cȩld* from OAng. *cāld,* and *mickel* with *ch* after an original guttural vowel.

III. The ME. voiced combination *g* (*j*), as in *judge* (*dzh*), corresponding to the voiceless *ch* above, occurs also in native and Romance words. In native words it springs only from the OE. voiced palatal stop *g* in gemination (*cg*) or in the combination *nğ* (=*n* + *dzh*). Examples are *briğğe* 'bridge,' *eğğe* 'edge,' *heğğe* 'hedge,' *senğen* (*singen*) 'singe,' *crinğen* 'cringe.' As the OE. combinations *cg, nğ* could not occur initially, most such words with *ğ,*

j (=*dzh*) are of Romance origin. OE. *cg* (*cge*) in the present tense of verbs was displaced by analogy of the 3rd sg. in which *ǧ* (=*dzh*) had not developed (cf. § 165). Examples are *seien* (*seyen*) 'say,' *leien* 'lay,' *bȳen* 'buy.' In Romance words ME. *ǧ*, *j* represents OF. *ǧ*, *j*, as in *gentil* 'gentle,' *general*, *geant* (*gīant*) 'giant,' *joie* 'joy,' *jęlōūs* 'jealous,' *engīn* 'engine,' *chargen* 'charge,' *juggen* 'judge,' *cāge*, *plegge* 'pledge.' In proper names with initial *I* (*J*) in the MSS. it becomes difficult to determine accurately, especially in Biblical names, whether they are from Old French or adopted directly from Latin with initial *I*=*Y*. It seems safe to assume that OF. Biblical names only gradually displaced the OE. and Latin, such words as *Jēsus*, *Jǭhan* (*Jǭhn*), *Jāmes*, *Jordan*, *Jerusalem* being adopted before the more unusual as *Jōsēph*; cf. Orm's *Josæp*, and *Īosēp* (*Īosēph*, *Ōsēp*), *Iācōb* (*Ācōb*) in 'Genesis and Exodus.'

NOTE.—Nth. shows no palatalization of OE. *cg*, *ng* and the voiced guttural stop therefore appears, as in *brig* 'bridge,' *lig* 'lie,' *big* 'buy,' *meng* 'mingle, disturb.' Sth. retains the voiced affricative in verbs, as *seǧǧen* 'say,' *büǧǧen* 'buy.'

GENERAL CHANGES AFFECTING CONSONANTS

112. Certain general changes which affect consonants more or less regularly may best be treated together. The most important of these for Middle English, Vocalization, has already been explained as it affected the voiced spirants *ȝ* (*h*), rarely *v*, and the semivowel *w* in the formation of diphthongs (§ 47). Similarly the voiced spirant *ȝ* after *ĭ*, *ŭ* was completely vocalized, causing compensatory lengthening when the preceding vowel was not long (§ 75); cf. also the vocalization of *ȝ* in the suffix *iȝ* (§ 103). Attention has also been called to the vocalization of the initial voiceless spirant *ȝ* (=*y*) in § 107. Other consonants are more stable, but medial *v* is also vocalized in *hāst*, *hadde*, and in OF. *pōvre* (*pōre*) 'poor.' The final voiceless *f* suffers the same change in the OF. ending *if*, as in *bailȳ* beside *bailif*, *jolȳ* beside *jolif*. Medial *k* is completely vocalized in *māde* from *makede*, and *d* in

dīst for *didest*. The ME. ending *we*, from OE. *we*, *ge*, during the period vocalizes to a syllable written *ou* (*ow*), as in *sorow* < earlier *sorȝe* (*sorwe*). Virtual vocalization in breath groups accounts for such forms as *nille* (*ne wille*), *nas* (*ne was*), *nō̜t* (*ne wō̜t*), § 106. The opposite tendency, Consonantizing, rarely occurs, and then only initially, as *ȝork* (OE. *Eoforwīc*) 'York,' *ȝōw*, § 107.

NOTE.—Nth. carries the vocalization of *k*, *v* still further, as in *tā* 'take,' *tān* 'taken,' *mā* 'make,' *hā* 'have,' *gīs* 'gives,' and allied forms.

113. Voicing and Unvoicing. The most noteworthy voicing of consonants in Middle English is the regular shift of initial *f*, *þ*, *s*, to *v*, voiced *þ*, *z* in Sth. English. In Ml. the most common shifting was that of *s* to *z* in unstressed inflexional syllables of late Middle English, as indicated by the occasional spelling with *z*. OE. medial *hh* must also have become voiced before developing into the second element of the diphthongs, § 104. Besides these, voicing is rare, as perhaps of OE. *c* (*k*) to *g* in **bedgen*, *beggen* if from OE. *bedician*, and OF. *c* to *g* in *sugre* 'sugar,' *graunten* 'grant.' OF. *t* became *d* in *jupardȳ*, *dīamaund* 'diamond,' *waraund* 'warrant.' Unvoicing of *d* to *t* occurs frequently in preterits of weak verbs ending in *ld*, *rd*, *nd*, *vd*, as *bilte* 'built,' *girte* 'girded, girt,' *wente* 'went,' *lefte* 'left,' and sometimes in past participles, as *nempnet* 'named,' *glifnit* 'glanced,' § 93 n. Unvoicing of initial OF. *b* to *p* appears in *putten* (OF. *bouter*), *purse*, *pudding* (OF. *boudin*).

114. Assimilation and Dissimilation. Assimilation is common, as in all periods. Thus *f* becomes *m* before *m*, as in *wimman* (*wumman*) from OE. *wīfman*, *lemman* from OE. *lēofman*; *n* becomes *l* in *elle* < *elne* 'ell,' *mille* < *milne* (OE. *mylen*, *myln*). By partial assimilation the dental nasal *n* becomes the labial nasal *m* before a labial, as *hemp*, OE. *henep*, *brinstō̜n* < ON. *brennistān*, *noumpīre* < OF. *nonpere*, *comfort* < OF. *confort*. Assimilation also accounts for the disappearance of *h* in *mirþe* < OE. *myrhþe* 'mirth,' and *c*, *g* before *þ*, *t* or *d* in *lenten* (*leinten*) < *lengten* 'spring, lent,' *strenþe* (*streinþe*) < *strengþe*, *dreinte* < *drencte* 'drenched,' *meinde* < *mengde* 'mingled.' *þ* in the combination *rþf* is assimilated and

disappears in *Norfolk*, and *þ* is assimilated to *f* in *Suffolk*, to *s* in *Sussex*, OE. *Norðfolc*, *Sūðfolc*, *Sūð Seaxan*. The stops are more stable, but *t* is assimilated to *s* in *blessen* < OE. *bletsian*, *best* < *betst*, *last* <**latst*, *Essex* < *East Seaxan*; *d* becomes *s* in *gossip*, *gospel* < *Godsib*, *Godspel*, and *n* by back assimilation in *winnow* < *windwian*. Back assimilation after *d*, *t* (*s*) also accounts for *atte* < *at þē*, *and tat* < *and þat*, *is tat* < *is þat*, *wǭst ū* < *wǭst þū* (§ 100). It is virtual assimilation also, when such a form as *such* results from *swilch* through *swuch*. Dissimilation has often been limited to such substitution of *l* for *r* as in OF. *purple* < *purpre*. So ME. *pilgrim* for *pelerin*. But a spirant has also been dissimilated to the corresponding stop, as *þ* to *t* in the combination *f*, *s*, *ȝ* (*h*) +*þ*. Examples are *þefte* < OM. *þēfþe* (WS. *þīefþe*), *leste* < OE. *þȳ lǣs þe*, *nostrils* < *nosepirles*, *siȝte* < OE. *gesihþ*, *heiȝte*, OM. *hēhþu* (WS. *hīehþu*), *sleiȝte* < ON. *slǣgþ*, 'sleight,' (cf. § 100). A voiced spirant *þ* after the continuant *r*, especially before *r*, *n* (*en*), has become the voiced stop *d* as in *murdre* < OE. *morþor*, *afȳrden* < OE. *aforðian*, *burdene* beside *burþene* < OE. *byrþen*.

NOTE.—In the dialects such examples as Nth. *s* from OE. *sc* in unstressed words and syllables must be set down to assimilation; cf. § 102, n. 2.

115. Metathesis is occasional in Middle English. Thus *sk* in the verb *asken* (OE. *acsian*, *axtan*) probably springs from a late metathesis of *ks*, since OE. *sc* would have given *sch* (*sh*). Metathesis of *r* appears in *fresch* 'fresh,' *þreschen* 'thresh,' but probably depends on OE. forms in *gras*, *rinnen* (*rennen*) 'run.'

116. Substitution. One consonant seems to be substituted for another, though the cause is not clearly apparent, in *cōūde* < *cōūþe* 'could,' *quod* < *quoþ* (OE. *cwæð*). In the latter *ð* must first have become voiced in the breath group between vowels, and the substitution in both cases may be due to the preference for a stop between continuants. By analogy of forms without grammatical change (Sievers, 'Gr.,' § 233), consonants due to this influence are regularly replaced by their originals, but a few forms remain, as the

verb *sēþen–soden* (pt. and pp.), or the past participles used as adjectives, *lǭren* (*lorn*), *forlǭren* (*forlorn*), *cǭren* (*ycǭren*) 'chosen.'

117. Ecthlipsis. The loss of a consonant through assimilation has been illustrated. The most common case of loss under other circumstances is that of final unstressed inflexional *n*, mentioned in § 109. Under a similar influence final *n*, which is not inflexional, is also lost in some cases. Examples are *a*(*n*), *ǭ*(*n*), *morwe*(*n*), *seve*(*n*), *ǭþe*(*n*), *tǭ*(*n*) 'toe.' OF. final *t* also disappears in *plai*(*t*) 'plea,' *peti*(*t*) 'petty.'

118. Addition. A stop consonant is frequently added finally in word or syllable after a continuant, the kind of stop depending upon the preceding, and its voiceless or voiced character on the following sound. Thus the labial *p* intrudes after *m* at the close of the syllable in *nempnen* 'name,' *emptȳ*, *dampnen* 'condemn,' *solempne* 'solemn,' *tempten* 'tempt,' the first two from native, the last from Romance sources. Similarly before a vowel or voiced consonant *b* is intrusive after *m* in *þumbe* (OE. *þūma*), *crumbe* (OE. *cruma*), *schambles* (OE. *sceamol–sceamles*) 'shambles,' *brembel* 'bramble,' *þimbel* 'thimble,' *slumbren* 'slumber.' The voiceless dental *t* is added at the close of the syllable after the dental *s* in *listnen* 'listen,' *glistnen* 'glisten,' *behest* (OE. *behǣs*), *anȝēnst* 'against,' *bitwixte*, and finally after the dental nasal *n* in the French derived *fīraunt*, *fẹ̄saunt* 'pheasant,' *parchment*, *pāgeant*. The voiced *d* is added after *n*, *l* in voiced company, as *þunder*, *kindrẹ̄d*, *expōunden*, *jaundīce*, *alder* (OE. *alra*) 'of all,' and after final *n* in *sōund*, *riband*, no doubt because of more frequent use before a vowel or voiced consonant. Less commonly a liquid *l*, *r* is added after a stop or spirant, as in *principle* (OF. *principe*), *manciple*, *syllable*, *chronikle*, *philosǭphre* (OF. *philosophe*), *provendre* (OF. *provende*). *N* (*y*) has also been added in *niȝtingāle*, *messengēr*, *passengēr*. By incorrect breaking of the breath group an initial *t* has been added in *tǭ* < *þat ǭ*(*n*), *tōþer* < *þat ōþer*, an *n* in *newt* < *an ewt*, *nǭnes* (*nǭnce*) < *þen ǭnes*.

INFLEXIONS

Introductory

119. As compared with Old English, most changes in the inflexion of Middle English words may be summed up under the one head of simplification of forms. This simplification, too, far from being exceptional in the history of language, has taken place naturally and gradually under the influence of phonetic change and analogy. How far it had gone during the period may be briefly shown. The noun, in general, had come to have but a single form for all plural cases, and usually but two forms for the singular; the strong adjective and adjective pronoun but one form in the singular, and one in the plural; the verb also shows a reduction in the number of personal endings and in the number of tense and mode forms. The former influence, phonetic change, had made dissimilar inflexional endings indistinguishable; the latter influence, analogy, had caused the substitution of more common forms for the less common, until they had wholly displaced the latter. Both influences were strong in late Old English, and their strength was no doubt increased by the unusual linguistic conditions after the Conquest. From this time, for a considerable period, English was less frequently the language of government and of a national literature, while to a less extent it was influenced by the use of Anglo-Norman on English soil and by the gradual introduction of new words from foreign sources.

Note.—This is not intended to imply that there was any considerable influence of the foreign language on English inflexions. Not a single inflexional form in the English of common people to-day cannot be accounted for by influences within English itself, and foreign influence should be assumed only beside the native, or when the latter fails to explain the phenomenon. While inflected tense and mode forms were reduced in number as mentioned above, it must be remembered that the compound forms with auxiliaries were increasing.

120. Specifically the most general phonetic change affecting

inflexions from Old to Middle English was the weakening of *a*, *o*, *u* in unstressed inflexional endings to *e*, as in most other unstressed syllables (§ 80), and their consequent union with *e* already common in inflexion. This had followed upon the late OE. weakening of unstressed inflexional *m* to *n*, as in the dative plural of nouns, adjectives and disyllabic pronominal forms. Except in the earliest period also, all words show syncopation of final *e* before words beginning with a vowel or *h*, and frequent loss of final unstressed *n*. These were followed during the period by the total loss of final unstressed *n* in inflexional endings, and in late Middle English by final unstressed *e*, whether belonging to the inflexion or the stem. Owing to these phonetic changes, which obliterated many of the differences between the different genders—for example the only difference between weak masculines and feminines in nouns and adjectives—the distinctions of grammatical gender in nouns, adjectives, and adjective pronouns was quickly lost. The most general analogical change was the substitution of the more common for the less common form. Specifically it may be pointed out that in the noun the accusative is probably the case-form of greatest frequency and therefore of greatest influence, and in the adjective and adjective pronoun, owing to the loss of grammatical gender, the neuter prevailed over masculine or feminine. In the personal pronouns, the more frequent use of the dative had almost obliterated the accusative before the close of Old English. In verbs, the third person of the indicative was more common than the other present forms and prevailed in its root over the others (§ 165). In the strong verbs the four stems tended to become three, either the preterit singular prevailing over the plural, or the preterit plural and past participle, when alike, prevailing over the singular preterit.

NOTE.—It is significant of the influence of accusative and oblique case forms that nouns adopted from Norse appear in the stem form found in the accusative singular, and nouns and adjectives from Old French almost invariably have the form of the OF. oblique case singular rather than the nominative singular. Cf. § 136.

121. That grammatical gender had disappeared in early Middle English is clear from the entire loss of feminine forms for the adjective and the pronoun (except the personal), and the almost entire loss of inflexional forms based on feminine and neuter originals in Old English. Even when inflexional forms which belong to older feminines or neuters are preserved, as an occasional genitive singular and a plural in *e*, and some neuter plurals without ending, there is little reason to suppose that they were regarded as connected with grammatical gender. They are more probably forms which had not yet fully assumed the common inflexion, based on that of masculine nouns. As an added evidence of the loss of grammatical gender, it may be noted that no foreign-derived noun assumed grammatical gender in English. When grammatical gender disappeared, natural gender took its place, as in Modern English. One of the earliest evidences of this is the assumption of natural gender by such words as *wīfe*, *maiden*, which were neuter in Old English, and *woman*, *lēfman* 'leman' which were masculine.

NOTE.—As usual, what is said above applies to the Midland dialect. In Nth., the loss of inflexional final *n* had taken place even in OE. (Sievers, 'Gr.,' § 276, anm. 5; § 354, 2, 363, 1, 365, 2), as indeed the inflexions had been simplified in other respects. The result is that Nth. shows greater simplification than Midland even in the earliest period. Sth., on the other hand, was somewhat more conservative than Ml. It retains a greater number of inflexional forms, especially in the earliest period, as also some distinctions of grammatical gender. Even in Sth., however, natural gender begins to prevail over grammatical, as shown by feminine pronouns referring to such words as *wumman*, *lēofman* 'woman, leman.' Further details of dialectal usage will be given under inflexions of nouns, pronouns, &c.

THE NOUN

122. Most Middle English nouns are inflected in one of two ways, according as they do or do not end in a vowel in the nominative singular. Both these declensions are based on the forms of OE. masculine strong *o* (*a*)-stems, as shown by the plural in *es* (OE. *as*). These OE. masculines were assisted in their

influence, as in genitive singular, by similar neuter stems, which did not differ in inflexion except in the nominative-accusative plural. The normal endings of these two declensions are as follows:

		I.	II.
Singular,	N. A. V.	—	*e*
	G.	*es* (*s*)	*es*
	D.	— (*e*)	*e*
Plural,	N. A. G. D.	*es* (*s*)	*e*

123. Instead of *es*, *is* (*ys*) also occurs occasionally, especially in Northern. Forms in parentheses are less common. In addition, there are occasional forms, based on the retention of older inflexional endings, which are so uncommon as not to be considered normal in any sense. Such are plurals without ending, based on the OE. neuter plural of long stems, and those in *en* (*e*), based on the OE. weak declension. The first usually belong to declension I, the second to declension II, and will be treated under those heads (§§ 127, 132).

NOTE 1.—Early Midland, as represented in the 'Chronicle' and Orm, differs mainly in the somewhat more common retention of older forms, as of dative singular in *e*, and of plural forms without ending or with *en* (*e*). In the selection from the 'Chronicle,' out of the first twenty-one plurals of different words, sixteen have *es* (*s*), three have no ending, one has *en*, and one *e*. This does not include two umlaut plurals, which of course belong under § 133.

NOTE 2.—In Nth. of the earliest times from which a literature is preserved, these two declensions have largely become one, owing to the loss of final *e*, the change being completed by the middle of the fourteenth century. Nth. also commonly shows syncopation of *e* in the plural, less commonly in the genitive singular. A Nth. genitive without ending, especially in proper names, sometimes occurs. Sth., on the other hand, preserves many plurals in *en*, based on the OE. *an* of weak nouns, while there are some other peculiarities, as follows. The dative singular of declension I more commonly preserves *e*, and the genitive plural sometimes has forms in *e* or *ene*. Nouns of declension II, besides having *en* in N. A. D., have *en* (*ene*) in the genitive plural. Texts differ considerably in these respects, and plurals in *en* are gradually replaced by *es* (*s*) forms. For instance, out of thirteen different plurals in the selection from the 'Poema Morale,' ten end in *es*, two in *en*, one in *e*. In the 'Juliana' selection, out of the first twenty different plurals, eleven have *es* (*s*), eight *en*,

one no ending. In the selection from 'Robert of Gloucester,' out of the first twenty-four plurals, nineteen have *es* (*e*), three *en*, and one no ending.

124. The First declension includes nouns ending in a consonant or in any vowel except unstressed *e*. It may be illustrated by *dōm* 'doom,' *dai* 'day,' *trē* (*trew*) 'tree,' *tǭken*, as follows:

SINGULAR

N. A. V.	*dōm*	*daȝ*, *dai*	*trē* (*trew*)	*tǭken*
G.	*dōmes*	*daȝes*, *daies*	*trees*, *trewes*	*tǭknes*
D.	*dōm*[*e*]	*daȝ*[*e*], *dai*[*e*]	*trē*, *trewe*	*tǭken* (*tǭkne*)

PLURAL

N. A. G. D.	*dōmes*	*daies* (*dawes*)	*trees*, *trewes*	*tǭknes* (*tǭkenes*)

125. To this declension belong most OE. *o* (*a*)-stems and long *wo*-stems; long masculine and neuter *i*- and long masculine *u*-stems, which had in Old English assumed the inflexion of *o*-stems in the main; some OE. *ā*-stems which had not assumed, from the accusative and other oblique cases, inorganic *e* in the nominative; and some anomalous nouns, as those having mutation, which had become regular by the loss of their anomalous inflexion. The few OE. *ā*-stems which did not assume inorganic *e* may have become masculine or neuter in Old English, as ME. *rērd* (*reord*) 'speech,' beside *rērde* (*reorde*). Special mention should be made of OE. feminine long *i*- and long *u*-stems, which had no inflexional final *e* in the accusative singular and show some variation between declensions I and II in Middle English. Their appearance without final *e* may be due to the influence of the accusative singular, possibly to change of gender and resulting change of inflexion, as in *wiȝt* 'creature,' *flōr* 'floor,' *werld*, *hand* (*hǭnd*). Those with final *e* may have assumed it in Old English (cf. Sievers, 'Gr.,' § 269, anm. 1), as *nēde*. Here belong OE. feminine long stems ending in a vowel, as *sǭ* 'sea,' *tǭ* 'toe,' *bē* 'bee,' *slǭ* 'sloe,' whether originally strong or weak. Such words, as all others ending in a long vowel, assume *s* only in gen. sing. and the plural.

126. It is impossible in a single table, except a very complex one, to represent all variations due to ME. orthography or other causes. The most prominent may be briefly mentioned. The ending of the genitive singular, as of the plural, is sometimes *is* (*ys*). Loss of *e* in the dative singular, common even in early ME., is increasingly frequent until that case becomes like the nominative-accusative, as in Modern English. In certain expressions, however, an OE. dative singular in *e* still survives. Examples are *on līve* (< *līf*) 'alive,' *tō bedde, tō wedde* 'for a pledge,' *for fēre* 'for fear.' Disyllabic stems in *el, en, er* often show syncopation of the root *e* when assuming an inflexional ending, as in *tōken* above[1]. Even when the spelling shows retention of the stem vowel, syncopation is usually to be assumed for the spoken form. Syncopation, often loss of inflexional *e*, occurs in polysyllables accented on the first syllable, as *pilgrimes, rivēres* (pronounced as if spelled *pilgrims, rivērs*) beside *humours, pilōurs* (*pelēr*) 'robbers.' The orthographic variations of words with new diphthongs, as *daȝ* (*daĭ*), are numerous, but will be clear by reference to the phonology. Thus 'Genesis and Exodus' has *daĭ* (*deĭ*), *dages* (*daiges, dais*) 'day, day's, dayes,' and a plural *dawes* is also found, based on the development of OE. *ag* to *aw* (§ 55). The latter has usually been displaced by a plural based on the singular, where OE. *æg* became ME. *aȝ* (*aĭ*). Occasionally, however, a new singular *daw* develops from the plural *dawes*. Stems ending in *f, þ, s* show voicing of these consonants before a vocalic ending, as in genitive (sometimes dative) singular and the plural. Only in case of *f* to *v*, however, is the voicing indicated orthographically.

127. Beyond those noted above, there are but few exceptions to the regularity of the common plural form. The most important is a plural without ending in the case of certain OE. neuters, or in words that have associated themselves with them. Examples are *folk, þing* 'thing,' *gēr* 'years,' *swīn* 'swine,' *hors* 'horses,' *shēp*

[1] Cf. Sievers, 'Gr.,' § 244.

'sheep,' *dēr* 'deer,' *nȩ̄t* 'neat cattle,' *wȩ̄pen* 'weapons.' Most of these gradually adopted the usual *es* (*s*) ending, though a few remain uninflected in the plural to modern times. Occasionally words which were not OE. neuters, as *fugel*, *fish* 'fowl, fish,' are uninflected in the plural when used in a collective sense, as in Modern English. Variation in the plural of the root finals *f*, *þ*, *s* has been noticed in the preceding paragraph.

128. Foreign derived words were adopted in the stem form or that of the accusative singular or oblique case when that differs from the stem. Thus ON. words do not appear with the nominative inflexional *r*, but with the accusative singular as *od* 'point,' *bol* (*bǭle*) 'tree-trunk,' *bark*, *garþ* 'yard,' *Orm*, ON. *oddr*, *bolr*, *bǫrkr*, *garðr*, *Ormr*. Similarly, where the OF. oblique case singular differs from the nominative, the former is regularly adopted, as in OF. *degrē*, *castel* (*chastel*), *dōl* (*dēl*) 'grief' < OF. *degrez*, *castels* (*chastels*), *duelz*. The apparent exceptions, so far as OF. words are concerned, probably represent differences in OF. usage as *tempest*, *poverte*, beside *tempestē*, *povertē*. Only in *armes* 'arms' was an OF. plural directly borrowed, and this the more easily because it agreed exactly with ME. plurals in *es*. Borrowed words generally assume the native inflexion in its entirety. Thus ON., OF. words regularly assume native endings, as the gen. and pl. *es* (*s*), though OF. nouns ending in *s* often remain uninflected as *cas* 'case,' *pas* 'pace, pass,' and proper names as *Ēnēas*, *Prīamus*, *Pērs* 'Pierce.' Occasionally other borrowed words, especially Biblical names, remain uninflected in the genitive singular, as *Adam soule*, *Dāvid lǭnd*, following mediæval Latin usage.

Note 1.—In early Midland some further traces of inflexion are found, as in the nom.-acc. pl. in *as* in the 'Chronicle' occasionally, and a gen. pl. in *e*, a dat. in *e* (*en*) rarely; cf. *wintre*, OE. *wintra* 'winters.' So Orm has a similar genitive in ȝ ch expressions as *allre kīnge king* 'king of all kings,' *dēofle follc* 'folk of devils.'

Note 2.—As already indicated (§ 123, n. 2), Sth. is much more conservative in inflexions than Midland or Nth., and retains many older forms, as *e*, in the dat. sg., *e*, *ene* (*en*) in gen. pl., *en* in dat. pl. Many nouns, also, which belong

to declension I in Ml., have assumed *en* in the plural in Sth., and hence belong to declension II. This is especially true of OE. short stem neuters and *ā*-stems.

129. The Second declension includes all nouns with final unstressed *e* in the nominative-accusative singular, and may be illustrated by *ēnde* (*ende*) 'end,' *helpe* 'help,' *soule* 'soul,' *þewe* 'habit, custom,' as follows:

Singular,	N. A. V.	*ēnde*	*helpe*	*soule*	*þewe* (*þeuwe*)
	G.	*ēndes*	*helpes*	*soules*	*þewes*
	D.	*ēnde*	*helpe*	*soule*	*þewe*
Plural,	N. A. G. D.	*ēndes*	*helpes*	*soules*	*þewes*

130. Here belong most OE. *jo* and short *wo*-stems; the majority of *ā* (*jā*, *wā*)-stems; short and many long feminine *i*-stems; short *u*-stems; the great body of weak nouns, which had early lost final *n*; and such others as had assumed inorganic *e* in the nominative singular. OE. feminines (sometimes masculines) ending in *g* (*h*), by influence of the oblique cases, assume *ȝe*, later *we*, as *sorȝe* (*sorwe*) 'sorrow,' *furȝe* (*furwe*) 'furrow,' *arwe* 'arrow,' while side by side a form with final *ȝ* (*h*) may exist, as *furȝ* (*furh*). OE. nouns ending in *f* assumed *ve* of the oblique cases, as *lēve* 'permission,' *glōve* 'glove.' OE. neuter *wo*-stems had no *w* in the nom.-acc. sg. or pl. and so do not assume it in Middle English, as *mēle* 'meal,' *smēre* 'ointment,' *tēre* 'tar.' OE. short feminine *wa*-stems assume *we* from the oblique cases, as *schadwe* 'shadow,' *sinwe* 'sinew,' and long stems show double forms sometimes, as *mēde*, *mēdwe* 'mead, meadow,' corresponding to forms with or without *w* in Old English. ME. *schāde* is possibly from OE. *scead* neut., and not *sceadu* the *wā*-stem. OE. short neuters with *e* from *u* in nom.-acc. pl. sometimes assumed *e* in the singular, as *blāde* 'blade,' *dāle*, *bēde* 'prayer,' *hōle* 'hole,' *dōre* 'door,' *ȝōke* 'yoke,' and a few masculines which may have become feminines, as *sēle* (OE. *seolh*) 'seal.' ME. *mēre* (*mare*) 'mare' is from OM. *mere* (WS. *miere*), not OE. *mearh*, masc. OE. masculines ending in *cg*

acquired inorganic *e*, perhaps under the influence of the greater number of such words which were feminine. Some original weak nouns have a plural in *en*, but, for the Midland dialect, are not sufficiently numerous to warrant treatment in a separate declension. Even when they have *en* plurals, *es* plurals are often found side by side with them.

131. A so-called genitive singular in *e* rarely occurs, but such forms may be better explained as essentially compounds. Examples are *helle pīne* 'hell punishment,' *chirche dure* 'church door,' *rōde cross* 'rood-cross.' All such words have originally, or have assumed, inorganic *e* in the nominative, so that the form is merely the uninflected one which so commonly enters into compounds, whether marked by a sign of union or not. In the dative singular, *n* is rarely added, more especially in rimes with forms regularly ending in *n*. As these occur mainly in south-east Midland texts of the earliest time, they may be due to the influence of the Sth. dialect, in which this peculiarity is more common (see Note 2 below), or they may be connected with the influence of the plural *en* forms.

132. The most important peculiarity of the plural is the retention of *en* (*n*) forms from the OE. weak declension, and the extension of this occasionally to nouns not originally weak. The whole number of such nouns is relatively small, and they decrease throughout the ME. period, until the only relics left in MnE. are *oxen*, rarely *eyen* in poetry, and *brethren*, *children*, *kine*, to which this ending has been extended. Examples in 'Gen. and Ex.' are *wunnen* 'customs,' *fēren* 'companions'; in 'Bestiary,' *willen* 'wishes,' *ēgen* 'eyes.' 'Gen. and Ex.' also shows the extension of this *en* to OE. strong nouns, as *cōlen* 'coals,' *treen* (*trēn*) beside *trees* 'trees,' *mēten* 'meats,' *stēden* 'places,' *sunen* beside *sunes* 'sons.' Owing to its early date and its south-east Midland dialect, the number of such forms in this poem is greater than in others, especially in rime, where the usage can hardly be relied on as showing the forms of ordinary speech. More rarely still, plurals in *e* are found, as in 'Gen. and Ex.' *elne* 'ells,' *senwe* 'sinew,' *fēre* 'companions.'

NOTE 1.—In early Midland a gen. sg. in *e* is occasional, as in Orm's *sāwle* 'soul's,' *frōfre* 'comfort's,' *asse* 'ass's,' *wicche* 'witch's.' Probably in all these cases the intrusion of *s* was resisted by the close connexion with the following noun. Rarely also, gen. plurals in *e* are also found, as Orm's *sāwle* 'souls,' *shaffte* 'creatures'; compare the retention of *en* in true compounds, as *Sunenndaȝȝ* 'Sunday,' *uhhtennsang* 'early morning song.' Plurals in *en* are also somewhat more common in this period, as *halechen* 'saints' in the 'Chronicle,' *wawenn* 'walls,' *hallghenn* 'saints,' *ēȝhne* (*ehne*, *ehhne*) 'eyes' in 'Ormulum.' Orm also has occasional *e* plurals, as *hallfe* 'halves,' *shaffte* 'creatures.'

NOTE 2.—Nth. is even more radical than Midland in giving up the old weak plurals in *en*, but a few still appear in 'Cursor Mundi,' as *oxen*, *eien* 'eyes,' *ēren* beside *ēres* 'ears.' Occasionally no inflexion occurs, as in *heven blis*, *heven king*, which are essentially compounds. In other respects Nth. does not differ markedly from Ml. except as noted in § 123, n. 2. Sth. retains many more relics of the OE. declension, as a gen. sg. in *e*, and a dat. in *en* in case of many OE. weak nouns. Indeed *en* sometimes intrudes itself into the singular nominative-accusative forms. In the plural, forms in *en*, *e*, rarely *a*, are especially common in the earliest period, as also genitives in *ene* (*en*), *e*, and datives in *en*. All such forms gradually grow less frequent, and are almost entirely replaced in late Sth. by regular forms.

ANOMALOUS NOUNS

133. A few nouns belonging to minor declensions in Old English show some peculiarities of inflexion. They include nouns with mutation as the distinctive feature, nouns of relationship, and those with original stems in *nd*, *os* (*es*). Those of the first subclass are declined as follows:

Singular,	N. A.	*fōt*	*man*
	G.	*fōtes*	*mannes*
	D.	*fōt*(*e*)	*man*, *manne*
Plural,	N. A. D.	*fēt*	*men*
	G.	*fētes* (*fōte*)	*mennes* (*manne*)

134. Few examples of these mutation nouns are found in Middle English, since most of them had already lost all traces of mutation and had ranged themselves with the regular classes. It is difficult therefore to be certain of all forms, but there is a clear correspondence in the singular with the nouns of declension I. In the

plural, the distinguishing feature is a nominative-accusative-dative with mutation but no ending. For the genitive plural, Orm has *menness* once, beside *manne*. An old genitive plural *fōte* occurs after a numeral, as *twel fōte* 'twelve feet' (dialectally to-day 'twelve foot'), 'Havelok,' 1054. Other nouns having mutation plurals are *gōs* 'goose,' *mūs* 'mouse,' *lūs* 'louse,' *kū* (*cōw*) the plural of which, *kȳn* 'kine,' has assumed *n* by analogy of *en* forms. A few nouns have uninflected plurals without mutation, as *mōneþ* (OE. pl. *mōneð*) in *twelve monthe* 'twelvemonth,' *niht* in such expressions as *seven niht* 'seven nights, sennight.' ME. *brēch*, 'breech, breeches,' preserves the mutation plural of OE. *brōc*, and becomes singular.

NOTE 1.—Early Midland has a few other mutation nouns, as Orm's *gāt* 'goat,' *gāt* 'goats,' an old feminine.

NOTE 2.—Nth. does not differ from Midland, except in greater regularity of forms. Thus *kū* (*kōu*) 'cow,' has the regular mutation plural *kī* (*kȳ*) without the *n* of Ml. and Sth. usage. Sth. has a greater variety of forms, as gen. pl. *monne*, *monnene* (*en*), dat. *monnen*. So also *fōten* as gen. pl., and *brēchen* (*brēches*) a pl. of *brēch* 'trousers.'

135. The nouns of relationship are declined as follows:

Singular,	N. A. V.	*fader* 'father'	*brōþer* 'brother'
	G.	*fader, fadres*	*brōþer, brōþres*
	D.	*fader*	*brōþer*
Plural,	N. A. G. D.	*fadres*	*brēþren, brēþere*

The genitive singular without ending persists through the ME. period, though the form in *es* also occurs from the earliest time. The older mutated dative has entirely disappeared. Like these nouns are declined *mōder*, *dohter* (*doȝter*, *douȝter*) 'daughter,' *sister*, the last from Norse *syster* and the regular Midland form.

NOTE 1.—Early Midland, as Orm, has uninflected forms more commonly, with the mutated form of *brēþre* in plural nom., acc., and gen. Orm also uses *susstress* 'sisters,' from the OE. rather than the Norse form of the word.

NOTE 2.—Nth. prefers the uninflected form of the gen. sg., and the plural in *es* (*s*) except for *brōþer* which has pl. *brēþer* for all cases. The mutated *dehteres* occurs sometimes, beside the more common *dohteres* 'daughters.' Sth. has both inflected and uninflected gen. sg., but prefers *en* plurals in the earlier

period, as *brōþeren* (*brēþeren*), *dohtren*, *sustren*. The native English *suster* from OE. *sweoster* (*swuster*), rather than the Norse form of the word, is common in Sth. as in Chaucer.

136. Here may be mentioned the remnants of the OE. *os*, *es* stems, *chīld*, *lamb*, the only words that show peculiar forms. The natural developments of the OE. plurals, *chīldru*, *lambru*, were *childre*, *lambre*, and these are often found in Midland. Later they both assumed the *en* ending, first in Sth., later in Midland, though at the same time *lamb* acquired a regular plural *lambes*. In the North *childre* (*childer*) remained the plural form, and *lambre* gave place entirely to *lambes* (*lambis*). In Sth. another word of this class, *calf*, followed *chīld* in adding *en*(*n*) to the older plural in *re*, as *calveren* 'calves.'

137. Of stems in *nd*, only *frĕnd*, *fēnd* 'friend, fiend' preserve peculiarities, and these only in the earlier part of the period. In that period uninflected plural forms are found, as *frĕnd*, *fēnd* 'friends, fiends.' These were soon displaced by the regular *frĕndes*, *fēndes*. For the quantity of *frend*, see § 79, n.

THE ADJECTIVE

138. The adjective has lost all trace of its OE. inflexion except for an ending *e*, which is added to those not originally ending in a vowel, in order to indicate the plural and the old weak form after a demonstrative or possessive pronoun. So far as this trace of the older inflexion is found, adjectives in Middle English are declined in one of two ways, as they do or do not end in unstressed *e*. The weak form of the adjective is used after a possessive or demonstrative pronoun, including the definite article, and in the vocative. In either case, if the adjective follows the noun without the repetition of the demonstrative (definite article), it remains uninflected.

I. Strong

Singular	*wīs*	*manī*	*lītel*	*frē*
Plural	*wīse*	*manī* (*manīȝe*, *manīe*)	*lītel* (*lītle*)	*frē*

Weak, Sg. and Pl.

wīse *manī* (*manīe*) *līlel* *frē*

II. Strong and Weak

Singular *grēne*
Plural *grēne*

139. To declension I belong *o* (*a*)-stems, including polysyllables and short *jo*-stems, except a few which have assumed inorganic *e*; long *wo*-stems with vowel preceding *w*; and long *u*-stems which had gone over to the *o*-stems in OE. times. It will be seen from the table that monosyllables ending in a vowel, and usually polysyllables, are uninflected. The participle is also regularly uninflected, as often in Old English. One relic of the older inflexion appears throughout the period in *aller* (*aldre*), OM. *alra* (WS. *ealra*) 'of all,' both alone and in compounds as *alderbest* (*alþerbest*). In the latter part of the period the adjective tends to lose all trace of inflexion, as shown by poetry, especially when far removed from the noun. This is but preliminary to the total loss of final *e* in adjectives as in other words. Adjectives belonging to declension II are virtually inflexionless. Here belong OE. long *jo*-stems; short *wo*-stems; *i* and *u*-stems, except such as had taken the inflexion of OE. *o*-stems. Short *wo*-stems, ending in *u* with *w* in oblique case forms, usually end in *we* in Middle English, as *calwe* 'callow,' *falwe* 'fallow,' *salwe* 'sallow,' *ȝelwe* 'yellow,' but sometimes forms ending in *e* alone are also found, as *ȝāre* beside *ȝarwe* 'ready' (Shakespeare's *yare*), *nāre* beside *narwe* 'narrow.' OE. adjectives ending in palatal *h* (*g*) lose the final consonant as a rule, those with guttural *h* (*g*) develop forms in *ȝe* (*we*) from the oblique cases, as *noh–nowe* 'enough,' *woh* (*wouȝh*)–*wowe* 'bad,' *sorful–soruful* 'sorrowful,' *walwe* (OM. *walg*, WS. *wealg*) 'sickly,' *arh*(*ȝ*)–*arwe* 'cowardly.' OE. adjectives ending in *f* regularly change *f* to *v* before *e*.

140. Most borrowed words fall into the same classes as the

corresponding native adjectives and are similarly inflected. Thus OF. adjectives not ending in a vowel assume the plural and weak *e*, as do native words, but OF. polysyllables which have acquired the Teutonic accent on the first syllable remain uninflected. The OF. *seint* often appears as *seinte*, but not exclusively before feminines. It is probable that both forms were adopted without regard to the OF. distinction of gender, though *seinte* would more naturally occur with certain feminines, as *Seinte Mārīe* (116, 15); but cf. *Seint Mārīe* (118, 2), *Seinte Powel* (200, 19). A few OF. adjectives with OF. *s* plurals are found, as in *plāces delectābles* 'delectable places,' *goodes temporelles* 'temporal goods,' but these are mainly in prose translated pieces, rarely poetry and that of the more learned poets, so that they can hardly have been living forms among the people.

NOTE 1.—Early Midland shows a somewhat fuller retention of older forms, though in the 'Chronicle' from the year 1132 there is no variation from what is given above.

NOTE. 2.—In Nth. the two declensions tend to become one by the loss of final unstressed *e*, as in nouns. The plural *e* of declension I has generally disappeared, and many adjectives ending in unstressed *e* have lost this ending, and have fallen in with those without *e*. Even the ending *e* of weak forms is not regularly preserved after a demonstrative. In early Sth. some further traces of OE. inflexions are still found, as a genitive singular in *es*, especially when the adjective stands without a substantive, but also in some other cases as *summes weies* 'some ways' in the 'Juliana' selection. So *bōþen* 'both,' with *en*, but such forms are rare. The distinction between strong and weak forms of adjectives not ending in unstressed *e* is generally preserved, as in declension I above.

COMPARISON

141. The adjective is compared by the addition of the endings *re* (later *er*) for comparative, *est* for superlative, from the OE. endings *ra, ost* (*est*) by regular vowel changes. At the same time comparison by use of the adverbs *mōre, mōst* begins to be used, especially with polysyllables. Long root syllables show shortening in comparative and superlative, in accordance with § 76, as *grēt–gretter, swēte–swetter*, but analogy of the positive often restores the

long vowel. Adjectives from Old French are compared like native words, with a tendency to use the adverbial comparison with polysyllables. As to inflexion, comparatives could not assume *e* after *re*, and did not usually after the later *er*; superlatives like *best, mǭst, first* were regularly inflected, as well as those with secondary stress upon the superlative ending, for example *sēmlīest*, but most superlatives remain uninflected.

142. As in Old English, a few adjectives are irregular in comparison. Thus *ǭld, lǭng, strǭng* still retain mutated comparatives, as *elder–eldest, lenger–lengest* 'longer–longest,' *strenger–strengest* 'strong–strongest.' Some adjectives have forms of comparison with different roots from the positive, as *gōd* 'good,' *bettre* (*betre*)–*best*; *ivil* (*ȝvil*), *werse* (*worse, wurse*)–*werst* (*worst, wurst*); the corresponding Norse forms are also found, as *ille–werre*, the former of which has remained to Modern English; *michel* (*mikel, muchel, much*), *mǭre* (*mǭ*)–*mǭst* (*mǭst*); *lītel* (*līte*), *lesse* (*lasse*)–*lǭst* 'least.' Forms of comparison based on adverbs, sometimes prepositions, are *fer* 'far,'–*ferre* (*ferrer*) 'farther,' dialectal *farer*–*ferrest* 'farthest'; *fǭre, first*; *ǭver, ǭverest*; *utter, utterest*; *upper, uppest*. In *nerre* 'nearer,' *furþest* 'furthest,' new forms of comparison have been based on older comparatives. The OE. superlative suffix *mǣst* appears as *mǭst, mast* and *mǭst*, the latter finally prevailing.

NUMERALS

143. Most numerals are adjectives in function, though often uninflected. The older use as nouns with a following genitive disappeared entirely, except in sporadic cases, as *twel fōte* 'twelve feet' ('Havelok,' 1054), where the expression is a mere survival without syntactical significance for Middle English. The cardinal numerals are as follows, though no attempt is made to give every variant even of Midland: *ǭn* (*ǭ*) 'one'; *twō* (*tweyne, tweye*) 'two, twain'; *þrē* (*thrē*) 'three'; *foure* (*fowre*) 'four'; *fīf* (*fȳve*) 'five';

sex (*sexe, sixe*) 'six'; *seven* (*sevene, seve*) 'seven'; *eȝte* (*eghte, eighte*) 'eight'; *niȝen* (*nīne*) 'nine'; *tēn*; *enleven* (*elevene, eleve*) 'eleven'; *twelf* (*twelve*); *þrettēne* (*þrittēne*) 'thirteen'; *fourtēne*; *fiftēne* (*fyftēne*); *sextēne* (*sixtēne*); *seventēne*; *eȝtēne* (*eghtēne, eightēne*); *niȝentēne* (*nīnetēne*); *twentī* (*twentȳ*); *þrittī*; *fourtī*; *hundred*; *þōusen* (*þōusende*) 'thousand.' The ON. form *hundreþ* is found beside the English *hundred*, and from OF. the new numeral *miliūn* (*milliōūn*) 'million' was adopted. Counting by the score (ON. *skor* ME. *skǭre*) is of Norse origin, as the word itself implies by its form.

144. The numeral *ǭn* 'one' sometimes has the old genitive *ǭnes* in early texts, and a plural of the same form in the expression *for þē nǭnes* 'for the nonce.' Plurals of the adjective form, *ǭne, nǭne, alǭne, nǭ ǭnes*, also occur rarely. Such forms as *five, sixe, twelve* usually occur when standing alone or after a substantive, as well as in the plural. Two or three Old French numerals are rarely found, as *cinq, sis* 'five, six' in Chaucer. In early Midland the weakened forms of the first numeral, *an* (*a*), are common as an indefinite article, and these are found throughout the period as in Modern English. Owing to the tendency to drop inflexional *n* in unstressed syllables such forms as *seve* 'seven,' *eleve* 'eleven' result.

NOTE 1.—Early Midland has other inflexional forms of the first and second numerals, as Orm's *āness* 'one's,' *ānne*, acc. masc.

NOTE 2.—Nth. forms naturally differ in phonology, as *ān* (*ā*), *twā, aht* (*aght*) 'eight,' but these differences will be easily understood. Nth. has lost all forms of inflexion for the numerals, except as in other adjectives; see § 138. Nth. also has some Norse forms which are less common in Midland, as *twin, þrin, hundreþ* 'two, three, hundred.' Sth., especially early Sth., preserves the gen. masc. and fem. *ǭnes, anre* (*āre*), the latter also as dat. fem.; the acc. masc. and fem. as *anne, ane*. Sth. also has a gen. and dat. pl. of OE. *twēgen*, 'two,' as *tweire, twam*. These, however, soon give place to regular forms.

145. The ordinal numerals are *firste* (*forme, firme*), *ōþer* and later *secōūnde, þridde* (*þirde*), *ferþe* (*fourþe*), *fifte, sexte* (*sixte*), *sevepe* (*sevende, sevenþe*), *eȝtepe* (*eȝtende, eightepe*), *niȝepe* (*niȝende,*

nīnþe), *tēzþe* (*tigþe, tēnde, tēnþe*), *endlefte* (*ellefte, ellevend, elevenþe*), *twelfte, þretēþe* (*þretēnde, þretēnþe*), &c. Ordinals with *ende*, as *sevende*, are sometimes Mercian in origin, sometimes perhaps Norse. Old English *ǒþer* is finally displaced by *secōunde* from Old French, though remaining pronominal as always. The ordinals regularly end in *e*, owing to their position as weak adjectives after *þē* 'the.'

NOTE.—In Nth. the forms with *ende* (*end, and, ind*) prevail, while in Sth. these are rare except in Kentish.

146. Multiplicatives are formed with the suffix *fōld*, OMerc. *fāld* (WS. *feald*), as *ānfōld* 'onefold.' The multiplicative idea, however, is expressed in various other ways, as by words meaning 'times' and by various adverbs. Distributives are *ān and ān* 'one and (by) one,' *twō and twō*, &c. Adverbs also, as *betwēn*, frequently express a distributive idea.

THE PRONOUNS

147. As to function, pronouns are either substantive, adjective, or both, and this distinction is important in understanding their inflexions in Middle English. Those that are wholly or mainly adjective in function, as possessives, demonstratives, and most indefinites, followed adjectives in their simplification to two forms, one for the singular and one for the plural. Those pronouns that are wholly or mainly substantive in function, as the personal, interrogative, and inflected relative, preserve, as their peculiar feature, an accusative-dative, generally based on an original dative and differing in form from the nominative. But the genitives of the personal pronouns have largely lost any substantive function, as of a substantive in oblique case, and their adjective functions are supplied by the possessives based upon them, together with new third personal possessives from the genitives of the so-called pronoun of the third person. The latter, therefore, though given in

the inflexion, are enclosed in parentheses to indicate their more restricted use.

148. The Personal Pronouns proper are inflected as follows:—

	First		Second	
	Sing.	Plur.	Sing.	Plur.
N.	*Ic* (*Ik, Ich*) *Ī*	*wĕ*	*þŭ* (*þōū, thōū*)	*ȝĕ* (*yĕ*)
G.	(*mȳn*)	(*ŭre, ōūre*)	(*þīn*)	(*ȝŭre, ȝōūre, yōūre*)
D. A.	*me*	*ŭs* (*ōūs*)	*þĕ* (*thee*)	*ȝūw* (*ȝōū, yōū*)

149. It is scarcely necessary to give all orthographic variations of these and the other personal pronouns. *Ic* (*Ik*), *Ī*, though without capitalization in the manuscripts, are the normal Midland forms, as also *ȝŭre, ȝūw* (*yōūre, yōū*) with initial *ȝ* (*y*) by analogy of *ȝĕ* (*yĕ*), and a vowel due to shifting of accent from the first element of the diphthong in OE. *ēower, ēow*, owing to constant use in unstressed position in the sentence. The form *þŭ*, owing to similar unstressed position and to assimilation, often becomes *tū* (*ū, ōū*) when immediately following a verb ending in *t*, as *shalt tū* (*ū, ōū*) for 'shalt thou.' For *tē* from *þē*, see §§ 100, 114. Dual forms are rarely found in the earliest texts, as *wit-unc, gunker–gunc* 'we two,' 'you two,' in 'Genesis and Exodus'; but these so soon disappear as to be quite irregular, and not deserving of a place in inflexion.

Note 1.—Early Midland does not differ materially. For *ȝūre, ȝuw*, the earliest 'Chronicle' has *iūre*, suggesting the older Northumbrian form *iurre* (Sievers, 'Gr.,' § 332, anm. 4). Orm also has *ȝūre, ȝuw*, showing the early addition of initial *y*.

Note 2.—Nth. does not differ from Midland. In Sth. *Ich* is the normal form for the first person. This is sometimes united with a following *wulle* (*wòlle*) 'will,' as *ichulle* (*ichòlle*) 'I will,' though each word is preserved separate in this book. Sth. also preserves genitive and accusative forms of the second personal pronoun without initial *y*, as *ēower* (*ōwer*) 'your,' *ēow* (*ōw, ōū*) 'you.' Besides, dual forms, which are almost unknown in Midland, are occasionally found.

150. The so-called third personal pronoun has the following forms:—

SINGULAR

	Masc.	Neut.	Fem.
N.	*hĕ*	*hit, it*	*schĕ, shĕ* (*shŏ*), *hēo* (*hĕ, hŏ*)
G.	(*his*)		(*hire, hir, here, her*)
D.	*him*		*hire* (*hir*), *here* (*her*)
A.	*him* [*hin*]	*hit, it*	*hire* (*hir*)

PLURAL

N.	*hĭ* (*hў, hĕ*), *þei* (*þey, þai, þay*)
G.	(*here, hire, þeire, þeir, þair*)
D.A.	*hem, þem* (*þeim, þaim*)

151. The genitives of the third personal pronoun, under the influence of possessives formed from the same case of the first and second personal pronouns, became possessives also, as shown by their inflexion in Middle English. The old masculine accusative singular, *hine* (*hin*), occurs rarely in early texts, as 'Genesis and Exodus'; but with this exception the masculine and neuter forms are quite regular. Those of the feminine singular nominative, on the other hand, are numerous, as they are based on OE. *hēo* or on the OE. demonstrative *sēo*, from which the prevailing form develops. The former appear as *gĕ* (*ghĕ*) in 'Gen. and Ex.,' *gĕ* in 'Best.,' *hĕo* (*hĕ*) in 'Flor. and Blanch.,' *hyē* (*hĕ*) in 'Adam and Eve.' Forms based on the latter appear first in the 'Chronicle' as *scæ, sgĕ* (=*syĕ*), *schĕ* in 'Gen. and Ex.,' *schĕ* (*shĕ, schēo, shŏ*) in other Midland texts until, about 1300, they prevail over the others. The earliest plurals are based on the OE. plurals *hĭ–here–hem*. The prototype of the Modern English *they*, based on the Norse demonstrative which is first found in Orm, occurs once as *þei* in 'Gen. and Ex.' In general, however, it is not until the beginning of the fourteenth century that the nominative *þei* (*þai, they*) becomes common, and not until late ME. that all forms with initial *th* (*þ*)

prevail. Chaucer, as representative of London English, has *thei* (*they*), but *here–hem*. In some early texts, as 'Gen. and Ex.' *hit* (*it*) is plural as well as singular, and another plural *his* (*is, es*), perhaps based on the singular masculine or from Sth., is also found.

152. As in Old English, the third personal pronoun is used reflexively, both alone and in combination with *self*. But such forms as *mīself, þȳself*, based on weak forms of the dative-accusative, or possibly combinations of the possessives and *self* used substantively, occur as early as the fourteenth century, and in Sth. a century earlier.

NOTE 1.—In early Midland the early use of *scā* 'she,' in the 'Chronicle,' and *þeȝȝ* (*þeȝȝre*), *þeȝȝm* 'they–their–them,' in Orm are the most important variations.

NOTE 2.—Nth. regularly has the fem. *schŏ* (*scŏ*), acc. *hir*, as also the plural forms with *þ*, *þai* (*þei*), *þair* (*þeir*), *þaim* (*þaimę, þām, þāmę*), but with an occasional *ham* 'them.' Sth. has preserved the masc. acc. *hine* beside the dat. *him*, and the fem. *hēo* (*hă̆, hĕ̆, hĭ̆, hue*). Variants for masc. *hĕ̆* are also *hă̆* (*ă̆*). The plural forms are based on those of OE., as nom. acc. *hĭ̆* (*hii, hue, hēo*), *here* (*hire, heore, hueore, hor*), *heom* (*ham, huem, hem, hom*). Sth. also has a plural *hise* (*is*) 'them,' beside *hĭ̆*, &c. As reflexives, Nth. has occasional forms with the genitive instead of the dative-accusative, as *yōūrself, þairself*, which seem to be unknown in Sth.

153. The Possessive Pronouns are *mīn* (*mī, mȳ*), *þīn* (*þī, thȳ*), *his, hire* (*hir*), *ūre* (*ūr, ōūr*), *ȝūre* (*ȝūr, yōūre, yōūr*), *here* (*her, hire, hir*) with *their* (*þeir*) in late ME. These are declined like adjectives, with plurals in *e* when the singular does not end in that vowel. The weakened forms *mī, þī*, occur only before words with initial consonants. The predicate and absolute forms are *mīn, þīn, his, here, ūre, ȝūre, here*, with plurals in *e*. Late forms in *s* are *ūres, ȝūres, heres*, but these do not appear in the earlier part of the period. Some texts also show forms with *n*, as *ōūren, ȝūren, heren* occasionally. The dual possessives *uncer, incer* appear only in the earliest period.

NOTE 1.—Early Midland (Orm) shows *þeȝȝrs*, the earliest absolute form in *s*, though perhaps due to Nth. influence.

NOTE 2.—Nth. works frequently show absolute forms in *s*, as *hers, ūrs, yōūrs, þairs*, while they are unknown in Sth.

154. The Demonstrative Pronouns, like adjectives with which they agree in use, retain at most only singular and plural forms without distinction of gender. They are three in number, two from OE. masculine and neuter *sĕ* (late OE. *þĕ*) and *þæt* 'the,' 'that,' and one from the OE. neuter *þis* 'this.' The first, (*þē*) (*thē*), is invariable and is used as a definite article; the others are declined as follows:—

Sing. *þat* (*þet, that*) *þis* (*þys, this, thys*)
Plur. *þō* (*þa, thō*) *þise* (*þis, thise, this*), *þēse* (*þēs, thēse, thēs*).

155. A relic of the OE. dative plural *ðām* remains in the expression *for þē nōnes* = *for then ōnes* 'for the nonce,' with final *n* from *m* transferred to the beginning of the next word. In a similar way final *t* of *þat* is sometimes transferred to a word beginning with a vowel, as *þē tō, þē tŏþer* (earlier *þet ō, þet ōþer*) 'the one, the other'; 'tother' is still dialectal English. For *tē, tat, tō* from *þē, þat, þō* after words ending in *d, t*, sometimes *s*, see §§ 100, 114. In the later period only *atte* = *at þē* 'at the' remains. A relic of the OE. instrumental *þȳ* appears in *forþī*, and as *þē*, in *þē mōre* and similar expressions. Occasionally *ȝon, ȝōnd* (*ȝon, ȝōnd*) < OM. *gon* (WS. *geon*) are also found as demonstratives. The plural *thǫos* 'those' instead of *thō* does not occur until late ME.

Note. 1.—Early Midland shows *þā* for *þō*, in accordance with § 43, n. 1.

Note 2.—Nth. has *þaas* (*þās*) beside the more common *þā* (*þaa*) as plural of *þat*, and *þiis* (*þēs*) as well as Norse *þīr* (*þeir, þēr*) for the plural of *þis*. Sth., especially early Sth., shows a much fuller retention of OE. forms. Masc. are N. *þē*, G. *þes* (*þē*), D. *þen* (*þē*), A. *þene* (*þē*); Neut. N. A. *þet* (*þē*), G. *þes* (*þē*), D. *þen* (*þē*); Fem. N. *þēo* (*þē*), G. D. *þer* (*þē*). Plural N. A. *þēo* (*þē*), G. *þēo, þē* (*þer*), D. *þēo, þē* (*þen*). Also Masc. N. *þes*, G. *þisses*, D. *þisse*, A. *þisne*; Neut. N. A. *þis*, G. D. as masc.; Fem. N. A. *þēos*, G. D. *þisse*. Plural N. A. G. *þēos*, D. *þēos, þissen*.

156. The pronoun of identity, *ilc* (*ilk, ilche, īche, ēche*), is declined like an adjective. The demonstrative *þē* and *ilk* (*ilke*) often unite by elision of *e*, as *þilke* (*þilche*). The intensive *self* also appears as *selve, selven*.

Note 1.—Nth. has *ilk, ilke* invariably; Sth. *ilch, ilche*, later *īch*.

157. The Relative Pronoun of Middle English, which is used universally and in all periods, is *þat* 'that.' Beside it OE. *þe* is found for a time, but soon disappears altogether. These are both indeclinable. In the fourteenth century others appear, as *which*, pl. *whiche* (which), and the genitive *whōs* (*whōse*) dative *whōm* come to be used; also compound relatives as *þat hē*, *þat his*, &c., *þē which*, *which þat*, *þē which þat*.

NOTE 1.—In early Midland *þe* is common beside *þat*.

NOTE 2.—Nth. has *þat* alone in the earliest texts. Sth. uses *þe*, *þet*, later *þat*, and retains *þe* much longer than in Midland. In the early fourteenth century Sth. also has *whan* (*wan*, *wanne*, *wane*) 'whom, what,' evidently from OE. *hwām* by weakening of *m*.

158. The Interrogative-Indefinite Pronouns are *whō* (*hō*), *whilc* (*hwilc*, *which*), *wheþer* (*hweþer*, *whether*) 'who, which, whether.' The first is declined as follows, without distinction of number:

	Masc.–Fem.	Neut.
N.	*hwō* (*wō*, *whō*, *hō*)	*hwat* (*wat*, *what*)[1]
G.	*hwōs* (*wōs*, *whōs*, *whōse*)	
D.	*hwōm* (*wōm*, *whōm*)[2]	
A.	*hwōm* (*wōm*, *whōm*)[2]	*hwat* (*wat*, *what*)[1]

159. The others are declined like adjectives, though *whether* is usually uninflected. Compound forms are also found, as *hwō sǭ*, *hwōse* 'whoso,' &c. Some Midland texts, as 'Genesis and Exodus,' have the spelling with *qu* for *hw* (*wh*) which is especially characteristic of Nth. Thus *quō*, *quōm* (*quam*), *quat*, *queþer*, &c.

NOTE 1.—Early Midland shows the earliest use of *wh* for OE. *hw*, as regularly in Orm, a spelling which is not established until the last half of the fourteenth century.

NOTE 2.—In Nth. the spelling with *qu* for *hw* prevails with few exceptions. Nth. uses *sum* as well as *swā* in compound forms, as *quāsum*, *quatsum*. Sth. variants are *hwoa* beside *hwō*, and occasional forms with *a*, as *hwas*, *hwam* (*hwan*), *hwase*, 'whoso.' Sth. also has *hwuch*, *hwuþer*, for *hwich*, *hweþer*, by influence of the preceding consonant on the vowel.

160. Other indefinites are *al* 'all'; *anī* (*anȳ*, *ǭnȳ*, *enȳ*) 'any'; *a3t* (*au3t*, *ought*) 'aught'; *na3t* (*naught*, *nought*) 'naught'; *bǭthe*

'both'; *ēlch* (*ēch*, *ȩ̄che*) 'each'; *aiþer* (*eiþer*, *ouþer*) 'either'; *naiþer* (*neiþer*, *nouþer*) 'neither'; *everilc* (*everich*, *everī*) 'every'; *everīwhēr* (*whēre*) 'everywhere'; *manī* 'many'; *man*, (*men*, *me*) 'man, one, they'; *ō̤n* 'one'; *nō̤n* 'none'; *ŏ̤ther* 'other'; *sum* (*sȯm*) 'some'; *swilc* (*swich*, *such*) 'such'; *wiht* (*wight*) 'wight.' Compound forms are also common, as *everilcō̤n* (*everichō̤n*) 'everyone,' *manī an*(*a*) 'many a,' *sumdȩ̄l* 'somedeal,' *sumkin* 'some-kind,' *sumwat* 'somewhat,' &c.

161. The indefinites are in general declined as adjectives, but a few special forms must be mentioned. An old genitive plural of *al*, *aller* (*alder*, *alþer*) is found occasionally, and in one or two compounds as a stereotyped form, as *yōure aller cost* 'cost of you all,' and *alderbest* 'best of all,' *alder first* 'first of all'; *bō̤the* 'both' sometimes has a plural *bō̤then* in imitation of nouns in *en*; a genitive of *ŏ̤ther*, *ŏ̤þres* 'other's' also occurs.

NOTE.—Nth. has *allirs*, *bāþir* (*bāþirs*) 'of all, of both,' instead of *aller*, *bō̤þe* (*bō̤þen*) above; also *sāme* 'same,' *slīke* (*slīc*, *slī*) 'such,' both Norse forms peculiar to Nth. texts or those influenced by Nth. Nth. also retains *quōn* 'few,' from OE. *hwōn*. Sth. retains many inflexional forms from OE. times, such as have been mentioned already under § 140, n. 2. In addition, Sth. has some plurals formed under the influence of the *en* nouns, as *bō̤þen* 'both,' *ō̤þeren* 'others.' Other forms of special peculiarity are Sth. *enī*, *ei* 'any'; *nenne*, acc. sg. of *nō̤n* 'none'; *summes*, pl. of *sum* 'some.'

THE VERB

162. With the exception of the few anomalous forms, verbs belong to two classes as in Old English, the weak distinguished by a preterit tense with dental suffix, the strong by one with change of root vowel[1]. As in Old English, also, the verb has both inflected and compound forms, the latter made up by the use of verbs originally independent but weakened to the force of auxiliaries, as

[1] The distinction between gradation and original reduplication verbs need not be here regarded, since the distinguishing feature remaining to Middle English is a change of root vowel, though sometimes owing to contraction of original reduplication.

in Modern English. The inflected forms, all belonging to the active voice, are two tenses, a present and preterit; two modes, an indicative and subjunctive, [or subjunctive-optative since it has the uses of both; an infinitive, and two participles, a present and a past. The compound forms are four indicative tenses, a future and three perfects, present, past and future; [a present and past optative,] or potential, with auxiliaries *may*, *can*, &c.; a present perfect infinitive and participle; [and a passive with all the modes and tenses of the active, both inflected and compound.]

163. The normal inflexional endings of the verb may be seen in the following scheme:

Inflexional Endings of the Verb

	Weak	Strong	Weak	Strong
	PRESENT		INDICATIVE PRETERIT	
Sing. 1.		*e*	*ede, de (te)*	– –
2.		*est*	*edest, dest (test)*	*e* (–)[2]
3.		*eþ (eth)*	*ede, de (te)*	–
Pl. 1, 2, 3.		*e(n)*[1]	*ede(n), (ed), de(n), te(n)*	*e(n)*
			SUBJUNCTIVE	
Sing. 1, 2, 3.		*e*	*ede, de (te)*	*e*
Pl. 1, 2, 3.		*e(n)*	*ede(n), de(n), te(n)*	*e(n)*
			IMPERATIVE	
Sing. 2.		*e* –		
Pl. 2.		*eþ (eth), e* *eþ (th), e, –*		
			INFINITIVE	
		e(n)		
			PARTICIPLES	
		ende (ande), inge	*ed (d, t)*	*e(n), (e)n*

[1] Loss of final *n* in all *en* forms grows increasingly common through the period.

[2] Loss of final *e* is most common in this inflexional form.

164. So far as inflexional endings are concerned, a single class of weak verbs resulted from the three weak classes of Old English. In the present tense the endings of the weak and strong verbs are the same, but for slight differences in the imperative. Syncope and apocope of *e* are sometimes found, more commonly in the latter part of the period. Loss of final *n* also grows more common through the period, thus reducing the number of forms, while final *e* is regularly silent in late Middle English. The second and third person singular of the present indicative, occasionally the plural imperative, sometimes have *es* (*s*), the characteristic Nth. forms. Assimilation and simplification in the consonants of the third singular are occasional, as *fint* beside *findeþ*, *sit* beside *sitteþ*. Verbs ending in a vowel naturally show contraction with the vowel of the ending, as *see*, *sēst*, *sēþ* 'see, seest, seeth.' The imperative plural ending is reduced to *e*, or lost altogether when immediately followed by its pronoun. The prefix *i* (*y*), OE. *ge*, in the past participle is rarely found.

165. Analogy played an important part in the development of inflexional endings. Thus OE. verbal stems in *r* which retained *i* from the Teutonic *jan* ending, whether weak or strong, and verbs of the second weak class in *īan* (*īgean*) regularly lost *i* (*ī*) in all forms in which it occurred. Their infinitives came to end in *en* as in the case of other OE. verbs in *an*, and *e* in the 1st sg. pres., *en* in the plural and *eþ* in the imp. pl. Examples are *hēren* (OE. *herian*) 'praise' for the OE. first weak class, *swēren* (OE. *swerian*) 'swear' the only strong verb, and *wunen* (OE. *wunian*) 'dwell' for the second weak class. But OE. verbal stems in *rgan* (*rgīan*) retain *ī* from palatal *g* (*ig*), as *birīen* 'bury.' Similarly OE. verbal stems in *cg*, *bb*, whether weak or strong, lost those combinations in the present and assumed those of the third *sg.*, as *seien* for *seggen* (OE. *secgan*) 'say,' *lizen*, *līen* (OE. *licgan*) 'lie, recline,' *hāven* (OE. *habban*) 'have,' *hēven* (OE. *hebban*) 'heave, raise.' OE. *libban* 'live,' however, gave way before OE. *lifīan* of the second weak class in preterit and past participle, the present of both verbs falling

together by reason of both the above changes. For grammatical change in strong verbs see § 172.

166. The verb *hāven* 'have,' the only relic of the third weak conjugation which has not become regularized, has the following peculiarities: present *hāve*, *hast* (*has*), *haþ* (*hath*); pl. *hāven* (*hāve*); preterit, *hafde* (*haved*, *hadde*, *had*). *Māken* 'make' shows a similar loss of medial *k*, and *clǭþen* 'clothe' of medial *þ*, as *māked* (*māke*), *cladde* 'clad.'

NOTE 1.—Early Midland differs mainly in a somewhat fuller preservation of OE. forms. Analogical changes, also, had not been fully carried out, Orm having *habben*, *libben*, *seǧǧen*, *leǧǧen* from OE. forms with *bb*, *cg*.

NOTE 2.—Nth. agrees with Midland in the main, but the endings of the present indicative are characteristic, as 1 *e* (–, *es*); 2, 3 *es*; pl. 1, 2, 3 *es* (*e* when followed immediately by the personal pronoun). The infinitive has no final *n* and often no *e* remaining, as *bīnd* 'bind,' for Ml. *bīnde*(*n*). Syncopated forms of the present are exceedingly rare; the preterit of the weak verb has, in general, lost its personal endings; the present participle ends in *and* (*e*), and the prefix of the past participle, *i* (*y*), OE. *ge*, is wholly lost. Sth. retains OE. weak verbs of the second class with infinitives in *īe*(*n*) and the following endings in the indicative present; Sg. 1 *īe* (*ī*, *ȳe*, *ȳ*); Pl. 1, 2, 3 *īeþ* (*īeth*). OF. verbs in *ier* and sometimes those in *eier* or *er* fall in with this characteristic Sth. class. Sth. also often has infinitives in *īen* from OE. *ian* after *r*, and present stems with *ǧǧ* < OE. *cg*, *bb* < OE. *bb*. In the second and third persons *es* (*s*) for *s* is unknown; syncopated forms are very common, as also those with assimilation and simplification of consonants; the present participle ends in *inde* (seldom *ende*), later *inge*; the prefix *i* (*y*) of the past participle is often retained. All other verbs have *eþ* (*eth*) in the plural. The London dialect seldom retains the prefix *i* (*y*), OE. *ge*, of the past participle, as in Midland, but Chaucer makes extensive use of it in poetry, no doubt for metrical reasons; see any glossary of Chaucer under *y* (*i*).

THE WEAK VERB[1].

167. The weak verb in Middle English may be divided into two classes, distinguished by a preterit tense ending of *ed* (*e*) or *de* (*te*).

[1] Weak verbs are placed first because they are the most numerous class in all periods of English, and hence represent regularity in forms as compared with all other classes. Besides, this arrangement brings together all minor divisions, as strong, preterit-present, and the four anomalous verbs.

The first, with preterit in *ede*, includes verbs of the OE. first weak class with original short stems, except those ending in *d* or *t*; most verbs of the OE. second weak class by weakening of OE. *ode* to *ede*; strong verbs with short stems, when becoming weak by analogy; and such borrowed verbs as have ranged themselves with them because of similar formation.

168. Verbs of the second class in Middle English are distinguished by a preterit tense-ending *de*, or *te* after stems ending in a voiceless consonant. To this class belong polysyllabic verbs of the OE. first weak class, together with those having original long stems, or short stems ending in *d* or *t*, and those with mutation only in the present (Sievers, 'Gr.' § 407); the small number belonging to the OE. third weak class; some verbs of the OE. second weak class which have lost the connecting vowel of the preterit ending; strong verbs with long stems, when becoming weak by analogy; and such borrowed verbs as have ranged themselves with them because of similar formation, especially long stems.

169. The past participles of both classes usually end in *ed*. Certain verbs of class II, however, have *d* or *t* without connecting vowel, as those with mutation only in the present, and the few originally belonging to OE. class III. Besides, some verbs ending in *d*, *t*, have past participles without ending, by reason of earlier syncopation of *e* and simplification of the resulting consonant group, as *fed*, *set*. A few others, as those ending in a vowel or liquid, also have past participles in *d*; for example, *flēn* 'flee'–*fled*, *hēren* 'hear'–*herd*.

170. Some irregularities naturally occur. In addition to the cases in which *te* regularly belongs to the preterit and *t* to the past participle, those endings are sometimes found after consonants voiced in the present but becoming voiceless in the other forms after syncopation of the connecting vowel *e*; examples are *lōsen–loste–lost* 'lose–lost,' *clēven–clefte–cleft* 'cleave–cleft.' Some verbs ending in a liquid + *d* change *d* to *t* in preterit and participle, as *wēnden–wente–went*, *bīlden–bilte–bilt* 'build–built,' *gīrden–girte–girt*

'gird–girt.' This last change is far less common in Nth. Some verbs differ in present and preterit by reason of special phonetic changes, as *blenchen* 'blench, blanch'–*bleinte–bleint*, *mengen* 'mingle'–*meynte–meynt*, § 48. In § 167 attention was called to the development of OE. palatal *g* after *r* as in *birīen* 'bury'; when OE. guttural *g* followed *l*, *r* it regularly became *ȝ* later *w*, as in *folȝen* (*folwen*) 'follow,' *borȝen* (*borwen*) 'borrow.'

171. Borrowed verbs, with few exceptions, assumed the inflexion of the weak verb, following one of the two classes above, according as they agreed with one or other in phonetic peculiarities. ON. weak verbs were easily received without much change, yet such verbs ending in *ja*, *va* (=*wa*) follow their presents without those endings in English. Examples are *eggen* < ON. *eggja*, *geren* < *gǫrva*. Verbs from OF. sources almost invariably became weak in Middle English. In general their forms depend upon the form of the OF. present stem, as ME. *chanten* < *chanter*, *plainen*, *responden* < *plaindre*, *respondre*, but *rendren*, *battren* 'render, batter' < *rendre*, *batre*; *mōven* < *movoir*; *aisen* (*ēsen*), *chāsen* (*cachen*) < *aisier*, *chasier* (Picard *cachier*) 'ease, chace, catch'; but *marīen* 'marry,' *carīen* 'carry,' *tarīen* 'tarry,' *studīen* 'study,' *denīen* 'deny.' The present stem is especially important as accounting for ME. verbs in *-ischen* (*issen*) from OF. presents in *iss-*, infinitives in *ir*, as *finischen* < *finir* 'finish,' *florischen*, *nurischen*, *punischen*, *rejoissen* 'rejoice,' *traissen* (*betraissen*) beside *traien* (*betraien*) 'betray,' *obeischen* (*obeissen*) beside *obeien* 'obey.' Double forms in OF. account for certain peculiarities in ME. verbs, as the two forms *clāmen*, *claimen* 'claim.' A few verbs are formed from OF. past participles used as adjectives, as *clōsen*, *peinten* 'paint,' *fainten* 'faint, feint' beside *feinen* 'feign,' *enointen* (*anointen*) 'anoint'; cf. OF. *clore–clos*, *peindre–peint*, *feindre–feint*, *enoindre–enoint*. In late Middle English other verbs were similarly formed from OF. or Lat. perfect participles first adopted as adjectives; cf. *creāt* 'created,' *desolāte* 'desolated' and the verbs from them. The greater number of borrowed verbs assumed the forms of class I, but some, especially

those ending in a vowel, took the preterit *de* of class II; examples are *crīen* 'cry'–*crȳde*, *payen* 'pay'–*payde*. By analogy of *lacchen–lauȝte–lauȝt* 'seize,' and others of its class, OF. *cacchen* 'seize, catch' formed its preterit and participle as *caughte–caught*.

NOTE.—Nth. agrees with Ml. Sth. retains infinitives in *īen* from OF. verbs in *ier*, the latter falling in with OE. weak verbs of the second class in that dialect.

THE STRONG VERB

172. This class, as in Old English, includes gradation verbs, and those with original reduplication, the former including several minor divisions. The most noticeable change in strong verbs during ME. times is that many of them have become weak by analogy of the great weak class. On the other hand, a very few new ones appear, owing to borrowings from Norse and to rare analogical formations. Strong verbs also show a tendency toward the reduction of the two preterit stems of most OE. strong verbs to one, but this tendency was not fully carried out until modern times. It results naturally from the fact that even in Old English the preterits of reduplication verbs, of those of class VI, and some of class V had the same stem vowel in both singular and plural. The reduction of the four OE. stems to three was further influenced by the similar vowel in preterit plural and past participle of verbs belonging to class I and most of class III, and by the regularizing of consonants in verbs originally having grammatical change.

NOTE.—In this reduction of preterit stems the dialects differ markedly. Nth. has lost one stem, usually the plural, almost entirely. Sth. retains both forms as a rule. Midland stands between the two in this respect, though agreeing more nearly with Sth. through most of the period. With this general statement, dialectal differences in the various classes need not be noted, except in special cases. Differences due to the different phonologies of the dialects have been sufficiently exemplified in the part on Phonology.

173. The inflexional endings of strong verbs have been shown in § 163. The preterit second singular is often without ending. There are also few peculiarities of strong stems not already noted.

Attention has already been called to the change in present stems ending in *cg*, and those which retained *i* after *r* in Old English, § 165. Variations originally due to mutation in second and third singular present indicative have also disappeared by the influence of the unmutated forms, though mutation was never so common in the Anglian dialects as in West Saxon (Sievers, 'Gr.' § 371, anm. 5 f).

NOTE.—Nth. seldom preserves the *e* of the second person preterit indicative, while in Sth. it is not uncommon. Sth. also preserves OE. *cg* of verb stems as ǰǰ (= *dzh*) more commonly than Midland.

174. Gradation verbs belong to six sub-classes, as in Old English, with the following vowels in their various stems; the present, preterit singular, preterit plural, and past participle respectively[1]:

1. *ī – ō – i (ō) – i*
2. *ē (ū) – ǣ – ō (ǣ) – ō*
3. *i (e) – a (ǒ) – u (ou, ǒ) – ō, u (ou)*
4. *ǣ – a – ē, ǣ (ō) – ō (u)*
5. *ǣ (i) – a (ē, ǣ) – ē, ǣ – e (i)*
6. *ă (ǣ, o) – ō – ō – a (ā, ǣ, o)*

175. Verbs of class I are exemplified by *drīven* 'drive'–*drōf*–*driven* (*drōf*)–*driven*; *wrīten* 'write'–*wrōt*–*writen* (*wrōt*)–*writen*; *rīden* 'ride'–*rōd*–*riden* (*rōd*)–*riden*. The introduction of the preterit singular vowel in the plural is especially to be noticed as suggesting the Modern English form. The verb *stīȝen* (*stīen*) 'ascend' has a pret. *steiȝ* as if from OE. **stēah* of the second class or possibly from Norse. To verbs which regularly belong here from OE. times must be added two borrowed verbs, *rīven* 'rive' from Norse, and *strīven* 'strive' from French, the latter with strong forms by analogy. The weak verb *chīden* 'chide' also shows strong forms as early as the thirteenth century; compare *chidden*, a past participle, in 'Gen. and Ex.' 1927.

[1] The order of these sub-classes is unimportant, except that sub-classes 1–5 develop from the Teutonic *e–a*, and 6 from *a–ō* gradation series. In England the reduplication verbs are sometimes called class I, and the above are then given in the order 6, 4, 5, 3, 1, 2. Streitberg, followed by Kaluza, adopts the new order 5, 4, 3, 1, 2, 6.

176. Of the contract verbs belonging to this class, only *þēn* (*thee*) 'thrive, prosper,' and *wrēn* (*wrien*) 'cover, conceal' seem to be preserved. Even in Old English, too, these had been influenced by verbs of class II, so that some of their forms still correspond with those of that class. The first has preterit sing. *þēg*, pret. plur. and past part. *þōgen*, later *þowen*; the second, pret. sing. *wrēȝ* (*wreigh*), pret. plur. and past part. *wriȝen* (*wreȝen*).

NOTE.—Early Ml. and Nth. retain *ā* in pt. sg. in accordance with §§ 5, 43.

177. Class II early adopted a preterit plural with the stem vowel *ō*, by analogy of the past participle, though occasionally the vowel of the preterit singular was introduced into the plural. Examples of verbs which are fairly regular are *shēten* 'shoot'–*shēt–shōten* (*shēt*)–*shōten*; *chēsen* 'choose'–*chēs–chōsen* (*chēs*)–*chōsen*, the latter with *s* instead of *r* in preterit plural and past participle by analogy of the remaining stems (OE. *curon–coren*). A form with *ū* in the present is *shūven* 'shove'–*shēf* (*shōf*)–*shōven–shōven*; with change of consonant due to Verner's law, *sēþen* 'seethe'–*sēþ–sōden–sōden*; *lēsen* 'lose'–*lēs* (*las*)–*lēsen*, (*lōst*)–*lōren*; *flēgen* (*flȳen*) 'fly'–*flēg* (*flei*)–*flōgen* (*flowen*)–*flōgen* (*flowen*). *Bēden* shows influence of *bidden* (class V) in forms and meaning.

178. Weak forms are found beside the strong in some cases, as *crēpen* 'creep'–*crepte–crept*, beside *crēp* (*crōp*)–*crōpen–crōpen*, and *lēsen* 'lose'–*lōste–lōst* beside the strong forms above. The contract verb *flēn* (OE. *flēon*) 'flee' has the same preterit as *flēgen* (*flȳen*) 'fly,' and there is in other respects much confusion between the two. The other contract verb, *tēn* 'draw,' has preterit *tēh* (*tei*) and past part. *tōgen* (*towen*).

NOTE.—Grammatical change disappears during the period except in *sēþen* 'seethe,' though past participles sometimes preserve the original consonant when used mainly as adjectives.

179. Class III consists of two subdivisions as the present stem has *e* or *i*, the latter before a nasal as in Old English. Both classes show occasional intrusion of the vowel of the singular

preterit into the plural. Verbs with *e* in the present stem are exemplified by *helpen* 'help'–*halp* (*holp*)–*holpen*–*holpen*; *swellen* 'swell'–*swal*–*swollen*–*swollen*. A few show peculiarities due to lengthening in accordance with § 72, as *ȝēlden* (*yēlden*) 'yield'–*ȝōld* (*ȝāld*)–*ȝōlden* (*yōlden*)–*ȝōlden* (*yōlden*). The verb *fiȝten* 'fight' has *i* from original *e* in the present stem, according to § 22, 2; its remaining principal parts are *faȝt* (*faught*)–*foȝten* (*foughten*)–*foȝten* (*foughten*). The verb meaning 'to become' (OE. *weorðan*, North. *ẅorþan*) early appears as *wurþen* (*worþen*)–*wurþ* (*worþ*, *warþ*)–*wurþen* (*worþen*)–*wurþen* (*worþen*) without change of *þ* to *d* in the last two forms, and with *u* (*o*) in all stems, by influence of preceding *w* (§ 25). Similarly OE. *swelgen* appears as *swelȝen* (*swelwen*, *swolwen*) 'swallow,' and develops a weak past participle *swolȝed* (*swolwed*). Here also may be mentioned *bresten* 'burst' with preterit singular *brast* and *brost* (compare § 76, *n.* 2). OE. *bregdan* becomes *breiden* (*brēden*)–*breid*–*broiden*–*broiden*.

180. The more numerous subdivision, with *i* in the present stem before an original nasal + consonant, is exemplified by *winnen* 'strive, win'–*wan*–*wunnen*–(*wǫnnen*)–*wǫnnen*; *drinken* 'drink'–*drank*–*drǫnken*–*drǫnken*; *springen* 'spring'–*sprang* (*sprǭng*)–*sprǫngen*–*sprǫngen*, the latter with *ǭ* in preterit singular, beside *a*, according to § 17. The *o* of preterit plural and past participle is of course orthographic for *u* (§ 27). A few verbs have lengthened vowels in all forms, as *finden* 'find'–*fǭnd* (*fānd*)–*fǭnden* (*fōunden*)–*fōunden*, the only others of this sort being *bīnden*, *grīnden*, *wīnden* 'bind, grind, wind.' The verb *rinnen* 'run' has a present, in *e*, as *rennen*, with the remaining forms regular. Similarly *brennen* 'burn' has *e* in the present, though like several others belonging to this class it has become weak. The preterit of *ginnen* 'begin' is frequently used as a preterit auxiliary in such expressions as *gan gǭ* 'went, did go.'

NOTE.—In late Nth. *begin* developed a weak pret. *begōuþe* by analogy of *cōuþe*. The pret. *gan* also appears as *can*, as sometimes in Ml.

181. Class IV is a small class, as in Old English, and it early

shows a tendency to the introduction of the vowel of the past participle into the preterit plural, occasionally the preterit singular. Verbs which are most nearly regular are *stę̄len* 'steal'–*stal–stēlen–stǭlen*; *shę̄ren* 'shear'–*shar–shēren–shǭren*. With *o* forms as above, *bę̄ren* 'bear'–*bar* (*bǭr, bēr*)–*bēren* (*bǭren*)–*bǭren*; *brę̄ken* 'break'–*brak–brēken* (*brǭken*)–*brǭken*. Quite irregular, as in Old English, are *nimen* (*némen*, perhaps Norse) 'take'–*nam* (*nōm*)–*nōmen* (*nāmen, nam*)–*numen*, and *cumen* (*cómen*) 'come'–*cam* (*cōm*)–*cōmen* (*cāmen*)–*cumen* (*cómen*).

182. To this class, which originally contained *brę̄kan* 'break' irregularly, several others of class V began to attach themselves by assuming past participles with the vowel *o* beside *e*. Examples are given under the class to which they originally belonged.

NOTE.—For *ǭ* (eMl. Nth. *ā*) instead of *ē* (Sth. *ę̄*) in the pret. pl. of this and the following class, see §§ 18, 43.

183. Class V, also a small class in Old English, is made smaller during Middle English by the tendency of verbs originally belonging here to assume forms of class IV, and thus range themselves with that class by analogy. Examples of those that still belong here in all their forms are *mę̄ten* 'mete,'—*mat–mēten–meten*; *ę̄ten* 'eat'–*ēt* (*at*)–*ēten–eten*. Verbs with original *i* in the present stem (Sievers, 'Gr.' §§ 391–3) are exemplified by *sitten* 'sit'–*sat–sēten–seten*. The verb *ȝiven* (*ȝeven*), with *i* from original *e*, has preterits *ȝaf–ȝēven*, past participle *ȝiven* like the infinitive; besides, its initial *ȝ* gradually gives way to *g*, under the influence of Norse *geve* 'give,' as also in ME. *ȝeten* 'get' by influence of Norse *gete*. Irregular, by reason of the final consonants of the stem, is *liğğen*, later *līen* 'lie, recline,'–*lay–leyen–leyen*, with analogical present (§ 165). *Bidden* shows influence of *bēden* (class II) in forms and meaning. The preterit *quoþ* (*quoth, quod*), alone remaining from OE. *cwe∂an* 'say,' perhaps has its vowel *o* by lack of stress in the sentence (§ 18). The only contract verb retained, *sēn* 'see,' has also various forms for its remaining principal parts, as *sey* (*saw,*

saugh)–*seyen* (*sāwen, sǭwen, sayen*)–*seyen* (*sēn, sogen, sowen*). Verbs which have been influenced by class IV are as follows:—

wrǣken 'avenge,'–*wrak*–*wrēken*–*wreken* (*wrǭken*).

spǣken 'speak,'–*spak*–*spēken* (*spāken, spǭken*)–*spǭken* (*speken*).

wǣven 'weave,'–*waf*–*wēfen*–*wǭven* (*weven*).

drǣpen 'kill'–*drap* (*drǭp*)–*drēpen* (*drāpen*)–*drǭpen*.

ȝeten 'get'–*ȝat* (*yǭt*)–*ȝēten*–*ȝeten* (*ȝǭten*).

NOTE.—Contrary to the rule, change of *s* to *r* by Verner's Law remains in *was*–*wēren*, originally belonging here but defective and associated with *bēn* 'be.'

184. Class VI seems to present greater irregularities than in Old English, owing to various phonetic causes. Most verbs have lengthened vowels in present and past participle, as *fāre*–*fōr*–*fōren*–*fāren*, *forsāken* 'forsake'–*forsōk*–*forsōken*–*forsāken*. To these have been added *tāken* 'take'–*tōk*–*tōken*–*tāken* from Norse. Verbs with mutated presents suffer various changes. A new form with unmutated *a* appears in *shāpen* 'shape'–*shōp*–*shōpen*–*shāpen*, sometimes in *slappen* beside the prevailing *sleppen*, which soon acquires weak forms as well. The infinitive of *laȝhen* (*lauȝen, lauhwen*) 'laugh'–*lōh* (*lough*)–*lowen*–*loghen* (*lowen*)–*lauȝhen* (*laughen*) must also have been influenced by the past participle (cf. Orm's *lahhȝhenn*. OE. *sceððan* 'injure' gave place to *skāþen* 'scathe' < ON. *skaða*, a weak verb. On the other hand, *swǣren* 'swear' and *hǣven* 'heave,' have retained present stems in *e* (*ǣ*), but have been influenced by verbs of class IV. Their principal parts are *swǣren*–*swǭr* (*swar*)–*swǭren* (*swēren*)–*swǭren* (*swǭrn*); *hǣven*–*hǭf* (*haf*)–*hǭfen*–*hǭven*. Verbs with stem in OE. *g* have forms like *draȝen* (*drawen*)–*drōȝ* (*drouȝ*)–*droȝen* (*drowen*)–*draȝen* (*drawen*). As in Old English *standen* 'stand' has *n* in the present and past participle only. ME. *waxen* 'grow,' originally belonging here, has fallen in with the reduplication verbs, and *waschen* 'wash' has both preterits, *wōsch* (*wēsch, weisch*). By analogy of verbs of this class, *quāken* 'quake,' a weak verb, has acquired a strong preterit *quōk*.

185. Contract verbs, *slǭn* (*slǣn*) 'slay' and *flǭn* (*flǣn*) 'flay' have the following principal parts: *slōn* (*slǣn*)–*slōg* (*slug, slough, slow*)–

slōgen (*slowen, slugen, slagan*)–*slawen* (*slayen*); *flōn* (*flēn*)–*flōgh* (*flow*)–*flowen*–*flawen* (*flain*).

186. Verbs with original reduplication are regular in having in the preterit *ē*, from OE. *ē, ēo,* or *ew* from OE. *ēow,* while the vowels of the present and past participle differ considerably owing to various phonetic changes of OE. originals. Examples of these with preterits in *ē* are *fallen* 'fall'–*fēl* (*fil*)–*fallen*; *lēten* 'let, allow'–*lēt* (*lat*)–*lēten* (*laten*); *hǭlden* 'hold'–*hēld*–*hǭlden*. Those with preterits in *ew* are exemplified by *blowen* 'blow as the wind'–*blew*–*blowen*; *growen* 'grow'–*grew*–*growen*; *hewen* 'hew'–*hew*–*hewen*. The last example shows how the distinctive forms of Old English became one in Middle English, after which the verb frequently became weak. The verb *hǭten* 'call, promise' (OE. *hātan*) has two preterits depending on the two OE. forms *heht* and *hēt*, as *hiht* (*hight, highte*) and *hēt*. At the same time *hihte* became present as well as past, and the OE. passive *hatte* 'am called' became a past. The OE. contracts *fōn* 'seize,' *hōn* 'hang,' soon gave way before new infinitives *fangen, hangen* under the influence of the past participles, while a weak *fangen* was adopted from ON. *fanga* and OE. *hangian* became Ml. *hangen*. Many of the reduplication verbs also have weak forms, as *slepte, wepte, walkede, dradde,* 'dreaded.'

THE PRETERIT-PRESENT VERBS

187. The preterit-present verbs show no exceptional changes from OE. times beyond the loss of some of their number, and of certain forms, as the infinitive. The more important forms in the several classes of strong verbs to which they originally belonged are as follows:—

I. Two verbs *ǭȝen* (*owen*) 'owe, have' and *witen* 'know'; inf. *ǭȝen* (*owen*); pres. indic. *owe, owest, oweþ* (*oweth*)–*owen*; pres. subj. *owe*–*owen*; pret. *aȝte* (*ǭȝte, aughte, oughte*); inf. *witen*; pres. indic. *wǭt, wǭst, wǭt*–*witen* (*wǭt*); pres. subj. *wite*; imp. *wite*; pres. part. *witende* (*witinge*); pret. *wist* (*wiste*); past part. *wist.*

NOTE.—Early Ml. has *wāt*, *āȝen*; Nth. *āgh* (*awe*) in inf. and pres. indic., *aght* in pret., in accordance with their phonologies. Negative forms of *witen* are *niten-nōt* (Nth. *nāt*) *-niste*, &c. Sth. has *wüten*, *nüten*, &c., from lWS. *wytan*, *nytan*.

III. Three verbs, *cunnen* 'be able, can' and *durren* 'dare,' *þurven* 'need'; inf. *cunnen* (*cȯnnen*); pres. indic. *can* (*con*), *canst*, *can* (*con*)–*cunen* (*cunnen*); pres. subj. *cunne* (*cȯnne*)–*cunnen* (*cȯnnen*); pret. *cūþe* (*cōuth*, *cōuthe*, *cōude*).

Inf. *durren* (*duren*); pres. indic. *dar*, *darst*, *dar*–*dor* (*dar*); pres. subj. *durre* (*dȯre*)–*durren*; pret. *durste* (*dorste*, *dirste*).

Inf. *þurven*; pres. indic. *þarf*, *þarf*(*t*), *þarf*–*þurven*; pres. subj. *þurve*–*þurven*; pret. *þurfte* (*þorfte*, *þorte*)–*þurften*.

NOTE.—Nth. has no such forms as *con*, *cȯnne*.

IV. Pres. indic. *shal*, *shalt*, *shal*–*shullen* (*shul*, *shȯl*, *shal*); pres. subj. *schule*–*schulen*; pret. *sholde* (*schulde*, *schold*, *scholde*).

NOTE.—Nth. has *sal*–*suld* in accordance with its phonology. It also retains pres. indic. *mon* 'remember, have in mind, must,' *–mune*; pres. subj. *mune*; pret. *mȯnd* (*munde*).

V. Inf. *muȝen* (*mōwen*); pres. indic. *mai*, *miht* (*mai*, *mayest*), *mai*–*mōwen* (*mōw*, *may*); pres. subj. *mōwe*–*mōwen*; pret. *miȝte* (*mihte*, *mighte*, *moughte*).

NOTE.—Nth. has only pres. *mai*, pret. *might* (*moght*).

VI. Pres. indic. *mōt*, *mŏst*, *mōt*–*mōten* (*mŏst*); pres. subj. *mōte*–*mōten*; pret. *mŏste* (*muste*).

188. In the earlier part of the period relics of several other preterit-presents are also found, as *dugen* 'avail' (class II), *unnen* 'grant' (class III); *munen* 'be mindful' (class IV), but these soon disappear, though a pres. and pret. of *munen* occur in Nth. (see above). Relics of the old strong past participles of these verbs are found in the adj.-adv. *wis* (*iwis*) 'certain, certainly,' and the adj. *owen* (eMl. Nth. *āȝen*, *āgen*) 'own.'

THE ANOMALOUS VERBS

189. Four verbs are quite anomalous in the number and character of their forms. They are *bēn* (*bē*) 'be,' *willen* 'will,' *dōn* 'do,' *gǭn* 'go.' These have the following forms :—

1. *Bēn* (*bē*) 'be.' Pres. indic. *am*, *art* (*ert*), *is* (*es*), and *bē*, *bēst*, *bēþ*; plur. *arn* (*āre*), *bēn* (*bē*); pres. subj. *bē*, plur. *bēn* (*bē*); pret. *was*, *wēre* (*wǭre*, *was*), *was*; plur. *wēren* (*waren*, *wǭren*); pret. subj. *wēre–wēren* (*wǭren*); imp. *bē–bēþ* (*bēth*); past part. *bēn* (*bēnę*).

Note 1.—In early Midland, as Orm, sometimes a little later also, the present forms *bēst*, *bēoþ*, pl. *sinden*, are found, and *sī* as pres. subj.

Note 2.—Nth. has for present indic. sg. *am*, *ert* (*art*, *es*), *is* (*es*); pl. *er* (*ar*, *ern*, *es*); also third sg. *bēs*, pl. *bēn* (*bēs*); pret. sg. *was* (*wes*), pl. *wēr* (*wēre*, *warn*, *wern*, *was*). Sth. has pres. indic. second sg. *ert*, pl. *bǭoþ* (*bēþ*, *būþ*); subj. *bēo*, pl. *bēon*; pret. *was*, *wǭre*, *was*, pl. *wǭren*; imp. *bēo–bēoþ*; inf. *bēon*; past part. *ibēon* (*ibēn*, *ybēn*). Early Sth. also has the gerund, or inflected infinitive *bēonne*.

2. *Willen* 'will.' Pres. indic. *wil* (*wol*), *wilt* (*wolt*), *wil* (*wol*); plur. *wiln* (*wil*, *woln*, *wol*); pres. subj. *wile* (*wole*); pret. *wolde* (*wilde*), *woldest* (*wost*, *wilde*), *wolde* (*wilde*, *walde*, *welde*); plur. *wolden* (*wold*, *welde*). A negative form, *nillen* 'will not' also occurs.

Note.—Nth. has pres. indic. sg. and pl. *wil* (*will*, *wille*, *wel*); pret. *wald* (*wild*, *weld*). Sth. uses pres. indic. *wüle* (*wülle*, *ich ülle*, *ich olle* = *ich wulle*), *wült*, *wüle*; pl. *wülleþ*; pres. subj. *wüle–wüllen*; pret. *wolde*.

3. *Dōn* (*dō*) 'do.' Pres. indic. *dō*, *dōst*, *dōþ* (*dōth*); plur. *dōn*; subj. *dō–dōn*; imp. *dō–dōþ* (*dōth*); pres. part. *dōende* (*dōinge*); pret. *dide* (*dēde*); past part. *dōn* (*dō*).

Note.—Nth. has pres. indic. *dō*, *dōs* (*dōse*, *duse*); pl. *dō* (*dōse*, *dōn*); pres. subj. sg. and pl. *dō*; imp. *dō–dō* (*dōs*); pret. *did* (*dēd*)–*did* (*dide*); pres. part. *dōand*; past part. *dōn* (*dune*). Sth. has pres. indic. *dō*, *dēst*, *dēþ*; pl. *dōþ* (*dōth*); pret. *düde*; pres. part. *dōnde*; past part. *idōn*.

4. *Gǭn* (*gǭ*) 'go.' Pres. indic. *gǭ*, *gǭst*, *gǭþ* (*gǭth*); plur. *gǭn*;

pres. subj. *gǭ–gǭþ* (*gǭth*); pres. part. *gǭend* (*gǭing*). The preterit is supplied by a different root, in the earlier period by *ȝēde* (*ȝōde, yēde*), OE. *gecēode*, later by *wente–wenten* from *wēnden* 'wend, go.'

NOTE.—Nth. has inf. *gān* (*gā*); pres. indic. *gā, gās* (*gāse, gais*), *gās* (*gāsc, gais*); pl. *gās*; pres. subj. *gā–gā* (*gān*); imp. *gā–gā* (*gān*); *gā* (*gās, gaes, gais*); past part. *gān* (*gāne, gain*); pret. supplied by *went*. Sth. has inf. *gǭn*; pres. indic. *gǭ, gēst, gēþ* (*gēth*); pl. *gǭþ* (*gǭth*); pres. subj. *gǭ–gǭn*; pret. *ēode* (*ȝēde, ȝōde*).

THE ADVERB

190. Many adverbs in Middle English do not differ from their Old English forms, except for phonetic changes common to them with other words. They are based on adjective, substantive, and pronominal roots, and are both simple and compound. Simple adverbs, based on adjectives, end in *e*, *l̆ike* (*l̆i, l̆y*), *inge* (*linge*). Those of the first class include adverbs which retain OE. *e*, or have *e* from *a* by weakening, as *sōfte* 'softly,' *sōþe* 'in truth,' *sōne* (OE. *sōna*) 'soon'; those of the second, adverbs which ended in *līce* in OE., and many which assumed this ending in Middle English, as *hārdlīke* (*hārdl̆i*) 'hardly,' *sōþl̆ike* (*sōþl̆i*) 'soothly'; to the third, those ending in *inga, enga, unga* (*linga, lenga, lunga*) in Old English, as *allunge* 'wholly.' During the period those of the first class gradually lost final *e*, and thus had the same form as the corresponding adjectives. With them came to be associated many adverbs from Old French which had the same form as the corresponding adjectives, as *just, verȳ, quīte*. The second adverbial ending, *l̆ike*, was gradually weakened until it became confused with the adjective ending *l̆i* (*l̆y*), OE. *lig*, which henceforth came to be the distinctive adverbial ending and was greatly extended in its use with both native and foreign words. The third ending above is least frequent of all, and was not extended in the ME. period.

191. Adverbs, formed from the oblique cases of adjectives or substantives in Old English, also remain in Middle English. These are most commonly genitives in *es*, the masculine-neuter ending,

as *elles* 'else,' *unwāres* 'unawares,' *daies* 'by day,' *nihtes* 'by night,' *nēaes* 'needs.' This ending was considerably extended in its use in Middle English, as to adjectives otherwise ending in *e*, *inge* (*linge*), and to nouns without regard to original gender. Old accusatives are *lĭtel*, *līt* 'little,' *firn* 'formerly,' *ful* 'fully,' *ȝenōh* (*enough*, *anough*). Old datives are *sǭre*, *seldom*, *whīlom*, relics of OE. dative-instrumental singulars or plurals. Neither of these last two case-forms was frequently used in forming ME. adverbs, and many formed in OE. gradually disappeared.

192. Pure pronominal adverbs are *þǭ* 'when,' *þus* 'thus,' *hū* (*hōū*) 'how,' *whȳ* 'why,' *þan* (*þen*), *whan* (*when*). Adverbs of place, based on adjective or pronominal roots, commonly have the ending *en*, from OE. *an*, as in case of those signifying 'where' or 'whence.' Examples of adverbs signifying 'place where' are *innen* (*inne*) 'in, within,' *ūten* (*ūte*) 'out,' *fǭren* (*fǭrn*, *fǭre*) 'before'; of those signifying 'place from which' *hennen* (*henne*) 'hence,' *hwennen* (*hwenne*, *whenne*) 'whence,' *ę̄sten* (*ę̄ste*) 'from the east.' To this class was added also some Norse forms, as *heþen* 'hence,' *þeþen* 'thence.' On the other hand, some of these adverbs have *es* instead of *en* in late Midland by extension of the *es* ending, as already mentioned above. A few adverbs denoting 'place whither' end in *der*, originally comparative, as *hider* 'hither,' *bider* 'thither,' and perhaps by influence of these *ȝonder*.

193. Compound adverbs are frequent, some being of OE. origin, some of Middle English formation. As belonging to the former, those ending in *līke* might be counted, although this had become a well-established adverbial ending in OE. Better examples are those ending in *ward*, OE. *weard*, as *upward*, *sūþward* 'southward,' and *mēle*, OM. *mēlum*, as *dropmēle* 'drop by drop.' To these were added in Middle English many ending in *ful*, *dę̄l*, 'part,' *līme*, *whīle*, *way*, *wīse*, and others. Still other compound adverbs are made up of a prefix, the relic of an older preposition, and a noun or pronoun, as *besīde*, *away*, *adūne* 'adown,' *forþī* 'because,' *þerin* 'therein,' *þerof* 'thereof.' Such adverbs as *alway* (*always*), *sum-*

time, sumwhile, are made up of an indefinite pronoun and a noun, and such as *within, withoūten* (*withoūte*) of two adverbs.

NOTE 1.—In early Midland adverbs differ little from the later time except as they conform somewhat more nearly to OE. forms.

NOTE 2.—The principal variations of the dialects are as follows. Nth. shows the loss of final *e* in most adverbs, so that adjectives and corresponding adverbs are invariable as a rule. The ending *lĭke* was early weakened to *lĭ* (*lў*), and in its place Norse *-leiki* is sometimes found, as *hardlaike* 'hardly.' The ending *inge* (*linge*) frequently becomes *inges* (*linges*), and the *es* ending is otherwise extended, as to numeral adverbs *ānes* 'once,' &c. The Norse adverbs of place are much more common, as *hepen* 'hence,' *quepen* 'whence.' Among compound adverbs, Nth. uses the Norse suffix *gāte* 'way, manner,' as in *algāte* 'always,' *pusgāte* 'in this manner,' while forms like *ūtwith* 'without,' *forwith* 'before,' are more common. The preposition *on*, when becoming a prefix, remains *on* (*o*), as in *obove* 'above,' *onān* 'anon,' *onlīve* (*olīve*) 'alive.' Sth. retains the *e* ending, even where wholly lost in other dialects, as in the numeral adverbs *ēne* 'once,' &c. The Sth. form of OE. *līce* is *līche*, which is not weakened to *lĭ* (*lў*), and *inge* (*linge*) does not become *inges* (*linges*). The ending *en* (*e*) is more extended in its use. Norse forms are not found, and OE. *on*, when becoming a prefix, is weakened to *an* (*a*) as in *alīve, abōut, anōn.*

194. The comparative and superlative of the adjective may be used as an adverb without change. In addition, a few adverbs not derived from adjectives have comparative endings. A few monosyllabic adverbs with mutation remain from OE. times, as *bet* 'better,' *ēr* (*ēre*) 'ere,' *leng* 'longer'; compare Sievers, 'Gr.' § 323.

THE PREPOSITION.

195. Little need be said of Middle English prepositions, since they present no serious difficulties, and show few changes not easily understood from the ordinary changes in phonology. Most OE. prepositions were preserved in Middle English, and some few were added from other sources, as Norse. Thus *frō* 'from' is derived from Norse *frā*, as is probably *umb* (*um*), cognate with OE. *ymbe* 'around.' Some few prepositions altered their meaning, as *wiþ* 'with,' which more commonly meant 'against' in Old English. In Middle English it ordinarily came to mean 'with,' doubt-

less through use in such expressions as *fight with*, in which it could have either signification. When this came to be true, *mid* in the latter meaning gradually disappeared. Simple prepositions from OF. were adopted in certain phrases, as *par amūr*, *par fai*, *paraventure* (*paraunter*), and certain OF. words came to be used as prepositions; examples are *rūnd* 'round,' *except*, *maugrē* 'in spite of,' *sāve*, *acordaunt*, later *acording*. Compound prepositions and prepositional phrases became common in Middle English, as *ażein* (*again*), *ażeines*, *amǭng*, *alǭng*, *besīde*, *nēżhǭnd* (*nērhǭnd*) 'near at hand, near,' *tōward*, *ūttāken* 'except.' OF. words were also united in these phrases as *bi cause of*, *be rȩson of*, *in regard of*, *arōund*, *according tō*.

NOTE.—It is naturally impossible to separate dialects on the basis of prepositions only, but some prepositions seem almost peculiar to certain dialectal divisions. Thus Nth. uses *at* and *til* (*intil*, *until*) for *tō* and *untō*, *amēl* (*omēl*, *emēl*, *imēl*) for *betwēn*, and *wiþ* more commonly instead of *mid*. Sth. has *an* (*a*) for *on*, *tō*, *untō*, and *med* for *wiþ*.

THE CONJUNCTION

196. Old English conjunctions in general remain in Middle English, subject to such changes as were natural to their phonetic forms. Among those deserving special mention are *eiþer* (*eiżþer*) 'either,' *ouþer* (*ǭþer*, *or*) 'or,' *siþen* (*siþenes*, *siþe*, *sith*, *seþe*, &c.) 'since,' Nth. *sin*, *sen*. Among correlative conjunctions, *þē . . . þē* remain from OE. *þȳ : . . þȳ* with different vowel by analogy of *þē*; but OE. *swā . . . swā* gave place to *alswǭ . . . ase*, or *as . . . as*. From OE. correlatives and preceding indefinite pronouns also arose the new correlatives of Middle English, as *eiþer* (*ǭþer*) . . . *or*, *neiþer* (*nǭþer*) . . . *nor*, in which *or*, *nor* are weakened forms of the indefinite *ǭþer*, OE. *āhwæðer*, *āwðer*. The common negative of Middle English is *ne*, which often suffers apocope of *e* and unites with the following word as in Old English. The OE. *nā*, from *ne* + *ā*, remained sometimes in *nǭ*, as to-day in *no better*, *no more of it*, but at the same time a new negative *nat* (*not*), based on OE.

nāwiht 'naught,' came into use and gradually supplanted both of the others in most situations. Sometimes both *ne* and *nat* (*not*) were used in the same sentence. In Middle English also, the Norse negative *nei* (*nay*) was adopted, as was also the affirmative *ei* (*ay*) beside the OE. affirmative *ȝes* (*ȝis, yes*).

THE INTERJECTION

197. Middle English interjections come from Old English, as *lō̜, ō̜* (*ō̜h*), *wō̜*, with the weak forms *la, a* (later perhaps *lā, ā, āh*), *wa* (*walawa*). From Norse came *wei* (*wai*) 'woe,' *weilawei* (*wailawai*), and *hō*; from Old French *alas, fȳ*. The adoption of foreign interjections is probably mainly of literary origin.

And Crīst ne wolde ðat hē sculde lānge rixan, and wærd dēd and his mōder beien.

And tē Eorl of Angæu wærd dēd and his sune Henrī tōc tō þē rice. And tē cwēn of France tōdælde frā þē kīng and scæ cōm tō þē iunge Eorl Henrī, and hē tōc hire tō wīve and al Peitou mid hire. IV. THE DEBATE OF THE BODY AND THE SOUL

Als Ī lay in a winteris nyȝt[4]
  In a droupening[5] biforn þē day,
Forsōþe[6] Ī sauȝ a sellȳ syȝt[7],
  A bodȳ on a bēre lay,

[1] ibod. [2] pond of ride. [3] habbeþ. [4] nyt. [5] droukening. [6] vorsoþe. [7] syt.

Þat hāvede bēn a mōdȳ knyȝt
And lītel[1] served God tō pay[2];
Lǭren hē hāved þē līves lyȝt,
Þē gǭst was ōūte and scholde away.

Wan þē gǭst it scholde gǭ,

Bihēld[4] thē bodȳ þēre it cam frǭ
Sǭ serfullī with drēdlī mōd;
It seide, 'Weile and walawǭ!
Wǭ wo þe þī fleys, þī fōūle blōd.
Wreche bodī wȝȳ līst ōū[5] sǭ,
Þat ȝwīlene wēre sǭ wīlde and wōd?

'Þōū þat wēre woned tō rīde
Heyȝe on horse in and ōūt,
Sǭ kweynte[6] kniȝt ikūð[7] sǭ wīde,
As a lȳōn fērs and prōūd,

And þī lēde þat was sǭ lōūd?
ȝwī līst ōū þēre sǭ bāre ō sīde[8]
Ipricked in þat pōre schrōūd?

'ȝwēre bēn þī wurðlī[9] wēdes,

Þī prōūde palfreys and þī stēdes?
Þat þōū abōūt[10] in dester leddes?
Þī faucōūns þat wēre wont[11] tō grēde,
And þīne hōūndes þat þōū fedde[12]?
Mē þinkeþ God is þē tō gnēde,
Þat alle þīne frēnd bēon frǭ þē fledde.

'ȝwēre bēon þī castles and þī tōures,
  Þī chāmbres and þī rīche halles
Ipeynted with sǭ rīche flōures,
  And þī rīche rǭbes alle?
Þīne cōwltes and þī covertōures,

Wreche, ful derk[1] is nōu[2] þī bōur;
  Tōmoruwe þōu[3] schalt þērinne falle.

'ȝwēre bēn þīne cōkes snelle,

With spę̄ces swēte for tō smelle,

Tō dō þat fōule fleys tō swelle
  Þat fōule wormes scholden ę̄te?
And þōu hāvest þē pīne of helle
  With glotonȳe mē bigę̄te. . . .'

'For God þē schǭp[6] aftir his schaft[7],

In þī lōking was Ī laft

Þat streite sat tō bac and brest;
An helm þat was lītel[3] tō hǣre

V. ADAM AND EVE

Ēve haþ Seþ yladde
Tō Paradȳs as Adam badde.
And [4] Ēve drouȝ hir fram þē ȝāte,
Schē ne [5] durst nouȝt lōke in þērate,
Schē durst nouȝt shewe God hir fāce,
Bot lēte Seþ abīde grāce.
And Seþ in þilke stȩde,

Hē abǭd þēr alle stille

Þurch [6] þē vertu of Godes miȝt
Þēr cōm adōūn an āngel briȝt,
And seyd tō Seþ in þis manēre [7],
Þat hē miȝt wiþ ēren hēre:
'God þat al þē warld haþ wrouȝt
Sēnt þē wōrd, þōū biddest for nouȝt,
Ēr þē terme [8] bē ygǭn
Of fīve þōūsende winter and ǭn,
And fīve and twentī winter and mǭ.

And God þat is ful of miȝt

And hāve ynomen kīnd of man,
And bāþed in þē flom Jordan;
Þan schal Adam and Ēve his wiif
Bē anoint wiþ oyle of liif,
And alle þō þat after hem comen
Þat have cristendōm[2] ynomen.
Gō tel Adam þī fader þis,
Þat nōn ōþer grāce þēr nis;
And tō grayþe him bid him hȳȝe[3],
His terme neiȝeþ þat hē schal dȳe.
And when þē bodī þat haþ dōn sinne,
And þē soule schal parten atwinne,

Sō seyþ[4] mī Lōrd þat alle haþ wrouȝt,
And biddeþ þat ȝē ne drēde nouȝt,
For nouȝt þat ȝē schul hēre ne sē;
Sō hē sent ȝōū wōrd bī mē.'
Ēve and Seþ her waye nōme,
And went aȝain[5] as þai cōme,
And tōld Adam þē tīding
Þat him sent þē Hevenking;
And Adam hēld up bōþe his hōnd,
And þonked God of alle his sōnd.
Adam his eiȝen unfēld,
And seþþen his sone hē bihēld
And seyd, 'Mercī, swēte Jēsus[6],
Whō haþ wōūnded mī sone þus?'
'Bī God, Adam,' quaþ Ēve,
'Hē þat is abōūte tō grēve

Hē cōm and mette[1] wiþ ōūs tway
As wē ȝēden in þē way,
And went tōward Paradȳs;
Þus hē bǭt him in þē viis.'
'Ǭ wę̄, Ēve,' quaþ Adam þǭ,
'Þōū hast ywrouȝt michel wǭ!
Alle þat after ōūs bē bǭre,
Alle schal curssen ōūs þērfǭre;
And alle þat after ōūs liven,

Þērfǭre, Ēve, telle alle þīne childer
Bǭþe þē ȝonger and þē elder,

Mī tīme is comen, Ī[3] schal dȳe.'
Þus Adam bad Ēve his wiif
Tę̄chen his childer after his liif,
Hōū þai schuld anǭn beginne
Tō crīen mercī for her sinne.
And þǭ hē hadde ytauȝt hem þus,
As þē bōke telleþ ōūs,
Hē knēled adōūn in his bę̄de,
And dȳed anǭn in þat stę̄de.
And as þē āngel hadde yseyd,
Alle þē liȝtnisse was yleyd;

Sexe[1] days and sexe[1] niȝt.
Ēve bigan tō wēpe and crīe,
Þǭ schē[2] seyȝe Adam dȳe;
And Seþ māde rewelī mǭn,
And fēl dōūn on his fader anǭn,
And as it telleþ in þē bōk[3]
In his armes his fader hē tōk,
And ful bitterlīche hē wēpe.
And God Almiȝtī þērof tōke kēpe,
And sent adōūn an āngel briȝt
Þat seyd tō Seþ anǭn riȝt,
'Arīse and lēte þī sorwe bē,
And wiþ þīne eyȝen þōū schalt sē

Frǭ þē tīme þat hē ēte
Of þat appel him þouȝt sǭ swēte.

Þus seyd Jēsus þat sitt an heyȝe,
And seþþen intō heven hē steiȝe.
Fram þē tīme þat cas fēl
Þat cursed Kaim slouȝ Abēl,
Til Adam dȳed upon mōld,
As swēte Jēsus Crīst it[1] wōld,
ȝēte lay Abēl above ērþe;
Til Jēsus Crīst,—herd mōt hē wērþe—
Bad his āngels þat þai schōlde
Birȳ þē bodīs under mōlde.
Þē āngels al wiþōūten chēst
Dēde anōn Godes hēst.
Intō[2] clōþes þē bodī þai fēld;

Riȝt in þilke selve stēde,
And hadde wonder what þai dēde,
For þai ne hadde ar þan
Never sēn birȳ nō man.
Þan seyd an āngel þēr hē stōde,

'Tāke ȝēme hōw wē dō,
And hēr afterward dō sō.
Birīeþ alle sō þat dȳen
As ȝē sē wiþ ȝōūre ȳȝen[3];
Þat wē dōn þis bodīs hēre,

Þǭ þē āngels had seyd þus
Þai wenten aȝain tō swēte Jēsus,
Tō heven þēr þai formast wēre,
And lę̄ved Ēve and hir children þēre.
Sex days after Adam was dę̄de,
God Almiȝtī an āngel bę̄de
Gǭ tellen Ēve, Adames wiif,
Þē terme was comen of hir liif.
Þǭ Ēve wist schę̄ schulde[1] dȳe,
Schē clę̄ped forþ hir progenīe,
Bǭþe þē ȝonger and þē eldre,
Hir childer and hir childer childre,
And sayd þat alle miȝten hēre:
'Þǭ ich and Adam, mī fēre,

Anǭn his wrę̄þe[3] was ysent
On ōūs and on ōūr progenīe;
And þērfǭre mercī ȝē schul crīe,
And bǭþe bī day and ēke bī niȝt
Dōþ penance bī al ȝōūr miȝt.
And þōū, Seþ, for anī þing
Ich comand þē on mī blisceing
Þat þī fader liif bē write,
And mīn alsǭ, everī smite,
Frǭ þē bigining of his liif
Þat hē was māked, and ich his wiif,
And hōū wē were fīled wiþ sinne,

And amenden aȝain[1] Jēsus.'
Þǭ Ēve hadde þus yseyd,
And hir erand on Seþ yleyd,
Schē knēled adōūn and bad hir bēde;
And riȝt in þilke selve stēde,
Þat alle hir kin stōden and seyȝe
Whēre, schē dȳed biforn her eyȝe.
Anǭn riȝt as Ēve was dēde,
Hir children tōken hem tō rēde,
And bēren hir þilke selve day
Untō þē stēde þēr Adam lay,
And birīed hir in þilke stēde,
Riȝt as þē āngels bēde
Þat birīed Adam and Abēl;
Þērof þai tōken hēde ful wēl.
And þǭ schē was in ērþe ybrouȝt,

Þai wōpen and māde miche sorwe.
And at þē foure[2] dayes ēnde,

And seyd þēr þai wēpen sǭre:
'Dōleþ sex days and na mǭre;

For God þat alle þē warld haþ wrouȝt,
And alle þē warld māde of nouȝt,
As him þouȝt it wold[2] bē best,
Þē seven day hē tōke rest.
And anōþer þing witterlȳ.

Þē seven day was Sonenday[3],
And þat day schal bē dōmesday,
And alle þē soules þat wēle hāve wrouȝt
Þat day schul tō rest bē brouȝt.'
Þǭ[4] þē āngel hadde his erand seyd
Þat God Almiȝtī[5] hadde on him leyd,
Intō heven þē way hē nam,—
Þai wist never whar hē bicam.
Seþ anǭn riȝt bigan
Of Adam þat was þē forme man,
Al tōgider hē wrǭt his liif,
As Ēve hade beden, Adames wiif,
As telleþ þē bōke þat wēle wǭt,
In stǭn alle þē letters hē wrǭt,
For fīr ne water upon mōld
Never grēven it ne schōld.
Þǭ Seþ hadde writen Adames liif,
And Ēves þat was Adames wiif,
Riȝt in þilke selve stę̄de
Þēr Adam was wone tō bide his bę̄de,
In þilke stę̄de þē bōk hē leyd,
As wīse men ę̄r þis hān seyd[6],
Þēr Adam was wone tō biden his bę̄de,
And lę̄ved it in þilke stę̄de;

Þat was heir[2] of Dāvid lǫnd;
And Adames liif þēr hē fǫnd,
And al in stǫn writen it was,
And damāged[3] nǫn letter þēr nas.
For alle þat Salamōn cōūþe

Of alle þat ever was þēr write,
Hē ne cōūþe ǭ wōrd understǫnd

And Salamōn þat was wiis
Bisouȝt þē King of Paradȳs,

Sēnde him grāce fram heven liȝt,
Þat hē miȝt hāve grāce tō wite

And seyd tō Salamōn ywis:

And hēre þōū schalt a temple wirche

Nōw hāve ȝē herd of Adames liif,
And of Ēve þat was his wiif,
Whiche liif þai ladden hēre on mōld,
And seþþen diden as God wōld.
And þǭ Adam in ērþe was dę̄d,
For sinne þat cōm of her sēd,
God sent Nōēs flōd
And adrenched al þē brōd[3];
Swiche[4] wrēche God ynam[5]
Of alle þat of Adam cam,
Sāve Nōē[6] and his wiif
Þat God hadde graunted liif,
And his children þat hē hadde
Tō schip wiþ him þat hē ladde.
Of Nōē seþþen and of his childer
Wē bēþ comen al tōgider.
And seþþen þai lived[7] in swiche sinne
Þat for þē liif þai liveden inne

As wē hēre clerkes telle.
And anōþer nǭble citē,
Þat was yhǭten Ninivē,

And þo̧ þai wēre tō penaunce pilt
God forȝaf hem here[1] gilt;
Þus Ninivē sāved was
Þurch bisēkeing of Jo̧nas.
Ȝēte after Nōes flōd,
Al þat cōm of Nōēs[2] blōd,—
Wēre[3] hē never so̧ ho̧lȳ man,—
For þē sinne þat Adam bigan,
Þēr mōst no̧n in heven com,
Er God had his cōnseyl nome
Tō liȝten in þē virgine Mārīe,
And on þē rōde wolde[4] dȳe,
For tō biggen ūs alle frē,—
Yherd and heyed mōt hē bē.
Now hāve ȝē herd of swēte Jēsus,
As þē bōke[5] telleþ ūs;
Of þē warld hōū it bigan,
And hōū hē mãde of mōlde[6] man.
Jēsu þat was nomen wiþ wro̧ng,
And þo̧led manī paines stro̧ng
Among þē Jewes þat wēre felle,

VI. HAVELOK THE DANE

In þat tīme, sǭ it bifelle,
Was in þē lǭnd[1] of Denemark
A rīche king, and swȳþe stark;
Þē[2] nāme of him was Birkabeyn.
Hē hāvede manī knict and sweyn;
Hē was fayer[3] man, and wicht[4],
Of bodī hē was þē beste knicht[5],
Þat eyere micte lęden ūt[6] hęre,
Or stēde on[7] rīde, or handlen spęre.
Þrē children hē hāvede bī his wīf,
Hē hem lovede sǭ his līf;
Hē hāvede a sone and[8] douhtres twǭ,
Swīþe fayre, as fēl it sǭ.
Hē þat wile nǭn forbęre,
Rīche ne pōvre, king ne kaysęre,
Dęth him tōk þan hē best wilde[9]
Liven; but hyse dayes wēre filde[10],
Þat hē ne moucte nǭ mǫre live
For gōld[11] ne silver, ne for nǭ gyve.
Hwan hē þat wiste, rāþe hē sende
After prēstes fer and[12] hēnde,
Chanōunes gōde and monkes bǭþe,
Him for tō wisse and tō rǭde[13];
Him for tō hoslen, and tō[14] shrīve,
Hwīl his bodī wēre on līve.
Hwan hē was hosled and shriven,
His quiste māked and for him gyven,

His knictes dēde hē alle site,
For þoru hem hē wolde wite
Hwō micte yēme hise children yunge,
Til þat hē kōuþen spęken wiþ[1] tunge;
Spęken and gangen, on horse rīden,
Knictes and[2] sweynes bī here sīden.
Hē spǫken þēroffe, and chǫsen sōne
A rīche man þat[3] under mōne,
Was þē trewest þat hē wēnde,
Godard, þē kinges oune frēnde;
And seyden hē mouchte[4] hem best lōke,
Yif þat hē hem undertōke,
Til hise sone mouhte[5] bęre
Helm on hęved, and lęden ūt hęre,
In his hand a spęre stark,
And king bēn māked of Denemark.
Hē wēl trowede þat hē seyde,
And on Godard handes leyde,
And seyde, 'Hēre bitęche Ī þē
Mīne children alle þrē,
Al Denemark and al mī fē,
Til þat mī sone of ēlde[6] bē.
But þat ich wille, þat þōu[7] swęre

On þē belles þat men ringes,
On messebōk þē prēst on singes,
Þat þōu mīne children shalt wēl[8] yēme,
Þat here[9] kin bē ful wēl quēme,
Til mī sone mōwe bēn knicht[10],

For þē king þat deide sōne.
Jēsu[2] Crīst that māked mōne
On þē mirke niht[3] tō shīne,

Hwan Birkabeyn was leyd in grāve,
Þē ērl dēde sōne tāke þē knāve,

And in þē castel dēde hē hem dō,

Of here kyn, þēr þei sperd wǭre[5].
Þēr hē grēten ofte sǭre,

Hē ne yaf a note of hise ǭþes;
Hē hem clǭþede riht[7], ne fedde,
Ne hem ne dēde rīchelīke bedde[8].
Þanne Godard was sikerlike
Under God þē mǭste swike
Þat evre in ērþe shāped was,
Withūten ǭn, þē wike Judas.
Hāve hē þē malisūn tōday

Þat God himselve ran on blōde!
Crīst warīe him with his mōuth;
Warīed worþe[1] hē of norþ and sūth,
Offe alle men þat spȩ̄ken kunne,
Of Crīst þat māked[2] mōne and sunne!
Þanne hē hāvede of al þē lō̧nd
Al þē folk tilled intil his hō̧nd,
And alle hāveden sworn[3] him ō̧th,

Þat hē sholden hise wille frȩ̄me,
And þat hē shulden him nouht[4] grȩ̄me,
Hē þouhte[5] a ful strō̧ng trȩ̄cherȳ,
A traysōn and a felōnȳ,
Of þē children for tō māke,—
Þē devel of helle him sōne tāke!
Hwan þat was þouht[6], onō̧n hē ferde
Tō þē tōur þēr hē wō̧ren sperde,
Þēr hē grēten for hunger and cō̧ld.
Þē knāve, þat was sumdȩ̄l bō̧ld,
Kam him ageyn, on knēs him sette,
And Godard ful feyre hē þēr grette.
And Godard seyde, 'Wat is yū?
Hwī grēte yē and goulen nōū?'
'For us hungreth swīþe sō̧re,'
Seyden hē wiþūten[7] mō̧re;
'Wē ne hāve tō ȩ̄te[8], wē ne hāve
Hērinne neyther kniht[9] ne knāve
Þat yeveth us drinken, ne nō̧ mȩ̄te
Halven dȩ̄l þat wē mōun ȩ̄te.

Godard herde hēre wā,—
Thēroffe yaf hē nouht[2] a strā,—
But tōk þē maydens bōthe sāmen,
Al sō it wēre upon his[3] gāmen,
Al sō hē wolde with hem leyke,
Þat wēren for hunger grēne and bleike.
Of bōþen hē karf on twō here þrōtes,

Þēr was sorwe, wōsō it sawe,

Havelok it saw, and þēr[6] bī stōd:
Ful sorī was þat sēlī knāve,
Mikel drēd hē mouhte[7] hāve,
For at hise herte hē saw a knīf
For tō rēven him hise lȳf.
But þē knāve[8] þat lītel was,
Hē knēlede biſōr þat Judas.
And seyde, 'Lōverd, mercī nōū!

Withdrow þē knīf þat was lewe
Of þē sēlī children blōd.
Þēr was mirācle fair and gōd,
Þat hē þē knāve nouht[2] ne slou,
But for rewnesse him wiþdrow[3].
Of Havelok[4] rewede him ful sōre,
And þoucte hē wolde þat hē dēd wōre,

Helpe þē pōre mēn þērwyþ tō lyve
Largelȳ and wyþ gōde wylle,
Þey mōwe peyse here dēdys ylle.
A gōde ensaumple nōw ȝē hēre,
Of Pērs þat was a tollēre;
And Ī[2] shal telle ȝōw as quyk
Hōw hē was bǭþe gōde and wyk.
Seynt Jǭne[3] þē aumenēre
Seyþ Pērs was an ōkerēre,
And was swȳþe coveytōus,
And a nygūn and avarōus,
And gadred penes[4] untō stǭre
As ōkerēres[5] dōne aywhǭre.

Befyl hyt sō upon a day
Þat pōre men sāte in þē way,
And spred here hatren on here barme
Aȝēns þē sonne þat was warme,
And rekened þē custome hōuses ȩch ōne
At whych þey had gōde, and at whyche nōne;
Þēre þey hadde gōde þey preysed weyl,
And þēre þey hadde noght, never a deyl.
As þey spāk of manȳwhat,
Cōme Pērs forþ in þat gat;
Þan seyd ȩch ōne þat sate and stōde,
'Hēre comþ Pērs þat never dyd gōde.'
Ȩch ōne seyd tō ōþer jangland,
Þey tōke never gōde at Pērs hand;
Ne nōne pōre men never shal hāve,
Cōūde hē never sō weyl crāve.
Ōne of hem began tō sey,
'A wājōūr[1] dar Ī wyþ ȝōw ley
Þat Ī shal hāve sum gōde at hym,
Bē hē never sō gryl ne grym.'
Tō þat wājōūr þey graunted alle,
Tō ȝyve him a ȝyft, ȝyf sō myȝt befalle.
Þys man upsterte and tōk þē gāte
Tyl hē cōm at Pērs ȝāte.
As hē stōde stylle and bōde þē quȩde,
Ōne cōm wyþ[2] an asse charged wyþ brȩde;
Þat yche brȩde Pērs had boght,
And tō hys hōūs shuld hyt bē broght.
Þō hē sagh Pērs come þēr wyþal,
Þē pōre þoght, nōw aske Ī shal:
'Ī aske þē sum gōde pur charytē,
Pērs, ȝyf þȳ wylle[3] bē.'

Pērs stōde and lōked on hym
Felūnlȳche wyþ yȝen grym.
Hē stoūped dowǹ tō sēke a stǭne,
But, as haþ was, þan fǭnde hē nǭne.
For þē stǭne hē tōke a lǭfe,
And at þē pōre man hyt drǭfe.
Þē pōre man hente hyt up belȳve,
And was þērof ful fērlȳ blȳþe.
Tō hys felawes[1] faste hē ran
Wiþ þē lǭfe, þys pōre man.
'Lǭ,' hē seyde[2], 'what Ī hāve
Of Pērs ȝyft, sǭ God me sāve.'
'Nay,' þey swōre bȳ here þryft,
'Pērs ȝāve never swych a ȝyft.'
Hē seyd, "ȝē shul weyl undyrstǭnde
Þat Ī hyt had at Pērs hǭnde;
Þat dar Ī swę̄re on þē halydōm
Hēre befǭre ȝōw ę̄ch ǭn[3].'
Grę̄te merveyle had þey alle
Þat swych a chaunce myȝt hym befalle.
Þē þridde day,—þus wryte hyt is[4],—
Pērs fyl in a grę̄te syknes;
And as hē laye[5] in hys bedde,
Hym þoghte weyl þat hē was ledde
Wyþ ǭne þat aftyr hym was sent
Tō come untō hys jugement[6].
Befǭre þē Juge[7] was hē broght
Tō ȝēlde acoūnte hōw hē hadde wroght.
Pērs stōde ful sǭre adrad,
And was abashed as amad[8];
Hē sagh a fēnde on þē tǭ partȳ
Bewreyyng hym ful felūnlȳ.

Alle hyt was shewed hym beſo̅re
How̅ hē had lyved syn hē was bo̅re,
And nāmelȳ everȳ wykked dēde
Syn fyrst hē cōude hymselve[1] lę̄de:
Whȳ hē hem dyd and for what chę̄sū̅n,
Of alle behōveþ hym ȝēlde[2] a rę̄sōū̅n.
On þē tōþer[3] partȳ stōde men ful bryȝt
Þat wulde hāve sāved hym at here myȝt,
But þey myghte no̅ gōde fȳnde
Þat myȝt hym sāve or unbȳnde.
Þē feyre men seyd, 'What is tō rēde?
Of hym fȳnde wē no̅ gōde dēde
Þat God is payd of, but of a lo̅fe
Þē whych Pērs at[4] þē pōre man dro̅fe.
Ȝyt ȝāve hē hyt wyþ no̅ gōde wylle,
But kast hyt after hym wyþ ylle;
For Goddys love ȝāve hē hyt noȝt,
Ne for almesdēde hē hyt had þoght.
No̅þelę̄s, þē pōre man
Had þē lo̅fe of Pērs þan.'
Þē fēnde had leyed[5] in balaunce
Hys wykked dēdes and hys myschaunce;
Þey leyd þē lo̅fe aȝēns hys dēdys,—
Þey had noȝt elles, þey mōte nēdys,—
Þē hōlȳ man telleþ us, and seys
Þat þē lōfe māde ę̄ven peys.
Þan seyd þēse feyre men tō Pērs,
'Ȝyf þo̅ū bē wȳs, no̅w̅ þo̅ū lę̄res
How̅ þys lo̅fe þē helpeþ at nēde
Tō tylle þȳ soule wyþ almesdēde.'
Pērs of hys slēpe gan blynke,
And grę̄tlȳ on hys drę̄me gan þynke,

Syghyng wyþ mōrnyng chēre
As man þat was in grẹ̄te wẹ̄re,
Hōw̄ þat hē acouped was
Wyþ fēndes fẹ̄le for hys trespas,
And hōw̄ þey wulde hāve dampned hym þēre,
ȝyf mercȳ of Jēsu Crȳst ne wēre.
Alle þys in hys herte hē kast,
And tō hymself hē spak at þē laste,
Þat 'For a lǭfe in ẹ̄vyl[1] wylle
Halpe mē in sǭ grẹ̄te perel,
Moche wulde[2] hyt helpe at nēde
Wyþ gōde wyl dō almesdēde.'
Frǭ þat tȳme þan wax Pērs
A man of sǭ feyre manērs,
Þat nǭ man myȝte[3] in hym fȳnde
But tō þē pōre bǭþe mēke and kȳnde;
A mȳlder man ne myȝt nat bē,
Ne tō þē pōre mǭre of almes frē,
And reuful of herte alsō hē was
Þat mayst þōū hēre lẹ̄re in þys pas.
  Pērs mette, upon a day,
A pōre man bȳ þē way
As nāked as hē was bǭ̄re,
Þat in þē sȩ̣ had alle lǭre.
Hē cōme tō Pērs þēre hē stōde,
And asked hym sum of hys gōde,
Sumwhat of hys clǭþing,
For þē love of Hevenekyng.
Pērs was of reuful herte,
Hē tōke hys kyrtil of as smert,
And dēd hyt on þē man above,
And bad hym wẹ̄re hyt for hys love.

[1] eveyl. [2] wlde. [3] myȝt.

Þē man hyt tōke and was ful blȳþe;
Hē ȝēde and sǭlde hyt as swȳþe.
Pērs stōde and dyd behǭlde
Hōw̄ þē man þē kyrtyl sǭlde,
And was þērwyþ fērlȳ wrǭþe
Þat hē sǭlde sō sōne hys clǭþe.
Hē myȝt nǭ lēnger for sorow stand[1],
But ȝēde hǭme ful sǭre grētand,
And seyd hyt was an ę̄vyl sȳgne,
And þat hymselve[2] was nat dȳgne
For tō bē in hys preyēre;
Þērfor nolde hē þē kyrtyl wę̄re.
Whan hē hadde ful lǭng grēte,
And a partȳ þērof gan[3] lēte,—
For comūnlȳch after wēpe
Fal men sōne on slēpe,—
As Pērs lay in hys slēpyng,
Hym þoght a feyre swevenyng.
Hym þoght hē was in hevene lyȝt,
And of God hē had a syght
Syttyng in hys kyrtyl clad,
Þat þē pōre man of hym had;
And spak tō hym ful mȳldelȳ,
'Whȳ wēpest þōū and art sǭrȳ?
Lǭ Pērs,' hē seyd, 'þys is þȳ clǭth;
For hē sǭlde hyt, wēre þōū wrǭth.
Know hyt weyl, ȝyf þat þōū can,
For mē þōū ȝāve hyt þē pōre man;
Þat þōū ȝāve hym in charytē,
Everȳ deyl þōū ȝāve hyt mē.'
Pērs of slēpe ōūte breyde,
And þoght grę̄te wunder and seþen seyd,

[1] stande. [2] hymself. [3] began.

'Blessyd be alle pōre men
For God Almyȝtȳ loveþ hem;
And weyl is hem þat pōre āre hēre,
Þey āre wyþ God bǭþe lēfe and dēre,
And Ī shal fǫnde bȳ nyȝt and day
Tō bē pōre, ȝyf þat Ī-may.'
Hāstlȳ hē tōke hys kateyl
And ȝāve hyt tō pōre men ęche deyl.
Pērs kalled tō hym hys clerk
Þat was hys nǭtarȳe, and bad hym herk:—
'Ī shal þē shewe a pryvytē,
A þyng þat þōū shalt dō tō mē,
Ī wyl þat þōū nǭ man hyt telle;
Mȳ bodȳ Ī tāke þē hēre tō selle
Tō sum man as in bǭndāge,
Tō lyve in povert and in servāge;
But þōū dō þus Ī wyl bē wrǭth,
And þōū and þȳne shal bē mē lǭth.
ȝyf þōū dō hyt, Ī shal þē ȝyve
Tēn pōūnd[1] of gōld wēl wiþ tō lyve;
Þǭ tēn pōūnd Ī tāke þē hēre,
And mē tō selle on bǭnde manēre,
Ī ne recche untō whōm,
But ǭnlȳch hē hāve þē crystendōm.
Þē raunsūn þat þōū shalt for mē tāke,
Þarfǫre þōū shalt sykernes mākе
For tō ȝyve hyt blȳþelȳ[2] and weyl
Tō pōre men everȳ deyl,
And wyþhǭlde þērof nǭ þyng
Þē mōūntouns of a ferþyng.'
Hys clerk was wǭ tō dō þat dēde,
But ǭnlȳ for manās and for drēde.

[1] pownd, as in next line. [2] bleþely.

For drēde Pērs māde hym hyt dō[1],
And dēde hym plyghte hys trouthe þērtō
Whan hys clerk had māde hys ǭthe,
Pērs dēde on hym a fōule clǭthe;
Untō a cherche bǭþe þey ȝēde
For tō fulſylle hys wyl in dēde.
Whan þat þey tō þē cherche cōm,
'Lǭrde,' þoght þē clerk, 'nōw whōm
Myȝt Ī fȳnde, þys yche sēle,
Tō whōm Ī myȝte[2] selle Pērs wēle?'
þē clerk lōked everȳwhēre,
And at þē last hē knew whēre
A rȳche man was[3] þat ęr had bē
Specyal knowlych ever betwē,
But þurgh myschaunce at a cas
Alle hys gōde ylǭre was;
ȝōle, þus þat man hyghte,
And knew þē clerk wēl bē syghte.
Þey spak of ǭlde aqueyntaunce,
And ȝōle tǭlde hym of hys chaunce.
'ȝē,' seyde þē clerk, 'Ī rēde þōū bȳe
A man tō dō þȳ marchaundȳe,
þat þōū mayst hǭlde in servāge
Tō restǭre weyl þyn dammāge.'
þan seyd ȝōle, 'On swych chaffāre
Wulde Ī feyn mȳ sylver wāre.'
þē clerke seyd, 'Lǭ, ǭne hēre,
A trew man and[4] a dubonēre[5],
þat wyl serve þē tō pāy
Peyneble, al þat hē may.
Pērs shalt þōū calle hys nāme,
For hym shalt þōū hāve moche frāme.

  Þē clerk ȝāve alle hys raunsūn
Tō þē pōre men of þē tōūn,—
Plenērlȳ alle þat hē tōke
Wyþhēlde hē nat a ferþyng nōke.
Þē emperōūre sent hys messagēres
Alle abōūte for tō sēke Pērs,
But þey ne myȝte[1] never hēre
Of rȳche Pērs, þē tollēre,
In what stēde hē was nome,
Ne[2] whydyrward hē was become;
Ne þē clerk wuld telle tō nǫne
Whydyrward þat Pērs was gǫne.
  Nōū is Pērs bycome brȳche,
Þat ēr was bǫþe stoūte and rȳche.
Alle þat ever anȳ man hym bad[3],
Pērs dyd hyt wyþ herte[4] glad.
Hē wax sǫ mȳlde and sǫ mēke,
A mȳlder man þurt nǫ man sēke;
For hē mēked hymself ǫverskyle
Pottes and dysshes for tō swȳle[5].
Tō grēte penaunce hē gan hym tāke,
And moche for tō fast and wāke,
And moche hē loved þǫlmōdnesse
Tō rȳche, tō pōre, tō mǫre, tō lesse.
Of alle men hē wuld hāve dōūte,
And tō here byddyng mēklȳ lōūte;
Wulde þey bydde hym sytte or stande,
Ever hē wulde bē bōwande.

[1] myȝt. [2] no, as in next line. [3] do bad. [4] hert. [5] swele.

And for hē bāre hym sǭ mēke and softe,
Shrewes mysdēde hym ful ofte,
And hēlde hym folted or wōde
For hē was sǭ mȳlde of mōde.
And þey þat wēre hys felawes[1] 5
Mysseyd hym mǭst in here sawes;
And alle hē suffred here upbreyd,
And never naght aȝēns hem seyd.
ȝōle, hys lǭrde, wēl undyrstōde
Þat al hys grāce and hys gōde 10
Cōm hym[2] for þē love of Pērs,
Þat was of sǭ hǭlȳ manērs.
And whan hē wyst of hys bōūntē,
Hē kalled Pērs in pryvytē:
'Pērs,' hē seyd, 'þōū wēre wurþȳ 15
For tō bē wurscheped mǭre þan Ī,
For þōū art weyl wyþ Jēsu,
Hē shewe þ for þē grę̄te vertu;
Þarfǭre Ī shal māke þē frē,
Ī wyl þat my felaw þōū bē.' 20
Þartō Pērs graunted noght
Tō bē frēman as hē besoght;
Hē wulde bē as hē was ǭre
In þat servāge for evermǭre.
Hē þanked þē lǭrde mȳldelȳ 25
For hys grę̄te curteysȳ.
Syþþen Jēsu, þurgh hys myȝt,
Shewed hym tō Pērs syȝt,
For tō bē stalworþe in hys fǭndyng,
And tō hym hāve lovelǭngyng. 30
'Bē nat sorowful tō dō penaunce,
Ī am wiþ þē in everȳ chaunce;

Pērs, Ī hāve mȳnde of þē,
Lo̱ hēre þē kyrtyl þōu[1] ȝāve for mē,
Þērfo̱r grāce Ī shal þē sēnde
In alle gōdenesse weyl tō ēnde.'
Byfyl þat serjauntes[2] and squyērs
Þāt wēre wont tō serve Pērs
Went in pylgrymāge, as in kas,
Tō þat cuntrē þēre Pērs was.
Ȝōle ful feyre gan hem kalle,
And preyd hem ho̱me tō hys halle.
Pērs was þēre þat ȳche sēle,
And everȳch o̱ne hē knew hem wēle.
Alle hē served hem as a knāve
Þat was wunt here servȳse tō hāve.
But Pērs nat ȝyt þey knew,
For penaunce chaunged was hys hew;
Nat forþȳ þey behēlde hym fast,
And oftyn tō hym here yȝen þey kast,
And seyde[3], 'Hē þat stonte hēre
Is lȳche tō Pērs þē[4] tollēre.'
Hē hydde hys vysege al þat hē myȝt
Oute of knowlych of here syȝt;
No̱þelę̄s þey behēlde hym mo̱re
And knew hym weyl, al þat wēre þo̱re,
And seyd, 'Ȝōle, is ȝone þȳ pāge?
A rȳche man is in þȳ servāge;
Þē emperōure bo̱þe fer and nēre
Haþ dō hym sēche þat wē fȳnde hēre.'
Pērs lestned, and herd hem spę̄kyng,
And þat þey had of hym knowyng;
And pryvylȳ awey hē nam
Tyl hē tō þē portēr cam.

Þē portēr had hys spēche lǭre,
And hēryng alsǭ, syn hē was bǭre;
But þurgh þē grāce of swēte Jēsu
Was shewed for Pērs feyre vertu.
Pērs seyd, 'Late mē furþe[1] gǭ.'
Þē portēr spak and seyde[2] 'ȝǭ.'
Hē þat was dēf, and dōumbe alsō,
Spak whan Pērs spak hym tō.
Pērs ōute at þē ȝāte wente,
And þedyr ȝēde þēre God hym sente.
Þē portēr ȝēde up tō þē halle,
And þys merveyle tǭlde hem alle,
Hōw þē squylēr of þē kechyn,
Pērs, þat haþ woned hēreyn,
Hē asked lēve ryȝt nōw lāte,
And went furþ ōūt at þē ȝāte.
'Ī rēde ȝōw alle, ȝeveþ gōde tent,
Whederward þat Pērs is went;
Wyþ Jēsu Crȳst hē is pryvē,
And þat is shewed weyl on mē,
For what tȳme hē tō mē spak,
Out of hys mōūþ mē þoghte[3] brak
A flamme of fȳre bryght and clēre;
Þē flaumme māde mē bǭþe spēke and hēre,
Spēke and hēre nōw bǭþe Ī may,
Blessed bē God and Pērs tōday.'
Þē lǭrde and þē gestes alle,
Ǫne and ōþer þat wēre in halle,
Had merveyle þat hyt was sō,
Þat hē myȝte swych myrācle dō.
Þan as swȳþe Pērs þey soght,
But al here sēking was for noȝt.

[1] furþ. [2] seyd. [3] þoght.

Never Pērs þey ne fōunde,
Nyȝt ne day, in nō stōunde,
For hē þat tōke Ennok and Ēlȳ
Hē tōke Pērs þurgh hys mercȳ,
Tō reste wyþōutyn ēnde tō lę̄de,
For hys mēknes and hys gōde dēde:
Tāke ensample hēre of Pērs,
And partēþ wyþ þē pōre, ȝē ōkerērs,
For ȝōw shal never come joye[1] wyþynne,
But ȝē lę̄ve fyrst þat synne,
And ȝyve tō almes þat yche þyng
Þat ȝē hāve wune wyþ ōkeryng.
Nōw wyþ God lę̄ve wē Pērs;
God ȝyve us grāce tō dō hys manērs.

VIII. THE WEST MIDLAND PROSE PSALTER

Psalm I.

Blescd bē þē man þat ȝēde nouȝt in þē cōunseil of wicked, ne stōde nouȝt in þē waie of sinȝę̄res, ne sat nauȝt in fals jugement. 2. Ac his[2] wylle was in þē wylle of ōure Lǭrd, and hē schal þenche in his[2] lawe bǭþe daye and nyȝt. 3. And hē schal bē as þē trē þat is[2] sett bȳ þē ērnynges of waters, þat schal ȝeve his frut in his[2] tȳme. 4. And his[2] lę̄f schal nouȝt fallwen, and alle þynges þat þē ryȝtful dōþ schal multiplīen. 5. Nouȝt sǭ bēn þē wicked, nouȝt sǭ; as a pōudre þat þē wȳnde casteþ fram þē fāce of þē ērþe[3]. 6. Forþī ne schal nouȝt þē wicked arīse in jugement, ne þē sinnię̄rs in þē cōnseyl of þē ryȝtful. 7. For ōure Lǭrd knew þē waie of þē ryȝtful, and þē waye of synnę̄rs schal perissen.

[1] ioye. [2] hiis. [3] þerþe.

Psalm XXIII.

Our Lǭrd governeþ mē, and nǭþyng shal defailen tō mē; in þē stęde of pasture hē sett mē þēr. 2. Hē nourissed mē up water of fyllyng; hē turned mȳ soule fram þē fēnde. 3. Hē lad mē up þē bistiȝes of riȝtfulnes for his nāme. 4. For ȝif þat ich hāve gǭn amiddes of þē shadowe of dęþ, Ī[1] shal nouȝt douten ivels, for þou art wyþ mē. 5. Þȳ disciplīne and þȳn amendyng conforted mē. 6. Þou mādest radī grāce in mȳ siȝt oȝayns hem þat trublen mē. 7. Þou mākest fatt mȳn hęved wyþ mercȳ; and mȳ drynk, mākand drunken, is[2] ful clēre. 8. And þȳ mercī shal folwen mē alle daies of mī līf. 9. And þat ich wonne in þē hous of our Lǭrd in lengþe of daies.

Psalm XXIV.

1. Þē ērþe is our Lǭrdes and his plentē; þē world and ich ǭn þat woneþ þērinne. 2. For hē bigged it up þē sęęs, and māde it rędī up þē flōdes. 3. Whō shal clīmben intō þē mountein of our Lǭrd, ǭþer whō shal stǭnde in his hǭlȳ stęde? 4. Þē innocent in hǭnde and of clęne hert, þat ne tōke nouȝt his soule in īdelnesse and ne swōre noȝt in gilerī tō his neȝbūr. 5. Hē shal tāke bliscyng of our Lǭrd, and mercȳ of God his helpe. 6. Þis is þē biȝetyng of þē sēchand hym, sēchand þē fāce of God of Jācob[3]. 7. Ǭpeneþ ȝour ȝātes, ȝē princes of helle, and bēþ ȝē lifted, ȝē everlastand ȝātes, and þē kynge of glǭrīe shal entre. 8. Which is hē, þat kyng of glǭrīe? Þē Lǭrd strǭnge and miȝtful, þē Lǭrd myȝtful in batail. 9. Ǭpeneþ ȝour ȝātes, ȝē princes of hevene, and bēþ ȝē lifted, ȝē ȝātes everlastand, and þē kynge of glǭrīe shall entren. 10. Which is hē, þat kynge of glǭrīe? Þē Lǭrd of vertu, hē is[4] kynge of glǭrīe.

Psalm LI.

1. Hā mercȳ on mē, God, efter þȳ mychel mercȳ. 2. And efter þē mychelnes of þȳ pitēs, dō way mȳ wickednes. 3. Wasshe[5]

[1] y, and always. [2] ys, and occasionally. [3] God Iacob. [4] his. [5] whasshe.

mē mo̅re of mȳ wickednes, and clense mē of mȳn synne. 4. For ich knowe[1] mȳ wickednes, and mȳ synne is evermo̅re ogains me. 5. Ich hāve synned to̅ þē alo̅n, and ich hāve dōn ivel to̅fo̅re þē, þat o̅u bē māde ryȝtful in þȳ wōrdes, and þat o̅u o̅vercum whan þo̅u art juged. 6. IX. THE EARL OF TOULOUSE

All they assentyd tō the sawe,
They thoght hē spake rēsōn and lawe.
Then answeryd þē kyng wyth crōwne,
'Fayre falle thē for thȳn avȳse.'
Hē callyd knyghtys of nōbyll prȳce,
And badd them bē rēdȳ bōwne
For tō crȳe thorōw all þē lōnde,
Bōthe be sēȝ and be sōnde,
If[9] they fȳnde mōwne
A man þat is[10] sō moche of myght,
That for þat lādȳ dar tāke þē fyght;
Hē schall hāve hys waresōun[11].

Messangērys, Ī[1] undurstǫnde,
Crȳed thorow all þē lǫnde
In manȳ a rȳche cytē,
If anȳ man durste prōve hys myȝt
In trewe quarell for tō fyght,
Wēle avaunsed schulde hē bee.
The Ērle of Tolōus[2] herde[3] þys telle,
What anger thē lādȳ befelle,
Thēreof hē thoghte[4] grę̄te pytē.
If hē wyste that schē had ryght,
Hē wolde aventure hys lȳfe tō fyght
For that lādȳ free.

For hur hē mōrned nyȝt and day,
And tō hymselfe can hē say
Hē wolde aventure hys lȳfe:
'If Ī may wytt þat schē bē trewe,
They þat hāve hur accused schull rewe,
But they stynte of thēr strȳfe.'
The ērle seyde, 'Bī[5] Seynte Jǫhn,
Intō[6] Almayn wyll Ī gǫǫn
Whēre Ī hāve fǫmen rȳfe;
Ī prey tō God full of myght,
That Ī hāve trew quarell tō fyȝt,
Out of wǭ tō wynne þat wȳfe.'

Hē rǫde on huntyng on a day,
A marchand mett hē bī þē way,
And asked hym of whens hē was.
'Lǫrde,' hē seyde, 'of Almayn.'

Then seyde the ērle wythōūte[3] lett,
'When is thē day sett,
Brente that schē schulde bee?'
The marchande seyde, 'Sikerlyke[4],
Ẹ̄ven thys day thrē wyke,
And thērſǭre wǭ is mee.'
Thē ērle seyde, 'Ī schall thē telle,
Gōde horsys Ī hāve tō selle,
And stēdys twō or thrē.
Certys myght Ī selle þem yāre,
Thidur[5] wyth thē wolde Ī fāre

Thē marchand seyd wyth[7] wōrdys hēnde,

Anǭn thē ērle seyde hym tylle,

Twentȳ pōūnde[10] Ī schall thē telle
Tō mēde, Ī māke a vōwe.'

Intō Almayn þey can rȳde;

Tyll they cāme tō that plāce.
A mȳle besȳde thē castell,

Thērfo̅re schē schall tō dę̄the go̅o̅
All agayne thē ryght;
except But schē hāve helpe, verrament, Truly

Thē ērle seyde, 'Sō hāve Ī blysse,

Thē abbot seyde, 'Bī Seynt Poule,

The abbot seyde bī bōkes fę̄le
And hys[2] profeſſyōn, þat hē wolde hę̄le,

XI. JOHN MYRC'S INSTRUCTIONS FOR PARISH PRIESTS[1]

Goᴅ seyth hymself, as wryten wẽ sȳnde,

II. THE DEATH OF SAINT ANDREW

Saint Andrew, Crīstis apostil dēre,
Whīls hē went in þis werld hēre,
Ful mekill folk in sēre cuntrē
Tō cristen trouth convertid hē;
And at þē last, sǭ it byfell,
In a cetē whǭre hē gun dwell.
A dōmesman in þat cetē was,
And his nāme was cald Ēgēas;
A man þat lifed in maumetrȳ
And in fals goddes, ful of envȳ.
Hē gederd tōgedir bǭth bǭnd and[1] frē,
Rīche and pōver of ilk cuntrē,
And bad þai suld māk sacrafīse
Untō his goddes of mekil prīse;
And whōsǭ wold noght ofrand māke,
Grę̄te vengeance wold hē on þām tāke.
Þē folk ful fast þan þeder soght
And tō þǭ warlaus wirschip wroght.
And sōne when Saint Andrew herd tell
Of þat fōūl fāre hōw̄ it bifell,
Þedir ful playnlī gun hē pas,
And þus sayd[2] unto Ēgēas:
'Sen þōū covaytes þat folk þē ken
Als dōmesman ǭver al ōþer men,
Þan suld þōū knaw in dēde and stevyn
Þī dōmesman, þat es God in hevyn,
Þat sal þē dēme efter þī dēde.
Him for tō knaw nōw̄ wār it nēde;

[1] &, as often. [2] he sayd.

Hē es þī God and ǭver all mightī,
And all ōþer er fals maumetrī;
Him for tō honūre evermǭre þē awe
And verrailȳ for þī God him knawe,
And draw þī hert frǭ dēvils oway,
Þat lędis tō pīne þat lastes ay.'
Ēgēas þan answerd ogayne:
'Þīr wurdes,' hē sayd, 'er all in vayne,
And nǭthing suth þōū tels mē till
Þat may Ī prōve bȳ propir skill;
For, whīls ȝōwre God þat ȝē on call
Prędchid þē pōple in ērth ǭverall,
And tędchid his men þat with him dweld
Tō prędche þē sāme þat þōū hēre teld,
Omāng þē Jews[1] hēre tāne was hē
And nayled and hānged high on trē;
And had hē bēne God, als þōū says,
It had noght bēne sǭ, by nǭ ways.
Þārfǭre Ī say, þīr wurdes er vayne.'
Saint Andrew þan answerd ogayne:
'And þōū kōūth klērelȳ knaw and sē
Þē vertu of þat ilk hālȳ trē
Þat nāmed es þē cros in lānd,
Þan wald þōū wit and understānd
Hōw Jēsu[2] Crīst, mȳ maystir frē,
Bī rędsonāble caus of charitē,
And for petē þat hē had in mȳnde
Of þat grędte meschēvys of mankȳnde,
Payn of þē cros hē put[3] him till,
Noght mawgrē his, bot with his will.'
Ēgēas þan untō þis thing
Answerd als in grędte hędthing;

[1] Iews. [2] Ihu, as usual. [3] putted.

Hē sayd, 'Hōw may þōū say þīr sawes,
Sen þat þīself þē suth wēle knawes?
At þē first tīme bitrayd was hē,
And thurgh āne of his awin mę̄nȝē,
And sethin tākin with Jewes[1] kēne,
And būnden and led furth þām bitwę̄ne
Tō Cayfas hall þē graythest gāte,
And frǭ þeþin untō Sir Pīlāte;
Þǫre was hē dēmid on cros tō hāng,
Als þę̄ Jews ordāned[2] þām omāng.
Maugrē his þai gun him spill,—
Hōw prōves þōū þan it was his will?'
Saynt Andrew says, 'His will it was,
Þat may Ī prōve wēle ǭr Ī pas;
Of his mę̄nȝē mīself was āne[3]
In þē sāme tīme when hē was tāne[4],
And bifǭr þē time hē was bitrayd
Untō us all sāmyn þus hē sayd,
Hōw hē suld for mans syns bē sāld[5],
And suffer paynes ful manȳfālde[6]
And dȳ on þē cros right als þōū tels,
For hę̄le of mans sauls and for noght[7] els,
And on þē thrid day ful right uprīse.
Þīr wurdes hē tǭlde us on þis wīse;
Þārfǭre Ī tell þē in þis stę̄de,
Þat with his will hē sufferd dę̄de.'
Ēgēas þan thoght grę̄te dispīte,
And tō Saint Andrew said hē tīte:
'Þōū hāves lę̄rd[8] of a symple skōle,
Þī prę̄ching prōves þīself a fōle;
For, whethir it wār his will or nǭne,
Þōū grauntes þat hē on cros was dōne,

[1] Iews. [2] ordand [3] one. [4] tone. [5] sold. [6] manyfolde. [7] nght. [8] lerid.

And hāngid hē was als Ī said āre;
And þārſǭre lę̄ve þat lūrdans lāre
And untō mȳ goddes offrand māke,
Or els Ī sall for þī God sāke
Ger hāng þē right on swilk a trē
Als þōū sais suld sǭ honōrde bē.
For fōūler dēde may nǭ man hāve,
Þārſǭre on þę̄ Ī vōūche it sāve.'
Saint Andrew þan, withōūten īre,
Said, 'Sertis þat es mȳ mǭste desīre.
Ī wold bē wurthī for his sāke
Opon a cros mȳ dę̄de tō tāke;
Þārtō ever sal Ī rę̄dī bē
For anȳ payn þōū may dō mē.'
Ēgēas þan, with grę̄te envȳ,
Sent efter al his turmentrȳ,
And bad þām smertlȳ þām omāng
Ordān a cros him for tō hāng,
And fest þārtō bǭth hēnd and fēte
Þat nǭne of þām with ōþer mēte.
'Festes him with nǭne nayles, Ī rēde,
Tō ger him hāstīlī bē sǭ dēde,
Bot bīndes him tō with rāpes strāng
Sǭ þat hē may bē pȳned lāng.'
Tō dō his biding wār þai bayne;
A cros þai māde with al þaire maine,
And hāndes on him þan fast þai fest,
Tō dō him payne þai wār ful prest.
Þai led him thurgh þat cetē
Tō þē stę̄de whāre hē suld[1] hānget bē.
And al þē folk þat dweld obōūt[2]
Gedird tōgyder in ful grę̄te rōūt,

[1] he, not in MS. [2] þare obout.

And al þus said þai þām omāng:
'Allas, þis wirking es al wrāng;
What has þis rightwīs man dōne ill
Þat ȝē en þis wīse will him spill?
Þis nǭbill man þat never did mis
Ful saklȩs suffers hē all þis;
Ful saklȩs bēse hē dōne on rōde,
And saklȩs sall men spill his blōde,
For hē has ever bēne blīth and glad
Tō mēnd al men þat mistēr had.'
Saint Andrew þan þē puple praid,
And al þus untō þām hē sayd:
'Wēndis ogayn, all Ī ȝōw̄ pray,
And lettes mē noght of joy[1] þis day;
Desturbes noght nōw̄ mī passiōūn,
For untō blis it mākes mē bōūn.'
And sōne when Saint Andrew bihēlde
Þē cros bifǭr him in þē fēlde,
Untō God māde hē his prayēre,
And untō þē cros on þis manēre
Hē crīed and sayd with ful high voice:
'Hayl bē þōū, hālȳ and blisced croyce,
Þat haloud es and glǭrifīde[2]
With Crīstes membris on ilk a sīde;
And honōūrd es þōū with his bānes
Wēle better þan with precius stānes.
With joyful[3] hert Ī cum tō þē,
Sǭ þat þōū gladlī resayve mē,

Þat hānged on þē, mī mayster dēre.
Nōw̄ es þōū rȩdī mē on tō hāng,
Þat Ī in hert hāve covayt lāng;

Ī hāve þē lufde with hert and will,
And covayted ever tō cum þē till.'
Bifǭr þē cros þan knēlid hē dōūne,
And þus hē māde his orisōūne:
'Ā, nǭbil cros of grę̄te bōūntē,
Frǭ ērthlī men resayve nōw mē,
And ȝēlde mē tō mȳ maister gōde[1]
Sǭ þat hē may, with mīlde mōde,
Bȳ þē resayve mē, þat hē wroght,
Als hē thurgh þē frǭ bāle mē boght;
Nō better bę̄de Ī hāve tō byd.'
His ǭvermāst clǭthes þan of hē did;
Tō þē turmentōūrs hē gun þām bēde,
And bad þai suld dō furth þaire dēde.
Þē turmentōūrs, when þis was sayde,
Tōke his bodī with bitter brayde;
Untō þē cros þai gun it bēnd,
And festid ful fast bǭthe fēte and hēnd;
And all his bodī ful fast þai bānd
Als Ēgēas had þām comānd.
When hē was būnden sǭ on brēde,
Þai lēte him hing and hǭme þai ȝēde.
Folk gederd ful faste[2] him obōūt,
Of al þat cuntrē in grę̄te rōūt;
Hē hēld his ēghen up untō hevin,
And þus hē sayd with joyful stevin:
'Ī sē mī Lǭrd God Alwēldand[3],
And in his sight nōw hēre Ī stand.'
Opon þē cros þāre quik hē hāng
Twō days, prę̄chand þē puple omāng;
Þat was ful lāng swilk payn tō fēle,
Bot with Crīst was hē confort wēle.

[1] gude. [2] fast. [3] god end alweldand.

Twentī thōusand folk wār þāre[1]
Tō hēre him prȩche, with hertes sāre[2].
When þē first day till ēnd was went,
Al þat puple by ǭne assent
Til Ēgēas hōus[3] fast þai ryn,
And said al quik þai suld him brin,
Bot if hē tīte gert tāk him dōune
Þat hānged was ogayns rȩsōune.
'Hē is a rightwīs man,' þai say,
'And wēle has dōne bǭth night and day;
A gude tȩcher ever has hē bēne,
And mǭre suthfast was never sēne,
And swilk a man, sir, for sertayne
Suld noght suffer sǭ hard payne;
Þārfǭre, bot hē bē tāne dōūn sōne,

Ēgēas drēd þē puple wrāke,
And dōūn hē hight him for tō tāke;
And furth hē went with þām in hī,
Bǭth hē and al hys turmentrī.
Þī folk thrāng efter al on a thrum;
And when Saint Andrew saw þām cum,
Of þaire cumyng hē was noght paid,
And untō Ēgēas þus hē sayd:
'Whārtō cums þōū untō mē,
Bot þōū wald trow in Jēsu frē,
And lȩve þī maumetes mǭre and les
And pray tō Jēsu of forgifnes?
If þōū will noght on þis wīse dō,

[1] þore. [2] sore. [3] hows.

Mī Lǭrd will lēn tō mē þat lāne
Þat quik sall Ī noght dōūn bē tāne.'
Þan turmentūrs, with ę̄gir mōde
Went tō him, als þai wār wōde.
Þai rugget at him with ful grę̄te bir,
Bot nǭthing might þai of him stir[1];
Þaire armes and hāndes sōne in hī
Als þai wār hērdes, wēx þai drī;
Als þai kest up þaire armes him till,
Als drȳ stykkes þan stōde þai still.
Saint Andrew þan māde his prayēre
Tō mightȳ God on þis manēre.
Hē said, 'Lǭrd, if it bē þī will,
In þis stę̄de lēt mē hing still,
Þat nǭne hāve pōwer mē tō fell
Dōūn of þis cros þat Ī on dwell,
Untō þē tȳme þīself vōūche sāve
Tō þē blis of hevin mē for tō hāve;
Bot lat mē hing still als Ī dō,
Til tȳme þōū tāk mī saul þē tō.'
When þis was said, þār cōme a light

And umbilappid his bodī abōūt.
Þē folk þārfǭre had mekil dōūt;
Þai might noght luke for mekil light
Untō his bodī, sǭ was it bright.
And als þē light was alþirmāste,
Tō God in hevyn hē gaf þē gāste.
Ę̄gēas was ful drēdand þan,
And for fērde fast hē ran;
Bot in þē way, ǭr hē cōme hāme,
Hē sufferd dę̄d with mekel[2] schāme.

[1] of stir. [2] mykel.

Sǭ sudan sorous wār tō him sent,
Als wurthī was, tō wǭ hē went.
Saint Andrew saul with āngell stevyn,
And with þat light was lift[1] to hevyn
Whǭre hē lēndes in ay lastand blis;
Alwēldand God þeder us wis.

Ēgēas had a wurthlī wīfe
Þat lufed Saint Andrew in his life;
For him scho ordānd a monument,
And berid his bodī with trew entent.
And of his grāve, als men might sē,
Sprāng up oyle ful fayre plentē
Þat medcyn was tō mǭre and les,
Þat þeder soght for sēre sēkenes.
And bȳ þat oyl, als says þē bōke[2],

For, when it sprāng on sīdes sēre,
Þan hǭpid þai for tō hāve gude ȝēre
Of cōrn and fruyt and ōþer thing;
And when þai saw it skarslī spring,
Þan hǭpid þai tō hāve skant of cōrn,
And of fruyt, als Ī sayd biforn.

III. TREATISES OF RICHARD ROLLE OF HAMPOLE

I. On the Nature of the Bee.

Thē bee has thrē kȳndis. Āne es þat[3] scho es never ȳdill, and scho es noghte with thaym þat will noghte wyrke, bot castys thaym ōwte and puttes thaym awaye. Anōthire es þat, when scho flȳes, scho tākes ērthe in hyr fēte[4] þat scho bē noghte lyghtlȳ ǭverheghede in the ayere of wȳnde. Thē thyrde es that scho

Thus, ryghtwȳse men þat lufes God āre never in ȳdillnes: for[1] owthire þay ere in travayle, prayand or thynkande or rēdande or ōthere gude dōande, or withtākand[2] ȳdill mene, and schewand thaym worthȳ tō bē put frā þē ryste of hevene for thay will noghte travayle. Hēre þay tāke ērthe, þat es þay hālde þāmselfe vīle and ērthelȳ that thay bē noghte blawene with þē wȳnde of vanytē and of prȳde. Thay kēpe thaire wynges clȩ̄ne; that es, þē twā commāndementes of charytē þay fulfill in gud concyens, and thay hāfe ōthyr vertus unblēndide with þē fylthe of syne and unclȩ̄ne luste. Aristotill sais þat þē bees āre feghtande agaynes hym þat will drawe þaire honȳ frā thaym; swā sulde wē dō agaynes dēvells þat afforces tō rȩ̄ve frā us þē honȳ of pōvre lȳfe and of grāce. For many āre þat never kane hālde in[3] þē ordyre of lufe ynesche þaire frēndys, sybbe or fremede, bot outhire þay lufe þaym ǭvermekill or thay lufe þām ǭverlyttill, settand thaire thoghte unryghtwȳselȳ on thaym, or þay lufe thaym ǭverlyttill yf þay doo noghte all as þey wolde till þāme. Swylke kane noghte fyghte for thaire honȳ, forthȳ þē dēvelle turnes it tō wormes, and mākes þeire saules oftesȳthes full bitter in angwys and tēne, and besȳnes of vayne thoghtes and ōþer wrechidnes; for thay āre sǭ hevȳ in ērthelȳ frenchype þat þay may noghte flee intō þē lufe of Jēsu[4] Crīste, in þē wylke þay moghte well forgaa þē lufe of all crȩatūrs lyfande in ērthe. Whārefǭre, accordandlȳ, Arystotill sais þat some fowheles āre of gude flyghyng, þat passes frā ā lānd tō anōthire. Some āre of ill flyghynge for hevȳnes of bodȳ and for þaire neste es noghte ferre frā þē ērthe. Thus es it of thaym þat turnes þām tō Godes servȳs. Some āre of gude flyghynge for thay flȳe frā ērthe tō hevene, and rystes thaym thāre in thoghte, and āre fedde in delīte of Goddes lufe and has thoghte of nā lufe of þē worlde. Some āre þat kan noghte flȳe frā þis lānde, bot in þē waye late theyre herte ryste, and delȳtes[5] þaym in sēre lufes of mene and womene, als þay come and gaa, nōwe āne

and nōwe anōthire. And in Jēsu Crīste þay kan fȳnde nā swettnes; or if þay ānȳ tȳme fēle oghte it es swā lyttill and swā schorte, for ōthire thoghtes þat āre in thaym, þat it brynges thaym till nā stābylnes. Or þay āre lȳke till a fōwle þat es callede strucyo, or storke, þat has wenges and it may noghte flȳe for charge of bodȳ. Swā þay hāfe undirstāndynge, and fastes and wākes and sēmes hālȳ tō mens syghte, bot thay may noghte flȳe tō lufe and contemplācyōne of God, þay are sǭ chargede wyth ōthyre affeccyōns and ōthire vanytēs.

II. A Notabill Tretys off the Ten Comandementys Drawene by Richerde the Hermyte off Hampull.

Thē fyrste comāndement es, 'Thȳ Lǭrde God þōu[1] sall lōute and til hym ānelȳ þōu sall serve.' In this comāndement es forbǭden all mawmetrȳse, all wychecrafte and charemynge, thē wylke may dō nā remedȳ till ānȳ sēknes of mane, woman, or bę̄ste, for þay erre þē snarrys of þē dēvelle bȳ þē whilke hē afforces hym tō dyssayve manekȳnde. Alswā in þis comāndement es forbǭdyn tō gyffe trouthe till sorcerȳe or till dyvȳnynges[2] bȳ stērnys, or bȳ drę̄mys, or bȳ ānȳ swylke thynges. Astronomȳenes byhāldes þē daye and þē hōure and þē poynte þat man es borne in, and undir whylke sȳgne[3] hē es borne, and þē poynte þat hē begynnes tō bē in, and bȳ þīre sȳgnes[4] and ōþer þay saye þat that[5] sall befall þē man aftyrwarde; bot theyre errōwre es reprōffede of hālȳ doctōurs. Hālȳ crosses man sall lōwte for thay āre in sȳgne[3] of Crȳste crucyfīede. Tō ymāges es þē lovynge þat es till thaym of whaym þai[6] are þē ymages; for þat entent ānelȳ þai[6] are for tō lōwte. Thē tōthire comāndement es, 'þōu sall noghte tāke þē nāme of God in vayne.' Hēre es forbǭdene āthe withōwttene chę̄sōn. Hē þat nevenes God and swę̄ris fals, dispȳses[7] God. In thrē manērs mane may syne in swę̄rynge; that es, if hē swę̄re agayne

his concyence, or if hē swe̊re be Crȳste wondes or blude, that es evermāre gre̊t syne þofe it be sōthe that hē swe̊ris, for it sōunes in irreverence[1] of Jēsu Crȳste. Alsō, if hē com agaynes his āthe, noght fulfilland þat hē has sworne. Thē nām of God es tākyn in vayne one manȳ manērs,—with herte, with mōuthe, with werke. With herte tākes false crystyn mene it in vayne, þat rescheyves þē sacrement withōwttene grāce in sawle. With mōuthe es it tāne in vayne with all āthes bre̊kynge; of new pre̊chynge þat es vanytē and undevōcyōne; prayēre when wē honōur God with ōure lippes and ōure hertys erre ferre frā hym. With werke ypocrittes tākes Goddes nām in vayne, for they feyne gud dēde withōwttene, and þey erre withōwtten charytē and vertue and force of sawle tō stānd agayne all ill styrrynges. Thē thirde comāndement es, 'Umbethynke thē þat thōu halowe þī halȳdaye.' This comāndement may be tākyn in thrē manēres: firste[2], generallȳ, þat wē sesse of all vȳces; sithen, specialī, þat wē sesse of alle bodīlī werkis[3] þat lettys devōcyōne tō God in prayenge and thynkynge; thē thyrde es specyall, als in contemplaytȳfe men þat departis þaym frā all werdlȳ thynges swā þat þey hālȳ[4] gyfe þaym till God. Thē fyrste manēre es nēdfull us tō dō, thē tōthire wē awe tō dō, thē thirde es perfeccyōne; forthī, one þē halȳdaye men awe, als God byddys, tō le̊fe all syne and dō nā werke þat lettis thaym tō gyffe þaire herte tō Godd, thatt þay halowe þē daye in ryst and devōcyōne and dēdys of charytē.

Thē ferthe comāndement es, 'Honōure thȳ fadyre and þī mōdyre.' That es, in twā thynges, þat es bodȳlȳ and gāstelȳ: bo̥dȳlȳ, in sustenance, þat þay be helpede and sustaynede in þaire ēlde, and when þay are unmyghttȳ of þaymeselfe; gāstelȳ, in reverence and bōuxomnes þat þay say tō þām nā wōrdes of myssawe, ne unhonestē, ne of disple̊sance unavȳsedlȳ, bot serve þāme mēkelȳ and gladlȳ and lawlȳlȳ þat þay may wyne þat Godde hyghte tō swylke bārnes, þat es, lānde of lyghte. And if þay be dē̊de, þaym

awe tō helpe þaire sawles with almousdēdes and prayērs. Thē fifte comāndement es, þat 'Thōū slaa nā man, nowthire with assente, ne with wōrde or fāvōūr.' And alsō hēre es forbōden unryghtwȳse hurtynge of ānȳ persōne. Thay are slāęrs gāstelȳ þat will noghte feede þē pōver in nēde, and þat defāmes men, and þat confōūndes innocentys. Thē sexte commāndement es, 'Thōū sall bē nā lichōūre.' Þat es, thōū sall hāve nā man or womane bot þat þōū has tāken in fourme of hālȳ kyrke. Alswā hēre es forbōdene all manēr of wilfull pollusyōne, procurede one ānȳ manēr agaynes kȳndlȳ oys or ōþer gātes.

Thē sevende comāndement es, 'Thōū sall noghte dō nā thyfte.' In þē whylke es forbōden all manēre of withdraweynge of ōþer men thynges wrāngwȳselȳ agaynes þaire wyll þat aghte it, bot if it wēre in tȳme of māste nēde when all thynges erre comōne. Alsō hēre es forbōdene gillerȳ of weghte or of tāle, or of mett or of męsure, or thorow ōkyre or vīolence or drēde, als będells and forestērs duse, and mynystyrs of þē kynge, or thurghe extorcyōne as lōrdes duse. Thē aughtene commāndement es, that 'Thōū sall noghte bęre false wyttnes agaynes thī neghtebōūre,' als in assȳs or cause of matremoyne. And alsō lȳenges ere forbōden in þis commāndement, and forswęreynge. Bot all lȳenges āre noght dędlȳ syn, bot if þay noye till som man bodȳlȳ or gāstelȳ. The nȳnde commāndement es, 'Thōū sall noghte covayte þē hōus or ōþer thynge, mōbill or immōbill, of þī neghtbōūr with wrānge.' Ne þōū sall noghte hāld ōþer mens gude if þōū may ȝēlde thaym, ellis þī penance sāves þē noghte. Thē tēnd comāndement es, 'Thōū sall noghte covayte þī neghtebōūrs wȳefe, ne his servande, ne his mayden, ne mōbylls of his.' Hē lufes God þat kēpis thīre commāndements for lufe. His neghtebōūr hym awe tō lufe als hymselfe, þat es, till þē sāme gude þat hē lufes hymselfe tō, nā thynge till ill; and þat hē lufe his neghtbōūr saule māre þan his bodȳ, or ānȳ gudes of þē worlde.

IV. A METRICAL HOMILY—THE SIGNS OF THE DOOM

Tōday Sain Lōūk telles us,
In ōūr godspel, þat Jēsus
Spac of þing þat es tō com,
And nāmelīc of þē dai of dōm.
Tākning hē saide[1] sal bē dōn
Bāthe in þē son and in þē mōn,
And in þē stērnes al bidēn;
And folc sal þǭl wandrę̄þ and tēn,
For folc sal dwīn[2] for din of sē
And for bāret þat þan sal bē.
Ǭver al þis werd bēs rę̄dnes,
Wandrę̄þ and uglīnes,
For mihtī gāstes of þē hevin
Sal bē afrayed of þat stevin;
Þan sal Crīst cum þat men may sē
In maistrī and in grę̄t pōūstē.
Quen þis bigines for tō bē,
Lōkes up and yē may sē
Þat yōūr bīing and yōūr prīs
Ful nēr cumen tilward yōū es.
Himself ōūr bīing hē es[3] calde,
For hē boht us quen hē was salde.
Quen Crīst hāvid said þis grimlī sau,
An ensampel gan hē schau,
And said, 'Quen yē sē lę̄fes spring,
And þīr trēs froit forþe bring,

Þan wāt ȝē[1] wēl þat somer es nēr;

Als quā sai, þing þat Ī yōū telle
Ne mai nā miht fordō ne felle.—
'Quen þis werld þat Ī mād of noht

Þan sal mī wōrd bē sōþefast,
For mī kinrīc sal ever last.'
Þis es þē strengþe of ōūr gospel,
Als man wiþ[3] Inglis tung may tel.
Þē maister on þis godspel prēches,
And sais þat Crīst þārin us tēches
For tō forsāk þis werdes winne,

For Crīst sais us hōū it sal ēnd,
And warnes us ful fair als frēnd.
Hē telles us tākeninges snelle,
Þār hē biginnes his godspelle,
And sais, 'Kinrīc sal rohlȳ rīse,
Igain kinrīc and ger men grīse,
For bāle sal ger þīr bērnes blēde,
And māk in lānd hunger and nēde;
Þis bāle sal bāld bāret breu,
And fel mikel of þis werdes gleu.'
Slīc wōrdes said Crīst of þīr wers
Þat folc in werd ful derfe ders[4];

As sais Jōēl, þat bęrs witnes
Of Crīst þat þīr tākeninges us schaues
In ōūr godspelle wiþ grislī sawes.

In þis dāle Ī droupe and dāre
For dērne[2] dēdes þat dōne mē dēre;
Of England had mȳ hert grēte cāre
When Edward founded first tō wēre.
Þē Frenche men wār frek tō fāre
Ogaines him with schēld and spēre;
Þai turned ogayn with sīdes sāre,
And al þāire pomp noght worth a pēre.

[1] penanz. [2] dern.

A pēre of prīse es mōre sumtȳde
  Þan all þē bōste of Normandȳe[1].
Þāi sent þaire schippes on ilk a sīde
  With flesch and wīne and whēte and rȳe;
With hert and hānd, es noght at hīde,
  For tō help Scotland gan þai hȳe;
Þai fled and durst nō dēde abīde[2],
  And all þaire fāre noght wurth a flȳe.

For[3] all þaire fāre þai durst noght fight,
  For dēdes dint had þai slīke dōūt;
Of Scotland had þai never sight
  Ay whīls þai wār of wōrdes stōūt.
Þai wald hāve mēnd þām at þaire might
  And besȳ wār þai þāre obōūt;
Nōw God help Edward in his right,—
  Amēn,—and all his rēdȳ rōwt.

His rēdȳ rōūt mōt Jēsu[4] spēde.
  And sāve þām bōth bȳ night and day;
Þat Lōrd of hevyn mōt Edward lēde,
  And maintēne him als hē wēle may.
Þē Scottes nōw all wīde will sprēde;
  For þai hāve failed of þaire pray;
Nōw er þai dāreand all for drēde,
  Þat wār bifōre sō stōūt and gay.

Gai þai wār, and wēle þai thoght
  On þē Ērle Morrē and ōþer mā;

Of wīlde[1] Scottes and als[2] of tāme.

And nǭthing list þām þan of play
Sen þām es tīde þis sārȳ chance.

Þis sārȳ chaunce þām es bitid,
For þai wār fals and wonder fell;
For cursed caitefes er þai kid
And ful of trȩ̄sōn, suth tō tell.
Sir Jǭn þē Comyn had þai hid,
In hālȳ kirk þai did him qwell;
And þārfǭre manȳ a Scottys brīd
With dōle er dight þār[4] þai mōst dwell.

[1] wild. [2] alls. [3] Valas. [4] þat.

Þāre dwelled ōūre king, þē suth tō saine,
With his mę̄nȝē a līttell whīle;
Hē gaf gude confort on þat plaine
Tō all his men obōūt a mȳle.
All if his men wār mekill of maine,
Ever þai dōūted þām of gīle;
Þē Scottes gaudes might nǭthing gain,
For all þai stumbilde at þat stīle.

Þus in þat stōw̄re þai left þaire līve
Þat wār biforę sǭ prōūd in prę̄se;

For tō kindel ȝōw̄ cāre and crak ȝōw̄re crōw̄ne.

And þārtō hēld þai up þaire hēnd.

V. ROBERT OF GLOUCESTER'S CHRONICLE—HOW THE NORMANS CAME TO ENGLAND

Mūche haþ[5] þē sorwe ibē ofte in Engelǭnde,
As ȝē mōwe hēr and ǭr ihūre and[6] understǭnde,
Of monī bataile þat haþ[5] ibē, and þat men þat lǭnd nōme.
Verst, as ȝē habbeþ[7] ihürd, þē emperōurs of Rōme,
Süþþe Saxons and Englisse mid batayles strǭnge,
And süþþe hii of Denemarch þat hūlde it al sǭ lǭnge;
Atte laste hii of Normandī, þat maisters bēþ ȝūt hēre,
Wonne hit and hǭldeþ ȝūt, ich olle[8] telle in wüch manēre.
Þǭ Willam bastard hürde telle of Haraldes swikelhǭde,
Hōu hē hadde[9] ymad him king and mid süch falshǭde,—
Vor þat lǭnd him was bitāke, as hē wēl wüste,
Tō wite hit tō him wēl and hē wēl tō him trüste;—

[1] me me. [2] vestimenz. [3] caliz. [4] þeo. [5] aþ. [6] &, as often. [7] abbeþ. [8] icholle = ich wulle. [9] adde.

As þē hēnde hē düde verst, and messagērs him sende,

And hūlde him þęrof vorewarde, as hē bihēt ęk þē kinge;
And bote hē düde bitīme hē wolde sēnde him ōþer tīdinge,

Harald him sende wōrd þat folīe it was tō trüste
Tō süch ōþ as was idō mid strengþe, as hē wēl wüste;
Vor 3if a maide treuþe iþli3t tō dō an fōle dędе

As hyt ys yknowe hōū3 menȳ manēr pēople būþ in þis ȳlǭnd, þę̄r būþ alsǭ of sǭ menȳ pēople longāges and tonges; nǭþelę̄s Walschmen and Scottes, þat būþ no3t ymelled wiþ ōþer nāciōns, hǭldeþ wēl ny3 here fürste lǭngāge and spę̄che, bote 3ef Scottes þat wę̄re som tȳme confederat and wonede wiþ þē Pictes drawe somwhat after here spę̄che. Bote þē Flemmynges, þat woneþ in þē west sȳde of Wāles, habbeþ yleſt here strānge spę̄che and spę̄keþ Saxonlȳch ynow. Alsǭ Englysch men, þey3 hȳ hadde fram þē bygynnyng þrē manēr spę̄che, sōūþeron, norþeron, and myddel spę̄che, in þē myddel of þē lǭnd, as hȳ cōme of þrē manēr pēople of Germānia, nǭþelę̄s, bȳ commyxstiōn and mellyng fürst wiþ Dānes and afterward wiþ Normans, in menȳe þē contray lǭngāge ys apeyred, and som useþ strānge wlaffyng, chyteryng, harryng and garryng, grisbittyng. Þis apeyryng of þē bürþtonge ys bycause of twey þinges. Ǭn ys, for chyldern in scōle, a3ēnes þē usāge and manēre of al ōþer nāciōns, būþ compelled for tō lę̄ve hēre oune lǭngāge and for tō construe here lessōns and here þinges ā Freynsch, and habbeþ süþthe þē Normans cōme fürst intō Engelǭnd. Þys[2] manēre was moche yused tōfǭre þē fürste moreyn, and ys seþthe somdę̄l ychaunged. For Jǭhan[3] Cornwal, a mayster of gramēre, chayngede þē lǭre in gramērscōle and construcciōn of Freynsch intō Englysch; and Richard Pencrych lurnede þat manēre tę̄chyng of hym, and ōþer men of Pencrych, sǭ þat nōw̄, þē 3ę̄r of

Here avauntāge ys, þat ā lūrneþ here gramēr yn lasse tȳme þan childern węr ywoned tō dō; disavauntāge ys, þat nōw childern of gramērscōle conneþ nȳ mȳre Frensch þan can here lift heele, and þat ys harm for ham and ā scholle passe þē sę and travayle in strānge lȳndes, and in menȳ caas alsȳ. Alsȳ gentilmen habbeþ nōw moche yleft for tō tęche here childern Frensch.

Hyt sēmeþ a grȩt wonder hōū [1] Englysch, þat ys þē būrþtonge of Englysch men and here oune lȳngāge, ys sȳ dȳvers of sōūn [2] in þis ȳlȳnd; and þē lȳngāge of Normandȳ ys comlyng of anōþer lȳnd, and haþ ȳn manēr sōūn [2] among al men þat spȩkeþ hyt aryȝt in Engelȳnd. Nȳþelęs [3], þęr ys as menȳ dȳvers manēr Frensch yn þē rȩm of Fraunce as ys dȳvers manēre Englysch in þē rȩm of Engelȳnd. Alsȳ, of þē forseyde Saxon tonge, þat ys dęled ā þrē and ys abyde scarslȳch wiþ fēaw uplȳndysch men, and ys grȩt wondur; for men of þē ęst wiþ men of þē west, as hyt węre undur þē sāme partȳ of hevene, acordeþ mȳre in sōūnyng of spȩche þan men of þē norþ wiþ men of þē sōūþ. Þęrfȳre hyt ys þat Mercii, þat būþ men of myddel Engelȳnd, as hyt węre partenērs of þē ēndes, understȳndeþ betre þē sȳde lȳngāges, norþeron and sōūþeron, þan norþeron and sōūþeron understȳndeþ eyþer ōþer. Al [4] þē lȳngāge of þē Norþhümbres, and specialȳch at ȝork, ys sȳ scharp, slyttyng and frȳtyng and unschāpe, þat wē sōūþeron men may þat lȳngāge unnęþe understȳnde. Ȳ trowe þat þat ys bycause þat ā būþ nyȝ tō strānge men and āliens þat spȩkeþ strāngelȳch, and alsȳ bycause þat þē kynges of Engelȳnd woneþ alwey fer fram þat contray; for ā būþ mȳre yturned tō þē sōūþ contray, and ȝef ā gȳþ tō þē norþ contray ā gȳþ wiþ grȩt help and strengthe. Þē cause whȳ ā būþ mȳre in þē sōūþ contray þan in þē norþ may bē betre cōrnlȳnd, mȳre pēople, mȳre nȳble cytēs, and mȳre profytāble hāvenes.

II. ADAM DAVY'S DREAMS ABOUT EDWARD II

Tō ōure Lǫrde Jēsu Crīst in hevene
Ich tōday shewe mȳne swevene,
Þat ich mette in ǫne niȝht
Of a kniȝht [9] of mychel miȝht;
His nāme is ihǫte Sir Edward þē Kyng,
Prince of Wāles, Engelǫnde þē faire þing.
Mē mette þat hē was armed wēl
Bǫþe wiþ ȳrne and [10] wiþ stēl,
And on his helme þat was of stēl
A corōune of gōld bicōm hym wēl.
Biſǫre þē shrȳne of Seint Edward hē stood,
Myd glad chēre and mȳlde of mood,
Mid twǫ kniȝttes armed on eiþer sīde
Þat hē ne miȝht þennes gǫǫ ne rīde.
Hetilīch hii leiden hym upon
Als hii miȝtten myd swērde [11] dōn.

Hē stood þēre wēl swīþe stille,
And þōled al tōgedres her wille;
Ne stroȣk ne ȝaf hē aȝeinward
Tō þilk þat hym wēren wiþerward.
Wōunde ne was þēre blōdȳ nōn,
Of al þat hym þēre was dōn.
After þat me þouȝht onōn,
As þē tweie kniȝttes wēren gōn,
In eiþer ēre of ōure king,
Þēre sprōnge ōut a wēl fāre þing.
Hii wēxen ōut sō briȝht sō glēm
Þat shȳneð of þē sonnebēm.
Of dīvers colōures hii wēren
Þat cōmen ōut of bōþe his ēren;
Foure[1] bēndes alle bȳ rewe on eiþer ēre
Of dīvers colōurs, rēd and whīte als hii wēre;
Als fer as mē þouȝht[2] ich miȝht see
Hii spredden fer and wȳde in þē cuntrē.
Forsōþe mē mette þis ilke[3] swevene—
Ich tāke tō witnesse God of hevene—
Þē Wedenysday bifōre þē decollāciōūn of Seint Jōn,
It is mōre þan twelve mōneþ gōn.
God mē graunte sō heveneblis,
As mē mette þis swevene as it is.
Nōw God þat is Hevenekyng,
Tō mychel joye tourne þis mētyng.

Anōþer swevene mē mette on a Tiwesniȝht,
Bifōre þē fēst of alle halewen, of þat ilk kniȝht,
His nāme is nempned hēre bifōre;—
Blissed bē þē tȳme þat hē was bōre;
For wē shullen þē day see,
Emperōūr ychōsen hē worþe of cristientē.

Þat þilke[1] tȳdyng hēre wē sōne
Of Sir Edward ōūre dērworþ kyng.
Ich mette of hym anōþere fair mę̄tyng:
Tō ōūre Lo̱rde of hevene ich telle þis,
Þat mȳ swevene tōūrne tō mychel blis.
Mē þouȝht hē ro̱od upon an asse,
And þat ich tāke God tō witnesse;
Ywonden hē was in a mantel gray;
Tōward Rōme hē nōm his way.
Upon his hevede sat an gray hure,
It sēmed hym wēl amę̄sure.
Hē ro̱od wiþūten ho̱se and shō,
His wone was nouȝht sō̱ for tō dō;
His shankes sēmeden al bloodrę̄de;
Mȳne herte wōp for grę̄te drę̄de.
Als a pilgryme hē ro̱od tō Rōme,
And þider hē cōm wēl swīþe sōne.
Þē þride[2] swevene mē mette ā niȝht
Riȝht of þat dērworþe kniȝht;
Þē Wedenysday ā niȝht it was
Next þē day of Seint Lucīe bifo̱re Cristenmesse.
Ich shewe þis, God of hevene,
Tō mychel joye hē tōūrne my swevene.
Mē þouȝht þat ich was at Rōme,
And þider ich cōm swīþe sōne;
Þē Po̱pe and Sir Edward, ōūre kyng,
Bo̱þe hii hadden a newe dubbyng.
Hure gray was hēr clo̱þing;
Of ōþere clo̱þes seiȝ ich no̱þing.
Þē Po̱pe ȝēde bifo̱re, mȳtred wēl faire iwis,
Þē Kyng Edward cōm coro̱ūned myd grę̄t blis;
Þat bito̱kneþ hē shal bē

Jēsus Crīst, ful of grāce,
Graunte ōūre kyng in everȳ plāce
Maistrīe of his wiþerwynes,
And of alle wicked Sarasynes.
Mē met a swevene on worþingniȝht,
Of þat ilche dērworþe kniȝht;
God ich it shewe, and tō witnesse tāke,
And sǭ shīlde mē frǭ synne and sāke.
Intō an chapēl ich cōm of ōūr Lēfdȳ;
Jēsus Crīst, hire lēve son, stood bȳ;
On rōde hē was, an lovelīch man
As þilke[1] þat on rōde was dōn.
Hē unneiled his hǭnden twǭ,
And seide wiþ þē kniȝht hē wolde gǭ:
'Maiden and mōder and mȳlde quēne,
Ich mōte mȳ kniȝht tōday sēne.
Lēve mōder, ȝive mē lēve,
For ich ne may nǭ lenger bilēve;
Ich mōte conveye þat ilke kniȝht

'Lēve son, ȝōūre wille sǭ mōte it bē,
For þē kniȝht bǭþe day and niȝht haþ served mē;
Bǭþe at ōūre wille wēl faire iwis,
Þērfǭre hē haþ served hevenerīche blis.'
God þat is in hevene sǭ briȝht,
Bē wiþ ōūre kyng bǭþe day and niȝht.
Amēn, amēn, sǭ mōte it bē;
Þērtō biddeþ a paternoster and an āvē.
Adam þē marchal of Stretford-atte-Bowe,
Wēl swīþe wīde his nāme is yknowe,
Hē hymself mette þis mētyng,

Tō witnesse hē tākeþ Jēsu, hevenekyng;
On Wedenysday in clęne leinte,
A voice mē będe Ī ne shulde nouȝht feinte;
Of þē swevenes þat hēr bēn write,
Ī shulde swīþe dōn mȳ lǫrde kyng tō wite.
Ich answerde þat Ī ne miȝht for derk gǫn.
Þē vois mē bad gǫǫ, for liȝht ne shuld ich faile nǫn,
And þat Ī ne shulde lette for nǫþing,
Þat ich shulde shewe þē kyng mȳ mętyng.
Forþ ich went swīþe onǫn,

Ich tāke tō witnesse God of hevene,
Þat sōþlīch ich mette þis ilche swevene;
Ī ne reiche what ȝee myd mȳ bodȳ,

Þē Þursday next þē bęryng of ōūr Lęfdȳ,
Mē þouȝht an aungel cōm Sir Edward bȳ;
Þē aungel bitook Sir Edward on hǫnde,
Al blēdyng þē foure forþer clawes sǫ węre of þē Lǫmbe.
At Caunterbirȳ, bifǫre þē heiȝe autere, þē kyng stood,
Yclǫþed al in rędе murrē[1]; hē was of þat blee rędе as blood.
God, þat was on gōde Frīday dōn on þē rōde,
Sō turne my swevene niȝht and day tō mychel gōde.
Tweye poynts[2] þęre bēn þat bēn unshewed
For mē ne worþe tō clerk ne lewed;
Bot tō Sir Edward ōūre kyng,
Hym wil ich shewe þilk mętyng.
Ich telle ȝōū, forsōþe wiþōūten lęs,
Als God of hevene maide Mārīe tō mōder chęs,

Þē aungel cōm tō mē, Adam Dāvȳ, and sę̄de,
'Bot þōū, Adam, shewe þis, þee worþe wēl yvel mēde.'
Ī shewe ȝōū þis ilk mę̄tyng,
As þē aungel it shewed mē in a visiōūn;
Bot þis tǭkenyng bifalle, sǭ dooþ mē intō prisōūn.
Lǭrde, mȳ bodȳ is tō ȝōūre wille;
Þeiȝ þee willeþ mē þę̄rfǭre spille,
Ich it wil tāke in þǭlemōdenesse,
Als God graunte us heveneblisse;
And lę̄te us nevere þę̄rof mysse,
Þat wē ne mōten þider wēnde in clennesse.
Amēn, Amēn, sǭ mōte it bē,
And lę̄te us nevere tō ōþere waye tee.
Whǭsǭ wil spę̄ke myd mē, Adam þē marchal,
In Stretforþe-Bowe hē is yknowe and ǭvere al;
Ich ne shewe nouȝht þis for tō hāve mēde,
Bot for God Almiȝttīes drēde,
For it is sooþ.

Nicholus[1] Brembre wyth his upbȩrȩrs propȭsed hym, thē yȩre next after Jȭhn[2] Northampton mair of thē sāme citee with strȭnge hȭnde as it is ful knowen, and thourgh debāte and strenger partȳe ayeins thē pȩȩs bifȭre purveyde was chȭsen mair, in destrucciōn of manȳ ryght. For in thē sāme yȩre thē forsaid Nicholus, withōūten nēde, ayein the pȩȩs māde dȳverse enarmynges bī day and ȩke bī nyght, and destruyd thē Kynges trewe lȳges, som with ȭpen slaughtre, somme[3] bī false emprisōnementz; and some fledde thē citee for fȩȩre, as it is ȭpenlīch knowen.

And sȭ ferthermȭre for tō susteyne thise wrȭnges and manȳ ōthere, thē next yȩre after thē sāme Nicholus, ayeins thē forsaide frēdam and trewe commūnes[4], did crȳe ȭpenlīch that nȭ man sholde come tō chēse her mair but such as wȩre sompned, and thȭ that wȩre sompned wȩre of his ordynaunce and after his avȳs. And in thē nyght next after folwynge hē did carȳe grȩte quantitee of armūre tō thē guyldehalle, with which as wēl straungērs of thē contree as ōthere of withinne wȩre armed on thē morwe ayeins his owne proclamāciōn, that was such that nȭ man shulde bē armed; and certein busshmentz wȩre laide that, when freemen of thē citee cōme tō chēse her mair, brȩken up armed crȳinge with lōūde voice 'Slȩ, slȩ,' folwyng hem; whȩrthourgh thē pēple for fȩȩre fledde tō hōūses and ōther hīdynges[5], as in lȭnde of werre adradde tō bē dȩd in commūne[6].

And thus yet hiderward hath thē mairaltee bēn hȭlden as it wȩre of conquest or maistrȳe, and manȳ ōthere offices als, sȭ that what man, pryvē or apert in special that hē myghte wyte grocchyng, pleyned or hēlde ayeins anȳ of his wrȭnges or bī puttyng forth of whȭmsȭ it wȩre, wȩre it never sȭ unprēnāble, wȩre apȩched and it wȩre displēsyng tō hym Nicholus, anȭn was emprisōned and, though it wȩre ayeins falshȩde of thē lȩȩst officēr that hym lüst meynteigne, was hȭlden untrewe līgeman tō ōwre Kyng; for whȭ

reprōved such an officēr, maynteigned bȳ hym, of wrǭnge or elles, hē forfaited ayeins hym Nicholus and hē, unworthȳ as hē saide, represented thē Kynges estāt. Alsǭ if anȳ man bicause of servȳce or ōther lęveful comaundement apprǭched a lǭrde, tō which lǭrde hē, Nicholus[1], dradde his falshęde tō bē knowe tō, anǭn was apęched that hē was false tō thē cōnseille of thē citee and sǭ tō thē Kyng.

And yif in general his falsenesse wēre ayeinsaide, as of us tōgydre of thē Mercerȳe or ōthere craftes, or ǭnȳ cōnseille wolde hāve tāken tō ayeinstande it, or,—as tȳme[2] ōūt of mȳnde hath bē used,—wolden companȳe tōgydre, hōw lawful sǭ it węre for ōwre nēde or profite, we[3] węre anǭn apęched for arrȳsęrs ayeins thē pęęs, and falslȳ manȳ of us of[4] that yēt stǭnden endīted. And wē bēn ǭpenlīch disclaundred, hǭlden untrewe and traitōūrs tō ōwre Kyng; for thē sāme Nicholus sayd bifǭr mair, aldermen, and ōwre craft bifǭr hem gadred in plāce of recorde, that twentȳ or thirtȳ[5] of us węre worthȳ tō bē drawen and hanged, thē which thyng lȳke tō yōwre worthȳ lǭrdship bȳ an ęven juge tō bē prōved or disprōved thē whether that trowthe may shewe; for trouthe amǭnges us of fewe or elles nǭ man manȳ day dorst bē shewed; and nought ǫǫnlīch unshewed or hidde it hath bē bȳ man nōw, but alsǭ of bifǭre tȳme thē mǫǫst profitāble poyntes of trewe governaunce of thē citee, compīled tōgidre bī lǭnge lābōūr of discrēte and wȳse men, wythōūt cōnseille of trewe men,—for thei sholde nought bē knowen ne contynued,—in thē tȳme of Nicholus Exton, mair, ōūterlīche węre brent.

And sǭ fer forth falsehęde hath bē used that oft tȳme hē, Nicholus Brembre, saide, in sustenaunce of his falshęde, ōwre līge lǭrdes wille was such that never was such, as wē suppǭse. Hē saide alsǭ, whan hē hadde disclaundred us, which of us wolde yēlde hym false tō his Kyng, thē Kyng sholde dō hym grāce, cherise hym, and bē good Lǭrde tō hym: and if anȳ of us alle,

Alsǭ, wē hāve bē comaunded ofttȳme, up ōwre līgeaunce, tō unnēdeful and unlęveful dīverse dōynges, and alsǭ tō wythdrawe us bī thē sāme comaundement frǭ thynges nędeful and lęfful, as was shewed whan a companȳe of gōde women, thęre men dorst nought, travailleden bārfōte tō ōwre līge Lǭrde tō sēche grāce of hym for trewe men as they suppǭsed; for thanne węre such proclamāciōuns māde that nǭ man ne woman sholde apprǭche ōwre līge Lǭrde for sēchyng of grāce, and ǭvermanȳ ōthere comaundementz alsǭ, bifǭre and[1] sithen, bī suggestiōn and informāciōn of suche that wolde nought her falsnesse had bē knowen tō ōwre līge Lǭrde. Forthȳ, grāciōuse lǭrdes, lȳke it tō yōw tō tāke hēde in what manēre and whęre ōwre līge Lǭrdes pōwēr hath bēn mysused bȳ thē forsaid Nicholus and his upbęręrs, for sithen thise wrǭnges bifǭresaide hān bēn used as accidental or comūne[2] braunches ōutward, it sheweth wēl thē rōte of hem is a ragged subject or stok inward, that is thē forsaid brēre or Brembre, thē whiche comūne[2] wrǭnge uses, and manȳ ōther if it lȳke tō yow, mōwe bē shewed and wēl knowen bī an indifferent juge and mair of ōwre citee; thē which wyth yōwre ryghtful Lǭrdeship ygraunted formǫost pryncipal remedȳe, as Goddes lawe and al ręsōun wole, that nǭ dōmesman stǭnde tōgidre juge and partȳe, wrǭnges sholle mǭre ǭpenlīch bē knowe and trouth dor apęre. IV. CHAUCER'S CANTERBURY TALES

The Tale of the Pardoner

In Flaundres whīlom was a compaignȳe
Of yonge folk that haunteden folȳe,
As rīot, hasard, stywes and tavernes,
Whēreas with harpes, lutes and gyternes
They daunce and pleyen at dees bōthe day and nyght,
And ēten alsō, and drynken ōver hir myght;
Thurgh which they doon thē devel sacrifise
Withinne that develes temple in cursed wise
Bȳ superfluytee abhomynāble.
Hir ōthes been sō grēte and sō dampnāble
That it is grislȳ for tō heere hem swēre;
Oure blissed Lōrdes bodȳ they tōtēre;
Hem thoughte þat Jewes rente hym noght ynough,
And ēch of hem at ōtheres synne lough.
And right anōn thanne cōmen tombestēres
Fētȳs[1] and smale, and yonge frutestēres,
Syngēres with harpes, baudes, wāferēres,
Whiche been thē verray develes officēres,
Tō kyndle and blowe thē fȳr of lecherȳe,
That is annexed untō glotonȳe.

Thē hǫǫlȳ writ tāke Ī tō mȳ witnesse,

Sǭ dronke hē was hē nyste what hē wroghte.

Whan hē of wȳn was repleet at hise fęęste,
Right at his owene tāble hē yaf his hęęste
Tō slęęn thē Baptist Jǭhn, ful giltelęęs.

And a man which that is dronkelewe,

Ǭ glotonȳe, ful of cursednesse;
Ǭ cause first of ōūre confusiōn,
Ǭ original of ōūre dampnāciōn,
Til Crīst hadde boght us with his blood agayn!
Lǭ, hōw̄ deere, shortlȳ for tō sayn,

Corrupt was al this world for glotonȳe.

Wȩ̄re set hem in a taverne tō drynke;
And as they sat they herde a belle clynke
Biforn a cors was carīed tō his grāve,
That ǫǫn of hem gan callen tō his knāve,
'Gō̄ bet,' quod hē, 'and axe rȩ̄dīlȳ
What cors is this þat passeth heer forbȳ,
And looke þat thōū report his nāme weel.'
'Sire,' quod this boy, 'it nēdeth never a dȩ̄ȩl,
It was mē tǫǫld ȩ̄r yē cam heer twō̄ hōūres;
Hē was, pardee, an ō̄ld felawe of yōūres,
And sodeynlȳ hē was yslayn tōnyght,
Fordronke, as hē sat on his bench upryght.
Thȩ̄r cam a privee theef men clȩ̄peth dȩ̄ȩth,
That in this contree al the pēple slȩ̄ȩth,
And with his spȩ̄re hē smǫǫt his herte atwō̄
And wente his wey withōūten wōrdes mō̄.
Hē hath a thōūsand slayn this pestilence,
And maister, ȩ̄r yē come in his presence,
Mē thynketh that it wȩ̄re necessarīe
For tō bē war of swich an adversarīe;
Bēth rȩ̄dȳ for tō meete hym everemǫǫre,—
Thus taughte mē mȳ dāme, Ī sey namǫǫre.'
'Bȳ Seinte Mārīe,' seyde this tavernēr,
Thē chīld seith sooth, for hē hath slayn this yȩ̄ȩr,
Henne ō̄ver a mīle withinne a grȩ̄ȩt villāge,
Bō̄the man and womman, chīld and hȳne and pāge;
Ī trowe his habitāciōn bē thȩ̄re.
Tō been avȳsed grȩ̄ȩt wysdōm it wȩ̄re,
Ȩ̄r that hē dide a man a dishonōūr.'
'Yȩ̄, Goddes armes,' quod this rīotōūr,
'Is it swich peril with hym for tō meete?
Ī shal hym sēke bȳ wey and ȩ̄ȩk bȳ strēte,
Ī māke avōw̄ tō Goddes digne bō̄nes!
Herkneth, felawes, wē thrē been al ō̄nes,

Lat ęch of us hǭlde up his hande til oother
And ęch of us bicomen ōtheres brōther,
And wē wol slęęn this false traytōur dęęth.
Hē shal bē slayn which þat sǭ manȳe slęęth,
Bȳ Goddes dignitee, ęr it bē nyght.'
Tōgidres hān thise thrē hir trouthes plight
Tō lyve and dȳen ęch of hem for oother,
As though hē węre his owene ybǭren[1] brōther.
And up they stirte, al[2] dronken in this rāge,
And forth they gǫǫn tōwardes that villāge
Of which thē tavernęr hadde spǭke biforn;
And manȳ a grislȳ ǫǫth thanne hān they sworn,
And Crīstes blessed bodȳ they tōrente,—
Dęęth shal bē dęęd, if that they may hym hente.
Whan they hān gǫǫn nat fullȳ half a mīle,
Right as they wolde hān troden ǭver a stīle,
An ǫǫld man and a pōvre with hem mette.
This ǭlde man ful mēkelȳ hem grette
And seyde thus, 'Nōw, lǭrdes, God yōw see.'
Thē prōudeste of thise rīotōures[3] three
Answerde agayn, 'What, carl, with sorȳ grāce
Whȳ art ōw al forwrapped sāve thȳ fāce?
Whȳ lyvest ōw sǭ lǭnge in sǭ grętt āge?'
This ǭlde man gan looke in his visāge
And seyde thus: 'For Ī ne kan nat fȳnde
A man, though þat Ī walked intō Ȳnde,
Neither in citee nor in nǭ villāge,
That wolde chaunge his youthe for mȳn āge;
And thęrfǭre moot Ī hān mȳn āge stille
As lǭnge tȳme as it is Goddes wille.
Ne dęęth, allas, ne wol nat hān mȳ lȳf;
Thus walke Ī lȳk a resteląęs kaitȳf,
And on thē grōund, which is mȳ moodres gāte,

Ī knokke with mȳ staf bǭthe ȩrlȳ and lāte,
And seye, "Leeve mooder, lęęt mē in!
Lǭ, hōw Ī vanysshe, flessh and blood and skyn;
Allas, whan shul mȳ bǭnes been at reste?
Mooder, with yōw wolde Ī chaunge mȳ cheste
That in mȳ chāmbre lǭnge tȳme hath bē,
Yȩ, for an heyre clōwt tō wrappe mē."
But yet tō mē shē wol nat dō that grāce;
For which ful pāle and welked is mȳ fāce.
But, sīres, tō yōw it is nǭ curteisȳe
Tō spȩken tō an ǭld man vileynȳe,
But hē trespasse in wōrd or elles in dȩde.
In hǫǫlȳ writ yē may yourself wēl rȩde,
Agayns an ǫǫld man, hǫǫr upon his hęęd,
Yē sholde arīse; whērfǭre Ī yeve yōw rȩęd,
Ne dooth untō an ǫǫld man nǫǫn harm nōw,

And God bē with yōw whȩre yē gǭ or rȳde,—
Ī moote gǭ thider as Ī hāve tō gǭ.'

'Nay, ǭlde cherl, bȳ God thōu shalt nat sǭ,'
Seyde this oother hasardōur anǭn;
'Thōu partest nat sǭ lightlȳ, bȳ Seint Jǭhn!
Thōu spak right nōw of thilke traytōur dęęth,
That in this contree alle ōure freendes slęęth;
Hāve heer mȳ trouthe, as thōu art his espȳe,
Telle whȩre hē is, or thōu shalt it abȳe,
Bȳ God and bȳ thē hǫǫlȳ sacrement.
For soothlȳ thōu art ǫǫn of his assent
Tǭ slęęn us yonge folk, thōu false theef.'

'Nōw, sīres,' quod hē, 'if þat yē bē sǭ leef
Tō fȳnde dęęth, turne up this crōked wey,
For in that grǭve Ī lafte hym, bȳ mȳ fey,
Under a tree and thȩre hē wole abȳde;

Noght for yōūre bǫǫst hē wole him nǭthyng hȳde.
Sē yē that ǫǫk? Right thę̄re yē shal hym fȳnde;
God sāve yōw̄, þat boghte agayn mankȳnde,
And yōw̄ amende.' Thus seyde this ǭlde man;
And everīch of thise rīotōūres[1] ran
Til hē cam tō that tree, and thę̄r they fōūnde
Of flǭryns fȳne of gōld, ycoyned rōūnde,
Wēl nȳ an eighte[2] busshels, as hem thoughte.
Nǭ lenger thanne after dęęth they soughte,
But ę̄ch of hem sǭ glad was of that sighte,
For þat thē flǭryns been sǭ faire and brighte,
That dōūn they sette hem bȳ this preciōūs hoord.
Thē worste of hem hē spak thē firste wōrd.
'Bretheren,' quod hē, 'taak kēpe what Ī seye,

And lightlȳ as it comth sǭ wol wē spēnde.

That ǫǫn of hem thē cut broghte in his fest,
And bad hem drawe and looke whēre it wol falle;
And it fil on thē yongeste of hem alle,
And forth tōward thē tōūn hē wente anōn.
And al sō soone as that hē was gōn,
That ǫǫn of hem[1] spak thus untō that oother:
'Thōw knowest wēl thōū art mȳ sworne[2] brōther;
Thȳ-profit wol Ī telle thee anōn.
Thōū wǫǫst wēl that ōūre felawe is agōn,

That shal departed been amōng us thrē;
But natheleęs, if Ī kan shāpe it sō

'Shal it bē cōnseil?' seyde thē firste shrewe,

And thus acorded been thise shrewes tweye

NOTES[1]

PART I

THE MIDLAND DIALECT

This part contains specimens of the several varieties of this dialectal division, but especially of East Midland, as that upon which later English is especially based. Only two selections represent West Midland, the 'Prose Psalter' (p. 100) and the 'Instructions to Parish Priests' (p. 119), as that dialect in its purity does not materially differ from East Midland. More important is the distinction of Early East Midland from that of the thirteenth and fourteenth centuries, which may be regarded as normal Middle English in this dialect. Early East Midland, represented by the first two selections, shows the language in a transition state. For example, OE. *ā* still remains *ā*, the characteristic lengthening of OE. *e, a, o* in open syllables had not taken place, and other less significant changes already mentioned in the Grammatical Introduction.

A. EARLY EAST MIDLAND

I. THE PETERBOROUGH CHRONICLE

The last part of the 'Chronicle,' from 1080 to its close, occurs only in Laud MS. 636 of the Bodleian Library, Oxford. The whole has been frequently edited, as by Thorpe and Earle, before the latter's edition was re-edited by Plummer, 'Two of the Saxon Chronicles Parallel' (1892–9). Selections are found in Morris ('Specimens,' I, 9) and Zupitza ('Übungsbuch,' p. 57, Schipper 75).

[1] These Notes are intended to give, in methodical manner, some account of MSS. and editions; time and place of composition, as well as author if known; character of the work, relation of the extract to the whole, and metrical relations, if poetry; source of derived material, when known; bibliography of more important monographs; explanations of words, phrases, allusions, and other difficulties. General works of reference are not mentioned in connexion with each selection, for teachers will naturally refer to Ten Brink's 'History of English Literature,' Morley's 'English Writers,' Brandl's 'Mittelenglische Litteratur' in Paul's 'Grundriss der Germanischen Philologie,' and Körting's 'Grundriss der Geschichte der Englischen Litteratur.' Cross-references to the texts are by page and line, the Notes to each page of text being arranged in a single paragraph.

Written at Peterborough, Northampton, the part chosen includes all that is written in the hand of the last continuator, who gives a summary of Stephen's reign immediately after his death in 1154. The selection therefore represents Northeast Midland (NEMl.) of the middle of the twelfth century. See Behm, 'The Language of the Latter Part of the Peterborough Chronicle' (1884); H. Meyer, 'Zur Sprache der jüngeren Teile der Chronik von Peterborough' (1889).

The 'Chronicle,' as the most important source for the history of the period, cannot be too highly regarded. Especially valuable is this contemporaneous account of Stephen's reign, since it is more detailed than most of the other entries and more vividly narrated. On the other hand the order of events is not chronological, as shown by Plummer (as above), II, 307.

As to language, the orthography of this selection is less regular than most others of the book. It shows the unstable condition of the written form when English was less commonly used in literature, as well as some orthographic influences of older works. Special peculiarities of orthography are *ǣ* for OM. *ǣ*, *ēa*, rarely *ēo*; *e* for OM. *e* (*æ*), especially in unstressed syllables; *ēa* for OM. *ē*, as in *gēar*; *ēo* for OM. *ē*, *ēo*, rarely *ēa*; *ēo* (*ǣo*) for OM. *ēo*, rarely *ēa*. Among consonants the most important peculiarities are *ch* for the OE. medial spirant *g* in a few words; *g*(*i*) for the OE. initial palatal spirant *g*; *t* initially for OE. *þ* (*ð*) in pronominal words when immediately following a final *d* or *t*; *w* for OE. *hw*, as in *warsæ*. The vocabulary shows a larger French element than the selections immediately following, partly owing to the number of terms connected with government and the church. The inflexions, which have been thought quite irregular, will fall into fairly definite schemes. Noun plurals in *es*(*s*) prevail, though a few OE. neuters with long stems still remain without ending. Adjectives have almost wholly lost oblique case forms. Verbs show somewhat more irregularities, but are fast tending to the simplicity of normal Middle English. The syntax of the period is also comparatively simple. On the other hand, the inverted order of subject and predicate is common, and the construction according to sense with collective nouns occasional. The title *kīng* (l. 1) is still an appositive and follows the personal name, or the personal name is in apposition with *kīng* (l. 13). The most striking single construction, from the standpoint of Modern English, is the double genitive, as *Stēphnes Kīnges* (4, 28), *þē kīnges sune Henrīes* (5, 12); yet these are quite in accord with OE. usage and the appositive noted above. Subjunctive forms of the verb are naturally much more frequent than in English of to-day.

Page 1, l. 1. Henrī Kīng. Henry I, who had come to the throne in 1100. **Henrī abbot.** Henry of Poitou, abbot of St. Jean d'Angely, from which he was expelled in 1131, to the great rejoicing of the monks who had been under him. He was related to Henry I and the Count of Poitiers, and had been a monk at Cluny or Clugni (1, 3) in Burgundy. This monastery was at the height of its prosperity in the twelfth century, some 2,000 religious houses throughout Europe acknowledging allegiance to it. **2. Burch.** That is Borough of St. Peter, Peterborough, a name which supplanted the earlier Medeshamstede. A Benedictine abbey of St. Peter had been founded in 655 by Oswy, King of Northumbria, and Peada, the first Christian King of Mercia. Plundered by the Danes in 870, it was re-established in 966 by Athelwold, Bishop of Winchester, who also changed its name. **3. tē.** For *þē*, after

a word ending in *t* or *d*. **5. Biscop of Seresberī.** Roger of Salisbury and Alexander of Lincoln, his nephew. **6. þe.** Note the retention of the OE. relative particle in early Middle English, though soon to be replaced by *þat*. **hē.** The abbot Henry. As in Old English, pronouns are often lacking in explicit reference. So *hē* ... *hē* ... *his* of the next line refer to the same Henry. **10. iaf.** This form, among others, shows how completely OE. palatal spirant *g* had assumed the quality of MnE. *y*. Cf. *iāfen* (2, 26), *iēden* (3, 28). **11. Sanct Nēod.** St. Neot's in Huntingdonshire. The MS. abbreviation for St. gives us no hint as to whether the OE. noun form, *sanct*, or *sant* (cf. Orm's *sannt*) was actually used. It is doubtless too early for the OF. form *saint* with a diphthong. **12. Sanct Pētres messedai.** June 29, the feast of St. Peter and St. Paul in commemoration of their martyrdom; really the date of reburial of their supposed remains in 358 A.D. **14. þā þēstrede.** Henry I left England, never to return, on Aug. 1 (Lammas), 1133. The eclipse occurred on the next day, but Henry did not die until Dec. 1, 1135 (1, 18). Perhaps the traditional bringing together of these two dates accounts for the wrong dating of Henry's departure from England. **15. wāre.** 'Might be'; subjunctive preterit singular. For other forms with *ā* in pret. pl. cf. *nāmen* (2, 1), *drāpen* (3, 18), *wāren* (3, 29), *forbāren* (3, 31), *stāli* (6, 8). **16. sterres abūten.** The copulative verb omitted as often. **18. ðat ōþer dæi.** 'The second, or next day,' *ōþer* being used with ordinal force as in Old English. St. Andrew's day is Nov. 30, and Henry died on Dec. 1. Andreas, a borrowed word ending in *s*, takes no ending in the genitive. **19. þā wes trȩsōn.** The MS. reading was long a puzzle, and various emendations were suggested before the present editor pointed out the true reading in 'Mod. Lang. Notes,' VII, 254. This was adopted by Plummer in a note to this passage (II, 307). Incidentally this is the first example so far discovered of the French word *treason* in English.

Page 2, l. 2. **Rȩdinge.** Henry I had founded an abbey at this place, no doubt the reason for his burial there. **10. midewintre dæi.** That is Christmas day, but authorities give the date variously, as Dec. 22, 24, 25, 26, the latter being St. Stephen's day. The name midwinter day is Teutonic, and antedates the Christianization of Britain. With the Conquest, Christmas (*Crīstes mæsse*) came to be used. **12. Baldwin de Redvērs.** The rebellion really belongs to the year 1136, as also the compact with David, King of Scotland. This Baldwin, first Earl Redvers (Rivers), died in 1155. **18. fōr ... tō Normandī.** The journey was in March, the return (1, 23) in December. **20. gēt.** Plummer says past participle of a weak verb *geten* 'get,' but this is not likely on several accounts. The word is the adverb *gēt* (OM. *gēt*, WS. *gīet*) 'yet,' as given in the glossary to Morris's 'Specimens,' I; cf. for the same word 16, 3; 29, 5. The treasure which Stephen yet had, and for which they received him so gladly, was about £100,000. **23. gadering æt Oxenefōrd.** This was in June, 1139. Bishop Roger was justiciar, or chief justice, and regent in the king's absence. Roger, the chancellor, was nephew only by courtesy. **25. hise neves.** The plural form of the pronoun shows that the OE. genitive *his*, from *hē*, had developed a possessive pronoun, with inflexion, as *mīn* and *þīn* had done in the older period.

Page 3, l. 3. **be nihtes ... be dæies.** The force of the OE. adverbial genitive is apparently not felt, and the adverbial relation is more clearly indicated by a prepositional phrase. **carlmen and wimmen.** 'Men and

women.' The word *man* was general in its meaning, and probably on this account the more distinctive *carlmen* was employed. **6. me henged.** 'They hanged (them) up by the feet,' &c. The indefinite *me*, an old singular, implies a plural, as indicated by the verbs *hēngen* (l. 7) and *wrythen* (l. 8). **11. crūcethūs.** The context sufficiently explains the meaning of this term. The first part is apparently Lat. *cruciatus*; for the quantity of *ū* cf. *crūc* in Pogatscher, 'Die griechischen, lateinischen und romanischen Lehnworte im Altenglischen.' **14. lof and grin.** This must be regarded as still a crux. The MS. reads *lof* ⁊ *grī*, which suggested to Thorpe *lǭþ and grim*, 'loathsome and grim,' as the names of the instruments, *lǭþ* being for OE. *lāð*. The use of the two names then accounted for the plural verb. On the other hand, the use of two adjectives in this way for an instrument would presuppose a singular verb, besides being unsatisfactory in other ways. **rachentēges.** Really a compound of OE. *racente* 'chain' and OM. *tēh(g)*, WS. *tēah(g)* 'fetter,' but the relation of the parts of the compound had probably been lost. **ǭþer.** To be carefully distinguished from *ōþer*, OE. *ōþer*. *Ǭþer*, OE. *āghwæðer*, soon became ME. *ōr*, *or*, and MnE. *or*. **15. bæron.** This form for the infinitive *beren* is paralleled by *æten* = *eten* (5, 14), *begæten* = *begeten* (7, 2). While not marked long here they probably represent sporadic cases of lengthening of *e* in an open syllable, a change which was not regularly carried out until the thirteenth century. **21. ðat lastede.** This proves conclusively that the account was not written until the close of Stephen's reign. Cf. also the reference to Martin's abbacy (4, 10 f.) lasting to Jan., 1155. **23. ǣvre um wile.** 'Ever from time to time,' OE. *āfre ymbe hwīle*. The form *um* is Old Norse, cognate with OE. *ymbe*; cf. *umstund* in 'Cursor Mundi.' **24. tenserīe.** First explained by Mr. Round and Mr. Toynbee in the 'Academy,' July 11, 1892. It is a NF. form based on LL. *tensarium*, 'a generic term for certain irregular taxations'; the latter is from *tensare*, 'to protect, exact tribute for protection.' **31. ǭwer sithon.** 'Everywhere thereafter, or afterwards.' The first word is OM. *āhwēr*, WS. *āhwǣr*.

Page 4, l. 3. tūnscipe flugen. Notice the construction according to sense; *tūnscipe* is a grammatical singular, a logical plural, and the verb agrees with the latter, as often. **6. warsæ**, perhaps **-sǣ**. OM. *hwēr* (*hwar*?), WS. *hwǣr*, and *sǣ* from older *swǣ*. **8. Crīst slēp.** In interpreting Christ's sleeping in the ship during the storm (Matt. viii. 24), the ME. 'Metrical Homilies' (ed. by Small, p. 135) explain that the ship is the church:

> 'And Crist þarin gasteli slepes,
> Quen he þoles god men and lele
> Wit wic(ce) men and fals(e) dele,
> Þat betes þaim wit dede and word
> Als se bare betes on schipbord.'

11. fānd. 'Provided for.' Still used in dialectal English in which a country labourer is engaged for 'so much and found,' that is, so much pay in addition to board and lodging. **14. lēt it rēfen.** 'Let roof it, caused it to be roofed.' **17. fōr tō Rōme.** This event, though placed under the year 1137, could not have taken place until 1145, since Eugenius did not become pope until that year. Cf. note to 3, 21. **18. privilegies.** The OF. form is *privilege*, so that *ie* is here not long, unless it shows influence of OF. words in *ie*. **20–21. circewīcan . . . hōrderwȳcan.** That OE. *wīce* had acquired final *n* in the nominative is clear from Orm's use, so that these examples can hardly

be assumed to be weak datives. **22. Rogingham þē castel.** 'The castle of Rockingham.' **24. solidi.** The MS. abbreviation is expanded as a Lat. plural, since the word was hardly English. The words ælc gēr, inserted above the line by the writer of the MS., were bracketed by Morris as if not in the MS. ('Specimens,' I), and this led to the proposal of *solidatas*, 'a measure of land,' as the true reading ('Mod. Lang. Notes,' VII, 134). The correct reading of the MS. shows that a sum of money is intended. **25. wīniærd.** Plummer notes, on Bede ('Hist. Eccles.,' Bk. I, ch. i), that vine-growing was formerly common in England, especially in some of the monasteries. **28. Stēphnes Kinges.** Each word is made genitive in form as in Old English. The MnE. group genitive has not yet developed; cf. *þē kinges sune Henrīes* (5, 12), *þē kinges dohter Henrīes* (5, 30). **29. On his time.** The death of William of Norwich, afterwards St. William, is placed in 1144 and 1146 by different chroniclers. Plummer says, 'The charge against the Jews of using the blood of murdered gentiles, especially Christian children, for ritual purposes is as old as the time of Josephus'; see his 'Contra Apionem,' II, 8. Cf. the similar story in Chaucer's 'Prioress's Tale.' **31. lāng Frīdæi.** The term occurs occasionally in OE. *langa Frigadæg* (*Frigedæg*), and is common in Old Norse as *langifrjādagr*.

Page 5, l. 2. **and tō munekes.** 'And those monks.' Editors have seemed to think *to* an unusual form, but it is a natural development of OE. *þā* after a final *d*; cf. 5, 8. **8. ēvest,** MS. æveꝛ. The MS. *ꝛ* is an OF. spelling, usually of *ts*, but here of *st*. **9. æt tē Standard.** The battle was fought at Northallerton, Yorkshire. Its name comes from the fact that banners of St. Cuthbert of Durham, St. Peter of York, St. John of Beverley, and St. Wilfred of Ripon were fixed upon a pole in a four-wheeled cart and placed in the centre of the English army. **12. wart it war.** 'Became aware of it.' **13. þēstrede þē sunne.** This date of March 20, 1140 (l. 15), is shown to be correct by the table of eclipses. **16. Willelm, Ærcebiscop.** The Willelm Curbuil mentioned at 2, 9. **24. Rodbert Ēorl of Gloucestre.** Robert was a natural son of Henry I and hence half-brother of Matilda, whose claims to the throne he vigorously espoused. **26. heore lāverd.** That is, King Stephen; so *him* of l. 27. Stephen was taken prisoner Feb. 2, 1141. **30. kinges dohter Henrīes.** This was Æthelīc (Adelaide) of earlier references, the daughter of Henry I, who was given in marriage to Henry V of Germany. On her coronation, July 25, 1110, her name was changed to Matilda. At her husband's death, 1126, she returned to England, and her father caused homage to be done to her as his successor. This was reason enough for her enmity toward Stephen. Soon after she was given in marriage to Geoffrey of Anjou. She reached England in 1139 and was chosen Lady (the name Queen was not used for her) in 1141. In June of the same year she fled from London. **32. scē.** This is especially noteworthy as the earliest use of the form which became MnE. *she*.

Page 6, l. 1. **biscop of Wincestre.** Henry of Blois, formerly abbot of Glastonbury. **8. stāli hī.** Preterit plural with loss of final *n* when immediately followed by a subject pronoun. In Old English this occurred only in the case of the first and second persons, but it seems to have been extended to the third person in ME. times. Cf. 25, 11, 14. **14. swā diden.** The exchange was made in 1141. The next year came the reconciliation with

Randolph, earl of Chester. **26. brohten hire intō Oxenfōrd.** This was in March or May, 1141, the chronicler doubling back in his narrative to tell of the divided state of England. Matilda was besieged in Oxford during October or November, 1142, and she escaped to Wallingford in December. She did not go over sea (l. 30) until the early part of 1147. **27. þā hērde ðat sægen.** 'Then heard he that saying'; *sægen* is OE. *segen* (*sægen*), 'saying, assertion,' and not an infinitive (OE. *secgan*) as usually interpreted. Confusion has resulted from the form of the infinitive in 4, 28. **30. hī of Normandī.** This happened between 1141 and 1144.

Page 7, l. 1. **fērde Eustace.** Stephen's son Eustace married Constance, sister of the French king, in February, 1140. He died (l. 8) in August, 1153, his mother May 3, 1152. **2. tō wīfe.** The OE. dative remains longest in such expressions as this, though finally displaced by the invariable nom. dat. acc. form; cf. *tō wīve* (24, 19), *tō wīf* (40, 13). **9. his sune Henrī.** Henry succeeded to the dukedom of Anjou on the death of his father, Sept. 7, 1151. In March, 1152, Eleanor was divorced from Louis VII, and she married Henry (l. 11) in May of the same year. **tōc tō þē rīce.** 'Succeeded to the kingdom.' The OE. idiom was *fōn tō*, and *fōn* had now been displaced by *taken*, from ON. *taka*. **12. þā fērde hē.** This was in January, 1153, and in November peace was made (l. 15). **16. wāre.** Pret. subj., 'should be.' Cf. 1, 15. **27. þæt minster.** Stephen and his queen had founded the religious house at Feversham, Kent, and the minster had been completed in 1148.

Page 8, l. 1. **innen dæis.** Some number is perhaps omitted before *dæis*. **cusen.** The OE. *curon* had already given way to a form with *s*, by analogy of the present and preterit singular. So with the past participle *cosan* = *cosen* in l. 4. **9. Ramesæie . . . Torneie . . . Spallding.** These are Ramsey (Huntingdonshire), Thorney (Cambridgeshire), and Spalding (Lincolnshire), all in the neighbourhood of Peterborough. The other places named cannot be made out with certainty.

II. THE DEDICATION TO THE 'ORMULUM'

The 'Ormulum' is preserved in Junius MS. 1 of the Bodleian Library, not improbably the MS. of Orm himself. It has been edited by White (1852), and this revised by Holt (1878), though a more scholarly edition is still much needed. Selections occur in Morris ('Specimens,' I, 39), Mätzner ('Sprachproben,' I, 3), Sweet ('First Middle English Primer,' 43), Zupitza ('Übungsbuch,' 7, Schipper, 99). An indispensable collation of the MS. was printed by Kölbing in 'Englische Studien,' I, 1. Of the author nothing is known beyond what is given in this Introduction (see various notes). The 'Ormulum' was composed in the neighbourhood of Lincoln about 1200, and the language therefore represents the Northeast Midland of that period. Orm's language, in relation to orthography and vowel quantity, is discussed in the Grammatical Introduction (§ 71, note). Besides may be noted Callenberg, 'Layamon u. Orm nach ihren Lautverhältnissen verglichen' (1876); Sachse, 'Das unorganische e im Ormulum' (1881); Brate, 'Nordische Lehnwörter im Ormulum' in Paul u. Braune's 'Beiträge,' X, 1; Kluge, 'Englische Studien,' XXII, 179.

The name of the work is given by the author (Preface, l. 1): þiss boc is nemmnedd Orrmulum, forrþi þatt Orrm itt wrohhte. Ormulum is clearly a diminutive, after the Latin, of the author's name. The book consists of an introduction, called dedication and preface, paraphrases intended to cover the gospels read in the church during the year, and homilies upon them. Of these paraphrases and homilies only about one-eighth were completed, or at least remain in MS., but these extend to nearly ten thousand long lines. The work has little literary value, as it is prosaic in the extreme, but is especially valuable for the light which it throws on the language of the time. The metrical form is that of the long line of fifteen syllables with cæsura after the eighth, but without rime or regular alliteration. The metrical flow is iambic, and the metre is clearly based on the Latin septenarius. With the addition of rime this metre became the MnE. quatrain of alternate eight and seven syllables, the long line being broken at the cæsural pause. On the other hand, Menthel, following Trautmann, tries to connect Orm's verse with that of Otfried, 'Zur Geschichte des Otfriedischen Verses in England' (Anglia, VIII, Anzeiger, 49). The sources of the 'Ormulum' have been shown to be principally Bede and Gregory the Great; cf. Sarrazin, 'Über die Quellen des Ormulum' ('Englische Studien,' VI, 1).

As to language, the peculiarities of Orm's orthography have been discussed in the Grammatical Introduction. Here may be added Orm's *ā* for OE. *ā*, sometimes OM. *ā*, the exact limits of the use not having been accurately made out; the use of *ȝ* or *w* for the second element of a true diphthong (cf. *þeȝȝ* 'they,' *Awwstīn* for OF. *Austin*), as well as for OE. *ȝ* or *w*; *f* for OE. medial *f* = *v*; *g* in *gōd* 'good' distinguished from *g* in *strānge*, though no example occurs in our selection; *sh* (*ssh*) for OE. *sc*, beside *sk* for ON., OF. *sk* (*sc* = *sk*). The poetical form naturally gives special assistance in regard to language, as in accent of words, and elision of final *e* (occasionally other vowels) before a vowel or weak *h*. Orm's vocabulary is characterized by a large Norse element and a smaller OF. element than in the 'Chronicle.' His inflexions are exceedingly simple, and the syntax, at least of this selection, requires no special explanation other than an occasional note.

Page 8, l. 13. brōþerr mīn. Probably not blood-relationship in the restricted sense, but rather that in which Philemon is desired to receive Onesimus as 'a brother in the flesh,' Philem. 16. Cf. Henrici, 'Otfrid's Mutter und Orm's Bruder' ('Zeitschrift f. Deutsches Alterthum,' XXII, 231). **14. Annd.** The MS. sign (7) is thus expanded in accordance with occasional forms of the word in the 'Ormulum.' Of course there can be no question of the shortness of the vowel in this unstressed word. **15. ī Godess hūs.** In the religious house of which they were both canons, it would seem from l. 17. **16. witt.** The dual forms of the pronouns are rare except in the earliest period. **17. Unnderr.** While the rhythm of Orm's lines is prevailingly iambic, a trochee instead of an iamb often occurs at the beginning of the line, or immediately after the cæsura; cf. *Affterr* (l. 20), *eȝȝwhār* (9, 13), and following the cæsura *affterr* (l. 13), *goddspelless* (l. 19). Those who suppose that these words are given iambic stress assume that Orm did violence to the natural accent of words, instead of following a frequent custom in all English iambic rhythm. **swā summ Sannt Awwstīn sette.** That is, St. Augustine, the great patron of the monastic life. The more explicit rule actually followed by Augustine monks was that of St. Benedict

(Benet), based on the brief directions and the writings of Augustine. **19. Ennglissh.** The substantive *English* seems already to have become established, since it never occurs with final *e* in Orm, while the adjective appears with or without *e*, as in l. 22, where *Ennglissh ffolc* is practically a compound, and at 10, 20. **hallȝhe lāre.** The adjective is in the weak form after a genitive, as shown by Sachse (mentioned above). **20. Drihhtīn.** According to Orm's manner of indicating vowel quantity the *i* of the last syllable is long, though the word represents OE. *drihten*; cf. Morsbach, § 67, Anm. 4. **21. þohhtesst tatt.** The rule that initial *þ* of pronominal words becomes *t* after *t* or *d* is followed absolutely in Orm, as shown by Blackburn ('Amer. Journal of Philology,' III, 46). See also note on 9, 11. **22. lufe off.** Elision of weak *e* occurs regularly before a vowel or weak *h*; see Gram. Introd. **26. unnc birrþ.** 'It becomes (behooves) us both.'

Page 9, l. **1. þā goddspelless nēh alle.** The Latin texts given by Orm after the 'Dedication' show that he followed, in general, some gospel harmony of his time. **2. sinndenn.** This form is less common in Midland, except in the early period. It is displaced by *are*(*n*), found in the Anglian district in OE. times; cf. 'Vespasian Psalter' *earon*, Nth. *aron* (*un*), and Sievers, 'Angelsächsische Grammatik,' § 427. **4. sāwle nēde.** This might almost be written as a compound. Such examples scarcely prove retention of the OE. feminine genitive, with gender signification, at least for Midland and Northern. **7. amāng.** Orm's orthography gives no clue to the length of the first *a*, but the constant appearance of *a* instead of *o* (= *ǭ*) in later texts seems conclusive proof of shortness; cf. *amǭng*, 18, 10. **10. t'unnderrstanndenn.** Occasional elision of other vowels than weak *e* occurs in the 'Ormulum'; cf. *he't*, 10, 4. **11. þess tē bettre.** The change of initial *þ* to *t* in pronominal words occurs after *s* in only a few such expressions as the above. **þeȝȝm.** This form, with the nominative *þeȝȝ* (l. 26) and genitive *þeȝȝre* (l. 4), shows that Orm's dialect had already begun to use the ON. forms of the pronoun, a change which had not been fully accomplished in Southeast Midland in Chaucer's time. **16. ferrs.** OE. *fers*, from Lat. *versus*, soon to give way to OF. *vers*. **17. wēl . . . well.** Both forms occur in Orm. Holthausen has shown ('Anglia Beiblatt,' XIII, 16) that *wēl* is the prevailing form in both stressed and unstressed positions, and is used in independent positions, while *well* is employed when modifying an adjective or adverb. There are some exceptions even to this rule. **annd all forrþī.** 'And therefore (*all forrþī*) I was compelled, full often of necessity, to put (*dōn*) my word among the words of the gospel, to fill my verse.' *Nēde* is an adverb, and *sholldе* has the old sense of 'was obliged, had to.' **19. wīkenn.** This OE. *n*-stem has acquired final *n* in the nominative singular, contrary to the usual rule. Cf. the compounds *circewīkan*, *hōrderwȳcan* (4, 21–22). **26. lēētenn.** 'Think, judge,' less common meanings of OM. *lētan*, WS. *lǣtan*.

Page 10, l. **6. fele wōrdess.** Note the early use of *fele* (OE. sb. *feola*) as an adjective, and cf. German *viel*. **24. att Godd.** 'From God'; cf. 'at the hands of,' a relic of this use in modern English. **30. ȝiff þeȝȝ all forrwerrþenn itt.** The same thought is to be found in Ælfric's 'Homilies,' II, 528: Gif we for synfullum mannum gebiddaþ, and he ðære ðingunge unwurðe synd, ne beo we swaðeah bedælede edleanes þæs godan willan, ðeah þe we ðam forscyldegodan geðingian ne magon. 'If we pray for synfull men

and they are unworthy of the intercession, yet we shall not be deprived of the reward of good intention, though we may not be able to mediate for the guilty.'

Page 11, l. 7. all mannkinne nēde. *Mannkinne* is an OE. genitive plural, which has not yet taken the invariable plural ending *es*, perhaps because it was felt to be part of a compound. The form *mannkinness* is also found in such expressions. **21. flumm Jorrdān.** Owing to the regular appearance of the two words in this order Kluge assumes that both are of OF. origin. While I have followed Kluge here, the whole subject of Scripture proper names in English needs fuller investigation. In Middle English the lack of certainty with regard to Latin or French origin of such names particularly affects names beginning with MnE. *J*, since they are written with *I* or *J* indiscriminately. **26. dæþþ.** The doubling of *þ* would indicate shortness of the vowel, but the latter is marked long in accordance with the more common writing *dæþ*; cf. l. 8. **wiþþūtenn wrihhte.** 'Without merit or desert,' so 'undeservedly.'

Page 12, l. 6. wiss tō fulle sōþe. 'Certainly, in full truth.' *Wiss* is OE. *gewiss*, strengthened by *tō fulle sōþe*. **18. seffnde.** The OE. *seofeðe* has already been displaced by the analogical form on the basis of the cardinal, as in MnE. *seventh*. **25. þatt hē sahh.** Cf. Rev. v. 1 f. **32. nānes kiness shaffte.** Note the genitive inflexion of both adjective and noun. The uninflected adjective is more common, but the inflected form remains in certain expressions.

Page 13, l. 4. all all swā se. The doubling of *all* for emphasis is not uncommon in Orm. **26. Orrmīn.** Mätzner regarded the name as formed on the Latin model, but Zupitza ('Guy of Warwick,' note to l. 9529, EETS., Extra Series, 25–26) makes it a diminutive of Orm on the French model; cf. *Awwstīn*, 8, 17. Orm's name is believed to be from ON. *ormr*, cognate with OE. *wyrm* 'worm, serpent.' **30. allre ǣresst.** The MS. gives clear evidence, as in some other cases, of elision.

B. MIDLAND OF THE THIRTEENTH AND FOURTEENTH CENTURIES

I. THE 'BESTIARY'

The 'Bestiary,' from which these selections are taken, is found in Arundel MS. 292 of the British Museum. It has been edited by Wright ('Altdeutsche Blätter,' II), by Wright and Halliwell ('Reliquiae Antiquae,' I, 208), by Morris ('An Old English Miscellany,' EETS. 49, 1), by Mätzner ('Sprachproben,' I, 55), and a selection by Morris ('Specimens,' I, 133). The language of the 'Bestiary' is that of the Southeast Midland (SEMl.) during the first half of the thirteenth century.

The poem consists of more or less fanciful descriptions of thirteen animals, with allegorical interpretations of their supposed characteristics. The first

twelve sections are based on the Latin 'Physiologus' of Theobaldus, an Italian monk of the eleventh century, the thirteenth upon Alexander Neckam's 'De Naturis Rerum.' The 'Physiologus' of Theobaldus is printed by Morris as an appendix to 'An Old English Miscellany.' Fragments of an older 'Physiologus' occur in Old English poetry. The metrical forms of the 'Bestiary' are various. The first and third selections are in long unrimed lines with some attempt at alliteration. The second, with exception of the first line, breaks up into rimed couplets of four (occasionally three) stresses. The 'Signification' of the Eagle, however, shows long rimed lines with the first half-lines frequently riming together also. If the latter feature were perfectly carried out we should have a four-line stanza riming *abab*. The metre of the fourth is similar to the first part of the second, but all show many irregularities in detail. These metrical forms are especially interesting in relation not only to the alliterative line of Old English, but also to the rimed couplet of four stresses which was soon to be so common in England.

As to language, all Old English diphthongs have become simple vowels, and the new diphthongs are appearing; OE. *ǣ* is no longer used; the change of OE. *ā* to *ǭ*, and the lengthening of vowels in open syllables, have taken place; in other words typical East Midland is before us. Special peculiarities in orthography are OF. *c* = *s* initially; *g* for *g* in *gōd*, 'good,' and for *ȝ* in *ligt*, 'light,' or *ȝ* = *y* in *gē*, 'ye'; *s* (*ss*) = *sh*; *ð* always for OE. *ð* or *þ*.

Page 14, l. 1. **lēūn stant.** Both *lēūn* and *līūn* occur in Middle English as in Old French, the latter finally prevailing. Contractions like *stant* = *standeþ* are more common in SEMl. than in NEMl., and still more common in Southern. **hille.** No doubt dative of *hil* (l. 14), though possibly from the OE. *hylle* f., beside *hyll* m. **and.** 'If'; it translates Lat. *si* of Theobaldus, introducing the subjunctive *hēre*. The Latin also shows that the first half-line is a separate sentence, not immediately connected with the next as usually punctuated. **4. fētsteppes.** Note that the plural in MnE. compounds of mutation nouns, except *man*, loses all trace of mutation. **5. dūn.** The addition of this word, though not corresponding exactly to anything in the Latin, seems justified by the context and especially by l. 18. It was first added by Morris. **6. hē.** Refers to 'hunter,' implied in *hunten* (l. 1). **9. līð.** With this contracted form compare *līeð* in l. 12. **16. Hū.** Both *hū* and *wū* are found in the selections, and represent OE. *hū* and *hwū* respectively, the latter commonly becoming *wū* in Sth. English. For convenience they have been regularized throughout the selection on the basis of the first form, the more common Midland variety. **17. divel.** This form shows conclusively that shortening of OE. *dēofol* had taken place, since only *dēvel* could have become *divel*. The latter is still common in dialectal English. **18. dennede him.** 'Made a resting-place for himself.' The Latin is:

'Viscera Marie tibi, Christe, fuisse cubile,'

and OE. *denn* is glossed 'cubile.' **19. defte.** 'Mild, gentle, meek.' OE. *gedæft*, whence MnE. *daft* by a change of meaning similar to that of 'simple,' 'innocent.' MnE. *deft*, from the same root if not the same word, has acquired the sense 'skilful' through 'easy,' a natural development from 'mild.' **20. tō manne frāme.** 'To the profit of men.' *Manne* is a relic of the OE. gen. pl. *manna*. Such a genitive plural is preserved only in certain expressions, and probably the folk-mind regarded combinations like *manne frame* as essentially compounds.

Page 15, l. 3. **dę̄de = dę̄þe**, with *d* from voiced *þ*. *Ded* for *death* still exists in English dialects. Cf. 122, 6 for the word in rime. **5. hīrde.** The strict Ml. form is *hērde*, MnE. (shep)herd. *Hīrde* doubtless comes from WS. *hīerde*; cf. *sīlden = shīlden* (l. 6) for Ml. *shēlden*, MnE. *shield*. **15–16. dimme . . . him.** The rimes of the 'Bestiary' are sufficiently irregular so that the extra syllable of the first line does not seem remarkable. As *dimme* is pl. we assume the word was disyllabic, though compare 20, 26. **21. skīes sexe and sevene.** Referring to the traditional view of the heavens, based on the Ptolemaic system. **25. Đē sunne swīðeð.** The Lat. reads *Tunc sibi sol ambas accendit fervidus alas.*

Page 16, l. 2. **Ne wēre.** 'If his beak were not'; *wēre* pt. subj. **15 kirke.** A distinctly Nth. or NEMl. form, perhaps used for rime. **16. Ǭr.** Distinguish from *or*, 'or'; this is ON. *ār* cognate with OE. *ār*, 'ere.' **21. tō Gode ward.** This is a not uncommon order of words in OE., though *tōweard* (*tōward*) also occurs. Cf. *tō đē water ward* (17, 9). **lōteđ.** 'Thinks'; this makes a perfect rime with *bēteđ* and gives a good meaning. The MS. reading *lēređ = lę̄ređ* is an imperfect rime in both vowel and consonant. **22. tē sunne sikerlīke.** The allegory here may be illustrated by an OE. 'Treatise on Astronomy' attributed to Ælfric ('Popular Treatises on Science,' Wright, p. 3), in which this passage occurs: 'Seo sunne getacneđ urne Hælend Crist, se đe ys rihtwisnesse sunne, swa swa se witega cwæđ, *Timentibus autem nomen Domini orietur sol iustitiae, et sanitas in pennis eius*:—đam mannum þe him ondrædađ Godes naman þam arist rihtwisnysse sunne, and hælþe is on hyre fiđerum.' The sun betokens our Saviour Christ, who is the sun of righteousness, as the prophet said: 'Upon the men who fear God's name shall arise the sun of righteousness, and health is in his wings.' The prophecy is in Mal. iv. 2.

Page 17, l. 3. **forbrǭken.** Note the MS. reading in footnote. Some emendation is clearly necessary, and I suggest that in the text as better preserving the alliteration. **7. narwe būten.** The Latin original makes the passage clear:

'Querit angustum lapidis foramen;
Vix movens sese veniensque tandem
Inde pertransit spoliatque carnem
Pelle vetusta.'

Thus *narwe* refers to *đirl*. 'He seeks a stone in which (*đat . . . on*) is a hole, narrow, but he forces himself (moves through with difficulty) for,' &c. **24. lītel him is.** 'Little (advantage) will be to him from his limbs'; 'he shall have little advantage,' &c. **25. higtest.** Note the shorter form *higtes* in the next line.

Page 18, l. 5. **It is tē nēd.** A half-line is lost as shown by the alliteration. **6. ful of đewes.** It seems best to regard *ful* as imperative of OE. *fullian*, 'become full.' Otherwise, we must supply the imperative of the verb to be, or take *ful* as an adjective and omit *and* at beginning of the next line. The Latin gives no assistance. **31. Dat is ūre hę̄ved gēvelīc.** 'That is like our head.' The full sense is shown by the Latin, where our head refers to Christ:

'Vis novus vitam sine fine dignam,
Semper illesum caput est habendum,
Hoc caput, dico, quod habes in ipso
Principe Christo.'

hēlde wē. 'Incline we to,' 'if we incline to.' But *hēlde* might be a Sth. form for Ml. *hǭlden*, WS. *healdan* (*hēaldan*), OM. *haldan* (*hāldan*).

Page 19, l. 3. seien. Note the early development of a Midland infinitive based on the present indicative 3rd singular. Sth. *seggen*, OE. *secgan*, still remains for some time. **4. sǭge.** Pret. subj. 3rd sing., early ME. *sāge*; cf. note on 1, 15, and Siev. § 391, anm. 7. **9. it smīt.** 'It thrusts out.' *Smīt* = *smīteð*. **23. sumer and winter winnen.** 'Fair weather and storm strive together.' The Lat. has *Si sit tempestas cum vadit, vel venit estas.* **28. ðat,** MS. **ðar.** The emendation was suggested by Mätzner ('Sprachproben,' I, 69).

Page 20, l. 10. dōð hem sinken. 'Maketh them to sink.' **13. Þis devel.** The whale was so commonly used as a figure for the devil that the English writer begins at once with 'This devil,' not following the Latin assertion of similarity: *Viribus est zabulus quasi cetus corpore magnus.* This was common interpretation of such Scripture passages as Ezek. xxxiii. 2; Isa. xxvii. 1; Job xli. 1. **18. wōsǭ him folegeð.** Note how the indefinite *wōsǭ* approaches relative force by the repetition of the subject (at first the clause) in *hē*. The next step was to place *hē* before *wōsǭ* or *whō*, when *wōsǭ* becomes wholly relative to *hē* as an antecedent. **22. gast.** A short secondary form of OE. *gāst* occasionally occurring.

II. THE STORY OF JOSEPH

The 'Genesis and Exodus,' from which this selection is taken, is found in MS. 444 of the Library of Corpus Christi College, Cambridge. It was edited by Morris in EETS. 7 (1865) and reprinted with corrections in 1874. Specimens are found in Mätzner ('Sprachproben,' I, 75), Morris ('Specimens,' I, 63), Zupitza ('Übungsbuch,' 81), Wülker ('Lesebuch,' I, 1). As in the case of the preceding selection, with which this has much in common, the language of the 'Genesis and Exodus' is of the southern portion of the East Midland, and the poem was composed in the first half of the thirteenth century. A single author, otherwise unknown, is believed to have composed the whole poem; cf. Fritzsche, 'Ist das altenglische Story of Genesis and Exodus das Werk eines Verfassers,' 'Anglia,' VI, 43. Notes are to be found in 'Anglia,' VI, Anz. 1; XV, 191; XXII, 141; 'Englische Studien,' II, 120; III, 273; XVI, 429; XXII, 292; 'Archiv für neuere Sprachen,' XC, 143; 'Mod. Lang. Notes,' I, 65.

The poem consists of a paraphrase of the Scripture story, mainly based on the 'Historia Scholastica,' composed by Petrus Comestor between 1169 and 1175. As usual in such cases the treatment is free, many parts of the Bible story being omitted and many additions of mediæval legend and interpretation being added. The metre is the rimed couplet of four stresses with iambic movement, but with the syllabic irregularity so common in the period. Thus the line often ends with an unstressed syllable after the principal stress, and as often lacks an unstressed syllable at the beginning. In the latter case the first stressed syllable forms a monosyllabic foot. Alliteration of the stressed syllables is sometimes found, though without the regularity of alliterative verse. Our selection includes lines 2037–2490, covering Genesis xxxix. 19 to l. 14, though with large omissions. Another version of the story of Joseph may be read in 'Cursor Mundi' (EETS. 57, 59), beginning at l. 4037, and the part corresponding to our selection at l. 4417. The latter is much fuller and more dramatic, while also showing some interesting variations upon the story.

The language of the poem is similar to that of the 'Bestiary,' with which its orthography agrees so thoroughly that in general no further remarks are necessary. A few cases of OE. diphthongs occur, as at 22, 14–15, but similar words are so frequently written with simple vowels as to prove that the older forms did not represent true diphthongs. Otherwise the most noticeable orthographic peculiarity is *qu* for OE. *hw*, as in *quīle* (21, 5), perhaps through Nth. influence. The language of the poem is treated by Morris in the Preface to his edition, by Hilmer in 'Die Sprache von Genesis und Exodus' (1876), and by Fritsche as above.

Page 21, l. 1. **Putifar trewiŏ.** The form of Potiphar's name is that of the Latin original, as are most of the other Scripture names in Genesis. 2. **Iō-ēp.** The form here and the rimes at 22, 21–22 and 30, 7–8 prove conclusively that the Latin, not OF. form of the word is meant. 3. **sperd.** Orm's *sperrd* (12, 26) shows the shortness of the vowel. Metrically the word is disyllabic, and might be written *sperred*; though compare 22, 29–30. 6. **prisūnēr.** Note that this is not the MnE. word 'prisoner.' 13. **hem drempte.** Impersonal uses of the verb were still common, as in OE., though soon to disappear; see Kellner, 'Hist. Outlines of Eng. Syntax,' § 151. 15. **on sēl.** Lines 15–16 paraphrase *Ioseph . . . ministrabat eis* of the Vulgate and Petrus Comestor, but the above words were added to imply regularity of the service. 17. **hē freinde**, MS. **hē hem freinde.** The MS. reading is impossible metrically, unless *hē hem* are to be read as *he'm*. The text follows Kolbing, 'Eng. St.,' III, 305. 18. **Harde drēmes.** 'Unpleasant (harde) dreams have that power,' that is, to make people mourn. 27–28. **hōnd . . . wrōng.** Note the assonance instead of rime. 28. **mē ðugte.** Morris says *ðugte* = *ðogte*, corrected by Egge in 'Mod. Lang. Notes,' I, 66. ME. *ðuȝte*, 'seemed,' and *ðoȝte*, 'thought,' later fell together under *pouȝte*, MnE. *thought*.

Page 22, ll. 3–4. **wīn . . . ðerin.** Many imperfect rimes in the poem show differences in vowel quantity. With rimes of long and short *i* cf. those at 28, 25–26; 29, 7–8; 30, 15–16; 31, 17–18; 34, 4–5; see also 35, 21–22. 10. **Ðat**, MS. **ðā.** Morris suggested the emendation. 21. **quad** = **quaŏ**, 'quoth.' For the change cf. Gram. Introd., §§ 100, 116. 25. **fleis, fleish.** For the diphthong see Gram. Introd. Cf. *weis* (29, 1). 26. **agte.** 'Possessions, wealth,' not 'care' as Morris. The line means 'that no wealth may protect thee.' Cf. *ðō agtes* (26, 32). This addition to the Scripture narrative is not found in Petrus Comestor, but occurs in 'Cursor Mundi,' l. 4493.

Page 23, ll. 7–8. **biforen . . . cōrn**, MS. **coren.** The MS. reading makes a good eye-rime, but it is doubtful whether *cōrn* was disyllabic in pronunciation. Better assume *biforn* (*biforn*) for *biforen*. 12. **Ðe rance**, MS. **ðe ranc he.** The emendation makes *rance* the correct plural, and leaves *sevene lēne* as the more direct subject of *hāven ovvercumen*. 13. **it smiten.** 'They smote.' Morris regards it as a neuter plural form, but perhaps this use is derived from that of *it* as introducing plural verbs in OE. 14. **ðrīsten tō ðē**, MS. **ðrist hem to ðo.** The emendation seems justified by the syntax. The plural *ðrīsten* is required and *ðē fētte* must be object of it. Cf. the Latin: *Septem spicae plenae pullulabant in culmo uno, aliaeque totidem iuxta oriebantur tenues, et percussae uredine, et devorabant priores.* 29–30. **ōn . . . Þhāraōn.** The NF. form of Pharaoh should rime with long close *ō*, as it

does at 22, 1–2, 9–10. Cf. 32, 15–16, and the OF. *Phāraūn* at 23, 21–22. **30. tawnen.** See the explanation of the form in the Glossary, and cf. MnE. *twit* for a similar initial *t* from OE. *æt* in a compound word.

Page 24, l. 8. **gēre.** The noun *gēr* = *ȝēr*, 'year,' appears with the plural *gēr* at 23, 31, *gēre* here, and *gēres* in l. 25. So most OE. neuters gradually assumed the *es* ending of masculines. **17. ðanne Putifar.** Confusion in the names Potiphar and Potiphera of our Bible is easy from the Lat. forms Putiphar and Putiphara. It was then easy to make Asenath the daughter of Joseph's old master, as here. Hebrew tradition explained Joseph's marriage of a foreign woman by saying that Job's second wife was Dinah, daughter of Jacob (Gen. xxxiv), from whom a daughter was born and became the mother of Asenath (Petrus Comestor). Moslem tradition gave a romantic turn to the story by making Joseph marry Zuleekha, wife of Potiphar, after the latter's death (Weil's 'Biblical Legends,' 97 f.). **20. Ōðer is nū.** 'Another (condition) is now than had happened before.' **24. Hē luveden God.** 'They (the sons of Joseph) loved God, he (God) repaid it to them.' **29. Hunger wēx.** The 'Cursor Mundi' shows an interesting addition, probably from Hebrew tradition. Joseph, after threshing, casts the chaff upon the Nile, where Jacob, who casually walked by that river (geography did not trouble many mediæval writers), found it, and sent his sons along the Nile to Egypt to buy corn. **29–30. Chānaan . . . forðan.** Another qualitative rime, as *Chanaan* seems to be disyllabic in 'Genesis,' though trisyllabic in 'Cursor Mundi,' as in Latin. Cf. 32, 7–8.

Page 25, l. 1. **for nēde sogt.** Morris defined *sogt* as 'reconciled,' associating it with OE. *sæht*, but it is the past participle of *sēken* in the less common sense of 'attacked, driven.' **8. als.** A connective of *knew* (l. 7) and *lēt* (l. 8), *als* must mean 'yet' or 'though,' not 'also' as Morris. Cf. Egge, 'Mod. Lang. Notes,' I, 66, and Koch, 'Anglia,' XXV, 321. **11. cume gē.** Note the form without ending before *gē*, as in OE. Cf. l. 28, and with *wē* in similar position, l. 14. Morris and Mätzner change *cume* to *came*, but this is surely unnecessary, since the action is regarded as present in time. **16. dōð us,** MS. **doðes.** Mätzner suggested *doð us*, though retaining the MS. reading. The change is simple and satisfactory. Koch ('Anglia,' XXV) interprets *doðes* as equivalent to *doð'e's* = *dōð hē* (Jacob) *us*, but Mätzner's suggestion seems better. **19. Hū sulde.** This addition to the Scripture is in Petrus Comestor: *Impossibile est enim viro idiotae tales filios esse, cum etiam regibus talis filiorum copia valde est difficilis.* The first part of the line is as emended by Morris. Possibly MS. *oninan* = *ōn man*, 'one man.' **32. Ðat hē wǭre.** Kölbing shows ('Eng. St.,' III, 305) that *hē* refers to Joseph, not to Benjamin as Morris had assumed. He compares Petrus Comestor: *Timebat enim ne forte et in illum aliquid deliquissent.* This is added to explain Joseph's imprisonment of his brothers.

Page 26, l. 4. **ðē tǭn.** The *t*, originally a part of *ðet* (*ðat*), seems to have become an integral part of the following word, and is so printed. Cf. *tōþere* (30, 20), which still remains in dialectal English. **6. Tō wedde.** 'For security,' 'as a pledge.' The frequent occurrence of OE. *wed* n. in this dative phrase no doubt accounts for the retention of the OE. dative form. Cf. *tō wīve* (l. 19). **12. Wrigtful wē.** 'Deservedly we are,' translating *Merito haec patimur, quia peccavimus in fratrem nostrum.* **19. deden . . . beden.**

The rime assumes that both *dēden* and *deden* must have occurred in speech. This seems better than assuming *dēden . . . beden*. **24. ðǭr biforen.** Cf. Egge ('Mod. Lang. Notes,' I, 66): 'I take in a local sense, "there before, at the top," referring to the mouth of the sacks.' **27. ǭverðogt.** Morris suggests 'over-anxious,' but the word corresponds to *obstupefacti turbatique* of the Vulgate: *Et obstupefacti turbatique mutuo* (Gen. xlii. 28). 'Amazed, stupefied' are better. **31. Quan men,** MS. **and quan men.** *And* is omitted, as it seems to have been copied from the preceding line by mistake.

Page 27, l. **5. Of Jōsēp.** 'Of Joseph I do not know the end,' paraphrasing the Vulgate, *Ioseph non est super*. **7–8. dōn . . . on.** Cf. rimes of long and short *i* in note to 22, 3–4. Perhaps the adverb *on* had long *ǭ*; see rimes at 28, 5–6; 29, 27–28. **8. sęgeð.** Note the plural subject with singular verb; probably *dęð* predominated in the mind of the writer. **16. But gē.** Note the abrupt transition from indirect to direct discourse; also the use of the plural pronoun in addressing one person, the earliest instance in English. **17. Quan it is nēd.** Kölbing points out ('Eng. St.,' III, 306) that *quan* = 'if' here, the clause translating *Si sic necesse est*. **18. And ic ne.** Mätzner adds *ic* here as rightly. **25. ęðemōded.** Mätzner's emendation of MS. *eðimodes*, making the word agree with its form in l. 1584 of the poem. **28. bēn intō Ēgypte ligt.** Mätzner's reading of the line. He suggests that *cumen* of the MS. was originally a gloss of *bēn ligt*. **30. lag,** MS. **was,** making no rime. Morris's *ðag* = OE. *ðā* is impossible, and Mätzner suggests assonance. Koch's late suggestion of *stāg* = OE. *stāg* is equally impossible, as OE. *ā* has regularly become *ǭ* in 'Genesis.'

Page 28, l. **2. Her nǭn.** 'None of them.' The objective use of the genitive plural; cf. *ūre nǭn* (l. 6) and *gūre ǭn* (29, 30). **7. ðē stiward.** Mätzner's suggestion for *stiward* of the MS. Otherwise the pause after *stille* must do duty for the omitted unstressed syllable. **8. For ic.** This part of the steward's answer does not very well agree with the Latin of the Vulgate, though the probable meaning is 'I have my instructions.' **11–12. cōme . . . nǭme.** Such seems to be the rime. The first word is Orm's *cōme*, 'coming,' and the second OE. *nām* f. There may have been, however, an OM. *nōm* showing the root of the pret. pl. of *niman*. **24. Wǭt ic.** 'I think none there did not tremble.' The line corresponds to the Vulgate, *Et incurvati adoraverunt eum* (Gen. xliii. 28). *Incurvati* was apparently understood in its metaphorical sense 'disturbed in mind, trembling,' rather than the literal 'bowing.' **32. wurð tęres wēt.** 'Was wet with tears.' The expression occurs with and without a preposition; cf. 30, 22, and 31, 4.

Page 29, l. **4. Sette hem,** MS. **and sette hem.** The reading of the text seems simpler than retaining *and* at the beginning of this line and omitting it before *him* in the preceding. **12. And hem.** There is nothing in the Scripture or Petrus Comestor for these lines, as Kölbing pointed out. In 'Cursor Mundi' the same 'sarmun' occurs, and the brothers are especially warned against theft. **18. Ǭr ęr.** 'Before.' The doubling of the particle is not uncommon. **29. For is it nogt.** All reference to divination (Gen. xliv. 5, 15) is omitted by the English writer here and at 30, 10. Petrus Comestor adds, after paraphrasing Joseph's words about divining, *Forte ioco dictum est, nec est imputandum*. **30. Ðat,** MS. **ða.** Morris's emendation, which seems necessary. **32. Up quām.** A very early use of *quām*, 'whom,'

as a relative pronoun. Such use appears first in the oblique cases, but is not established until Late Middle and Early Modern English.

Page 30, l. 1. **Hē bē slagen.** Mätzner's emendation from MS. reading *he slagen.* **agēn.** 'Back,' not 'again,' as Morris. 'There is no reference to an earlier state of slavery' (Egge).

Page 31, l. 1. **lewse.** This seems to be the only form of the MS., occurring also at l. 1576. No doubt the form should be *lēswe*, OM. *lēs* (acc. *lēswe*), WS *lās*, connected with OE. *lesan-læs*, 'to glean.' Gersen. The Lat. form is *Gessen*, which a copyist seems to have transformed by mistaking *s* for *r*. With this rime with long *e* cf. 31, 12–13; 32, 12–13, where the vowel is clearly short. **9. For luve of Iōsēp migte hē tīmen.** The *him* of l. 8 and the *hē* here seem to refer to the father (30, 31), and the line means 'For (on account of) love of Joseph might he prosper.' The rime of *tīmen* here and in other places may indicate shortening. **19. Alsǭ fēle.** Kölbing suggested connecting with following rather than preceding line. It translates Petrus Comestor, *Et totidem* (referring to Benjamin's gift) *misit patri.*

Page 32, l. 3. **Wēl mē.** No verb is necessary in the exclamation. Cf. *wumme* (195, 33). **6. And sēn.** Mätzner adds *him*, but it is unnecessary and adds an extra syllable to the line. **8. manīe a man.** Note the early introduction of *a* to make the singular number clear, indefinites tending to lose their singular uses and forms. **15. Fader dēre,** MS. **derer.** Mätzner's change. **20. ðǭ,** MS. **ðog.** The copyist was influenced by the preceding *ðōg* just above; cf. Gen. xlvii. 9. **23. Sǭ ðinkeð.** Kölbing ('Eng. St.,' III, 307) pointed out that the speech of Jacob ends with the preceding line, these words paraphrasing a comment of Petrus Comestor: *Peregrinationis dixit, quia sancti vitam hanc pro incolatu habent.* **29. Him and hise,** MS. **he.** The change is Mätzner's.

Page 33, l. 2. **fowrtēne gēr,** MS. **xiiij.** The writer is in error, as the Vulgate reads *decem et septem annos.* That the error is not a copyist's is clear from the fact that ME. *seventēne* would be too long to replace *fowrtēne.* **6. off hē,** MS. **offe.** Mätzner added *hē* after *offe*, and Schumann ('Anglia,' VI, Anz. 1) proposed the reading adopted. **7. Ðat quan it wurðe.** Literally, 'that when it should be done with him,' an idiom easily understood to-day though not a literary form. **16. hem.** Kölbing ('Eng. St.,' III, 307) would change *hem* to *him*, referring to *Crīst* (l. 14) only. He quotes the comment of Petrus Comestor: *Cura fuit sanctis sepeliri in terra, qua sciebant Christum resurrecturum, ut cum eo resurgerent.* But surely the wish of Jacob twice repeated (Gen. xlvii. 30; xlix. 29) was to be buried with his fathers, and it is more likely that *hem* is correct. It would include Christ with *hise eldere* (l. 13). **27. smāken.** Mätzner alters to *māken*, but the sense of *smāken* is clear; cf. 14, 2. **28. biwāken.** The whole passage upon the burial customs occurs in Petrus, though with several slight differences. **29–30. daiges ... laiges.** For forms see Gram. Introd.

Page 34, l. 5. **delven it wið ȳre.** 'Bury it with iron (instrument).' The last two words add nothing of value, but no doubt the whole was a common expression in rime. **12–13. mide ... wechdēde.** Perhaps for *mide* we should

read *mede* (*mēde*?) with the vowel of ON. *með*, Dan. *med*. Cf. 34, 30–31. 21. wēl him. 'Well may it be with him (*tō him*) that has done well.' 30–31. dede ... mide. Another rime which shows the short form of ME. *dede*, if not indeed that which Orm regularly uses, *dide*.

III. 'FLORIS AND BLAUNCHEFLUR'

The story of 'Floris and Blauncheflur,' of which this selection forms a part, is found in four MSS.: Gg. 4, 27, 2 of Cambridge University Library; Cotton Vetellius D. III of the British Museum; Auchinleck MS. of the Advocates' Library, Edinburgh; Trentham MS. of the Duke of Sutherland's Library. Of these the first and best, so far as complete, was edited by Lumby, EETS. 14 (1866), and re-edited by Dr. G. McKnight in 1901. Other editions of the poem are those by Hartshorne ('Ancient Metrical Tales' (1829)), Laing (Abbotsford Club Publ. (1857)). A critical edition, with valuable introduction from a comparative standpoint, was made by Emil Hausknecht for the 'Sammlung englischer Denkmäler' of Zupitza in 1885. The Cambridge MS. belongs to the middle, possibly the second quarter, of the thirteenth century. The language is that of the Southeast Midland, with a considerable number of strictly Southern forms, as shown by the footnotes. This direct Southern influence points to a district farther south than that of the 'Bestiary' or 'Genesis and Exodus.' Owing to the mixture of Southern with Midland forms this selection does not represent the East Midland in its purity, but is added largely because of its greater literary interest. The metre of the poem is the rimed couplet of four, sometimes three, stresses.

'Floris and Blauncheflur' is a romantic tale, probably of Eastern origin, and brought to the West in the twelfth century, perhaps by crusaders. The English poem was freely translated and condensed from a French version, and is one of the earliest of a long series of French romances in Middle English literature. The main current of the story to the beginning of our selection (l. 433 of Camb. MS., 847 of the Hausknecht text) is as follows. Floris and Blauncheflur had become passionately attached as children. The father of Floris, the king of Spain, disapproves of the union, and suggests killing the maiden. In the original French version Blauncheflur is the daughter of a Christian captive, and the father of Floris a Saracen. The queen, mother of Floris, proposes sending him away, and this was done. Blauncheflur is then sold to the 'Admiral' of Babylon for a marvellous cup, a tomb is erected, and Floris, on his return, is told that she is dead. He is so heart-broken that he attempts his life, and the king and queen reveal to him the truth. Floris proposes to seek Blauncheflur, and the king gives him the marvellous cup, the queen a magic ring. He has various adventures in his search, and finally reaches Babylon. Here, by giving him the marvellous cup and promising great wealth, Floris at last persuades the porter of the tower in which Blauncheflur is confined to assist him. Then follows our selection.

The Southern forms in the original text have been largely replaced by those of the Midland. This applies especially to those with *u*, OE. *y*, and inflexional forms, while some with *ēo* (*hēo*, 36, 16), which would probably not be found as late as this text but for Southern influence, have been retained. Besides these peculiarities, among vowels may be mentioned the rare use of

o for *u* (*ȝongling*, 44, 3), a usage to become much more common in the following selections. Among consonants, the regular use of *ȝ* for *y* initially and for a palatal and guttural spirant medially separates these sounds from the stop *g* (as in *go*), though the latter character is still used for *g* = *dȝ* (as in *jugement*, 42, 2). For the latter sound initially, OF. *j* also appears. OF. *c* = *s* is found as in *certes* (38, 11), *Clārīce* (38, 3), and *sch* for *sh*. Contrary to the practice of the last two texts *wh* represents OE. *hw*, as in Orm. Among inflexional forms, a few with the prefix *i* = OE. *ge* have been left, as perhaps properly belonging to SEMl., at least longer than to Ml. and Nth. English. A special treatment of the language occurs in Hausknecht's edition, with which cf. 'Eng. St.,' IX, 92, 'Anglia,' Anz., VIII, 150. For notes see 'Anglia,' I, 473; 'Eng. St.,' III, 99, 272, IX, 389.

Page 35, l. **15. cūpen.** Hausknecht takes this as OF. *cupe*, not Sth. *cūpe* = OE. *cȳpe*, because of the form in the Auchinleck MS., *coupe* (*couppe*) = *cūpe*. The meaning is the same in either case. **19. gegges.** The Trenth. MS. has *maydens*. **20. for hēvīe.** A substantive use of the adjective, as in the colloquial 'for cold,' 'for hot.' **28. lēte hire stūnde.** *Hire* refers to the basket (*cūpe*), the SEMl. apparently agreeing with Sth. in preserving grammatical gender later than in Ml. and Nth.; cf. *hē* referring to *ring* (43, 16). The adverb *stūnde*, MS. *stonde*, completes the rime and sense: 'and go forth and leave it (*hire*) at once.' It is easy to see how *stūnde* was misunderstood for *stǭnde*.

Page 36, ll. **1–2. wōlde . . . bihǭlde.** Long *ō* in *wōlde* is proved by occasional rimes like these, though the short form is equally clear from Orm's *wollde*; cf. 23–24. Otherwise we must assume qualitative rimes only, in such cases. **7–8. rēde . . . hadde.** These two lines, with imperfect rime, are found only in Camb. MS. and are rejected by Hausknecht from his critical text. Perhaps we are to read *hēde* (OE. *hēde* < *hæfde*). **9. agē**, MS. **agen.** The MS. rime *agen . . . him* is of course impossible. *Agē*, from Auch. MS., and a slight change in the following line, makes all right. Trenth. MS. reads:

'When he saw ȝ it was not shee,
Into þe lepe aȝen stert he.'

15–16. itǭld . . . isǭld. The retention of the OE. prefix *ge-* as *i-*, occasionally found in Ml., is characteristic of Sth. English; cf. *ifere* (37, 22). **16. hēo.** Note the Sth. feminine of the pronoun, as well as the OE. diphthong *ēo*. **17. lēpe.** An infinitive dependent upon *cōmen*, as Zupitza pointed out in 'Anglia,' I, 473: 'Now maidens came running (leaping) in to her.' **19. what hire wēre.** 'What might be to her,' that is, 'what was the matter with her?' a common idiom. **21. Wēl hēo was biþoȝt.** 'She was very (well) considerate and (considered) where to find them answer'; or could *whare* be for *ware*, 'wary'? Trenth. MS. has:

'Clarys byþouȝt hur anoon ryȝt
Þat hit was Blaunchefluf þe white,
And gave þe maydens answere anoon.'

23. ich, MS. **ihc always.** This can hardly indicate the true Sth. form *ich* = *itʃ* (*ch* in *church*), but rather a SEMl. *ic* in which *c* (*k*) is shading out into a spirant like German *ch* in *ich*.

Page 37, l. **2. Wilt ū.** Usually printed as one word, but in this book the identity of each word has been consistently preserved by separating even the

reduced forms, as here. **8. libbe.** Another form at least more common in the South. In Ml. and Nth. *bb* of the OE. infin. and ind. pres. 1st sing. has been replaced by *v*, by analogy of the 3rd sing. and the other forms of the verb. Cf. MnE. *have*, *live*, and for a similar loss of *gg*, *lie* ('recline'), *buy*, *say*, *lay*.

Page 38, l. 3. **þō.** This addition to the MS. line seems to be required by the metre, though not added by Hausknecht. **6. o = of.** Theoretically we must assume a long *ō* as in *ō* from *on*, but partly to differentiate the two words I have used short *o* in this word, even in these early instances. **22. Ōwer beire.** An objective genitive, 'of you two.' **25–26. adūn . . . fram.** An impossible rime. All other MSS. read *aroum* (*aroom*, *rown*), i. e. *arūm*, OE. *on*(*an*), *gerūm*, 'apart,' and no doubt this is the correct form, though giving assonance only with *adūn*.

Page 39, ll. 13–14. **wite . . . underȝete.** Correct rime form here requires *undergite*, not uncommon in Sth., or possible *wete* < *wite*. 'But they might not long guard them, that they should not be perceived,' or as we should say, 'They could not long prevent them from being perceived.'

Page 40, l. 4. **lōke.** So MSS., but syntax requires *lōked*, in which final *d* is rarely dropped. **15–16. arīst . . . atwīst.** Mätzner explains the first as a contracted form of *arīseð* (Siev. 'Angelsächsische Gram.,' § 359, 8), and the second as an analogical preterit like OE. *wiste*. We should expect preterits in both cases from the form of the narrative, but no such preterit as *arīst* seems to be known. **23. pilēr.** The pillar in which the water-pipes were concealed. **28. Hē axede.** The pronoun refers to *Admiral*, which the other MSS. repeat here as in 40, 2.

Page 41, ll. 9–10. **mūþ . . . cūþ.** Perhaps we should read *mūþe* ds., *cūþe* pl. of the adjective. **11. teȝ.** The short form belongs here, or the rime is qualitative only, as in ll. 21–22. **19–20. caste . . . breste.** With *keste* for *caste*, a not uncommon ME. form, the rime would be correct; cf. 42, 3–4. *Breste* is an OE. neuter which has not yet acquired the *es* plural. **30. ligge.** A characteristic Sth. form, the prevailing Ml. being *līe*(*n*). Cf. note on 37, 8.

Page 42, l. 30. **hōndhabbing.** A legal expression handed down from OE. times, the original word being a participle *handhæbbende*; cf. 'Anc. Laws and Inst. of England,' I, Index, *hæbbendæ handa*.

Page 44, l. 32. **ȝēt.** This word has not been satisfactorily explained, but the best assumption seems to be that it is for *ȝēd*(*e*), with *wiþdraȝe* as an infinitive depending upon it: 'And Blauncheflur went (endeavoured) to withdraw him.'

Page 45, l. 2. **þat ōþer.** The line is too short metrically, and probably we should read *þat eiþer ōþer deide biforе*; cf. 37, 29 and 45, 5.

Page 46, l. 1. **of Spaygne.** It looks as if this were originally a gloss which had been thrust into the line, perhaps because the beginning of the story is incomplete in all the English texts, and the connexion of Floris's father with the Saracens was lost sight of.

IV. 'DEBATE OF THE BODY AND THE SOUL'

The 'Debate of the Body and the Soul' is found in six MSS.: Auch. MS., Edinburgh; Laud MS. 108, and Vernon MS., both of the Bodleian; Digby MS. 102, Royal MS. 18 AX, and Additional MS. 22, 283 of the British Museum. Our text is from Laud MS. 108, which was edited by Th. Wright in 'Latin Poems commonly attributed to Walter Mapes,' by Mätzner ('Sprachproben,' I, 92), and by Linow in 'Erlanger Beiträge zur englischen Philologie,' in which the Laud MS. is accompanied by three others and an important introduction, together with appendices. The 'Debate' was written in the second half of the thirteenth century, and the Laud MS. represents East Midland in the main, of northern rather than southern variety, but with a considerable number of Sth. forms. The interest of the poem rather than the purity of the text has led to its inclusion here.

The 'Debate' is based on a motive common in Western Europe in the middle ages. It finds expression in Old and Early Middle English in an 'Address of the Soul to the Body.' The 'Debate' or 'Dialogue' between the two belongs to Middle English only; cf. Bruce, 'A Contribution to the Study of the Body and the Soul Poems in English' ('Mod. Lang. Notes,' V, 197). To the 'Debate' two poems bear close relation, the Latin 'Visio Fulberti (Philberti)' printed by Wright in the above-mentioned work, as by Méril in 'Poésies populaires latines antérieures au douzième siècle,' and an OF. poem 'Un Samedi par Nuit,' Anhang I, to Linow above. A modern version of the 'Debate' was made by Sir Theodore Martin in the 'Monk's Dream,' and one was printed by Prof. F. J. Child of Harvard for private circulation. The metre of the poem is an eight-line stanza made up of lines with four stresses and iambic movement, riming *ababaßab*, with the *ß* rimes more exact than the others. The poem has been treated in relation to sources, language, metre, by Kleinert, 'Über den Streit zwischen Leib u. Seele' (1880), Heesch, 'Über Sprache u. Versbau' (1884), Linow as above, Kunze, 'Þe Disputisoun bitwen Þe Bodi and Þe Soule' (1892), Bruce as above.

Special peculiarities of language which appear for the first time are the new diphthongs *ei* (*ey*) and *au* (*ou*) before palatal and guttural *ȝ* (*g*) respectively, as *eiȝene* (51, 25), *sauȝ* (47, 27). The former occur rarely in 'Genesis and Exodus,' as already noted. Here also *o* = *u* commonly, and *ōū* = *ū* almost invariably. Among consonants *ȝw* represents OE. *hw*, as in *ȝwīlene* (48, 12), and *ȝth* of the MS. = *ȝt* (*ȝht*). Owing to lateness of the MS. copy, rather than the poem, final *ȝ* is often omitted, or added to words to which it does not belong. These peculiarities, as scribal, have been placed in the footnotes. Strictly Sth. forms have also been placed in the footnotes, and attention will be called to some of Nth. origin. The much more frequent loss of final *n* in inflexional forms should be noted in this and the following selection.

Page 47, l. 26. **drōūpening.** The MS. reading *droukening* can hardly be correct, as it must be connected with ON. *droukna*, 'to drown,' an inappropriate meaning. Auch. and Vern. MSS. have *droupening* (*droupnynge*), while Digby MS. has *derkyng*, as if the scribe had not understood the form before him.

Page 48, l. 2. **tō pay.** 'For pleasure, satisfaction.' The MS. *payȝ* seems to indicate that, at the time of the copy, *ȝ* had already shaded out into *i*,

since it is here added to an OF. word to which it could not have belonged. Cf. similar forms in the footnotes. **5. gǭst it.** Such repetition of the subject in pronoun form, originally used for emphasis, came to be employed by the metrist to complete his line. Cf. Kellner, 'Hist. Eng. Syntax,' § 284, 286. **6. It,** MS. **yt.** Initial *y* for *i* has usually been replaced by the latter in these early selections, to reduce the number of variants, especially in initials. **18. lēde.** The changes of meaning and use in this word are especially interesting. First, 'Latin (tongue),' a borrowed adjective; next, 'discourse, speech, in Latin'; then, 'any tongue, language, speech'; here, 'speech in sense of voice,' perhaps 'boasting speech'; the word may also mean 'song of a bird.' **21. ȝwēre bēn.** In Laud MS. this and the next stanza change places, all other MSS. giving the order of the text. The Auch. MS. also has another stanza between the two **26. fedde,** MS. **ledde.** The other MSS. have *fed* (*feddes*). *Feddes* would agree in use with *leddes*, but would not rime with *fledde* (l. 28).

Page 49, l. 10. gǭn tō greiþe. So Auch. MS., which seems better metrically than *gǭn greiþe*, though the latter is the older syntax. Two forms have developed, that of Auch. MS., and *gǭ and greiþe* of Digby, a well-known form in colloquial and dialectal English. **16. mē bigēte.** At this point the Laud MS. lacks seventeen stanzas as compared with the Auch. text. Eleven of these continue the speech of the 'Soul' (see Linow, or a modernization), after which the 'Body' (Auch. MS.),

> 'Lift up his heved opon þe swere;
> As it were sike it gan to gron,
> And seyd, "Wheþer þou art mi fere,
> Mi gost þat is fro me gon?"'

The 'Body' admits that it must decay, and then turns upon the 'Soul' with a countercharge:

> 'Soule, ȝif þou it me wilt atwite,
> Þat we schul be boþe yspilt,
> ȝif þou hast schame and gret despite,
> Al it is þine owhen gilt.
> Y þe say at wordes lite,
> Wiþ riȝt resoun ȝif þat ow wilt,
> Þou berst þe blame and y go quite;
> Þou scholdest fram schame ous have yschilt.'

Then follow the stanzas at 49, 17. **14. swelle.** Note the new vowel which has developed in the MS. *suwelle*, and cf. *koweynte* (48, 15). **17. þē schōp,** MS. **schop þe.** The text is the reading of all the MSS. except Laud. If the poet intended to mark the contrast between *þē* (the 'Soul') and the 'Body,' the Laud MS. is correct. **22. gōd,** MS. **guod.** The MS. form is of Nth. origin, unless perhaps Kentish can be assumed to have influenced the Laud MS. **23. dumb and daft.** An example of the alliterative phrases, once so common, and still often preserved in poetry. Cf. *lime and lyþ* (50, 15), *tēme and tęche* (50, 27), *linde and lēf* (51, 22), *fēld and fenne* (51, 23). Under the influence of these phrases of OE. origin new ones have often been made, as *pile and piþ* (50, 13), where the first is OF., and *preye and pręche* (51, 1), where both words are of OF. origin. In *rest and rō* (51, 19) the second is ON., and in *þriven and þrō* (51, 17) both are of Norse origin. **24. mē þērtil.** *Mē*, omitted in Laud, occurs in all other MSS. and is necessary to the metre.

Page 50, l. 3. **gast.** Both *gōst* and *gast* occur in the poem, the latter riming with short *a*, as at 58, 13, so that it probably represents not Nth. *gāst*, but a secondary form from OE. *gāst*. Cf. Morsbach, 'Mitteleng. Gram.,' § 62, anm. 22. **dīst.** A somewhat unusual shortening of *dīdest*. Cf. the form in rime at 54, 4. 28. **ȝwat was yvel.** Linow has the impossible reading *ȝwat was wel* from a misunderstanding of Sth. *üvel* of the MS. *ȝwat* at the beginning of the line was suggested by Mätzner; cf. 58, 22.

Page 51, l. 9. **ēdest.** The shorter and earlier *ēdes* would make the rime perfect. Cf. *leddes* (48, 24). 13. **Hō may.** This stanza, found at this place in Auch. and Digby MSS., occurs in Laud after 56, 16. As to sense it fits either place. 18. **Miȝtis did**, MS. **mittis ded.** Mätzner proposed the reading of the text. Pluralizing an abstract noun for emphasis was common in OE., and remained in the ME. period sometimes; cf. Kellner, 'Hist. Eng. Syntax,' § 21. 19. **rō.** Though from ON. *rō(r)*, and so having close *ō*, it is possible the *ō* has become open under the influence of preceding *r*. 20. **mē in pīne.** Mätzner added *mē*, which occurs in all the other MSS.

Page 52, l. 3. **niȝt, niȝth.** This is the beginning in our texts of the spelling *ȝth* = *ȝt* (*ȝht*). Cf. *hc* = *ch* in 'Floris and Blauncheflur.' 8. **Come þou.** 'If thou shouldst come.' Subjunctive in transposed clause, as in MnE. 'had I.' 14. **Sat or stōd.** That is, '(Where) sat (I) or stod,' in ellipsis with the preceding line. 21. **þat tōu ne wēre.** 'That thou were not (present) and advised course (counsel),' that is, 'Unless thou wert present,' &c., 'I never did,' &c. 23. **mōwen.** The shortened form *mōwn* is necessary for the rime; cf. 78, 31. 29. **chaunged**, MS. **chaunched.** Mätzner suggested the change, which is obviously necessary.

Page 53, l. 7. **Nevere of catēl.** 'I should have' from the first line is to be supplied. Then *nome* (= *nume*) is a past participle depending upon 'should have.' 10. **Ne wēre þē wit.** 'Were it not for the wit that was wholly thine.' 18. **Sō dōth.** 'As doth that (one) who dares no other (thing).' 26. **gete**, MS. **getin.** The change seems necessary for metre, and is proper owing to the many infinitives which have lost final *n*. 30. **bētin and birst.** Mätzner connects the last word with *bersten*, 'burst, broken,' but the pp. in Ml. would be *bersted* regularly, while both form and meaning point to OE. *gebrȳsed* with syncopation of *e* and shortening of the vowel after metathesis.

Page 54, l. 4. **dīst.** So MS., although breaking the rime sequence. Perhaps *dirst*, 'durst,' connected with OE. *dȳ(r)ste*, found once in the Rushworth 'Matthew,' a Mercian text. 13. **gloterīe.** Altered by Linow and Mätzner to *glotonīe*, but a substantive of this form, with the same meaning as *glotonīe*, occurs in OF. works. 22. **wē.** Mätzner added to the text as necessary. So also *dide* in l. 27, though Mätzner uses the Sth. form *düde*. 24. **þōu sauȝ.** It has been customary to add *þōȝ*, 'though,' at the beginning of this line, and Vern. and Digby MSS. so read. Auch. MS. reads:

'Litel hede tok þou of þat
When þou seiȝe ded men in grave.'

This seems to indicate that the third line of the stanza refers to the fourth and not to the second, and I therefore keep the MS. reading. The 'Body' took no heed of the many dead seen in the grave, and thought no such fate could come to it.

Page 55, l. 6. **Abȳ . . . abȳȝe.** Note the double forms of the same verb, one without the spirant *ȝ*. 11. **Ǭn untiȝht.** Mätzner says, 'only orthographically different from *an untiht* of Vern. MS.,' but *ǭn* implies greater emphasis on the word than would be implied by the article. 25. **lein ǭn hǭnd.** Mätzner interpreted *lein* as 'conceal, hide,' and Linow regards *ǭn* as an adverb modifying *lein*, taking *hǭnd* as a direct object. I assume that MS. *on* is 'one,' and that the expression means 'lay a (one) hand,' i.e. 'initiate one hand that hath turned to shame and sin.'

Page 56, l. 7. **ȝwanne þē blīnde.** Cf. Matt. xv. 14. 12. **las.** Mätzner assumes this is pret. of *lēsen* = *lēs* (OE. *lēosan* = *lēas*), 'lose,' when it must be accounted a shortened form, certainly not common. I propose the pret. of *lēsen* = *las* (OE. *lesan* = *læs*), 'gather, collect'; 'for all my love on thee I collected or centered.' The usual, but special sense of 'glean,' is not the only one, as shown by 'Elene' 1238, where *ic læs* is used intransitively. 23. **þey.** Note the double forms of the pronoun *þey*, *hē* (l. 8) in this poem. 29. **þus sōne.** The Auch. MS. reads *so ȝong*, 'so young,' and Vern. and Digby *þus ȝong*. There seems no sufficient reason for departing from the Laud reading.

Page 57, l. 4. **mes.** Note the plural without ending in an OF. word ending in *s*. With its meaning of 'messes, courses at table,' cf. OE. *sand* (*sǭnd*), ME. *sande* (*sǭnde*) from *send*. 12. **Nim of mē.** Laud MS. reads *on*, all others *of*. *þī soule* is appositive, of course. 18. **bochēre.** Both Laud and Vern. MSS. read *boþelere*, Auch. *bucher*, Digby, *bell-wether*. The Auch. reading is to be preferred. 21. **trotevāle.** The origin of the word is obscure. Perhaps from OF. **trotevale*, with some such meaning as 'a trifling thing.' Halliwell quotes:

'Yn games and festys and at the ale
Love men to lestene trotevale.'

Page 58, l. 20. **in a lāke.** 'In a lake.' The MSS. vary greatly, as if the passage were misunderstood. Auch. reads:

'And seþþen into a pit ycast
Unto a nadder and a snake.'

Page 59, l. 1. **þē wayn.** Mätzner thinks the reference is to the wagon used for carrying the dead body, and cites Turner's 'Hist. of the Anglo-Saxons,' III, 84. 2. **leid þē spǭche.** 'Laid (aside) the speech.' Auch. MS. reads:

'And þe tong haþ lorn his speche,'

giving the sense clearly. The other MSS. agree with Laud. 9. **þǭ.** Mätzner would change to *þōū*, 'thou.' The Auch. MS. gives the sense:

'When þou feldest þe sike and sere.'

Our line may be read, 'When that (the life) was so sick and sere.' 19. **And miȝte.** 'And might five (times) such as there are in the world of all things,' that is 'five times as many things as there are in the world.'

Page 60, l. 4. **A þōūsand develene.** The plural *develene* = Ml. *devels* is another indication of Sth. influence in this poem. 10. **With brǭde bulches.** In the middle ages devils were often pictured as having the most hideous deformities. 20. **shenke abōūten.** Mätzner proposed the emendation.

Page 61, l. 12. **a cō̊te.** Mätzner alters to *colte*, 'colt,' on the ground that the devil was often represented as a horse. I have preserved the MS. reading, assuming that if the word is for *colte* the *l* has already been lost, thus preserving the rime. 18. **ilke a grō̊te.** Note the addition of *a* after *ilke*, to make the singular clear. Cf. note on 32, 8. 30. **tō him wēre let**, MS. led. Surely *led* is impossible in both rime and meaning; *let*, 'permitted,' fits both exactly.

Page 62, l. 6. **Bauston** (MS. **Hauston**) **and Bewis.** All but Laud MS. agree in using alliterative names: Auch. *Bausan and Beweviis*, Vern. *Bauson and Beufys*, Digby *Bauȝan and Beaufitz*. Can the original names in Laud be connected with those in the OF. romance 'Beuves d'Hanstone'? 30. **tō wrō̊þer hē̊le.** *Wrō̊þer* seems to be an old fem. dat. sing. which has become fossilized in this stereotyped expression.

Page 64, l. 5. **þō alle sinful.** The Laud line is too long metrically, and Vern., Digby agree in *alle synful*.

V. 'ADAM AND EVE'

The metrical 'Adam and Eve,' or 'Canticum de Creatione' as it has been called, occurs in Auchinleck MS. at Edinburgh, and Trinity College MS. 57 at Oxford. The former, from which our selection is taken, was edited by Laing for the Abbotsford Club (1857), and by Horstmann, 'Altenglische Legenden' (1878), p. 139. Prose versions of the story are found in Vern. MS. (Horstmann's 'Legenden,' 1878, p. 120), Egerton MS. 876, Harl. MS. 4775, Bodl. MS. 596, both the latter having been edited by Horstmann for the 'Archiv für neuere Sprachen,' LXXIV, 345. The language of the poem is that of the SEMl. dialect, as shown by Bachmann in his excellent monograph 'Die beiden Versionen des ME. Canticum de Creatione,' and the time of writing about 1300.

The poem contains an apocryphal story of the fall of man, the repentance and penance of Adam and Eve, and their death. It is based on the 'Vitae Adae et Evae' (see edition of W. Meyer, 1878). Just before the beginning of the selection Adam, in his last illness, has commanded Eve to go with Seth to Paradise, where they are to receive a message from God. They are met in the way by the devil, who bites Seth in the face before the latter commands him to be gone. Then they proceed on their journey as in the passage chosen. To the latter version, represented by the Trinity MS., was added the story of the cross tree, said to have grown from the seeds brought by Seth from Paradise and placed under Adam's tongue on his deathbed. Both stories also appear in 'Cursor Mundi,' l. 1237 f. The metre is the rimed couplet of four stresses, with occasional lines of three stresses and other irregularities.

The language shows fewer peculiarities than any selection so far. The MS. omits final *e* in a number of forms to which it must be restored on metrical grounds, probably indicating that the copyist's speech had lost this sound, though perhaps owing only to scribal carelessness. On the other hand, the metre proves that final *e* was beginning to disappear in many classes of words, as pronouns and other unstressed words. Bachmann also thinks that final *e* at the end of the line was wholly lost, but his position seems not to be demonstrated by the examples cited. See his monograph for a fuller treatment of language.

Page 64, l. 12. ne, MS. no. The MS. form can hardly be regarded as the emphatic negative *nō*, OE. *nā*, and must be an orthographic variant of unstressed *ne*; cf. *oȝain* of MS. at 65, 23. **13. Schē ne durst nouȝt.** Earlier in the poem Adam had told Eve to take Seth:

'For he haþ nouȝt trespast so miche
As have we, sikerliche,
Þerfore he may þe balder be
To speke wiþ Jhesu Crist þan we.'

20. an ānġel briȝt. According to the Trinity version this is *Miȝhel*, 'Michael.' **21. manēre**, MS. maner. The MS. shows lack of final *e* in a number of places in which it must have been originally written or pronounced; cf. *term* (l. 25 and 65, 1), *mett* (66, 5), &c. **26. Of fīve þōusande.** That is, as is not very clearly told, until Christ's death and the 'harrowing of hell' during his three days in the grave. Cf. the various versions of the 'harrowing of hell' story in Old and Middle English, and 67, 23.

Page 65, l. 12. hȳȝe, MS. heyȝe. The change is fully justified by the rimes *crīe . . . dȳe* (67, 3–4), *dȳen . . . ȳȝen* (68, 29–30), *dȳe . . . progenīe* (69, 9–10). Such rimes as *heyȝe . . . seiȝe* (67, 17–18), *heyȝe . . . steiȝe* (68, 7–8) probably represent older forms still preserved by the scribe. **23. aȝain**, MS. oȝain. The MS. form may mean *oȝain*, but probably *o* is merely the weak vowel in unstressed syllable, and it is altered to reduce the number of variants, especially of initials.

Page 66, l. 9. Ō. This is the strong form of the OE. interjection *ā*, and accounts for MnE. *O* (oh). The weak form *A*, from which MnE. *ah* comes, occurs at 25, 23 and commonly. **11. ōus.** The regular spelling with *ou* indicates the preservation of long *ū* in this dialect, beside the short form, for which we have the authority of Orm's *uss*. On the other hand, rimes like *þus . . . ōus* (ll. 27–28), *ōus . . . Jēsus* (70, 7–8 and 74, 19–20) indicate the short form, though the written form is the same and has been retained. **13–14. liven . . . ēven.** Such a rime cannot be wholly reconciled in its stressed vowels, but rime of unstressed syllables were often regarded as sufficient; cf. *childer . . . elder* (ll. 17–18). **32. alle þē liȝtnisse.** In the 'Revelation of Moses' (above) the sun and moon fell down and prayed for Adam, and were 'black-looking, because they could not shine in the presence of the Light of the Universe, and for this reason their light was hidden'; Ante-Nicene Fathers, VIII, 565, 569.

Page 67, l. 7. bōk, MS. boke. Both forms appear in the poem, though the word is usually disyllabic. Here, however, a disyllable is impossible in perfect rime. **17. sit.** The contract form for *sitteþ*, as occasionally. **18. Adam soule.** A genitive without ending in proper names, especially Biblical names, is not uncommon, no doubt through the influence of the Latin Scriptures in which it so occurs; cf. *David lond* (72, 5).

Page 68, ll. 11–12. mōld . . . wōld. Perhaps *mōlde . . . wōlde*, the final *e* in each case being organic; but cf. *mōld . . . schōld* (71, 23–24). Such rimes seem to indicate long forms of *wōld(e)*, *schōld(e)*, beside the usual short ones; cf. note on 36, 1–2. **13. ȝēte lay Abēl.** There is no reference to this in the Trinity MS. version, but it occurs in the apocryphal 'Revelation of Moses,' Ante-Nicene Fathers, VIII, 570.

Page 69, l. 23. **fader liif bē write.** Petrus Comestor, following another tradition, says that Enoch invented letters and wrote certain books from which the death of Adam is known.

Page 71, l. 22. **In stǭn.** In the Trinity version Eve is represented as having been more explicit in her directions. Seth was to make 'tables tweye':

'Tweye of erthe and tweye of ston,
. . . . . .
For long er domesday falle,
Þis worlde shal ben fordon alle
By water or by fere (fire).'

The stone pillars would thus resist water, and the earth the fire. This Hebrew tradition appears commonly. Petrus Comestor, following Josephus (ch. ii), says two such pillars of marble and tile were made by Tubalcain to preserve the knowledge of his arts; 'Hist. Schol.,' Gen. xxviii, also 'Genesis and Exodus,' 461, 'Cursor Mundi,' 1533.

Page 74, l. 13. **com.** So the MS., as if final *e* were not preserved in the infinitive. Probably, however, we should read *come* = *cume*, to rime with *nome* = *nume*, since final *e* must certainly be added within the line as shown by the metre.

VI. 'HAVELOK THE DANE'

The poetic romance from which this selection is taken is found in Laud MS. 108 of the Bodleian, Oxford. It was edited by Madden for the Roxburghe Club (1828); by Skeat for the Early English Text Society, Ex. Ser. 4 (1868), and re-edited for the Clarendon Press (1902); and by Holthausen in the Morsbach-Holthausen series of Old and Middle English texts (1901). A selection appears in Wülker ('Lesebuch,' I, 80), and Morris ('Specimens,' I, 222). The date of the poem is about 1300 (see Skeat's introduction for full discussion), and the dialect is probably that of Lincolnshire of that time, that is, NEMl. This original dialect, however, has been somewhat modified by different scribes, as so often in the case of popular poems. The metre is the rimed couplet, regularly of four stresses.

The complete poem consists of 3001 lines, and the story is as follows. An English king Athelwold had a daughter Goldborough, whom he entrusted at his death to the care of Earl Godrich of Cornwall, charging him to marry her to the fairest and strongest man he could find, and place the government of England in her hands. The Earl, resolving to seize England for his son, imprisoned Goldborough in the castle of Dover. Then our selection takes up the hero Havelok. To finish the tale, Havelok assisted Grim in his trade as a fisherman at Grimsby. When a famine came he left his foster-father, walked to Lincoln, and took service as a scullion to the Earl of Cornwall's cook. One day, at some games, Havelok showed his great strength, and Godrich determined to fulfil his oath by marrying Goldborough to the supposed menial. Havelok at first rebelled, but finally took Goldborough to wife and departed for Grimsby. At night, as Grim's wife had done before, Goldborough perceives the light from Havelok's mouth, and the royal cross on his shoulder. An angel also tells her of good fortune to come. At the same time Havelok has a dream that he possessed all Denmark and England.

They go to Denmark and, with many adventures, Havelok becomes king after Godard is defeated and hanged. He invades England, Godrich is made prisoner and burnt, and Havelok and Goldborough are crowned at London, reigning happily for sixty years. The source of the tale, though clearly Teutonic and English in characters and localities, is probably an OF. poem now lost, but the ancestor also of the OF. 'Lai d'Havelok,' as of the stories in Gaimar's 'Estorie des Angleis,' and in Manning's translation of Peter Langtoft's 'Chronicle.' For further particulars see the bibliography in Skeat's edition of 1902.

Peculiarities of orthography, it is believed, will no longer trouble the student. Some Nth. and some Sth. forms occur, as indicated in notes and footnotes. For the first time *ȝ* is used for initial *ȝ* (OE. *g*, as usually printed), while *cht*, *ht* (MS. *cth*, *th*) are employed for OE. *ht*, ME. *ȝt*. That this *th* does not mean OE. *þ* would be clear from the scribe's using it for *t* in such words as *ūth* = *ūt*, 'out.'

Page 75, l. 1. **In þat tīme.** The time of the earlier part of the story when Goldborough was placed in charge of Godrich. The line preceding reads:

'Sa(y) we nou forth in ure (hure) spelle.'

2. **lǭnd**, MS. lon. Note omission of final *d* here, in *gōld* (l. 19), and in *and* (l. 21). 6. **fayer**, MS. fayr. The word is disyllabic for metre. Morris and Skeat both add something to the line, but unnecessarily. 16–17. **wilde ... filde**, MS. wolde ... fulde. If the first MS. form is correct, *fulde* as a Ml. form must represent *fullede* (OE. *fullode*). It seems more probable that *fulde* = Sth. *fülde*, Ml. *filde*, in which case the true Ml. rime must be *wilde*. This would either be for *willede* (OE. *willode*), or better a new form on the basis of *wille*(*n*), such as occurs in 'Cursor Mundi.' The latter seems to settle all difficulties. 23. **rǭþe**, MS. rede. The MS. form makes no rime, but the ON. form of Ml. *rēde*(*n*) is *rāða*, ME. *rǭðe*, and makes perfect rime. Cf. 86, 9–10. 26. **hosled**. Besides ME. *hūsle*(*n*), *hōwsle*(*n*), a shortened form occurs with *o* = *u*. 27. **and for him gyven.** For explanation cf. the statement at the death of Athelwold (1218):

'He made his quiste swiþe wel,
And sone gaf it were ilk del.'

He not only made his bequest but gave over his property as well.

Page 76, l. 9. **Was þē trewest.** Zupitza, 'Anglia,' I, 468, proposes, quite unnecessarily, the change of *þat* to *as*. *Wēnde* here takes the accusative directly, as sometimes in OE. usage. 22. **ēlde**, MS. helde. The addition of *h* initially is common in words beginning with a vowel; cf. *hǭld* for *ǭld* (77, 20). 25–26. **ringes ... singes.** Both Nth. present indic. 3rd sing. *Men* is the weak indefinite form of *man*; cf. 84, 27.

Page 77, ll. 3–4. **wāre ... sāre.** An example of Nth. forms which have been allowed to remain. The Ml. forms appear in 17–18, as one of them exists in the MS. *were ... sore*. 6. **Jēsu Crīst.** Holthausen says a mistake for God, and he even proposes a new line, in spite of 78, 7 and frequent other references of the same sort, as at 149, 9. All these are based on John i. 3, and the usual interpretation of 'word' as Christ. Cf. the use of that passage in Tatian's 'Ḍiatessaron,' and Milton's 'Paradise Lost,' VII, 139. *Godes sone* (l. 10) does not interfere with this interpretation, since the two lines express

the ordinary prayer for the dead, and the inconsistency is only apparent. **13–14. heir . . . tōþer.** Such a rime is certainly suspicious, and Holthausen assumes an omission of two lines. On the other hand, the sense is complete, and a form *hēr* from *heir* (cf. Behrens, 'Französische Sprache in England,' p. 141, for similar forms) may be assumed, though still riming with an unstressed syllable. **13. Havelok.** The name has been traced to OE. *Anlaf* (ON. *Olaf*) through Irish *Amlaib*, Welsh *Abloc*, AN. *Avelok* (*Havelok*). This Anlaf was Olaf Sitricson, called Cuaran 'of the sandal.' **14. Swanborow . . . Helflēd.** These names seem thoroughly English. The first may be OE. *Swan*, 'swan,' or *swān*, 'herdsman,' by shortening in the compound, and OE. *burh*, also found in *Goldborough* (l. 284). Helflēd is doubtless *Elflēd*, WS. *Ælflēd*. **22. yaf a note.** Cf. the expression at 79, 5. **25–26. sikerlike . . . swike.** With the short form of the ending *-like* cf. the same rime at 84, 5–6.

Page 78, l. 3. þat God himselve. 'On which (þat . . . on) God himself ran (with) blood.' For the use of *blōde* without a preposition cf. the similar expression *tēres wēt*, 'wet with tears,' at 28, 32. **23. grette.** Note the clear indication in the rime of the shortening of OE. *grētte*. **24. Wat is yū.** Cf. the indirect form of the same question at 36, 19.

Page 79, l. 1. nis it nō̤ cōrn. 'Is there no corn?' Note use of the expletive 'it,' as in OE. syntax. **29. wepne,** MS. **wepne bere.** The latter is no doubt repeated from l. 27 above, but quite unnecessarily.

Page 80, l. 6. Of þē sēlī. Note the plural 'children' without distinctive genitive ending. **11. And þoucte.** Napier proposed to read *þouh*, 'nevertheless,' instead of *þoucte*, and Holthausen accepts. It may be easily read as it stands, except that *nouht* (l. 13) must be assumed to have intruded from the preceding line: 'And thought, he would that he [Havelok] were dead, except that he would not kill him with his [own] hand, the foul fiend.' The MS. *but on* here and at l. 962 of the poem Skeat has properly explained as OE. *būton*.

Page 81, l. 10. þrinne, MS. **þerinne.** The shorter form is required for the rime here and perhaps at 85, 7. **21. And siþen.** Holthausen assumes the loss of two lines to say that Grim put the gag in Havelok's mouth. This is not necessary, as *in . . . wōunden* with the next two lines are quite explicit enough as to what was done. If any emendation is to be made I suggest that *mūth* might be added after *siþen in*. **26. Hwan þō swike.** Most editors have assumed that *hwan* was incorrect, perhaps repeated from the line above, and have altered it to *þan* (Morris) or *as* (Holthausen and Skeat). It is possible, however, to consider this as a second subordinate clause to *Sone hē caste* (l. 31). L. 25 merely emphasizes the action begun in l. 20, before taking up the next one. The last word of the line is also an emendation of the MS. *heþede*. Morris reads *him gan bede*, omitting *havede* entirely. Holthausen and Skeat change the line to *As þē swike him bad hē yēde*, but this seems to anticipate the action in ll. 30–32. Zupitza's explanation of *heþede* as *ēþede*, based on OE. *āð*, is highly improbable if not quite impossible. The punctuation will make the passage clear.

Page 82, l. 2. Lēve. The word rimes with open *ē* words, but this does

not especially assist in its etymology. **4. Al sǭ thōu.** Holthausen, followed by Skeat, alters to

'Also thou wilt mi lif save (nou save),'

but it seems to me the slight emendation of *mī* to *mē* is sufficient. Grim commands his wife to watch Havelok as she values her own life, and then explains the rewards to follow. **11. sō harde adōun . . . crakede hise croūne.** The change, suggested by Morris, is unquestionably right, final *e* in *crōūne* not being pronounced. **16. þat him.** Prof. Browne ('Mod. Lang. Notes,' VII, 134) makes the lament end with l. 18, at the same time suggesting the change of *dǣre*, 'injure,' to *nǣre*, 'save, deliver.' No emendation is necessary, however, as Havelok laments not only that he is a king's son, but that wild beasts do not have him rather than such inhuman people. Holthausen makes *him* refer to Grim, but surely this is impossible. The peculiarity seems to be that the last part is quoted indirectly rather than in the first person. **31. blawe.** Another Nth. form, equivalent to Ml. *blowe*.

Page 83, l. 10. Rīs up, MS. **sir up.** Morris's change is obviously right and generally accepted. **17. kynemark.** As Goldborough sees it, this is later described (l. 1262) as follows:

'On his shuldre, of gold red
She saw a swiþe noble croiz.

Page 85, l. 14. Denemarkes stiward, MS. **denemark a stiward.** It seems clear that Godard is not *a stiward*, but *the stiward*, appointed by the king above all others. Instead of inserting *of* before Denemark (Holthausen), I prefer to think the genitive *s* has been lost in the initial of *stiward*.

Page 86, l. 9. Wat shal mē. 'What shall (be) to me for counsel.' So in l. 118 of the poem. **16. shēp . . . nēt.** The MS. *shep, net, hors, swin,* might all be plurals without ending, as they are all OE. neuters. But they are more likely general singulars, as are the descriptive words *wolle, hōrn, bǣrd*. For this reason the omitted word *gǭt*, not *gēt* (*gȩȩt*), the mutated plural (Skeat, Holthausen), is adopted. **21. And al hē.** 'And he drew all to the penny,' i.e. obtained money instead of barter for his possessions.

Page 87, l. 4. sē. This word, with open *ē* in OE. dialects, invariably rimes close in Havelok; cf. Ten Brink, 'Chaucers Sprache,' § 24 a. **15. siþe,** MS. **þrie.** The MS. reading is meaningless, and some change must be made. I repeat *siþe* from *siþen* (l. 11); Holthausen and Skeat read *yete*, 'yet.' **24–25. ērde . . . ērþe.** The MS. *erþe* in both lines is impossible, and the change of the first to *ērde* is probably the best that can be made. **30. Grimesbī it calle,** MS. **calleth alle.** The change is Zupitza's and is generally accepted.

VII. ROBERT MANNING'S 'HANDLYNGE SYNNE'

THE TALE OF PERS THE USURER

The 'Handlynge Synne,' or 'Manual of Sins,' is found in Harleian MS. 1701 of the British Museum, and Bodleian MS. 415. It was edited by Furnivall for the Roxburghe Club (1802) and is appearing in a new edition for the Early English Text Society. A selection occurs in Morris ('Specimens,' II, 50). Our selection is from the Harleian MS. as edited by Furnivall, and includes

lines 5555 to 5946. The author, Robert Manning, was born at Brunne or Bourn near Market Deeping in Lincolnshire about 1260, and died about 1340. In 1303, while living at Brimwake in the hundred of Kesteven, he translated this work, as he tells us in the prologue. The language therefore represents NEMl. of the early fourteenth century.

Manning's work is translated from the French 'Manuel des Pechiez' of William of Waddington. It treats the seven deadly sins and seven sacraments, the twelve requisites of a good confession, and the twelve graces resulting therefrom. In illustration of various points such tales as this of Pers are introduced. In this case, as usually, the translation follows the OF. tale with slight variations. The metre, as so commonly at this time, is the rimed couplet of four stresses.

Like the last selection, the language of this contains some Nth. forms. The use of *y*, long and short, for *i* is exceedingly common. An occasional Nth. *ei* (*ey*) represent Ml. Nth. *ē*, an orthographic peculiarity which also grows more frequent. Final *e* is more generally lost in pronunciation than in previous selections, but is often written where it must have been silent, and even added where it never belonged historically. It is probably silent at the end of the line in most cases. A medial *e* which is necessary for the metre has often been omitted. Among consonants *gh* appears for *ȝ* before *t*, as in MnE. spelling. Some of these are no doubt connected with the fact that the MS. is later than the time of Manning, that is about 1360.

Page 88, l. 1. kauersyns. Though used as a general name, as in OF., the word was originally more specific, since it is derived from the Provence town of Cahors, early noted for its usurers. Dante ('Inferno,' XI, 50) connects Cahors with Sodom, and Matthew of Paris has a chapter near the beginning of his 'History' on the extortions of these usurers. The word *kauersin* has been generally missed by the dictionaries, or wrongly glossed as 'hypocrite.' **2. wykked.** Note how early ME. *wikke* has assumed excrescent *d* after the analogy of adjectives and participles ending in *ed*. **5. nat.** This is probably a retention of OE. *naht*, rather than an early unrounding of *o* in *noht*. **18. Pērs.** Here, and often elsewhere, to be read as a disyllable. Perhaps we should print *Pēres* (cf. *pens*, *ōkerērs* = *penes*, *ōkerēres*, ll. 25, 26), but I have preferred to leave the MS. forms with this note. **21. Seynt Jo̅ne.** This St. John, the Almoner, was patriarch of Alexandria in the seventh century.

Page 89, l. 2. sāte. Evidently a Nth. form if the vowel is long, or possibly a new formation on the basis of the singular. **7–8. weyl . . . deyl.** Examples of the Nth. use of *ei* (*ey*) for *ē*. **25. bode þē quēde.** 'Awaited the evil (man).'

Page 90, l. 1. Pērs stōde. Cf. 85, 27–28, thought by Skeat to have suggested this passage. It was probably a rather common expression in one form or another at the time. **5–6. lo̅fe . . . dro̅fe.** A good example of the addition of final *e* where it could not have been pronounced, a practice increasingly common in later Middle English. **22. fyl.** A shortened preterit of *fallen* = *fēl*, with *e* become *i* (*y*). **24. Hym þoghte.** Note the confusion which has already taken place between ME. *þuȝte* and *þoȝte*. **30. abashed as amad,** MS. as mad. Morris suggested *a mad*, 'a maid,' but the correct form is the shortened pp. of *amæden*, OE. *gemēdan*.

Page 91, l. 28. **nōw þōu lēres.** 'Now thou shalt learn how this loaf shall help you at need, (and how) to improve thy soul with alms-deeds.' Note the present 3rd sing. in *-es* and *-eþ* side by side.

Page 92, ll. 29–30. **herte . . . smert.** Another indication of the loss of final *e* from the spoken language of this region; cf. also *breyde . . . seyd* (93, 31–32).

Page 93, l. 14. **And a partȳ.** 'And began in part, or in some measure, to leave off.'

Page 94, l. 31. **Hys clerk was wǭ.** In OE. syntax clerk would require a dat. after *was*, but the loss of distinctive ending for that case made a noun in such position seem the subject, and this syntax has prevailed in MnE. usage.

Page 95, l. 10. **Tō whōm.** Note the clear use of *whom* as a relative. 17. **ȝōle.** The etymology is uncertain, but I have assumed its connexion with ON. *jōl*, OE. *gēol*, 'yule,' still found in MnE. *Yule*.

Page 96, l. 7. **Plenērlȳ alle þat.** Cf. Havelok, ll. 819–20:

'Al þat he þerfore tok
Withheld he nouht (nouth) a ferþinges nok.'

From some such resemblances between the two poems it is believed that Manning may have known the Havelok, another Lancashire work.

Page 98, l. 19. **stonte = stǭndeþ.** The contracted form is less common in Ml. and Nth. than in Sth. English. 25. **ȝone.** The OM. demonstrative *gon*, WS. *geon*, which is only dialectal in MnE., though the root occurs in *yonder*, OM. **gonre*.

Page 99, l. 13. **squylēr.** Though OF. in immediate relation to English, it is based on a Teutonic root which appears in MnE. *swill*, OE. *swilian*, 'to wash,' as at 96, 24. 23. **A flamme of fȳre.** A frequent attendant of supernatural manifestations, and probably connected in the mediæval mind with the pentecostal fire, Acts ii. 3. Havelok is known to be of royal birth by a similar token (83, 1–7).

VIII. THE WEST MIDLAND PROSE PSALTER

The translation of the Psalms from which our selection is taken is found in Additional MS. 17,376 of the British Museum and in MS. A 4, 4 of Trinity College, Dublin. On the basis of the former it has been edited from both MSS. by Karl Bülbring (Part I, EETS., 97), and Bülbring has been followed here. The language is almost pure West Midland, and belongs to the first half of the fourteenth century. This 'Psalter' was formerly attributed to William of Shoreham, with whose poems it occurs in the MS., but such authorship is impossible, as Shoreham's poems are Kentish and there is no trace of Kentish in this version; cf. Konrath, 'Beiträge zur Erklärung u. Textkritik des William von Shoreham' (1878). A WMl. selection is added to show how closely that dialect agreed with EMl. in most particulars.

This 'Psalter' is a close, though sometimes mistaken rendering of the Latin text, presumably the Italic version of the Scriptures. Some interesting examples of mediæval rendering and interpretation are given in the notes. For these and other peculiarities it may be compared with Hampole's earlier Nth. version (ed. by Bramley, 1884), and with the Wiclifite version (ed. by Forshall and Madden). It will be seen that the verse division is not quite the same as in our modern Bible, but the original numbering of the Psalms has been made to correspond with our own.

As already stated in the Grammatical Introduction the West Midland does not differ materially from East Midland, and this is especially true of the present selection, in its phonology. As to orthography, we may note *c* (*ce*) for *s* in OF. words; *ck* = *kk* (*wicked*, 100, 23), *sc* for *ss* (*blesced*, 100, 15). The one striking peculiarity of inflexion is the use of *-and(e)* in the present participle. Rarely, too, *is* = *es* appears in the plural of nouns.

Page 100, l. 16. sinȝēres. The word is based on the root of OE. *syngian*, not the sb. *synne*; but note the variants, *sinniȝrs* (l. 23), *synnȝrs* (l. 25). **19. frut.** The OF. diphthong *ui* is usually preserved in stressed syllables, but other cases of its appearance as simple *u* (= *iu*) are well known. **20. fallwen,** MS. fallen with *w* in later hand. As the Lat. is *defluit* it is not impossible that the translator thought *fallen*, 'fall, fail, pass away,' a good rendering. **22. as a pōudre.** The connective has been omitted; cf. the Lat. *sed tamquam*. **24. ōure Lȯrd knew.** The translator has taken Lat. *novit* for a preterit, as in other places (103, 12; 104, 10). On the other hand, *cognovit* is translated *knoweþ* at 105, 2.

Page 101, l. 2. water of fyllyng. Lat. *aquam refectionis*, and Dub. MS. *water of fulfillyng*; MnE. Bible, *still waters*. No doubt *fyllyng* is used in the sense of 'fulfilling, restoring,' and is thus a good rendering of *refectio*. **3. hē turned . . . fram þē fēnde.** The Lat. is *animam meam convertit*, and the addition is probably due to some commentator. **4. For ȝif þat ich hāve gȯn.** Lat. *nam etsi ambulavero*, and the translator has mistaken the fut. perf. for the perf., or had a different text before him. **8. þōū mākest fatt.** A literal rendering of the Vulg. *Impinguasti in oleo caput meum*. **15. innocent in hȯnde.** Lat. *innocens manibus*; Dub. MS. *clene of hondes and clene of hert*. **19. þē sēchand hym.** The translator uses the English participle exactly as the Latin: *Haec est generatio quaerentium eum, quaerentium faciem Dei Iacob*. **20. princes of helle.** *Of helle* here and *of hevene* in verse 9 are additions to the original in accordance with mediæval interpretation, as referring to Christ when 'harrowing hell,' and later ascending to heaven. This is based on the apocryphal 'Gospel of Nicodemus,' which was closely followed in English versions of the 'harrowing of hell' story.

Page 102, l. 9. whȳte up snowe. The Lat. reads *super nivem aealbabor*, and the translator has not perceived that *super* means 'beyond more than,' not 'up.' **29. fram þē world.** A good example of the OE., ME. use of *world* in sense of time, as in *world without end*.

Page 103, l. 2. þē kēpyng ō nyȝt. 'And the watching (*kēpyng*) at night that avails not (*for nouȝt bēn had*) shall be their years'; Lat. *Custodia in nocte, quae pro nihilo habentur, eorum anni erunt*. Our modern version is based on a different text. **9. penchen as þē lob.** Lat. *anni nostri sicut*

aranea meditabuntur, and the verb has been translated *þenchen*, 'think,' not *þinchen*, 'seem.' This is natural since *meditor* properly meant 'to think,' and only in mediæval times acquired the passive sense 'to seem.' **in þē seventī ȝēre.** The Lat. *dies annorum nostrorum in ipsis, septuaginta anni* evidently puzzled the translator. He has left *in ipsis* untranslated and the syntax of the phrase is not clear. **10. þē mōre ōver hem.** 'The more (years) beyond, or in addition to them,' another slavish rendering; cf. Lat. *amplius eorum*. **14. bē þōu turned.** *Untō nōu* perhaps translates *usque* of the Vulgate with possibly some other word. 'Be thou turned until now,' though not clear, seems to be the meaning. **19. dresce her sones.** 'Direct their sons,' translating literally Lat. *dirige filios eorum*. So the first part of the verse translates *Respice in servos tuos et in opera tua*, where the modern version has a different reading. **25. trappes of þē fēndes.** Lat. *de laqueo venantium*, the latter being interpreted as 'devils,' according to the commentary attributed to Jerome, 'Breviarium in Psalmos' (Migne's 'Jerome,' VII). See my article on 'Some of Chaucer's Lines on the Monk,' 'Modern Philology,' I, 105. **asper word.** Lat. *verbo aspero*, where our version has 'noisome pestilence,' a different reading. **29. temptāciōūn waxand.** Lat. *a sagitta volante*, familiar in our 'arrow that flieth.' With the application of the whole passage to man's contest with the devil, *sagitta* has been understood in the figurative sense of 'temptation.' **30. fram þē cūrs.** There are various readings of the original, as often. The Vulgate has *ab incursu et daemonio meridiano*, the last words being regarded as a reference to Lucifer. **þōūsand temptāciōūns.** Lat. merely *cadent . . . mille*, and the translator assumes a connexion with the preceding and adds *temptāciōūns* implied in *þē cūrs*.

Page 104, l. 1. **þē devel.** The translator refers the subject of the verb, unexpressed in Latin, back to *fēnde* in verse 6. **17. þē which.** The earliest use in our selections of this compound relative; cf. 'Chaucers Sprache,' § 254. **21. is dōand.** A translation of Lat. *faciens*. **28. streinped.** The MS. is not clear, but seems to have been corrected to read as in the text.

Page 105, l. 2. *faintes*. The Vulgate reads *figmentum*. **3. þat wē.** The OE. Vespasian text reads *quod pulvis sumus*, not *quoniam* as the Vulgate, and the former was probably before our translator.

IX. 'THE EARL OF TOULOUSE'

This poetic romance is found in four MSS., Cambridge Ff II, 38; Ashmole 45 and 61 of the Bodleian Library; and Thornton MS. A 5 of Lincoln Cathedral Library. The first of these, represented in our selection also, was edited by Ritson, 'Ancient English Metrical Romances,' III, 93 (1802, revised by Goldsmid, 1885), and a so-called critical edition from all the MSS. was made by Lüdtke for Zupitza's 'Sammlung englischer Denkmäler' in 1881. The poem was composed in the NEMl. district about the middle of the fourteenth century, although the MS. belongs to the fifteenth century, and therefore shows a later orthography than the time of composition.

The poem consists of 1,224 verses arranged in twelve-line stanzas, riming *aabccbddbeeb*. The first two verses of each triplet have four stresses, the last three stresses. Our selection begins with l. 895 and continues to the end. The

earlier part tells how Earl Barnard made war upon the Emperor Diocletian, because the latter had deprived him of territory. Earl Barnard was successful, and, among other captives, takes Sir Trylabas of Turkey, whom he agrees to free if he will obtain for the earl a sight of the beautiful Empress Beulybon (Beaulyoun, Beaulilion). Trylabas arranges the meeting in the presence of others, Barnard appears as a hermit, and, on leaving, is given by the empress some coin and a ring. About the same time two knights are enamoured of the empress and, on her refusal to comply with their base wishes, contrive to make her appear guilty of adultery, of which they accuse her to the emperor. He condemns her to be burned alive, unless, as suggested in 'parliament' just before the opening of our selection, some one shall be found to support her innocence in combat with her accusers. The favour which this proposition meets is shown by the first line of the passage chosen. The story is believed to have historical foundation in the life of the Empress Judith, wife of Louis I (778–840). A romance based on this historical foundation became widely reproduced in Spain, Italy, France and other countries; see Lüdtke's excellent Introduction, 61 f. The immediate source of the English poem, the 'Lay of Bretayne,' mentioned in the last stanza, is unknown.

As already noted the orthography is late. For example, *ōu* (*ōw*) is always used for long *ū*, *th* for earlier *þ*, *ght* often for *ȝt*, and *wh* for OE. *hw*. On the other hand, *sch* for *sh* still prevails. Besides, *y* is used with great frequency for *i*, both alone and in the diphthongs *ai*, *ei*, and occasionally for *e* in unstressed syllables. The doubling of long vowels is also common.

Page 105, l. 18. hē spake. The 'olde knyght' who had proposed the trial by combat to decide the guilt of the empress. **24. be sęę and be sōnde.** An alliterative expression for the whole world, quite common in Middle English; cf. 161, 25.

Page 106, l. 14. can = gan. This weak form with voiceless initial is more common in Nth. English.

Page 107, l. 4. Sǭ mōte thōū thē. 'So may thou prosper,' that is, 'as you hope to prosper.' **27. māke a vowe.** The last two words represent OF. *avou*, 'vow,' but they became separated so as to suggest 'a vow' as here. We still say *make avowal*, and *an avowal*.

Page 108, l. 24. mās. Another form which suggests the Nth. dialect or a district near it. **29. When thē abbot.** The shortness of the verse suggests an omission, as of *did* after *abbot*; cf. Ashmole MS. 45.

Page 109, l. 23. durre, MS. **dar.** Lüdtke reads *dare* as a disyllable, but surely that is not a likely form. One MS. reads *durste*, but I assume a subjunctive form as more probable.

Page 112, l. 22. Manlȳ. One MS. reads *manfully*, which shows the content of the word.

Page 114, l. 9. Soche wōrdes. 'I advise [that] thou shouldest alter such words.' *Wǭnde* is subjunctive preterit of *winde(n)*, the old *ū* vowel having been replaced by analogy of other singular forms. **10. Anǭne in hāste.** Note the absence of the verb in the clause as representing the abrupt manner of address.

Page 116, l. 4. chyldyr fyftēne. So Havelok and Goldborough have fifteen children, all kings and queens. **7–8. geste cronyclyd is . . . callyd ywis.** Some change is necessary, as shown by footnote readings, and I have adopted that of Lüdtke.

X. GILD OF THE HOLY TRINITY AND OF SAINT WILLIAM OF NORWICH

This selection is from a MS. in the Public Record Office, London, Bundle CCCX 116, as edited by Lucy Toulmin Smith in 'English Gilds' (EETS., 40), p. 29. The 'Return' was made in January 1389, and the language is the East Midland of Norfolk, the descendant of East Anglian of Old English times.

These 'Returns' concerning the gilds had been ordered by a Parliament held at Canterbury in 1388. The extract is an account of the formation of the gild and the statutes under which the brotherhood was constituted. It is preceded in the MS. by a recital, in Latin, of the king's writ to the sheriff of Norfolk, and followed by two Latin sentences saying that no other statute had been established, and that the property of the gild consisted of four pounds, four shillings, 'et non plus nec minus.' The whole is endorsed 'Fraternitas Sancte Trinitatis ac beati Willelmi Innocentis et martiris in Norwico.' It is similar to other 'Returns,' and is chosen as a prose piece of sufficient length to represent one part of the EMl. dialect.

Few peculiarities of language need be mentioned. *Th* now interchanges with *þ*, written with open top and resembling *y*. *Qw* = OE. *hw* occurs as in Ml. occasionally (cf. 'Genesis and Exodus'), in Nth. commonly. For a special treatment of the language see Schultz, 'Die Sprache der English Gilds' (1891).

Page 116, l. 13. In þē nāme. This is immediately preceded by the Latin word *Constitutiones*. **15. Seynt William.** For the account of his martyrdom see the passage in the 'Chronicle' at 4, 28. Note the modern form of the name as compared with Willelm of the 'Chronicle.' **18. gylde.** The form of this word with initial guttural stop is not English, since OM. *gēld*, WS. *ġield*, became Ml. *ȝēld*, Sth. *ȝild* or *ȝīld* respectively, and the Ml. form would have become MnE. *yield*; cf. the corresponding verb, the sb. *yield* applied to crops, and Chaucer's *yeldhalle* (MSS. *yeldehalle*, *yeldhalle*, *ȝeldehall*, *ȝildehalle*). The ME. form with guttural stop must therefore show external influence, probably that of ON. *gildi*; cf. MDu. *ghilde*. **20. systeren.** Note the extension of the OE. weak plural ending under the influence of constant association with *bretheren*. **21. upen here pōwēr.** 'According to their power, or ability.' This meaning does not seem to belong to OE. *uppan*, but is easily derived from it. **23. þē fēst of Seynt Pēter and Powel.** That is June 29. The Sunday after is then the *gyldeday* of 117, 21 f.

Page 117, l. 2. tō. This form of OE. *twā*, ME. *twō*, but with loss of *w*, is exactly parallel to *sē* from OE. *swā*, though I have assumed close *ō* in *tō* owing to a later disappearance of *w*. **14. þē aldermannes wyl.** The alderman, a master or president of the gild, was regularly chosen each year on the gildday, as indicated at l. 30. Other 'Returns' speak of wardens who have charge of the property. **15. at þē cumpanȳ.** Note the genitive

without ending, no doubt as the last word of the clause. **18. sāve þē kynge hys ryhte.** 'Preserve (save) to the king his right,' probably not 'Preserve the king's right.' **27. anȳ.** The MS. *ony* may indicate *ǭnȳ*, but the prevailing short *a* seems to show that this *o* is short also. **leyn it doūn.** Dependent upon *schal* above, which would be repeated in MnE. usage.

Page 118, l. 7. **But if it bē.** The gild laid great stress upon character, and every member was in some sense responsible for every other. **24. at here comōun cost.** 'At the cost of them all, or in common'; cf. Chaucer's well-known *at our aller cost*, Prol. to 'Cant. Tales,' I, 799.

XI. JOHN MYRC'S 'INSTRUCTIONS FOR PARISH PRIESTS'

These 'Instructions' are preserved in three MSS., Cotton Claudius A II in the British Museum, and Douce MSS. 60, 103 in the Bodleian. The first and best was edited by Peacock for the Early English Text Society, 31 (1868), and from this have been selected ll. 1–76 and 234–371. The writer was a canon of Lilleshall, Shropshire, and is supposed to have written the work about 1400. The extract therefore represents WMl. of that time, though the MS. is of the early fifteenth century.

The title gives a good idea of the general character of the work. A note at the end tells us that it was translated from Latin, but its source is not definitely known. It is similar to many other mediæval treatises, the prior of Mirc's own house having written a more complete 'Manuale Sacerdotis.'

The language will present few difficulties after the previous selections have been read. We meet for the first time *uy* for OE. *ȳ*, Ml. *ȳ* (*ī*), Sth. *ū̄*.

Page 119, l. 10. **dawe.** Really a new singular based on the plural *dawes*, OE. *dagas*, and preserved in only a few phrases. **11. bōth.** Note the Sth. plural of the verb, as occasionally; cf. the Ml. plurals *fallen* (l. 8), *sēn* (l. 9), *fāren* (l. 10).

Page 120, l. 14. **serve God tō pay.** 'Serve God to his pleasure.' **23. Cuttede clǭthes and pyked schōne.** For the first we should say 'slashed,' that is, with long narrow openings to show the rich lining beneath. The shoes called *pyked* were long and pointed ones, used first in the reign of William Rufus, and often prohibited to the clergy by local councils. **27. honest clǭthes.** Note the old meaning of *honest*, 'honourable, suitable, according to law and custom.' **28. Baselard.** A short sword much worn in the fourteenth and fifteenth centuries, but not allowed to priests. They often failed to obey the prohibition, as shown by the following lines quoted by Peacock from the 'Plowman's Tale':

> 'Bucklers brode and swerdes long
> Baudrike with baselardes kene,
> Such toles about her necke they hong:
> With Antichrist soche priestes been.'

Cf. also 'Piers Plowman,' III B, 303. **30. thȳ ordere.** Mirc's order was a branch of the canons regular of St. Austin, taking its name from the city of Arras, where they were first established. The branch had been transplanted to England by Richard de Belmeis about 1145.

Page 121, l. 25. **Alsō thōw.** The passage omitted relates to shriving of women, marriage and childbirth, and is of less general interest than that which follows. 30. **ischryve.** The retention of the OE. prefix *ge* as *i* is distinctly Sth., and is probably here indicative of Sth. influence, though it occasionally occurs in Ml., when it cannot certainly be attributed to Sth. influence. 32. **asterday.** A natural shortening of OE. *ēasterdæg*, but usually resisted by the influence of the uncompounded *ēaster*, 'Easter,' so that the two agree in MnE.

Page 122, l. 10. **but wȳn and water.** Peacock says: 'After communion it was the custom for the laity to drink unconsecrated wine, to assist them in swallowing the eucharistic wafer.' At this time it was not customary to give the cup to the laity. 32. **Knēlynge dōūn.** Peacock notes this as evidence that there were no pews or benches in the churches.

Page 123, l. 11. **thē belle.** The so-called sanctus bell (*sance-*, *sauce-bell*) hung in mediæval churches, says Peacock, on the east gable of the nave outside the church. It was rung to permit those not present to join in the devotion. A hand-bell was also sometimes used, as to-day in Catholic churches. All these were ordered to 'be utterly defaced, rent and abolished' in 1576.

Page 124, l. 10. **As Seynt Austyn.** Peacock says not in St. Augustine's writings, though possibly in some work once attributed to him. 25. **seyntwarȳ.** The reading of Douce MSS. *chirchhay*, 'churchyard,' restores the rime, and is no doubt correct. In explanation of the MS. reading Peacock says: 'In mediæval documents belonging to this country (England) *sanctuarium* and its equivalents in English almost always mean churchyard.' As bearing this out cf. *seyntwarȳ* (125, 2), where the Douce MSS. have *chyrchyerd*, very likely the correct sense here also. 27. **Sǫnge and crȳ.** Peacock mentions that the Douce MS. 103 has a note in a somewhat later hand, which reads: 'danseynge, cotteyng, bollyng, tenessyng, handball, football, stoilball, and all manner other games out cherchyerd.' 29. **Castynge of axtrē.** The axletree was sometimes used instead of the bar or the stone; cf. Strutt's 'Sports and Pastimes of the Middle Ages,' p. 140. 31. **Bal and bāres.** The former may be one of several games of ball. The latter is Base or Bars, or Prisoner's bars, the name being due to the practice of staking out the 'base.' Cf. for both Strutt, as above.

Page 125, l. 1. **Cōurte hǫldynge.** Peacock notes that the use of churches and churchyards for secular purposes was not uncommon, citing local histories for particular instances. 14. **Everȳ mon.** No doubt *ȩ̄che*, occurring in one of the Douce MSS., is the correct reading. 23. **Wychecrafte.** In the service of excommunication, given in Douce MS. 60, reference is especially made to witchcraft. **telynge.** Cf. 'Ancren Riwle' (ed. Morton), p. 208: 'Sigaldren and false teolunges, levunge on ore and of swefnes, and alle wicchecreftes . . . nis hit þe spece of prude þet ich cleopede presumciun?' *Telynge* is connected with OE. *tilian*, 'to strive, labour,' and may be equivalent to ME. *experiment*, 'sorcery,' as in a passage in Douce MS. 60: 'All þat maken experimentes or wichecrafte or charmes.' Cf. also 145, 11.

PART II

THE DIALECTS OF THE NORTH, THE SOUTH, AND THE CITY OF LONDON

This Part is designed to illustrate the Northern and Southern dialects, and London English as it gradually changed from Southern to Midland. Northern is placed first, as most closely allied to Midland, and examples are here given of Northern English in the more distinctive sense, as well as of Middle Scotch which is based upon it. As there are few available selections until the end of the thirteenth century, no division of 'Early' Northern need be made.

I. PROLOGUE TO THE 'CURSOR MUNDI'

The 'Cursor Mundi' is preserved in various MSS., of which Hupe (EETS., 99, p. 62*; 101, p. 113*) describes no less than ten. Four of these, Cotton Vesp. A III of the British Museum, Fairfax 14 of the Bodleian, Göttingen MS. Theol. 107 r at the University of Göttingen, and Trinity College MS. R3, 8 at Cambridge, were edited by Morris for the 'Early English Text Society' (57, 59, 62, 66, 68, 99, 101). The purest of these completer texts is the Cotton above, of which our selection includes lines 1 to 270. The poem was written about 1300 (Hupe thinks as early as the last half of the thirteenth century) in a region placed by Murray as near Durham, and by Hupe in North Lancashire, owing to forms that suggest Ml. influence, as the words with *ō̄* instead of Nth. *ā*, OE. *ā*. These indicate that the MS., if not the author, belongs to a region affected by the Ml. change. No author is known, but Hupe argues for a certain John of Lindberghe, whose name appears in the Göttingen MS., though usually assumed to be that of a scribe.

The 'Cursor Mundi' is a poetical history of the Hebrew and Christian world based on various sources, the Scriptures, the 'Historia Scholastica' of Petrus Comestor, the apocryphal books of the New Testament, and others; see Hænsch's 'Inquiry into the Sources,' EETS., 99, p. 1*. Some notes to our selection from the ME. 'Genesis and Exodus' show the common basis of the two, but the 'Cursor Mundi' is much fuller in all respects. Especially are the legendary portions interesting, as reflecting the credulous character of the mediæval mind. The metre, as will be seen, is the common rimed couplet of four stresses.

As to language, the mixture of Ml. *ō̄* with Nth. *ā* from OE. *ā* has been mentioned. Otherwise the vowel phonology is simple. Among the peculiarities of consonants are the use of *s* in unstressed syllables for OE. *sc*, as

Inglis, Ml. *Englisch* (127, 6); *suld*, Ml. *schuld*, *schold* (129, 3); *sc* = *sk*, as in *scaw* (130, 1); *qu* for OE. *hw*, as sometimes in Ml.; *th* beside *þ*; *ght* for *ȝt* regularly.

Page 126, l. 3. **Alisaundur.** The widespread romances relating to most of these heroes are well known, as those of Alexander, Brutus, Arthur, Charlemagne (Charles King, l. 15), Tristrem (l. 17), Amadas (127, 2). **6. lēsis.** The form is clearly pres. pl., but perhaps we should read *lę̄s*, preterit with *thousand* as a collective sing. On the other hand, the only pret. form recorded by Kellner in his excellent glossary is *lest*, 'lost.' The pres. pl. could be explained as used in vivid narration. **9. sǭ.** Note this among many examples of strict Ml. forms, beside those of the North. **13. Wawān, Cai.** More commonly *Gawain*, *Kay*, as in Malory's 'Morte D'Arthur.' **ōþer stābell.** 'Other brave ones.' **17. Ysote.** Hupe, in his critical text, changes to *Ysoud*, spoiling the rime in both vowel and consonant. With so many final *d*'s becoming *t*'s it is not strange that this name should have suffered the same alteration.

Page 127, l. 1. **Joneck . . . Ysambrāse.** The first may be a corruption of *Jonet*, which appears in one of the other MSS. The second is the subject of a romance in 'Thornton Romances,' p. 88. **2. Amadāse.** The romance of Sir Amadace is found in Robson's 'Three Metrical Romances,' Camden Society (1842), based on the OF. romance of 'Idoine and Amadas.' **6. Inglis.** The regular Nth. form of the adjective and substantive. Note change of *e* to *i* before the nasal as in the MnE. form, though we still write *E*. **10. draws.** The MS. form *draghus* is common in the Lancashire dialect (cf. *draȝeȝ* in 'Sir Gawain and the Green Knight,' l. 1,031), but a monosyllabic form is necessary for the metre. **15. scilwīs sē.** Hupe adopts *ilk wiis* for *scilwīs*, considering the latter a mistake for *slīwis*, but the change is wholly unnecessary. *Scilwīs* is used substantively, and the line means 'but by the fruit may wise (men) see.' **25. tās.** Both *tās* and *mās* for *tākes* and *mākes* are common in Nth.

Page 128, l. 7. **chaunge of hert.** The reading of Gött. and Trin. MSS., while Fairfax has a different expression, *or elles of hert*. **9. at bē.** Note the Nth. use of *at* with the infinitive for Ml. and Sth. *tō*. Modern English has a contraction of the Nth. form in *ado* = *to do*. **10. Frǭ hir schalt þōu.** The reference is to *folȳ*, *vanitē* of l. 3. **16. hē forwith bedd.** The MS. has *he hym forwit* (= *forwith*), but no rime word. The other MSS. vary greatly. I take *bedd* as a shortened form of *bę̄d*, 'offered, announced, threatened,' and the meaning of the passage to be, beginning with l. 13: 'Ere he shall be brought down so violently he knows not whither to turn, until his love has led him to such reward as he before announced.' **17–18. mere . . . were.** The other texts have *let* (*lett*), 'hindrance,' and this, together with the rime, suggests a noun not recorded for OE. but connected with OAng. *merran*, WS. *mierran*, 'hinder, mar.' *Mere* would thus represent OAng. *merre*, which occurs in Trin. MS. 24,802. The rime with *were* = *werre*, 'worse,' would then be perfect. Kaluza, in his glossary, translates 'harm, trouble' without explanation. **23. þof.** The OE. guttural spirant *h* (*g*) has become the labio-dental spirant *f*, as in MnE. *laugh*, *cough*, *tough*, and a few others. **32. þē love bēs never gān.** 'The love (that shall) be never gone,' that is, 'shall never perish.'

Page 129, l. 3. **matēr tāke.** *Matēr* added by Morris from the other MSS. 7. **Quat bōte is.** Morris would insert *hit*, 'it,' after *is*, as in Trin. MS., but *bōte* may be disyllabic and the line complete. 9. **werd**, MS. **warld.** The MS. reading must be a scribal alteration, as shown by the rime and the reading of the other MSS. 19. **lavedī . . . lḛvedīs.** Double forms of the word appear in two of the four MSS.

Page 130, l. 1. **scaw.** Such a form beside *schew* (l. 5) indicates scribal alteration or that both forms were found in the dialect of the poet. 10. **hāve in tāle.** 'Have in tale,' that is, 'relate, be able to tell.' 21. **Oxspring.** The other MSS. have *ospringe* (*hospring*), indicating that *x* in the word probably represents *s*. 26. **Ēsaū.** The word is regularly trisyllabic in the poem, as in Lat. and OF. 29–30. **Mōysēs . . . chḛs.** The same rime occurs once in 'Genesis and Exodus,' though *Mōysēs* usually rimes with close *ē*.

Page 131, l. 7. **redd yuu.** *Reddynn* of Morris is impossible, and the MS. must have been misunderstood. 20. **þat Jēsus did.** The account is based upon the apocryphal 'Childhood of Jesus,' so literally accepted in the middle ages.

Page 132, l. 6. **þat.** 'To whom.' Without change of form *þat* is nom. dat. or accus., though when dat. or accus. a preposition-adverb often follows the verb. 12. **Lōrdə fēte.** All the other MSS. have a genitive in *es* (*is*). On the other hand, the genitive without ending is common in Nth. English. Cf. *lḛvedī* (133, 7). 23. **unschill.** Morris notes as equivalent to *unscill*, that is, *sch* = *sc*. 26. **onstad and sey.** Hupe reads *onstand and sey*. But a preterit *stad* appears in rime with *badd*, 'bade,' at l. 5,541, as well as a past participle *stad* (*stadd*) in several places. These indicate that *onstad* is probably correct, based on ON. *steðja-staddi*. The line means 'many a man was present and saw.' 31. **Hōw ōur Lḛvedī ēndid.** The 'assumption' of the Virgin, believed to have occurred on August 15, and still celebrated in some countries.

Page 133, l. 4. **þē drērī days fivetēn.** A full account of these days occurs in the selection from 'Metrical Homilies,' beginning on p. 148. 7. **ōure Lḛvedī murnand mōde.** This theme was often treated by mediæval poets, and frequently in English with such titles as 'Compassio Mariae,' 'Lament of Mary,' &c. In the 'Cursor Mundi' it is found at l. 23,945. 14. **er.** Cf. note on 9, 2. The form preserves the original vowel of the root, which has become *a* in later English under the influence of *r*. 23. **Intō Inglis tong.** The passage is interesting as showing the national spirit which produced a literature for Englishmen, notwithstanding the period of French influence following the Conquest, and the dominance of Latin as the language of learning.

Page 134, ll. 13–14. **tent . . . amend.** The rime was probably perfect with *t* in both words, as final *d* so often became *t* in Nth. Cf. the past participles in *et* (*it*) for *ed* (*id*) in Burns. 15. **Ful il hā þai.** Morris reads *il-ha*[*yl*], 'ill luck,' and Hupe follows him. But surely our text is complete and makes admirable sense, while with the reading of Morris another verb must be supplied. 17. **sum wē til heild.** 'As we incline to.' 18. **acōuntes**, MS. **armites.** The MS. reading seems impossible if the word means 'hermits.' *Acōuntes* is from Fairfax MS.

II. THE DEATH OF SAINT ANDREW

The story of Saint Andrew, of which this selection forms a part, belongs to the Northern collection of legends found in various MSS.; see Horstmann, 'Altenglische Legenden,' Neue Folge, p. lx. That from which this is taken is Harl. 4,196 of the British Museum. Horstmann believed the collection was made in the diocese of Durham in the last quarter of the thirteenth century, though the MS. is of the fourteenth. The prevalence of Midland forms, however, indicates a region nearer the border of the Midland district; cf. Retzlaff, 'Untersuchungen über den nordenglischen Legendencyclus' (1888). The collection bears the marks of having been written by a single author, but nothing is known of him.

The legend of St. Andrew first appears in Old English times in the poem 'Andreas' of the eighth century, and in a prose version of the tenth century. Both these relate the story of Andrew's rescue of Matthew, but give no account of his death. The latter is told in the 'Acts and Martyrdom of Andrew'; see the translation in 'Ante-Nicene Fathers,' VIII, 511.

Page 135, l. 1. Saint Andrew. The story of Andrew, the first in the collection, is preceded by four introductory couplets, one of which tells us:

'Out of Latyn þus er þai draune,
Omang laud men for to be knaune.'

3. in sēre cuntrē. Tradition assigns Andrew's labours to Scythia, Greece, and Thrace, his martyrdom as here related to Petrae in Achaia. **5. sō̆.** Note the Ml. form as frequently. Only in rimes have these been replaced by those of strict Nth. English. **8. Ēgēas.** Called proconsul of Achaia in 'Acts and Martyrdom of Andrew.' His wife (143, 7) is called Maximilla. **18. warlaus.** Applied to the 'fals goddes' of l. 10, who were regarded as devils and often so called.

Page 136, l. 8. þīr. An ON. form of the plural demonstrative pronoun. **9. suth.** OE. *ō* shows change to *u* = *iu* (*iu*) as in Scotch *gude*, 'good.' In this text the change is only partially indicated, and perhaps is due wholly to the scribe of the later MS. **23. cros.** Kluge ('Eng. Etymol.,' 1898) explains this form beside *crois*, OF. *crois*, as borrowed from OIr. *cross*. **29. put**, MS. **putted.** The dissyllabic form makes the line too long, and I assume the unchanged preterit, occurring in Tib. MS. E VII and often in 'Cursor Mundi.'

Page 137, ll. 15–16. āne . . . tāne. That *ā* is correct in both words is shown by the fact that *tāne* = *tāken* by contraction, and so has a vowel which never became ME. *ō̆*. The MS. forms with *ō̆* must therefore be purely scribal in origin. **28. tīte.** This adverb, of ON. origin, is still preserved in MnE. *tight*, with incorrect *gh*, which has been wrongly supposed to have come from OE. *þiht*.

Page 138, l. 8. vōuche it sāve. From this phrase, with object after the adjective, has sprung our anomalous compound *vouchsafe*. **19. hēnd.** Note this ON. plural, used beside the English plural *handes*. Probably *hēnd* was associated in the folk mind with mutation plurals like *men*. **30. hē suld hānget.** The pronoun necessary to the sense is from Tib. MS. E VII. *Hānget* is the first in our selections of the common Nth. past participle in *et* (*it*) for Ml. Sth. *ed* (*id*).

Page 139, l. 23. **and glōrifīde**, MS. **and ever glorifide.** The reading in the text is from Tib. MS. E VII.

Page 140, l. 13. **Tō þē turmentōurs.** Evidently in imitation of the taking of Christ's clothes at the crucifixion. **29. hāng.** This preterit form is common in Nth., as in 'Cursor Mundi' for example. It is probably a modification, by analogy of the present, of the old reduplicated preterit *hēng*. Beside this preterit, only the weak past participle *hānged* (*hānget*) seems to occur.

Page 141, l. 17. **puple.** The *u* of this word is one of the numerous forms of OF. *ue*. The AN. monophthong *ē* has become the standard modern form, but *pople*, *puple* and other forms occur in ME. Note also the genitive without ending.

III. TREATISES OF RICHARD ROLLE OF HAMPOLE

The selections from the writings of Richard Rolle are from Thornton MS. A I, 17, preserved in the Library of Lincoln Cathedral. They have been edited by Perry (EETS., 20), by Mätzner ('Sprachproben,' II, 120), and by Horstmann ('Richard Rolle and his Followers,' I, 184). Hampole, where Rolle lived as a hermit, and from which he takes his name, is near Doncaster in South Yorkshire. As the Thornton MS. was written about 1330–40 (Rolle died in 1349), these treatises represent the Northern dialect of the first half of the fourteenth century.

Rolle was a prolific writer of both prose and verse, Latin and English. Some of his most important works in English are the 'Prick of Conscience' and the 'Mirror of Life' in verse, and a translation and exposition of the Psalms in prose. The extracts give a good example of the religious character of all his writings, most of which are tinctured by the asceticism he exemplified in his life.

As to language Rolle's Treatises are pure Northern, for example, in the appearance of *ā* for OE. *ā* with no mixture of Ml. *ǭ*.

Page 143, l. 23. **thrē kȳndis.** Cf. Pliny's 'Natural Hist.,' XI, 10, on which this is based. **26. fēte**, MS. **fette.** The MS. form perhaps indicates shortening of the vowel; cf. *fotte* = *fōt* beside *fette* = *fēt* in 'Cursor Mundi.'

Page 144, l. 10. **Aristotill sais.** The reference is to the so-called 'Historia Animalium,' IX, 40. **14. kane hālde in þē ordyre of lufe ynesche.** The MS. lacks *in* and Mätzner supplies *of* instead, placing it after *ynesche*, but without improving the sense of the passage. Perry in his edition solved the difficulty by translating *ynesche* as 'towards,' a wholly impossible rendering. The meaning seems to be, 'For there are many that can never hold in the condition (*ordyre*) of tender love their friends,' &c. For *lufe ynesche* cf. *hnesce lufu* in the Alfredian 'Past. Care,' 17, 11. **19. wormes.** Horstmann alters to *wormed* = *wermod*, 'wormwood,' but the change is too violent and quite unnecessary. 'Worms' was often used figuratively for that corruption characteristic of the devil's working. Besides, though this is not conclusive, the alteration of OE. *wermod* toward *wormwood* does not appear until the fifteenth century. **24. Arystotill sais.** Cf. 'Hist. Anim.,' IX, 7 and 8.

Page 145, l. 4. **strucyo or stork.** As Mätzner points out, Rolle has confused the ostrich and the stork, the Latin name being the same for both. 12. **mawmetrȳse.** Mätzner assumes this as a second form of *maumetrīe*, but the latter was used for 'idol' as well as 'idolatry,' and this seems merely a plural in the latter sense. Perhaps Rolle had in mind the *deos alienos* of the Vulgate. **thē wylke.** Note the voiced initial *w*, instead of the unvoiced *hw* (*qu*) of Nth.; cf. *þē whilke* (l. 14). 27. **dispȳses**, MS. **dispyse.** Mätzner's alteration is adopted on account of the syntax. Horstmann retains the MS. reading without explanation.

Page 146, l. 1. **wondes.** For *o* for *u* (older *ū*) in such words cf. Morsbach, 'Mittelenglische Gram.,' § 125 b, and Heuser, 'Eng. St.,' XXVII, 353. 6. **rescheyves.** The writing with *sch* must be assumed to represent *s*, as in some other Nth. forms. 8. **āthes brēkynge; of new prēchynge.** The punctuation of this passage has met with curious treatment by different editors. Without illustrating these at length, I understand there are three ways of taking the name of God in vain, false swearing, vain preaching, and prayer without the spirit. The difficulty is that Rolle, forgetting the exact connexion, has introduced the three clauses in three different ways. 13. **ill styrringes.** 'Evil passions.' Even in Old English the word had acquired this metaphorical sense as applied to the mind, and it is so used several times by Rolle, as well as by other writers. 14. **pī halȳdaye.** Mätzner suggests that *þī* should be *þē*, 'the.' But the text of John Gaytryge's sermon, which quotes Rolle, shows that the commandment is given a direct and personal application, and the MS. is therefore correct. 15. **sesse.** This is OF. *cesser* in its exact form, while beside it is found ME. *cēse(n)*, MnE. *cease*. 16. **sithen, speciali.** This second 'manner' is omitted in Thornton MS., but is supplied from Arundel MS. of John Gaytryge's sermon, quoting Rolle. 31. **may wyne.** Perry wholly misunderstood the passage, and altered it. It is complete as it stands: 'That they may win that (which) God promised to such children, that is land of light.'

Page 147, l. 2. **slaa = slā.** The usual Anglian form of original *slahan*, WS. *slēan*. 10. **oys.** A form peculiar to the Nth. dialect; cf. Jameson's 'Scottish Dict.' 24. **neghtbōur.** The common occurrence of this form with excrescent *t* proves that it is a natural development in Nth.; it is still found in Scotch.

IV. A METRICAL HOMILY—THE SIGNS OF THE DOOM

The 'Metrical Homily' here chosen is from a MS. preserved in the Library of the Royal College of Physicians and Surgeons at Edinburgh, though also found in at least five different MSS. in Cambridge, Oxford, and London. A portion of this MS. was edited by John Small in 1862, and short extracts are given by Mätzner ('Sprachproben,' I, 278) and Morris ('Specimens,' II, 83). The collection was made about 1330—where is not known—and thus represents the Northern dialect of the first half of the fourteenth century.

The Homilies, of which this is one, became an important feature of literature, especially in the North. They consist of a paraphrase of the Scripture for the day, a homily interpreting it, and a legend or tale illustrating the subject. Gradually there grew up a series of these poetical homilies connected with the

gospel story, as in the 'Ormulum,' or with the Scripture lessons assigned by the church, as in the collection from which our extract is taken. These followed the ecclesiastical year, beginning with Advent, our selection being that for the second Sunday in Advent. The metre is the common rimed couplet of four stresses.

Page 148, l. 1. **Tōday.** The second Sunday in Advent, the gospel for which is Luke xxi. 25. The writing of *Louk* for *Luk* indicates a true long *ū*, as sometimes in Nth.; cf. Behrens, 'Franz. Sprache in England,' p. 118, **11. bēs rędnes.** Based on Matt. xxiv. 29, probably associated with Joel ii. 10, 31; iii. 15, the second of which mentions that the sun shall be turned into blood. Cf. 150, 20–24. **13. For mihtī gāstes.** The Vulgate has *nam virtutes coelorum movebantur*, translated in our version 'the powers of the heaven shall be shaken.' The mediæval poet has taken *virtutes* to refer to one of the orders of angels, the 'virtues' of Milton's 'Par. Lost,' V, 772. **26. froit.** An occasional form of OF. *fruit*; cf. Behrens, 'Franz. Sprache in England,' p. 159.

Page 149, l. 7. **Als quā sai.** 'As any one may say.' The two lines are the poet's explanation, Christ's words ending with l. 6. The next lines seem to be put in direct form, though not based on any words of Christ. **9. Quen þis werld.** Cf. note on 77, 6. **12. For mī kinrīc.** No doubt based on Luke i. 33. **15. þē maister.** The reference is not clear, unless intended for Jerome, mentioned at 151, 13. **23. Kinrīc sal.** See Luke xxi. 10; Matt. xxiv. 8. **27. sal bāld bāret.** Probably the true reading should be *bālde*, the adv., 'quickly.'

Page 150, ll. 11–12. **bāret ... mę̄t.** Perhaps *met* is short here, as indicated by such spellings as *mett* in other Nth. texts. **20. As sais Jōēl.** In three passages Joel mentions such signs, ch. ii. 10, 31 and iii. 15.

Page 151, l. 13. **Sain Jerōm telles.** These 'signs of the doom,' attributed to Jerome, are not found in his works as printed, and probably belong to some work now lost. Jerome is said to have found them in a Hebrew MS., as in 'Cursor Mundi,' I, 22, 441:

> 'Als Jeromme that well man trowes
> Telles he fand in the bok of Juwis.'

Page 152, l. 24. **And cum.** This line is followed by thirty-three Latin verses on the signs, with the rubric: *Isti versus omittantur a lectore quando legit Anglicum coram laycis.*

Page 154, l. 1. **A blak munk.** That is, one who wore a black habit, as a Benedictine; cf. reference to 'Rule of Saint Benet' (155, 24). A similar tale is told by Roger Wendover in his 'Chronicle' under the year 1072. **8. Faiþful frēndes.** The MS. clearly needs emendation, and the Camb. MS. seems to suggest the proper correction. **13–14. felid ... telld.** The rime is no doubt monosyllabic, with shortening of the vowel of *fēld* (⟨*fēldd*), as in weak preterits of the first class.

Page 155, l. 28. **o̧verlōp.** The strict English form would be *o̧verlēþ* (Camb. MS. *overlepe*), and this one is probably due to analogy, or possibly to borrowing from some of the cognate languages. Cf. English *lope*, *elope*.

V. THE SONGS OF LAWRENCE MINOT

The 'Songs of Minot,' preserved in a single MS., Cotton Galba E IX of the British Museum, have been frequently edited. They are found in Ritson's 'Poems on Interesting Events in the Reign of Edward III' (1795, 1825), Wright's 'Political Poems' (1859), 'Quellen und Forschungen,' 52 (Scholle, 1884), and in Hall's 'Poems of Lawrence Minot' (1887). Extracts occur in Mätzner ('Sprachproben,' I, 320), Morris ('Specimens,' II, 126), Wülker ('Lesebuch,' I, 77). Nothing is known of the author but his name, and his probable connexion with the Minots of Yorkshire or Norfolk in the fourteenth century. The poems were clearly written at the time of the events they celebrate, so that they represent the Nth. dialect of about 1333 to 1352, somewhat modified by a Midland copyist; or possibly Minot lived on the border of the two districts and used a mixed dialect. Cf. Scholle, p. vii; Hall, p. xvii.

The 'Songs of Minot' represent the native political lyric which had been first written in England in the second half of the thirteenth century, beside Latin and Anglo-Norman poems of the same sort. The poet takes a religious-patriotic view of Edward's victories, with special emphasis of the attitude of Englishmen toward Scotchmen at this time. The poems chosen are the first three of the eleven preserved as a monument to Minot's genius. The metres of the poems are various, as indicated by the selections, and in this respect suggest the new metrical influences of the fourteenth century.

The language of Minot's poems, as already indicated, is a mixture of Northern and Midland, very likely due to a scribe. It has been especially investigated by Scholle and Hall, as by Bierbaum, 'Über Lawrence Minot und seine Lieder' (1876), and Dangel, 'Lawrence Minot's Gedichte' (1888).

Page 157, l. 9. Līthes. All but two of the poems are introduced by short couplets giving the general subject of the poem. A few of the main points of history leading up to the battle of Halidon Hill may be briefly given. Robert Bruce had gained the independence of Scotland by the treaty of Northampton (1328), but died the year after, leaving the throne to a son eight years old. Civil dissensions arising, Edward Balliol, claimant of the Scottish throne, headed an invading force of English barons who claimed estates in Scotland (1332). Edward III, who had opposed the expedition until its success in the crowning of Balliol at Scone, now obtained an acknowledgement of England's suzerainty and supported Balliol when driven from the realm. He personally appeared before Berwick, which had been garrisoned by Balliol's opponents, after Easter, 1333, and the battle chronicled resulted (July 19) from one of several unsuccessful attempts of the Scots to raise the siege. **11. trōne.** The correct form of the word from OF. *trone*. Later, written *throne* in imitation of Lat. *thronum*, the *th* came to be pronounced like *th* from OE. *þ*. Cf. *author*, *authority*, *apothecary*. **18. dresce mȳ dēdes.** Perhaps in allusion to Ps. xc. 19; cf. 103, 19. **19. In þis dāle.** As in other of the 'Songs,' the first line of each stanza after the first repeats an emphatic word, sometimes a phrase, from the last line preceding. In the only departure from this (159, 9) *þat forsaid toune* takes the place of *Berwick* in l. 8. For such linking of stanzas cf. 'Pearl,' 'Aunters of Arthur,' and other poems of Northern or Northwest Midland. **20. dērne**, MS. dern. Hall thinks MS. reading a mistake for *derv* (*derve*), 'terrible, injurious.' But OAng. *dērne*, WS. *dīerne*, means

'deceitful, evil' as well as 'secret,' and I see no reason to change the word, except to add *e* for metrical reasons. **23. þē Frenche men.** This refers to a fleet of ten ships, armed and victualled by Philip VI of France (*Philip Valays* of 158, 29), which had been sent in aid of the Scotch besieged in Berwick, according to the French chronicler Nangis. These were defeated and the vessels destroyed by the English fleet at Dundee (1333). **26. noght worth a p̄re.** A great number of such expressions are common in Middle and Modern English; cf. Mätzner's 'Grammar,' II, 2, 128, and the expression at 158, 8.

Page 158, l. 2. **þē bo̅ste of Normandȳe.** The French ships were armed with Norman sailors, between whom and those of the Cinque Ports there was long rivalry. This probably, rather than any traditional hatred of the Norman conquerors, accounts for the exultation over their defeat. **8. And all þaire fāre.** Note development in meaning of *fāre*, 'journey, going,' into 'behavior, boasting,' and cf. the same change in the word *gait*. **26. On þē Ērle Morrē.** A rising at Annan (Dec. 13, 1332), under John Randolph, Earl of Moray, and Archibald Douglas, Earl of Dunbar, had expelled Edward Balliol from the kingdom. **27. þai said.** The Scotch who had been expelled from the kingdom by Balliol and his English followers. **29. Philip Valays.** Note the form at 159, 21 and the MS. reading. See note to 157, 23.

Page 159, l. 7. **all nāked.** The stripping of the dead is illustrated by Barbour's 'Bruce,' XIII, 459 f, in describing the battle of Bannockburn:

> 'And quen þai nakit spulȝeit war
> Þat war slayne in þe battale þar,
> It wes, forsuth, a gret ferly
> Till se sammyn so feill dede ly.'

18. At Dondē. See note to 157, 23. **29. Sir Jo̅n þē Comyn.** John Comyn of Badenoch, killed by Robert Bruce in the church of the Minorites at Dumfries, Feb. 10, 1306. Comyn was Balliol's nephew and heir, and at his death Bruce definitely began the struggle for independence which ended at Bannockburn. For the Scotch use of *the* before a surname see note in Boswell's 'Tour of the Hebrides,' Sept. 6.

Page 160, l. 1. **þāre dwelled.** That is, before Berwick. **3. Hē gaf gude confort.** He encouraged them in a speech that lasted as long as it would take to go a mile. Examples in Mätzner ('Wörterbuch') show this to have been a common expression. *On þat plaine*, as Hall points out, is not appropriate to the hilly ground of the battle field, but as Minot was probably not present at the battle he uses the expression in a general sense. **13. Now for tō tell.** Evidently this is not a title in the strict sense, since Minot gives no account of Bannockburn. He regarded Halidon Hill as avenging the former defeat of the English, and in this sense is to treat *þē batayl of Banocburn*. **17. manȳ saklȩs.** Hall quotes Barbour's 'Bruce,' XX, 173 f, where Bruce says:

> 'For þrou me and my warraying
> Of blud þar has beyne gret spilling
> Quhar many sakles men wes slayne.'

21. Saint Jo̅hnes to̅un. This is Perth, occupied and fortified by the English after defeating the Scotch at Gaskmoor, or Dupplin Moor. A church in Perth is dedicated to St. John, and this accounts for the name; cf. Froissart's use of

St. Jehanstone. 27. **Striflin.** That is, Stirling, the Strevillyne of Barbour's 'Bruce.' Perhaps the allusion is to Wallace's most famous victory over the English, Sept. 11, 1297. The implication then is that Halidon Hill had wiped out the memory of that defeat also.

Page 161, l. 1. **þē pilērs.** Mätzner, Wülker, and Kölbing take this as meaning 'pillars,' either of state or boundaries of the country, but Hall is doubtless right in assuming connexion with OF. *pilleur* (AN. **pilēr*?), 'robber, raider.' 6. **Rughfute riveling.** The riveling is a rough shoe made of raw hide tied round the ankle, and regarded as characteristic of the Scotch, who were thus called 'rough-footed.' So Skelton's 'Of the out yles the roughe foted Scottes,' I, 187. **Bērebag.** So called because the Scotch soldier carried his own baggage and was thus enabled to move more rapidly. 8. **Brughes.** The MS. *brig* represents one pronunciation of the name; but Minot uses *Bruge* (*Brughes*, *Burghes*), all with *u*, and the last no doubt a scribal error for *Brughes*. The place was well known to Scotchmen in the fourteenth century. 11. **bētes þē strētes.** Hall thinks imitated from OF. *batre les chemins*, 'to riot or revel in the streets,' but the idea of revelling seems hardly appropriate, and the words may mean no more than 'go about the streets persistently.' 23. **How Edward.** Out of the war with Scotland came the great Hundred Years' War with France, Scotland's ally. At the beginning of 1338 Philip attacked Agen in Gascony, still claimed by England, and Edward was forced to declare war. He crossed to Antwerp (162, 30) in July, in order to negotiate with his allies the princes of the Low Countries, and Lewis of Bavaria (162, 9), the German emperor.

Page 162, l. 3. **his right.** The claim to France, more or less fully acknowledged by the French king himself. The war on the part of France was virtually a struggle to free all French territory from English rule, an end accomplished at the close of the Hundred Years' War in 1451. 9. **þē Kaysēr Lowis of Bavēre.** Louis IV, German king and Roman emperor from 1314 to 1347. Though he had been excommunicated by the pope, the electors, in the very month of Edward's departure for the continent, declared his power was derived from them and not from the church. The reception of Edward was by no means as flattering as Minot makes out. 31. **mādē his monē playne.** Louis had made Edward vicar-general of the empire, and he was empowered to coin money to pay his German auxiliaries. Jehan le Bel says he 'coined money in great abundance at Antwerp.'

Page 163, l. 23. **at Hamton.** On Oct. 4, 1338, the French from fifty galleys landed at Southampton, plundered the country, and burned the town on hearing that the English were gathering to oppose them. So rapidly did the country rise that some three hundred of the French were cut off from their ships.

Page 164, l. 7. **þan saw þai.** The poet has reversed the order of events, for the *Christopher* was taken by the French before the attack on Southampton (Froissart's 'Chronicle,' ch. 44). It was later recovered by Edward after the battle of the Swyn. 8. **Aremouth.** The word has gained an initial *y* in modern English, as also the river Yar, on which it is situated. 11. **galays.** These were long narrow boats used by the Genoese and sailors of the Mediterranean. In 1337 Philip had engaged twenty such galleys of two

hundred oars from Ayton Doria of Genoa, who was present at the attack on Southampton. **12. tarettes.** A large vessel like a galley, but commonly used for transport. **13. galiȳtes.** These were similar to the galleys, but about half the size, each carrying a crew of one hundred men. **17. Edward ōure King.** Hall notes that no chronicler mentions the presence of Edward at the fight, and perhaps the poet has confused the ship *Edward* with the king, a suggestion of Sir Harris Nicholas in his 'History of the Navy,' II, 37. **27. put þām tō wȳre.** Surely Hall is wrong in suggesting that this may mean 'put the enemy in distress.' It is, as Skeat explains, 'prepared themselves for battle,' 'put themselves (in readiness) to war.' **32. withōwten hīre.** Literally, 'without hire or recompense,' but idiomatically for a conquered and ignominious condition. Similarly in Minot's 'Poems,' VII, 65–66:

'Inglis men with site þam soght
And hastily quit þam þaire hire';

that is, vanquished them.

Page 165, l. 9. sen þē tīme þat God was born. Often used to emphasize a situation by referring to a long time in general. **26. with his hālȳ hand.** The expression depends ultimately, doubtless, on the biblical use of the hand as a symbol of power and goodness.

VI. BARBOUR'S 'BRUCE'—THE PURSUIT OF KING ROBERT

The 'Bruce' occurs in two MSS., of which the better, so far as it is complete, is MS. G 23 in the Library of St. John's College, Cambridge. This was made the basis for the edition of Prof. Skeat for the Early English Text Society (Extra Series 12, 21, 29, 55), though the Edinburgh MS. had to be used for the first four books. The 'Bruce' has been frequently printed, as by Hart (1616), Pinkerton (1790), Jamieson (1820); see also a list of editions in Skeat's 'Introduction,' p. lxvi. Selections are found in Mätzner ('Sprachproben,' I, 371) and Morris ('Specimens,' II, 203). The poem was completed in 1378, and therefore represents Northern of the last half of the fourteenth century, except for such differences as come from a later copyist, the MS. being a little more than a century younger than the original. As Barbour was Archdeacon of Aberdeen from 1357 to his death in 1395, the Northern dialect here represented is that of the extreme North or Scottish English. Of Barbour little is certainly known. He first appears in 1357 as Archdeacon of Aberdeen, when he was granted a safeguard to study at Oxford. From the responsible position he held at the time it is inferred that he was born about 1320. He again visited England for study in 1364, and passed through it to France in 1365 and 1368. He attained further honor in his own country, held a position in the king of Scotland's household, and was granted several sums of money by the king at different times. According to Wyntoun's 'Chronicle' (about 1420), on the authority of which rests the ascription of the 'Bruce' to Barbour, he also wrote the 'Brut' and a genealogical poem called the 'Original of the Stuarts.' Two other works formerly attributed to Barbour, the 'Siege of Troy' and a collection of 'Lives of Saints,' have been shown not to belong to him.

The 'Bruce' is a national epic, valuable alike for history and literature. It consists of some 13,500 lines, and covers the years 1286 to 1335. The passage chosen is a good example of the poet's power in vivid narration. Just before the selection begins, John of Lorn had sought to track the king with a hound, and five of his men had been slain by the king and his foster-brother. The latter then retreat before Lorn's approaching company to a wood near at hand.

As already noticed the MS. is younger than the work itself by a century, and this no doubt accounts for some differences in language, or at least in orthography. For example, the Northern use of *i* (*y*) after a long vowel to indicate length becomes more common. Compare such rimes as *gāne, wayn*; *þair, mār*; *agāne, vayn*; and such forms as *soyn*, 'soon,' *heir*, 'here,' *deill*, 'deal,' in the early lines. Perfect participles ending in *t* instead of *d* are also common.

Page 166, l. 7. begōuth. Note this interesting example of analogy, formed on the model of *cōuth*, preterit of *can*. This was perhaps assisted by the constant confusion, especially in Nth., of *can* and *gan*. **9. His man.** Really his foster-brother, as shown by 173, 15, and by references in Book VI of the poem. **10. Abȳde ȝhē heir.** 'If you abide here'; the subjunctive in condition.

Page 167, l. 9. Jǭhn of Lōrne. John MacDougal of Lorn in Argyleshire, son of Allaster of Lorn, and descendant of Somerled, Thane of Argyle and Lord of the Isles, who fell at Renfrew in 1164. See Scott's 'Lord of the Isles' and notes thereon.

Page 168, l. 11. lēst on līf. 'Last, or remain, alive.' **27. Schir Āmēr.** Sir Aymer de Valence, Earl of Pembroke and leader of the English forces. He was a son of the half-brother of Henry III.

Page 169, l. 1. Schir Thomas Randale. Sir Thomas Randolph, Bruce's nephew, first fought with the latter until made prisoner at the battle of Methven. Then, submitting to the English, he even took part against Bruce as indicated here. Later, captured by Douglas, he was reconciled to his uncle and made Earl of Moray (Murray). He now distinguished himself by many exploits, especially the capture of Edinburgh. See note to 'Lord of the Isles,' VI, 1, and reference to his descendant John Randolph in Minot (158, 26). **9. And hōw.** An adventure narrated in Book VI, 589 f. Five of Lorn's men had overtaken Bruce and his brother, but were all slain by the two, Bruce himself killing four. **17. And hē wār bǭdyn all ēvynlȳ.** 'If he were bidden or challenged (to fight) on even terms.' **19. And þē gud kyng.** This adventure is told with some alterations by Scott in 'Lord of the Isles,' III, 18 f. **26. Līk tō lichtmen.** Skeat explains as light-armed men; cf. *light-horse*.

Page 170, l. 14. bryng hym þan of daw. 'Bring him then out of day,' that is, 'kill him,' a common ME. idiom.

Page 171, l. 3. slew fȳre. Skeat replaces *slew* of both MSS. by *strake*, 'struck,' on the ground that *slew* must have been repeated from the preceding line. On the other hand, *slew fīre* is not uncommon (cf. the 'Bruce,' XIII, 26), and I prefer to keep the MS. reading. **10. At a fȳre.** 'At a fire,' with

stress on *a* 'one.' The line might still be improved by an extra syllable, though the cæsural pause may account for its absence.

Page 172, l. 1. **And slēpit nocht.** Skeat reads *And slepit nocht* [*full*] *ynkerly*, [*Bot gliffnyt up oft*] *suddanly*, supplying the bracketed words from Edin. MS. With the different punctuation I have given the line, no syntactical alteration is necessary. 6. **as fōūl on twist.** Supposed to be indicative of readiness for any emergency; cf. MnE. 'with one eye open' in similar connexion.

Page 173, l. 18. **his trist.** Bruce had divided his men into small bands when hard pressed, and had appointed a rendezvous for such as should not be taken. His party alone had been followed by the hound.

Page 174, l. 29. **Jāmes of Dōūglas.** This Douglas, son of William who supported Wallace, had been the first to take up the cause of Bruce, and one of the most faithful. 31. **at.** *At* for *þat* is especially common in Nth., though no doubt found in all dialects as a reduced form of the spoken language. 32. **Edward þē Bruce.** The brother of Robert, fiery and headstrong. As Barbour says, thinking Scotland too small for him and his brother he tried to make himself king of Ireland, but lost his life in the attempt; cf. Book XVIII.

THE SOUTHERN DIALECT, INCLUDING KENTISH

Southern English represents several somewhat different varieties. In our selections the first three pieces are of Early Southern, in which, as in Early Midland, certain changes of Old English forms had not yet taken place. The third of these pieces belongs to Southern of the so-called Katherine group (Morsbach, 'ME. Gram.,' § 3, anm. 2), that is, shows a Southern English with Midland peculiarities. This is due to the fact that the works of this group were written in a northern part of the Southern region near to Midland. Selections VI and VII represent Kentish English, the remaining pieces Southern of the normal type.

I. THE POEMA MORALE, OR 'MORAL ODE'

This characteristic bit of mediæval moralizing exists in six MSS., Digby A 4, Egerton 613 (two versions), and Jesus Coll. I Arch. I 29 at Oxford, Lambeth MS. 487 in London, Trinity Coll. MS. B 14, 52 at Cambridge. Not all of the MSS. are complete, and of the two groups into which they fall, the versions in Digby and Trinity Coll. MSS. are Kentish rather than Southern in the more restricted sense. Of the Sth. texts those of the Egerton MSS. are, on the whole, the best, and a selection from Egerton e is here taken. The poem has been edited at various times, as by Furnivall in 'Early English Poems and Lives of Saints,' p. 22; by Morris ('Old English Homilies,' I, 159, 288, II, 220); ('Specimens,' I, 194); ('An Old English Miscellany,' p. 58); by Zupitza ('Anglia,' I, 6); ('Übungsbuch,' p. 58); by Lewin in a critical edition (1881). The poem was written about 1170 in South Hampshire or Dorsetshire, and thus represents Southern of the middle district.

The 'Moral Ode' consists of 396 long lines of seven stresses, riming in couplets. As in the 'Ormulum,' with the metre of which it has close relations, the long line is divided into two parts by a cæsural pause after the fourth stress, so that each couplet might be printed in alternate lines of four and three stresses, riming *abcb*. Indeed this is the original of such a stanza in MnE. poetry, and this is the second stage in the development from the unrimed lines of Orm. The lines are often irregular in number of syllables, though many irregularities may be easily explained as due to lost inflexional or other elements, or to metrical peculiarities of Middle English. In content the poem begins with a penitential portion of eighteen lines in the first person, after which the moralizing becomes more general in character, and approaches that of a sermon in verse. The selection gives a good idea of the whole.

The language of the 'Ode' shows a mixture of early and late forms to some extent; cf. *ē* for OE. *ā* in the rimes of the first couplet, but *ā* usually.

Besides, *æ* (*e*) appear for WS. *æ*, *ea*; *ā*, *ēa* for WS. *ǣ*, *ēa*, beside *e* = *ę̄*; rarely *ēo* (*eo*) are found for WS. *ēo* (*eo*), and the former sometimes for WS. *ō*, as in *wēorde*, 'word.' These are in addition to the typical Sth. *ü*, *ï* for WS. *y̆*, though occasionally *y*, as in *ÿlde*, *yfele*. As to inflexion, Southern is more conservative than Midland or Northern, and therefore longer retains Old English forms; there are also typical Southern peculiarities which have been already sufficiently mentioned in the Grammatical Introduction.

Page 176, l. 1. **Ich.** This is the characteristic Sth. form of the pronoun with *ch* as in *church* from OE. *c* after a palatal vowel. Note that both other forms also occur in the selection, *ic* (l. 2), *I* (l. 4). 1–2. **lo̤re . . . mo̤re.** A later Sth. rime modifying the earlier *lāre . . . māre*; cf. *mäȝe . . . äȝe* (177, 5–6) and *āre . . . māre* (177, 29–30). 3. **habbe.** The Sth. dialect, with characteristic conservatism, retains such forms in case of verbs with different consonants in infinitive and 1st pers. pres. indic. from those in the remaining forms. Thus inf. *habbe(n)*, *libbe(n)*, *segge(n)*, and 1st pers. pres. indic. *habbe*, *libbe* (177, 9), *segge*. In the Anglian districts, on the other hand, under the influence of analogy, these have adopted the consonant of the other pres. forms, as *have(n)*, *live(n)*, *seie(n)*, 'have, live, say.' Cf. Gram. Introd., § 165. **ibēon.** Note the characteristic Sth. prefix, a retention of OE. *ge* in reduced form. In this particular instance no OE. *gebēon* is known to literature, but it must have existed in speech at some time. 7. **chilche.** This difficult word, known only here, seems to have been formed from *child* (OE. **childs* for *childs* f.), as OE. *milts*, ME. *milce* (*milche*?), is formed from *mild*. At least the meaning, 'childishness, puerility,' seems to fit the connexion fairly well. 21. **þe wēl ne dēþ.** The OE. relative particle *þe* was retained in Sth. much longer than in the other dialects.

Page 177, l. 6. **ōðres.** Note retention in early Sth. of the OE. inflexion of the adjective. 12. **Manïes mannes.** The line has met somewhat different interpretations, based especially on different conceptions of the words *iswinch* and *unhōlde*. Morris ('Specimens,' I, 350) translates: 'Many a man's sore trouble often hath ungracious ones, i.e. a man often receives no return for his hard work.' In 'OE. Homilies' he translates quite freely: 'many kinds of sore trouble have often the infirm.' Lewin, opposing this quite rightly, finally proposes *manches Mannes sauer errungenen Gewinn haben oft die Widersacher*. The sense is 'Ungracious (or hostile) ones often obtain (have) the sore labor (or gain) of many a man,' and is probably based on Ps. xxxix. 6 and Luke xii. 20. 13. **dōn ā fürst.** Literally, 'put in time or respite,' and so 'put off, or delay.' The phrase occurs in several forms, *dō in firste* ('OE. Homilies,' I, 71); *dō . . . on frest* ('Havelok,' l. 1,337), printed by Skeat and Holthausen *onfrest*. 21. **of wȳfe ne of chïlde.** The imperfect rime *childe . . . selde* is at once suspicious, and it is not strange to find other MSS. with a different reading. The Lambeth reading *of ȝefe ne of ȝelde*, 'of gift nor of reward,' is probably the older form of the line. 23. **wēl oft and wēl ȝelōme.** A common phrase with two words for the same idea, in order to give it emphasis. 26. **sē irēve.** The prevalence of *þē* for OE. *sē* throws some suspicion on this expression. Digby MS. reads *ne his serreve*, 'nor his sheriff,' and Trin. MS. *ne ne scirreve*. Lewin reads *ne þe scirreve*.

Page 178, l. 12. **And þē ðe māre.** 'And the one who may do no more (may do) with his good intention as well as he that has many pieces (manke)

of gold.' **14. kan māre þanc.** The phrase is OE. *cunnan þonc*, beside *witan þonc*, and it has survived in Scotch *con thanks*. Literally, 'to know thanks,' it is equivalent to 'feel (or express) gratitude, show favor.' 'And often God feels more gratitude to those who give less to him.' **19. biŏ.** The plural subjects are thought of as one and so take singular verb; cf. *dēŏ . . . ŏenchet* (178, 22), where the verbs agree with *hwet*, not with *wihte*, the real subject.

Page 179, l. 3. **scule wē.** Based on the OE. form when the verb was immediately followed by *wē* or *gē*. In Middle English it was extended to the third personal pronoun also; cf. *scule hē* (l. 6), but *Nabbeŏ hī* (l. 9). **8. vele.** Note this first case in our Sth. selections of initial *v* for older *f*. **28. cōm tō manne.** 'Came to man's estate.'

Page 180, l. 4. **ŏe bēot and bę̄at, and bīt.** All texts give two verbs with initial *b*, indicating intentional alliteration, and Lambeth agrees with our text in its three forms *biet* and *bit* and *bet*. Three verbs that are possible in the place are OE. *bētan*, 'to amend,' *bedan*, ME. *bę̄ŏe(n)*, 'to pray,' *biddan*, 'to pray, beseech.' The line then means: 'therefore he is wise who repents and prays and beseeches before the judgement.' Lewin bases his text on the Trin. MS. reading, *þe bit and biȝet and bet*, though I cannot think with a better result in sense. The former are all contracts of the third singular present indicative. **7. Sünne lę̄t þē.** 'Sin leaves thee and thou not it (or them), when thou art not able to do them any more.' *Hī* may be either sing. or pl., but *is* of the following clause seems to indicate that it was considered plural. Lewin alters *is* to *hi*, in order to agree with the former word. This line and the next, owing to omission and erasure, cannot be easily made out in the MS. **8. þe swā abīt.** 'Who so awaits,' that is as implied in the preceding line. **14. Ne bidde nā bet.** 'Should (I) not better pray to be loosed from bonds on doomesday?' Several MSS. have *ich* (*ic*) after *bidde*, and it has probably disappeared from our text. **20. Ŭvel is.** 'Evil is it to suffer seven years for seven nights' bliss.' *Ŭvel is* must be understood with the next line also. **32. For tō ŏē müchele mürcŏe.** 'For to come to the great bliss (of heaven) is happiness with certainty.'

II. ARTHUR'S LAST BATTLE—FROM LAYAMON'S 'BRUT'

Layamon's 'Brut' is preserved in two MSS. of the British Museum, Cotton Calig. A IX and Otho C XIII, from the former of which, the older, our selection is taken. Both texts were edited in 1847 by Sir Frederic Madden, and extracts are given in Mätzner ('Sprachproben,' I, 21), Morris ('Specimens,' I, 64), Zupitza-Schipper ('Übungsbuch,' p. 92). The poem is the work of a priest Laȝamon (later text Lawemon), but more commonly written Layamon, son of Leovenath, of Arnley in North Worcestershire, and was composed about 1200. The language therefore represents Southern of the Western division during the last of the twelfth and beginning of the thirteenth century.

The 'Brut' consists of some 16,000 long lines (a little less than 15,000 in the later MS.), or double the number of short lines as printed by Madden. These long lines are based on the older alliterative line and show frequent alliteration, though rime and assonance are also common in binding together

the two half-lines. The metrical form is thus a combination of the old alliterative line and a rimed couplet of irregular character. Compare the similar lines of the 'Bestiary.' In content the poem is a legendary history of Britain from the destruction of Troy to the year 689 A.D. It is based on the Norman Wace's 'Roman de Brut,' which in turn has its source in Geoffrey of Monmouth's 'Historia Regum Britanniae.' Our selection begins with l. 13,996 (Madden, l. 27,992). Arthur, the world conqueror, resting after the great feast on the overthrow of the emperor of Rome, is summoned home by bad news as told in the passage chosen.

The language of the poem does not greatly differ from that of the 'Moral Ode.' It shows a similar mixture of older and later forms. OE. *ā* still appears as *ā*, long and short *æ* are not infrequent, and *eo*, *ēo* are still preserved. The latter, *ēo*, sometimes appears for Sth. *ę̄*, OE. *ā*, as in *wę̄ore*, unless indeed this is for Ml. *wēre* with close *ē*. Assuming the open quality of the first element, as indicating Sth. *ę̄*, the *e* is marked open (*ę̆*). Some Ml. forms certainly occur, as *hālden* (183, 7), beside *hālden* (l. 1416). Among consonants the Sth. initial *v* for OE. *f* is more common than in the 'Moral Ode.' Inflexions show the usual Sth. conservatism. A special peculiarity of Layamon is the more frequent final *n* of inflexional forms, either retained from an older inflexion or often added where not original; cf. Stratmann, 'Anglia,' III, 552. Examples are *tīden*, dsg. (181, 1); *dēoren*, nsg. (182, 13); *cumen*, pr. subj. sg. (183, 21); *warīen*, gpl. (184, 26), perhaps from OE. gpl. in *ena*. In many cases inflexional *en* is a retention of OE. dpl. *um*. The vocabulary of Layamon is full of epic phrases from OE. poetry, so full as to imply some considerable acquaintance with OE. literature. For convenience of reference the line-numbering of Madden is always given in the notes, except of course when referring to our selection.

Page 181, l. 1. **þā cōm þę̄r.** Arthur is represented as being *inne Burguine*, 'in Burgundy,' when the news reaches him. **āre.** Note retention of inflexional forms in the pronoun, as *āre* = OE. *ānre*; *þān* (l. 2) = *þām*; *hine* (l. 20); *āne* (l. 29) f. asg.; *þę̄re* (l. 23) = *þāre*. **3. Mōdrę̄de.** In setting out from England Arthur had left his kingdom in charge of Modred and Wenhavere (Guenevere), as told at l. 25,465 (Madden). **6. Swā naver.** 'Yet never would he,' the young knight. Only in a supernatural manner, through the vision, does Arthur find out the truth. **17. Walwain,** B text **Waweyn.** Better known as Gawain, nephew of Arthur and brother of Modred. **22. Wenhevēr,** B text *Gwenayfer*. The Welsh *Gwenhwyvar*, Eng. *Guenevere*. In Layamon she is simply an extremely fair woman, whose mother was of Roman birth and relative of Cador, Earl of Cornwall. **24. tō hę̄lden.** The MnE. form has lost final *d* and appears as *heel*, 'to incline.' Layamon's word seems to be Midland *hēlden*, a form which also appears in his text.

Page 182, l. 6. **dēore mīne swēorde.** This order of adjective and possessive is especially common in Layamon. Cf. the Elizabethan *dear my lord*.

Page 183, l. 20. **quēn.** The MS. *que* is probably for *quē* = *quēn*, though the commoner form in Layamon is *quēne*. **21. cumen.** The form is pres. subj. with excrescent *n* so common in Layamon. Cf. *þat Arður þider comen*, 'that Arthur thither should come,' ll. 27,078 and 19,110 (Madden). **27. þā sæt hit.** 'Then it remained all still.'

Page 184, l. 18. **wæisiδ**, MS. **wæisïδ**. Madden suggested the change, required by the context and alliteration. Cf. *feiesiδe makede* (l. 304) and *fæiesiδe* (l. 26,040), in both cases alliterating with *f*. Here, of course, we must assume an earlier *f–f* alliteration, now become *f–v* or *v–v* by the regular Sth. change of initial *f* to *v*. 28. **hā**, MS. **a**. The third personal pronoun, both masc. and fem., sometimes appears as *ā*, *hā*. 32. **Ā marȝen þat hit**. So MS., but the correct reading is probably *þā*, 'when.' The B text has *þo*, 'when.' **and Drihten**. 'And the Lord had sent it (the day),' perhaps referring to its favorable character for an expedition.

Page 185, l. 3. **Whitsǭnd**. Wissant, Pas-de-Calais, called *Hwitsand* in the 'Chronicle' under the year 1095. 17. **Childrīche**. Childric was in those days an emperor of great authority in Alemaine, as we are told at l. 20,198. Arthur had already vanquished him when he came to Britain to assist Colgrim and Baldulf, as told in the lines following that quoted above.

Page 186, l. 9. **Romenel**, MS. **Romerel**. Romney in Kent without doubt. 11. **avorn on**, MS. **avornon**. The phrase is an interesting example of the replacing of a worn-out form. *Avorn* is OE. *on foran*, the first part of which was no longer recognized in the reduced prefix *a*, and *on* was again added at the end. 26. **Ängel**. A king of Scotland whom Arthur had assisted to regain his kingdom. He had last led the foremost troop in the fight against 'Luces,' emperor of Rome. The name appears as *Aguisel* in Wace, *Augusel* (*Angusel*?) in Geoffrey of Monmouth, and is possibly Scotch *Angus*.

Page 187, l. 2. **ȝurren þā stānes**. 'The stones babbled with streams of blood.' 'Roar, resound' are too strong for *ȝurren*, which applied to the chattering of people, the whirring or singing of ropes when the ship met a storm; cf. *garring*, from the same root, at 224, 15. Such exaggerated descriptions of battle are common in Layamon, as in all early poetry. Cf. 189, 32.

Page 188, l. 1. **þē fēond hine ǣȝe**. 'May the devil take him.' 30. **and hū**. The B text really reads *and ou ȝeo hinne ende*, with place for an initial in the last word. I have assumed the lost letter to be *w*, and have otherwise used the forms of the A text. 31. **þā hēo hire seolf**. No doubt this is one of the alternatives beginning with *whaδer*, and we are to supply 'or whether' at the beginning of this line. The loss of the preceding half-line makes the connexion uncertain.

Page 189, l. 16. **swā þē rein falleδ**, MS. **rim falled**. The change of *rim* to *rein* was suggested by Madden. Either this is a scribal error or perhaps the noun was influenced by the verb, which appears as *rine—rinde* in the 'Brut.' 20. **Tambre**. The river Tamar between Devon and Cornwall. In Malory's 'Morte D'Arthur' the great fight is by the sea near Salisbury. 21. **Camelfōrd**. A Camelford, ford of the Camel, still exists in the north of Cornwall, but is naturally not connected with the Tamar river. Geoffrey of Monmouth says the battle took place near the 'river Cambula,' while Wace has *Camblan . . . a l'entree de Cornuaille, Tambre . . . en la terre de Cornoaille, Tamble*, &c. in different MSS. ('Brut,' l. 13,659). Confusion was easy because of the likeness between the MS. *c* and *t*, as well as by reason of the

frequent interchange of *l-r*. Once in the 'Chronicle' *Camermuða* is found for *Tamarmuða*. The reference to the sea (191, 1) would imply a situation like that of Camelford in North Cornwall, and probably *Cambre* for *Tambre* is the correct reading of the preceding line.

Page 190, l. 11. ī þare lasten. 'In the least (of the wounds),' as mentioned in the line preceding. **26. Avalūn.** Geoffrey of Monmouth twice speaks of the 'island of Avalon (Avallon),' and Wace follows with *en l'île d'Avalon* ('Brut,' l. 9,516). In the passage corresponding to this Wace does not say an island, and Layamon also makes no specific reference to the situation of the place, except that Arthur reaches it by sea (191, 1). See discussions of the place in 'Romania,' Oct. 1898, and 'Mod. Lang. Notes,' XIV, 47. **27. Argante.** Wace and Geoffrey of Monmouth make no mention of this personage. Malory names four, three queens and the Lady of the Lake. **30. And seoððe.** Wace makes mention of the tradition that Arthur should come again, and Layamon, whose more dramatic treatment is seen in several places, puts it into the mouth of Arthur himself.

Page 191, l. 7. þat wǭore. 'That immeasurable trouble should come (be) after (of) Arthur's death.'

III. 'THE LIFE OF SAINT JULIANA'

The Middle English prose 'Life of St. Juliana' is preserved in two MSS., Royal 17 A 27 of the British Museum, and Bodleian MS. 34 at Oxford. Of these the first is the purest text, and from it our selection is taken. Both MSS. were edited for the Early English Text Society by Cockayne in 1872 (EETS., 51), and extracts from both are found in Morris ('Specimens,' I, 96). The work was written about 1200, the MSS. themselves being of the first half of the thirteenth century. It belongs to the northern part of the southern district, and has certain Midland peculiarities. The language is therefore Sth. with Ml. coloring, as explained below.

The story of St. Juliana has already been told by Cynewulf in an Old English poem (cf. Garnett, 'The Latin and Anglo-Saxon Juliana,' Publ. of Mod. Lang. Ass., XIV, 279). It also appears, later than our prose version, in a poem of long rimed couplets (EETS., 51, 81) similar to those of the 'Moral Ode,' as also in an unpublished version; cf. Horstmann, 'Altenglische Legenden,' p. xlvi f. As to the form of the present 'Life,' at once noticeable for its alliterative and rhythmical character, there is difference of opinion among scholars. Ten Brink speaks of the long alliterative line or the rhythmical alliterative prose ('Eng. Lit.,' p. 199). Einenkel undertook to prove that this work, together with the similar 'Lives' of St. Margaret (EETS., 80) and St. Katherine (EETS., 13), are in long alliterative lines. From this view Schipper dissents ('Grundriss der englischen Metrik,' p. 75), and I see no reason to print otherwise than as prose, though the alliterative and rhythmical elements will be clear to any reader. The source of the story is that found in the 'Acta Sanctorum' for Feb. 16.

The language of the 'Juliana,' like that of the prose 'Lives' of St. Katherine and St. Margaret, is a mixture of Sth. and Ml.; cf. Morsbach, 'Mittelenglische Grammatik,' § 3, anm. 2; § 9, 1. The chief Ml. peculiarities are the close

instead of open *ē* = Goth. *ē*, WT. *ā*, as in Mercian and the non-Wessex dialects, and the preservation of the *u* and *o* mutations in many cases. In other respects the dialect is Southern, as shown especially by *e* for OE. *æ*, Ml. *a*, and *ü*, *ū* for OE. *y*, *ȳ*. Besides may be noted the preservation of OE. *ā*, as in the preceding early Sth. selections, and the diphthongs *eo*, *ēo*, *ēa* (*ea*). The long diphthong *ēa*, used for OE. *ēa* or *ǣ* and certainly a mere graphic representation of ME. *ę̄*, has been marked *ę̄a*. No voicing of initial *f*, *þ*, and *s* is indicated by the orthography, but unvoicing of final *d* is common.

Page 191, l. 16. **In ūre.** This paragraph is preceded by the rubric: *Her cumseð þe vie of seinte iuliane and telleð of liflade hire*, 'Here commenceth the life of Saint Juliana, and (it) telleth of her manner of life.' **Feader.** The usual form is the Sth. *feder* = Ml. *fader*. **ant.** The usual form in this 'Life,' as in the others of the group, so that the sign for *and* is regularly expanded *ant*. **23. Nichomēdes burh.** Nichomedia in Asia Minor, founded by Nichomedes I. In the OE. 'Juliana' it appears as Commedia. **25. of þē hę̄þene mę̄st.** 'Greatest of the heathen.' Not in the Latin, and Bodl. MS. has a different reading: 'Affrican hehte, þe heande ⁊ heascede mest men þe weren cristene.' Egge ('Mod. Lang. Notes,' I, 138) connects with following clause, but I think not rightly. **26. dērflīche hē drōh**, MS. **derfliche droh.** The *hē*, subject of *drōh*, was probably lost by scribal confusion with *he* of the preceding word.

Page 192, l. 3. **Maximian.** Really Galerius Valerius Maximinus, made emperor in 308, and one of six to claim the title at that time. He renewed the persecution of the Christians after Galerius had published an edict of toleration, but was soon overthrown by Licinius and died in 314. Here he seems to have been confused with Maximian, contemporary emperor of the West, as in the OE. poem. Perhaps this is due to the frequent confusion of the Eastern and Western Roman empires, as shown also in the next note. **4. Rōme.** Of course Constantinople, or New Rome, in this place. **mawmets**, MS. **maumez.** The final *z* is unquestionably equivalent to *ts*, and I have not hesitated to expand it as if it were an abbreviation; cf. 195, 22 and note on 194, 25. **13. ihǭndsald.** 'Betrothed wholly against her will.' **24. as me þā luvede.** 'As they (me) then loved,' that is, as was the custom of the time. **intō cure þet**, MS. ⁊. 'Into a chariot that the powerful rode in, or in which,' &c. Cockayne and Morris retain the MS. *and*, reading 'and ride into the kingdom.' I have assumed a phrase descriptive of the chariot, as *rīche* 'kingdom' seems inappropriate to a *rēve*. The Bodl. MS. has another descriptive phrase, *i cure up of fowr hweoles*, 'up into a chariot of four wheels.' **30. bālde hire seolven.** As it stands, *bālde* must be a past participle modifying *Juliane*. The Bodl. MS. has a sign for *and* before *sende*, making *bālde* and *sende* correlative, and this may be the correct reading. **32. wraðði sǭ.** 'Be angry as thou wilt.' Cf. a similar construction in the third pers. at 196, 10.

Page 193, l. 20. **Ich ülle**, MS. **ichulle.** The MS. form indicates that the two words were spoken in close association, as in the MnE. Sth. dialectal *chull*, 'I will.' **27. eis weis.** 'In any way (ways),' one of the few examples of the inflected adjective in this selection.

Page 194, l. 6. **Me hwet.** 'But what.' The conjunction *me*, 'but,' is found especially in Sth. texts, but apparently not in Old English or the Anglian

territory. This would argue for the Low German origin suggested for it. **16. wummon.** Note the influence of the preceding *w* upon the original *i* from *ī* in this word, causing it to become *u* as still preserved in the singular. **25. mix mawmets,** MS. **mawmex.** Final *x* in the latter may be due to scribal influence of the preceding word. **28. Elewsium.** Foreign derived names retain their original inflexion as here, remain uninflected, or assume the inflexion of English nouns, depending on the frequency of their usage.

Page 195, l. **8. ōw.** A dative which seems redundant to-day, but no doubt added force to the expression. It may be translated as a possessive, 'for your evil fortune.' **11. as rēve of þē burhe.** Since the 'Life' was too long to use as a whole, the trial before Eleusius has been omitted and the account resumed at the close of the tortures. The intervening part tells how Eleusius is again struck with Juliana's beauty, and how she again repels his advances. She is then beaten a second time, hanged by the hair, has boiling brass poured over her, and is finally cast into prison. Here a supernatural visitor tempts her, but she seizes him and makes him confess he is the devil. She binds him with chains and drags him to the judgement seat of the prefect. She is torn to pieces on a wheel of spikes, but is made whole by an angel, thus converting the executioners. She is thrust into a great fire, but an angel quenches it. This angers the prefect still more, and at this point the narrative is resumed. **31. ȝēldeð hire ȝarew borh.** The speech differs here from that in the 'Acta Sanctorum,' in which the devil speaks to Eleusius. *ȝarew borh* seems to be used ironically, or for punishment in general, the Bodl. text reading 'ȝeldeð hire ȝarow borh efter þat ha wurðe is.'

Page 196, l. **3. unwiht.** Not found in OE. literature, but there is the similar *untȳdre*, 'monster,' literally 'no child or offspring.' **8. uppon trēowe staðele.** Referring to Matt. vii. 24–27. **24. underfēng.** Cf. with this imperative *onderfang* of Layamon ('Brut,' II, 168) and *undervong* of 'Anc. Riw.,' p. 114. **wið meidenes imǣne.** No doubt alluding to Rev. xiv. 3–4. Cf. 'Pearl,' l. 1,096 f. **26. þē ēdie engles.** See, for an early instance of the same, the account of the death of Chad in Bede, 'Eccl. Hist.,' Bk. IV, ch. iii. **28. Cōm ā sēlī wummon.** This incident, given in the Greek and Latin lives, is omitted by Cynewulf. The name of the woman is variously given as Sophonia (Sophronia) and Sophia, the latter by Symeon Metaphrastes the Greek martyrologist. **32. from þē sǣa ā mīle.** In the territory of Puteoli, as stated by the first life in the 'Acta Sanctorum.' Later (the late sixth century) her remains were transferred to Cumae for greater safety. Thence, in 1207, they were said to have been taken to Naples, and various cities now claim them, as Brussels for example.

Page 197, l. **1. þē rēve.** In the 'Acta Sanctorum' no mention is made of the reeve's pursuing Sophie, and twenty-four, not thirty-four, are destroyed by the storm. **4. þrittuðe.** Both MSS. have the form, though surely for *þrittī*, 'thirty,' it would seem. **5. warp ham adriven.** 'Cast them, driven about, on (to) the land.' The change from plural to singular in the verbs is also found in the Bodl. MS. No doubt the general idea of storm was in the writer's mind. **8. þē sixtēnðe dei.** This is the day on which the Romish church celebrates her martyrdom, while the Greek church prefers Dec. 21.

IV. 'THE ANCREN RIWLE, OR RULE OF NUNS'

There are five MSS. of the 'Ancren Riwle,' Cotton Nero A XIV, Titus D XVIII, Cleopatra C VI in the British Museum, Corpus Christi Coll. MS. and Caius Coll. MS. 234 at Cambridge. Besides, a fragment of another MS. was recently discovered by Napier ('Jour. of Germ. Philology,' II, 199). The first of these, with collation of the second and third, was edited in 1853 for the Camden Society by Morton, and selections are found in Morris ('Specimens,' I, 110) and Mätzner ('Sprachproben,' II, 5). Our selection follows Morton's edition with such changes as are necessary by reason of Kölbing's collation with the MS. ('Jahrbuch für rom. und engl. Philologie,' XV, 180). The work was written about the beginning of the thirteenth century, in the middle part of the Southern district, since it mentions Tarente (Tarent-Kaimes or Kingston) near the Stour, in southwest Dorset. Morton suggested (Preface, p. xii) that its author may have been Ralph Poor, who was born at Tarente and died there in 1237. He was in turn bishop of Chichester, Salisbury, and Durham, and may have been a benefactor of the house since he was sometimes called its founder.

The 'Rule of Nuns' is a free and not uninteresting treatment of monastic duties, prepared for three sisters of good family who had become nuns. It consists of a brief introduction and eight parts: of religious service; keeping the heart; of monastic life; of temptation; confession; penitence; love; of domestic matters. Of plain and simple style, it contains numerous quotations from the Bible and the Church Fathers, with allusions to saintly lives but practically no legendary or moral tales. The first extract is from Part II (Morton, p. 64), dealing with each of the senses in turn; the second from part VIII (Morton, p. 414).

The language of the 'Rule of Nuns' is a pure Southern, and in most respects represents the normal form of that dialect, as distinct from the Early Southern of the preceding selections. OE. *ā* has now regularly become *ǭ*, the new diphthongs have developed, and the voicing of initial *f* to *v* is the rule. On the other hand, OE. *ēo* (*eo*), *ēa* (*ȝa*) still appear as in preceding texts. Occasionally *ēo* of this text is equivalent to open *ȩ́*, so that it has in such cases been marked *ȩ́o*. Consonant peculiarities are not numerous. The most important is *t* for initial *þ* after a word ending in *t* or *d*, as *vort tet* (l. 15) for *vort þet*; and *terefter* (l. 16) for *þerefter*. Further see Wülker in Paul and Braune's 'Beiträge,' I, 209.

Page 197, l. 14. Spellunge and smecchunge. Note the retention of the *unge* ending of OE. nouns.

Page 198, l. 1. þet hē ouh tō siggen. Morton connects with preceding clause, but it belongs, as Mätzner shows, to the following. '(To) that (which) he has to say, hearken to his words.' The peculiarity is in the repetition of 'his words.' **12. Paraīs.** Both this and *Paradīs* occur in OF. and ME. **22. þē cǭve, MS. coue.** The word here and in l. 24 has been somewhat variously read, as the MS. *u* may be *u* or *v*. Morton connects with OE. *ceo*(*h*), 'chough,' but this should appear with ME. *ch* initially, to say nothing of the diphthong. Mätzner assumes a Netherland *kauwe* (*kauw*), which ought, it would seem, to give *caue*; cf. MnE. *caw*. Icl. *kofa*, 'young pigeon,' is also not

easily connected with the word. To account for the form, and preserve the play upon the word, I assume OE. *cāf*, ME. *cǭve*, used in the first case as a substantive adj., 'the swift, the deceitful,' perhaps, 'the thief.' *Cumes te ȝeape*, 'comes the cunning (one),' of Titus MS. shows the understanding of another scribe, and that he had no idea of the chough or any other bird.

Page 199, l. 1. **Sed multi veniunt.** Matt. vii. 15, the Vulgate for which is *Attendite a falsis prophetis, qui veniunt.* 7. **Gābrīēles spǣche.** The annunciation, Luke i. 29. 11. **ōðer stūnde**, MS. **stude.** Morton's emendation is proved correct by the Latin text (Magd. Coll., Oxford), which conveys the same idea in positive form: *si tertius haberi possit.* 32. **Ancre and hūses lǣfdī.** 'There ought to be much (difference) between an anchoress and a housewife.'

Page 200, l. 3. **swīwike**, MS. **swiðwike.** Mätzner suggested retaining the MS. reading as OE. equivalent for MLat. *hebdomeda maior*, though no such OE. word is known. On the other hand, we know that OE. *swigdæg*, 'day of silence,' was used for the three days of Holy Week between Thursday evening and Sunday morning; cf. Ælfric's 'Homilies,' I, 218, 31; II, 268, 16. Besides, Titus MS. reads *swihende wike*, and Cleopatra MS. *swiwike.* The emendation therefore seems fully justified. The nuns are advised to make the whole week one of silence, rather than the customary three days. 9. **Ase Seont Anselme.** I have not found the original. 10. **chǣofled = chǣofleð.** Here, as occasionally in most texts, ð is replaced by *d* by scribal error; cf. 201, 17. 20. **Mulieres.** 1 Tim. ii. 12 and 1 Cor. xiv. 34. Neither passage is followed verbatim, the former more nearly. 22. **þē ǭverkūðre.** Morton's omission of *þe* led Mätzner to a wrong understanding of the words. He rightly pointed out Morton's error in connecting this with the following sentence. 27. **ase ich ǣr seide.** See 199, 31. 31. **Ad summam volo.** Morton has made the strange mistake of including *þet is* in the quotation as he translates it, and omitting *ich ulle*, &c. *þē ēnde of þē tāle* is of course a free rendering of *ad summam.*

Page 201, l. 5. **Censura.** I do not find the exact words here or in l. 7, but a discussion of silence with the figure of the water (201, 8) occurs in Gregory's 'Regulae Pastoralis Liber,' ch. 38 (Migne, 77, 53). 22. **Maria optimam.** Luke x. 42. The translation begins with the preceding verse.

Page 202, l. 15. **Bidden hit.** 'To ask (or beg) it, in order to give it away, is not the part (rihte) of an anchoress.' 19. **on ōu.** 'On yourselves,' that is, 'from your own wants.' **nenne mon.** That is, 'Let no man eat before you,' *mākīeð* of the preceding clause being understood with this also. 25. **Muche nēode.** That is, 'only much need.' 32. **heiward.** The hayward was the keeper of the cattle in the common field or pasture, and it was his duty to prevent trespass on cultivated ground. There was a similar officer of the manor or religious house. As the hayward could assess damages against the owner of cattle, a little flattery was evidently considered a good investment. **hwon me pūnt hire.** 'When men impound hire (the cow).'

Page 203, l. 1. **hwon me mākeð mǭne.** 'When they (me) make complaint in town of anchoresses' cattle.' Probably refers to formal complaint as before the town reeve.

V. ROBERT OF GLOUCESTER'S 'CHRONICLE'—HOW THE NORMANS CAME TO ENGLAND

This metrical 'Chronicle' is found in an earlier and later form. To the earlier belong the following MSS.: Cotton Caligula A XI, Harleian 201, Additional 19,677 and 18,631 of the British Museum, and Hunterian MS. at Glasgow; to the latter, Trinity Coll. MS. R 4, 26 at Cambridge, Digby 205 of the Bodleian, Univ. Library Ee 4, 31 at Cambridge, Lord Mostyn's Library 259, Pepysian Library, Magdalen Coll., Cambridge, 2,014, Sloane 2,027 of the British Museum, and Herald's Coll. MS., London. There are editions by Hearne (1724) based on the Harleian MS., and by Wright in the Rolls Series (1887) based on the Cotton MS. above. Extracts are found in Mätzner ('Sprachproben,' I, 155), Morris ('Specimens,' II, 1), Wülker ('Lesebuch,' I, 55). The name of the author is based on l. 11,748, which tells us that 'Robert þat verst þis boc made' saw the battle of Evesham (1265), but otherwise we know nothing of him. Stow first connected him with Gloucester, and this is at least probable. More recently Strohmeyer ('Das Verhältnis der Hds. der Reimchronik,' Robert of Gloucester's 'Archiv für neuere Sprachen,' LXXXVII, 217) shows that the 'Chronicle' is the work of three different authors, the first writing about the end of the thirteenth century lines 1–9, 137, the second (Robert of l. 11,748) lines 9,138–12,049, and a third writing and somewhat extending the later version. As the work mentions the canonization of St. Louis in 1297, it could not have been written before that event, and was probably composed about 1300 in Gloucester. The language is therefore Southern of that district about the last of the thirteenth century. Our selection is from Cotton Caligula A XI, the purest text, and consists of ll. 7,395–7,513 as printed by Wright above.

The 'Gloucester Chronicle' relates the history of England from the legendary Brutus to 1271. It contains about 12,000 long lines (12,600 in the later version), riming in couplets. As to the number of stresses the lines are sufficiently irregular to occasion considerable difference of opinion. They seem to be based on the line of seven stresses with cæsura after the fourth, but many lines occur with only six stresses. The sources of the poem are Geoffrey of Monmouth, Henry of Huntingdon, William of Malmesbury, and other chroniclers.

The language of the 'Chronicle' is some three-quarters of a century later than that of the 'Ancren Riwle.' The OE. diphthongs have entirely disappeared even from the orthography, and the language is therefore typical Southern in most respects. Among vowels there is a largely increased use of *o* for *u*. Among consonants the selection often shows loss of initial *h*, and a frequent voicing of *hw* to *w* which is parallel to some extent with that of initial *f* to *v*. Besides *ss* (*s*) regularly represents *sh*.

Page 203, l. 14. **haþ.** Note the unusually frequent omission of initial *h* in this text. 15. **hēr and ꝑr.** Other MSS., as Harleian 201, read *her and þer*, 'here and there,' perhaps a better reading. On the other hand, *hēr* is constantly used, especially in the Chronicles, for 'now, at this time,' and *þꝑr* may be due to a scribal misunderstanding of *hēr* in this sense. 17. **Verst.** Strict Sth. would require *vürst*, but *e* for *ü* is found in a few words in this writer. See *herne* (*hērne*) 204, 8 for Sth. *hürne*, but the latter in rime (204, 18), and cf. Morsbach, 'Mittelengl. Gram.,' § 133, anm. 2.

Page 204, l. 1. As þē hēnde. 'As the courteous one,' so 'politely, courteously.' **3. þē grę̄te ō̄þ.** See Freeman's 'Norman Conquest,' III, 91. **14. þat was al.** The Harleian MS. reads *þo* after *þat*, 'that then was,' &c., but it seems no material improvement. **27. Godwine.** The crime was attributed to Godwine, though committed by followers of Harold I. William now gives this as a reason for making war on Godwine's son Harold. **28. Alfrę̄d.** The brother of Edward the Confessor, son of Æthelred II and Emma of Normandy, the latter sister of William the Conqueror's grandfather. *Cosīn* is therefore very freely used, as often in earlier English and sometimes to-day. On Alfred's return to England from Normandy in 1036 he was seized, his followers killed or enslaved, and his eyes torn out at Ely. **31. Seint Edward.** Edward the Confessor, who had promised the throne to William, so the latter said. That he was 'next of his blōd' (l. 32) was of course true.

Page 205, l. 13. Sein Walrī. This is St. Valéry at the mouth of the Somme, with *w* for OF. *v*, as in Wace's *Waleri*. **14. and abide mō̄.** We should expect a sing. pret. to agree with *wende*, *hadde*, but the construction certainly changes in the following clauses, and there is no reason to suppose it may not here. Otherwise we must assume an infin., with an omitted *tō* or *for tō* expressing purpose. **21. Ō̄n of his kniȝtes.** The well-known story of William's stumbling as he set foot on the land is here omitted entirely. The words of the knight therefore lose point.

Page 206, l. 2. As hē of nō̄ mon. 'As if he took account of no man.' **4. þē ōþer bataile.** The battle of Stamford Bridge, Yorkshire, September 25, 1066, in which Harold had defeated and killed King Harold of Norway. **10. þat upe þē Pō̄pes.** 'That he should rest (*dō*) it upon the judgement (*lōkinge*) of the Pope.' **13. him tāke nō̄ lō̄nd.** 'Give or deliver him no land.' For this sense of *tāke(n)* see the use of *bitāke(n)*. **12. Wę̄r Seint Edward.** Morris suggests 'whether,' and Mätzner 'if' for *wer*. But the meaning is rather 'notwithstanding, although.' **27. mī fader.** Really his ancestor Rollo, first Duke of Normandy, in the early tenth century, or a hundred and fifty years before. **31. Richard.** This was Richard the Fearless, who reigned from 943 to 996. The French king who was taken prisoner was Lewis (Louis) IV.

Page 207, l. 7. hē overcōm. There are numerous references to this story in the chroniclers. See also Uhland's poems on the subject. **31. Wiþ strō̄nge targes.** OE. poems often refer to making a 'war-hedge,' or close protection of overlapping shields before the men. No doubt this custom is intended here.

Page 208, l. 14. nō̄ wille habbe. 'Have no chance (*wille*) of striking (*dūnt*).' **17. al vor noȝt.** A phrase of varying import, 'all in vain, all for nothing.' Here it seems to imply lack of resistance, and so 'easily.'

Page 209, l. 15. gō̄stes. See Freeman's 'Norman Conquest,' III, 11. **19. Seint Calixtes day.** October 14, when Pope Calixtus is supposed to have been martyred in 222. **31. Willam hit sende hire.** This is a mistake. Harold's mother offered a large sum for the body, but William would not give it up and had it privately buried by the sea-shore, so that the grave could not be identified; cf. Ramsey, 'Foundations of England,' II, 35 f.

Page 210, l. 20. **Vor þē mǭre.** This line shows that the writer had no strong feeling either for or against the conditions he mentions. The antipathy of the races had long passed away.

VI. OLD KENTISH SERMONS

These 'Sermons' are found in Laud MS. 471 of the Bodleian Library, Oxford, and were printed by Morris in 'An Old English Miscellany' (EETS., 49), p. 26. They represent Kentish of about 1250, so that they really precede in time the previous selection, but are placed here to bring together the two specimens of Kentish in the book.

But five of these sermons are preserved, all brief and simple in plan. They are translations from the French of Maurice de Sully (d. 1196), the earliest French sermon writer to give up Latin for the vernacular. They all follow the same general plan of text, narrative, exposition, application, as exemplified in the fourth and fifth, here printed.

An outline of Kentish grammar is given by Morris in the Introduction to the volume quoted above, and more completely in the Introduction to 'Ayenbite of Inwit.' The characteristic mark of Middle Kentish is the retention of Old Kentish *e*, *ē* for non-Kentish *y*, *ȳ*; cf. *prēde* (211, 20), *ꝑveles* (211, 23). Besides, Kentish agrees with the non-Wessex dialects of Old English in having *ē* for T. *ē*, WT. *ā*, WS. *ǣ*, and *ē*, *īe* for *i*-mutation of OE. *ēa*, *ēo*, while it is itself peculiar in having *ē* for non-Kentish *ǣ* by *i*-mutation of *ā*. It has also the diphthongs *ȳa* (*īa*) beside *ēa*, for WS. *ēa* or lengthened *ea*, and *au* from OE. *āw*. The special treatise on Kentish of the Middle English period is by Danker, 'Die Laut- und Flexionslehre der mittelkentischen Denkmäler' (1879).

Page 210, l. 24. **godspelle of tōdai.** This is indicated by the Latin rubric, *Dominica quarta post octavam Epiphanie*, and the gospel is Matt. viii. 23 f. Apart from slight lack of verbal agreement with the Vulgate, the last clause is from Mark vi. 48, and no doubt suggests a gospel harmony as the basis.

Page 211, l. 15. **blēþelīche.** This form of the word also appears regularly in 'Ayenbite of Inwit.' As the OE. word is *blīþelīce* not *blȳþelīce*, the first *e* may be short or lengthened from a short *e* which took the place of shortened *i*. 16. **Salus populi.** Hardly a quotation from any one passage of Scripture, certainly not from Christ's words. It may have come from one or more Psalms which were regarded as messianic; cf. Ps. xxxv. 3; and for the last part xviii. 6; l. 15; lxxxvi. 7; cxviii. 5. 24. **wordle.** The prevailing form in Kt., as shown by the next selection. 25. **Quod ipse prestare.** An expression used as a benediction and closing, *qui vivit et regnat Deus per omnia secula seculorum*. But it has various forms. 29. **godespelle.** Lat. rubric, *Dominica in sexagesima*; gospel, Matt. xiii. 24.

Page 214, l. 13. **nǭn man wǭt.** The preacher quotes very freely as before. Reference seems to be to the interpretation of such passages as Matt. xxiv. 36, 42; Luke xii. 19–20. 14. **for man.** A common proverb, cf. 'Ancren Riwle,' p. 338; 'Ayenbite of Inwit' (Morris), p. 129. A poem on long life ('Old Eng. Misc.,' p. 156) begins:

'Mon mai longe lives wene,
Ac ofte him lieð þe wrench.'

VII. 'THE AYENBITE OF INWIT, OR REMORSE OF CONSCIENCE'

This work, in the handwriting of the author, is contained in Arundel MS. 57 of the British Museum. It was edited by Stevenson in 1855 and by Morris for the Early English Text Society (No. 23) in 1866. Extracts appear in Mätzner ('Sprachproben,' I, 60), Morris ('Specimens,' II, 98), Wülker ('Lesebuch,' I, 112). The author gives his name as Dan Michel (Michael) of Northgate (Kent), tells us that he was an Augustine monk of Canterbury, and that he finished the 'Remorse of Conscience' in 1340. His language therefore represents Kentish of the first half of the fourteenth century, about three-quarters of a century later than the preceding selection, and a quarter of a century later than the 'Gloucester Chronicle.'

The work is a translation of 'La Somme des Vices et des Vertus' by Lorens, a Benedictine monk of the later thirteenth century. It treats of the ten commandments, the twelve articles of faith, the seven deadly sins, &c., with occasional illustrative tales, anecdotes, or lives of saints. It is strongly allegorical throughout, but the style is not as pleasing as that of the 'Ancren Riwle,' or as simple as that of the 'Kentish Sermons.' Our selection, 'How to learn to die,' is based on the text of Morris above (p. 70 f.), where it begins the more constructive teaching of the book. Special monographs on the work are by Varnhagen, 'Beiträge zur Erklärung und Textkritik' ('Eng. Stud.,' I, 379; II, 27); by Evers, dissertation with same title (1888); by Konrath, 'Die lateinische Quelle zu Ayenbite' ('Eng. Stud.,' XII, 259).

In Notes to 'Old Kentish Sermons' reference was made to the principal treatises on the Kentish dialect, and to important peculiarities. In the present selection are to be noticed *ēa* (*ȳa, ȳea*) for WS. *ēa* or lengthened *ea*, and *uo* for OE. ME. *ō* (*ǭ*) sometimes; cf. *guodes* = *gōdes* (215, 22); *guo* = *gǭ* (218, 32). Among consonants *z* is regularly written for voiced *s*, clearly indicating the voicing of the latter when initial as well as when medial.

Page 215, l. 18. raþre þanne ssed. The figure is a common one in Scripture; cf. 2 Chron. xxix. 15; Job viii. 9; xiv. 2; Ps. cii. 11; cix. 23.

Page 216, l. 15. þē wȳse Cātōūn. Presumably Dionysius Cato, whose 'Disticha' were so highly regarded in the middle ages. Nothing exactly like this occurs, but for contempt of death see 'Disticha' at I, 22, IV, 22. **21. þrī dȳeaþes.** Another interpretation of the three deaths occurs in 'Old Eng. Homilies,' II, 169. **29. damezēle Bēreblisse.** Explained in the following clause, 'death that crowns and places (*dǭþ*) in bliss all the saints.' For a name made in the same way cf. 161, 6.

Page 218, l. 7. tō þē reward of. 'In respect of or to.' *Reward* has the sense of 'regard,' the cognate word. **19. ase zayþ Salomōn.** Prov. xxiv. 16, which reads in the Vulgate, *Septies enim cadet iustus, et resurget.*

Page 219, l. 2. þēr ne may guo in. Referring to Rev. xxi. 27; cf. l. 32. **15. mǭre stranger.** The double comparative appears thus early.

VIII. TREVISA'S TRANSLATION OF HIGDEN'S 'POLYCHRONICON'

The English 'Polychronicon' of Trevisa is preserved in at least four MSS., St. John's Coll. H I at Cambridge, and Cotton Tiberius D VII, Harleian 1,900, Additional 24,194 of the British Museum. Of these the first was printed by Caxton in 1482. A later version than those above was edited by Babbington for the Rolls Series, and extracts from Trevisa are found in Mätzner ('Sprachproben,' II, 343), Morris ('Specimens,' II, 335), and Wülker ('Lesebuch,' II, 205). Our selection is from Cotton Tiberius D VII, a contemporary MS. in pure Southern. The translator, John Trevisa, was vicar at Berkeley, then canon at Westbury, Gloucestershire. He finished his translation in April 1387, as he tells us. The language is therefore Southern of Gloucestershire in the last half of the fourteenth century.

The 'Polychronicon' was originally written in Latin by Radulphus or Ranulphus Higden of Chester. As the name implies, the work is a sort of history of the world, brought down to the year 1342. This Trevisa translated freely, adding here and there, and extending to 1357. Besides this he is supposed to have translated other works, though these cannot be proved to be his with certainty.

As to language, Trevisa's Southern shows no voicing of initial *f*, *þ*, and *s*, so far as orthography is concerned, but otherwise well represents the dialect. The selection shows *ā* for *hā* (*ha*), beside *hī* (*hȳ*), in the plural of the third personal pronoun; cf. 'Juliana,' p. 191.

Page 220, l. 1. **þē ȝēre of Hēlȳ.** The mediæval historians were fond of such union of sacred and secular history, and it was natural to their annalistic form of historical writing. **7. Vespāsian hys tȳme.** That is 69–79 A.D. **Pictes oūt of Scitia.** This tradition appears in numerous chroniclers back to Bede. That the Picts entered Britain later than the Britons is probably true enough. Cf. 221, 6. **17. In Vespāsian.** Based on Geoffrey of Monmouth, as the footnote shows. This accounts for many statements of which authentic history gives no confirmation. **18. Mārius.** Geoffrey of Monmouth, 'Hist. Brit.,' IV, ch. xvii. Arviragus, his father, is mentioned in ch. xiii f, but neither is known to be historical, though Geoffrey connects them with the Roman emperors, as here. The same may be said of Rodric in the same line. **21. Cathenēsia.** The present Caithness doubtless.

Page 221, l. 4. **Servius.** The commentator on Virgil, who lived in the last of the fourth and beginning of the fifth century, the time of Jerome and Augustine. **5. Agatirsis.** Cf. 'Aeneid,' IV, 146, where occurs *picti Agathyrsi*, giving rise to the comment of Servius. **12. Maximus.** The chronicler has here confused Magnus Clemens Maximus (383–388) with Maximus Tyrannus (408–411), as shown by the references to Gratianus and Valentinianus in l. 14. He has also mistaken the name Tyrannus for a descriptive title. Marius is mentioned, not by Geoffrey but by Gildas. **21. Carausius.** Mentioned by Geoffrey, 'Hist. Brit.,' V, ch. iii. **22. Bassiānus.** Better known as Caracalla. Geoffrey recounts the death of Geta as in battle between the brothers for supremacy in the empire. **28. þwartōver wal.** The wall of Hadrian from Newcastle to Carlisle and the Solway Firth, here called the *Scottysch*, that is,

the Irish sea. So also at 222, 2 and 22. **30. Nynyan.** Bede gives the tradition regarding Ninias or Nynian ('Eccl. Hist.,' III, iv), but his date cannot be definitely fixed. He is said to have died in 432. **32. Brenicia.** Berenicia, founded according to Bede in 547 A.D.

Page 222, l. 4. **Duke Reuda.** In his edition of Bede, Plummer says the northern portion of County Antrim, Ireland, was called Dal Riada, after an ancient leader who is supposed to have died in 165 A.D. Thence the name was transferred to Britain with an Irish colony.

Page 223, l. 2. **Flemmynges.** In 1111 Henry I established a colony of this people in Pembrokeshire, Southwest Wales. **11. þē Dānes.** Reference is doubtless to the massacre on St. Brice's day, 1002; cf. Freeman, 'Norm. Conquest,' I, 182, 312 f, 634 f.

Page 224, l. 7. **drawe somwhat.** An early recognition, perhaps, of words borrowed from the Celts. **26. þys manēre.** This whole paragraph is an addition to his original by Trevisa himself, and is naturally of greatest interest as a contemporary account. **þē fürste moreyn.** The great plague of 1348–9. A second occurred in 1361–2, a third in 1369, and some reckon a fourth in 1375–6. **27. J̄ohan Cōrnwal . . . Richard Pencrych.** Both Cornishmen, as it would seem from their names. It is not improbable that they were both at Oxford, as was Trevisa, for the name Master John Cornwall appears in the records of Merton College, and the names Pencrych (Penkrissh) and Pencrych Hall are also found. The latter was about opposite Nunne Hall, where Cornwall taught. See Stevenson's article on the 'Introduction of English in English Schools' in 'An English Miscellany,' p. 421.

Page 225, l. 1. **of þē secunde Kyng Richard . . . nȳne.** The ninth year of Richard II began June 22, 1385, so that this part must have been written in the last half of that year. **6. disavauntāge.** This shows that Trevisa was not in the least prejudiced against French, when properly added to a knowledge of the mother tongue. Cf. Robert of Gloucester at 210, 19, 20. **11. grēt wonder.** Trevisa was scarcely more in the dark than many a later historian of our language. Of course the changes in spoken English were due to an unconscious variation in different districts, while *þē lōngāge of Normandȳ* —that is French in general—was taught and learned, with some idea of a normal or standard form. Had Trevisa been more widely acquainted with the French as was Chaucer, he would have known that there was some variation as spoken in England and on the continent; cf. what Chaucer says of the Prioress, Prologue to 'Cant. Tales,' 124 f. **28. bycause þat þē kynges.** Just what influence Trevisa supposed the kings to have had is not clear, but the relation of the capital city and the center of government to the development of a standard language is well known.

THE DIALECT OF LONDON

The importance of the language of the capital city to the development of standard English has led to the placing of four selections from London English in this place. A comparison of these will show how the language gradually changed, in most particulars, from Southern to Midland.

I. THE ENGLISH PROCLAMATION OF HENRY III

This proclamation occurs in two MSS., one in the Public Record Office, London, and the other in the Bodleian Library, Oxford. The first of these was published by Rymer (1816), by Ellis in 'Transactions of the Philological Society' (1868), and by Mätzner ('Sprachproben,' II, 54). The second was printed in 'Memorials of Oxford' by J. Ingram (1837), and by Skeat in 'Transactions of the Philological Society' (1880–1). Our text follows the first. As indicated, the 'Proclamation' was issued Oct. 18, 1258, so that we have here the English of some London scribe in the middle of the thirteenth century.

This 'Proclamation' is the earliest in English, after the disuse of the latter in public documents following the Norman Conquest; cf. the author's 'History of the English Language,' ch. v. It was issued to confirm to the people the 'Provisions of Oxford,' a charter of rights which had been wrested from the king. As indicated at the end, a copy was sent to every shire in England and to Ireland. The copy we print indicates Huntingdonshire as its destination, as that of the Bodleian indicates Oxfordshire. The writ was issued in both French and English; cf. the French version in Ellis's edition. For the 'Provisions' themselves, which accompanied this Proclamation, see Stubbs's 'Select Charters'; Adams and Stevens's 'Select Documents of English Constitutional History,' I, 56.

The language of this selection shows the use of the OE. diphthongs *eo*, *ēo*, *ēa*, and the ligatures *æ*, *ǣ*, as in Southern texts of the same period; cf. the 'Ancren Riwle' with the Midland 'Genesis and Exodus.' To these are added the digraph *oa*, probably an early writing of ME. *ǭ* from OE. *ā*. In other respects the language shows a mixture of Southern and Midland, probably characteristic of London English of the time. True Southern forms are those with *ü*, *ǖ* = OE. *ÿ*, *ȳ*, those with the prefix *i* (OE. *ge*), and such verbal forms as *bēoþ*, *habbeð*, *mākīen*; besides these the older inflexional forms, as *þān* (OE. *þām*), *Gode*, *loande*, and the noun plurals in *en*, as *wōrden*. For a fuller consideration of the language of this 'Proclamation' cf. Morsbach, 'Schriftsprache,' p. 161.

Page 226, l. 1. þurȝ Godes fultume. For the OF. *par le grace Deu*, Lat. *dei gratia*. **3. sēnd** = **sēndeð. 4. witen ȝē.** The subjunctive of mild command. **willen and unnen.** Note the present plurals in

en, Ml. forms, and compare the Sth. *bēoþ* (l. 5), *habbeð* (l. 7). **5. ūre rēdesmen.** Reference is made no doubt to the Committee of Twenty-four, twelve elected by the barons and twelve by the king, who had drawn up the 'Provisions' in the Oxford session. **24. Bonefāce.** No special note is necessary on these prominent men of the time. Thirteen sign here, sixteen the corresponding French translation. The same thirteen in the Oxford copy, in the same order, probably indicates, as Skeat emphasized from another circumstance, that all the copies were alike in this respect.

Page 227, l. 8. **And al on.** This part does not occur in the Oxford copy. It suggests that we may have before us the original, on which this note was made for general reference. **9. þēre küneriche.** Note the peculiar use of the feminine form of the pronoun with a noun originally neuter.

II. ADAM DAVY'S DREAMS ABOUT EDWARD II

This text is found in Laud MS. 622 at the Bodleian Library, Oxford, and was edited by Furnivall for the Early English Text Society (69) in 1878. The 'Dreams' were written between 1307 and 1327, probably soon after the accession of the king. Of Adam Davy, the author, little is certainly known beyond what he tells us in his verses; cf. the 'Dict. of Nat. Biography.' The 'Dreams' have no special literary value, but are important as exhibiting the language of the capital city. Their purpose was doubtless to obtain favor of the king. Certainly, that Edward II should be 'emperor in Cristendom' (229, 33) could hardly have been expected long after his troublous reign began.

The change of the language of London from a mixture of Southern and Midland toward pure Midland is very evident in this selection. The notable Sth. characteristics are wanting, as *ü*, *ǖ* for OE. *y*, *ȳ*, though the Sth. open *ē̆* (WS. *ēa*, Merc. *ē̆*) still prevails. Similarly the indicative present plural of verbs ends in the Midland *en*, not Sth. *eþ* (*eth*). Forms with the Sth. prefix *i* (*y*), OE. *ge*, are not numerous. Even at the beginning of the fourteenth century, therefore, the language of London was closely approximating the Midland dialect of Chaucer.

Page 227, l. 15. **Prince of Wāles.** This title, coupled with that of king in the preceding line, shows that the 'Dreams' relate to Edward II, the first to possess the former title and the only one of the Edwards of the fourteenth century to be both prince and king. **20. Seint Edward.** Edward the Confessor, commemorated on Jan. 5, though the title might apply to the second Saxon king of that name.

Page 228, l. 21. **þē decollāciōūn of Seint Jǭn.** The beheading of John is commemorated on Aug. 29. **28. þē fę̄st of alle halewen.** All Saints' day, Nov. 1.

Page 229, l. 21. **þē day of Seint Lucīe.** That is, Dec. 13.

Page 230, l. 5. **worþingniȝht.** This has not been identified, but would seem, from the chronological order followed, to fall between All Saints and Lent. The only analogous compound in OE. is *dægweorþing*, 'celebration, festival,' but this does not assist us unless *worþingniȝht* could be some very important festival as Christmas.

Page 231, l. 2. **in clēne leinte.** Already the old word for spring (OE. *lengten*) has been specialized to the clerical use, as in modern English. **20. þē bēryng of our Lēfdȳ.** The birth of the Virgin Mary, commemorated on Sept. 8. **29. For mē ne worþe.** 'On account of me,' 'nor shall be (shewed) to learned or unlearned.'

III. THE FIRST PETITION TO PARLIAMENT IN ENGLISH

This 'Petition' is preserved in a MS. of the Public Record Office, London. It was printed, quite imperfectly, in 'Rolls of Parliament,' III, 225, and later by Morsbach in 'Neuenglische Schriftsprache,' p. 171. As it bears the date 1386, the language is London English of the last quarter of the fourteenth century. Apart from its linguistic value the 'Petition' is highly interesting as giving us a most vivid conception of municipal politics in early London. The language presents few peculiarities, and these will be readily understood from the previous readings. The sentence structure hardly suggests one accustomed to the pen, and the document may easily have been composed by some clerk of the Mercery.

Page 232, l. 21. **as a membre.** One of the twelve great Livery Companies of the city, and having an important place in the government. **22. wrōnges subtiles.** Note the OF. adjective following the noun and taking the plural form, no doubt a documentary usage rather than one colloquially common at the time. **24. is tō bē tō.** 'Is to be by' or 'belongs to,' as we should say. **25. at ō day.** The Anglo-French text reads: *chescun an le jour de Seint Edward le Roy*, that is, Jan. 5; cf. note on 227, 20.

Page 233, l. 1. **Nicholus Brembre.** A member of the Grocers' Company and chief supporter among the people of Richard II, Brembre became mayor in 1383–4 by forcible means as narrated. In 1386 he secured the election of his accomplice Nicholas Exton (234, 25), and he himself became a councillor of the king. In the next year he was charged with treason and fled to Wales. He was brought back and hanged in London in 1388. **2. Jōhn Northampton.** Also called Comberton. He was leader of the faction supporting Wyclif and itself supported by John of Gaunt. Elected mayor in 1381, for two years he was imprisoned in 1384 by Brembre, but was released in 1387 and fully restored to London citizenship in 1390. **13. her mair.** While the preceding *nō man* is sing., it implies the pl. and accounts for the plural pronoun. **14. of his ordynaunce.** The Anglo-French text reads: *par son assent*, 'of his assent or party,' explaining the passage. **15. grēte quantitee of armūre.** This passage is a wonderful revelation of the political methods sometimes employed at this time in the freest and most powerful city of England. **17. of withinne.** Those of the city, besides the 'straungērs of the contrē.' **27. of whōmsō it wēre.** 'Of whatsoever it might be.' The *whōm* is dat.-acc., the older dat. of the neuter *what*. **28. and it wēre.** 'If it were.' Morsbach adds (*if*) after *and*, but this seems unnecessary as shown by the punctuation.

Page 234, l. 10. **tȳme out of mȳnde.** That *tyme* was omitted by mistake is clear from the Anglo-French text, *del temps dount nulle memoire*

ne court. **11. wolden.** A subject *wē*, which may have been omitted by the scribe, is implied in 'thē Mercerȳe or ōthere craftes' above. Or perhaps the writer intended another construction connected with the clause beginning *as* (l. 8). **17. thē which thyng lȳke tō yōwre.** 'Which (*thē which thyng*) may it please your worthy lordship to be proved or disproved, that truth may show which of the two (*thē whether*) (is correct).' Here and several times the word *lordship* is an abstract, used instead of the plural but implying all the lords in council. **24. for thei.** 'So that (for) they should not be known or continued,' equivalent to 'lest they should be known and continued.' **25. Nicholus Exton.** Made mayor in 1386 by Brembre and his party. As here accused, he is said to have publicly burnt a book of good customs called the 'Jubilee.' This event marks the revival of the party of Northampton in the city. **30. which of us . . . thē Kyng sholde dō hym.** Note the anacoluthon. Brembre made a charge of being false to the king, and then offered immunity to any who would admit the charge, hoping thus to gain a good witness for his case. **32. and if anȳ.** Note the indicative in the condition, perhaps in emphasis of the reality of the case.

Page 235, l. 3. thē mair that nōw is. That is, Exton, mentioned above. **8. thēre men.** 'Where men,' implying also 'because.' **13. bī suggestiōn.** This seems to imply that the offer by Brembre (234, 30) had been accepted by some, who had thus shielded themselves from punishment in other particulars. **16. tō bēn used.** The sense is: 'your lord's command is too great a thing to be used familiarly among or toward simple men, lest they, because of their ignorance in obeying it (*unwȳse tō sāve it*),' &c. **24. brēre or Brembre.** To understand the play upon the name it must be remembered that our word *bramble* had, in both Old and Middle English, a form *brember*. For this period cf. *brember-flour* (Harl. MS. of Chaucer) for *brembel-flour* of the received text. **27. thē which.** 'Which being granted by your lordship'; that is, what is implied in that clause (l. 29). **30. as amōng us.** 'Among ourselves.'

Page 236, l. 2. vittailērs. Brembre's party 'had its strength among the . . . grocers, then dominant, and the fishmongers, whose monopoly it upheld against the claims of the populace.'—'Dict. of Nat. Biog.,' Brembre. 28. **in thē sexte yēre.** That is, in 1384.

IV. CHAUCER'S 'CANTERBURY TALES'

It is needless to give details regarding the Chaucer MSS., or the numerous editions of his works. The extract is from the Ellesmere MS. as reprinted by the Chaucer Society, except for the few changes indicated in the footnotes. Nor is it necessary to say much of place and language, since every detail of this sort is so easily accessible. It will be generally admitted that the 'Pardoner's Tale' represents London English, in the last decade of the fourteenth century, that is, somewhat later than the time of the last selection.

For the originals of the story, so far as known, see the account in Skeat's 'Chaucer,' III, 439 f. For Chaucer's language it is scarcely necessary to give special references, as to Ten Brink's 'Chaucer's Sprache und Verskunst'

(trans. as the 'Language and Metre of Chaucer'), and the numerous introductory treatises giving two or three Tales with grammar, &c.

Page 237, l. 7. **In Flaundres.** The place was perhaps so indicated in the original form of the story which Chaucer used. **18. they tōtȩre.** One of the best illustrative passages is from the 'Parson's Tale': 'For Cristes sake ne swereth nat so sinfully, in dismembringe of Crist by soule, herte, bones, and body. For certes it seemeth that ye thinke that the cursede Jewes ne dismembred nat ynough the preciouse persone of Crist, but ye dismembre him more.'

Page 238, l. 2. **luxurīe is = luxurī 's.** The Scriptural passage (Eph. v. 18) reads in the Vulgate *Nolite inebriari vino, in quo est luxuria.* As the passage is quoted by Innocent III in 'De Contemptu Mundi,' which Chaucer translated, he may have taken it from that source. **6. thē stōrīes.** Reference is to the 'Historia Scholastica' of Petrus Comestor, called 'clerke of the stories' in 'Piers Plowman,' B VII, 73, and 'maister of storyies' by Lydgate. The plural is used because each of several parts of the work is called 'Historia.' The clause then means 'whoso has well perused the stories.' **10. Senek seith ȩȩk.** Tyrwhitt suggested Seneca's Epistles lxxxiii: *Extende in plures dies illum ebrii habitum; numquid furore dubitabis? nunc quoque non est minor, sed brevior?* **14. fallen in a shrewe.** 'Fallen on a shrew or evil person.' **18. Ō original.** The line is metrically complete without *O*, which may have intruded from the preceding lines. **22. Corrupt was.** Cf. the 'Parson's Tale,' § 70: 'This sinne (glottony) corrumped al this world, as is wel shewed in the sinne of Adam and Eve.' **30. Ō glotonȳe.** The original of this (Ecclus. xxxvii. 32) was quoted by Innocent III in 'De Contemptu Mundi.'

Page 239, l. 2. **a belle.** The custom of the time as shown by the direction of Myrc, 'Instructions for Parish Priests,' l. 1,964:

'Make þy clerk before þe ȝynge,
To bere lyȝt and belle rynge.'

4. **That ǫǫn of hem.** MnE. 'one of them' rather than 'the one'; *that* is the old demonstrative with *t* retained before a vowel. Cf. *thē tǭn, thē tōther.* 17. **this pestilence.** This shows that the story is placed in the time of one of the great plagues which swept western Europe, perhaps that of 1348–9, the worst of all. **34. al ǭnes.** The usual expression is *at ǭnes*, or *al at ǭnes.*

Page 240, l. 10. **God yo͞w see.** Cf. 'Cant. Tales' B 156, D 2,169; 'Troilus,' II, 85, *God you save and see.* While the corresponding OE. word seems not to have the meaning of 'protect,' that is found in the case of the corresponding ON. form. **26. Ynde.** Taken as an example of the far distant land. Sometimes Greece is used in the same way. **31. Ne dȩȩth.** As Prof. Kittredge pointed out, the next seven lines are imitated from the first elegy of Maximian; cf. Skeat's 'Chaucer,' v, 287.

Page 241, l. 5. **mȳ cheste.** That in which his worldly belongings were kept; usually found in old times at the foot of the bed in the bed-chamber. 13. **In hǫǫlȳ writ.** Lev. xix. 32; in the Vulgate, *Coram cano capite consurge.* **17. did.** 'Should do'; subj. mode.

Page 242, l. 31. **thē cut.** The shortest, as in a fuller account of a drawing of cuts in the Prologue, 835–845.

Page 244, l. 6. at ōure owene wille. 'According to our own pleasure,' a common idiom. 19. Forwhȳ thē feend. Cf. 'OE. Homilies,' II, 39 (EETS., 53): 'Swa giveð ure Drihten leve þe devle to ben on þe swinisshe men þe ihc er of spec, and on hem to wuniende and hem to drenchende, and of here wit to bringinde and to driven fram unrihtw to oðer, fram eðeliche laste to michele, fram synne to synne, fram ivele to ivele, and et tan ande hem drencheð on shameliche deðe and mid hem to helle ledeð.'

Page 245, l. 5. gǫǫn apaas. The first part of the last word is not the article, as sometimes explained, but *a* = *on*. The expression means go *on foot*, and is thus indicative of the time required for such travel. 29. canōn . . . fen. The work of Avicenna (Ibn-Sina) is called 'Book of the Canon in Medicine,' and one part in the Latin version is named *fen*, from Arabic *fann*.

GLOSSARY

THE Glossary is arranged on a strictly alphabetical basis, except as follows: initially, *þ* (*ð*) occur after *t*, and *ȝ* just before *y*, with which it belongs in its modern development; but medially *þ* (*ð*) are placed after *tg*, and *ȝ* with *g* after *h*, since these positions are most natural to the modern reader. Each word is given in its normal form, rather than in the form in which it happens to occur the first time, as usually done in the so-called glossarial index. But words tending to lose a final element (usually final *e*), even in normal Middle English, are sometimes given in the shorter form. The great diversity of ME. spelling makes frequent cross-reference necessary, and only in case of Orm's forms with extra doubling of consonants has normalizing occasionally been practised; for example, Orm's *annd*, *affter* will be found under *and*, *after*. Orm's forms, owing to their importance, are designated by (O) after them.

The etymology is given so far as the immediate form and language from which the word is derived. To attempt more would have been to increase unwisely the size of the book. Yet when some considerable change in the form of the word has occurred a hint of this is given. Thus OE. nouns (mainly feminines) which have assumed inorganic *e* in the nominative-accusative, under the influence of the oblique cases, are indicated by adding the OE. gender, as *f.*, *m.*, *neut.* So the stem-forms of OE., OF. verbs, when differing from the infinitive, are added to explain ME. forms. In case of all irregular verbs, weak, strong, and minor classes, the OE. present and preterit-singular are given. With strong verbs a number in parentheses indicates the class, according to the numbering of the Grammatical Introduction. An (R) denotes reduplication verbs. See list of irregular verbs at end of Glossary.

Common abbreviations need no explanation, as *sb.*, substantive, *vb.*, verb, *inf.*, infinitive, &c. The following may be explained: *n.*, *g.*, *d.*, *a.*, nominative, genitive, dative, accusative; *ns.*, *ds.*, etc., nom. sg., dative sg.; *wk.*, weak; *wkv.*, *stv.*, *ptprv.*, *anv.*, weak, strong, preterit-present, anomalous verbs, as in the Grammatical Introduction. For other abbreviations, see list at the beginning of the book. All references to the text are to page and line.

The manner of marking quantity has been explained in the Grammatical Introduction. In addition some few diacritics have been added in the Glossary to assist in differentiating certain sounds. Thus *c*=*ch* is marked *č*; *g*=*j* in judge (dʒ), *ǧ*; *g*=*y* initially in stressed syllables, *ġ*; *o* = older *u*, *ȯ*; OF. *u*=*ü*, short and long, *u̇*. Medial or final *e*, when certainly silent, is sometimes marked *ę*.

[1] This list is intended to assist in finding the numerous forms of the strong verbs, and of certain weak verbs which are especially irregular. On this account, not all variant forms of these verbs are given in their alphabetical places in the glossary. The list includes only such irregular verbs as occur in this book and present special difficulties. Compounds must be looked for under the simple verbs. Loss of final *n* or *en*, since it follows general laws already stated, is not always indicated.
